## TUNIS.

(*French Protectorate.*)

*Bey*, Mohamed el Hadi Pacha; *born* 24 June, 1855; *succ.* 11 June, 1902.
*Heir Apparent*, Mohamed Naceur Bey, *b.* 1855.
*French Resident-General*, Stephen Pichon (20 Dec., 1902).

The Regency of Tunis, formerly a tributary dependency of the Ottoman Empire, may now be considered an informally annexed dependency of France, nominally under the dominion of the Bey, but in reality under the control of a French Resident. By treaty, 12 May, 1881, "the occupation is to cease when the French and Tunisian authorities recognize by common accord that the local government is capable of maintaining order." By a convention signed 10 July, 1882, France administers the country and collects the taxes in the name of the Bey, who is granted a civil list of £37,500, and the princes of the Beylical family a sum of £30,000. It is in the north of Africa, situated on the Mediterranean, east of Algeria, between lat. 32° 20′—37° 25′ N. and long. 7° 40′—11° 15′ E. It comprises an area of 44,920 square miles, and has about 1,500,000 inhabitants, of whom (1903) about 70,000 are Europeans.

The chief town, Tunis, is an inland port connected with the sea by a canal; it is the largest and most commercial city of Barbary, with a population estimated at 176,500, of whom 50,000 are Jews and 26,500 Christians (12,000 Italians, 5,000 Maltese, and 8,000 French). It possesses considerable manufactures of silk and woollen stuffs, shawls, carpets, mantles, fez caps, bernouses, also otto of roses and jessamin. The chief exports are grain, oil, wool, esparto grass, and phosphates. N.E. of Tunis is the site of the ancient city of Carthage. There are 258 miles of railway and 1,245 of telegraph.

| | 1904. | 1905. |

## TURKEY (THE OTTOMAN EMPIRE).

*Sultan*, Abdul Hamid II., *b.* 22 September, 1842; *proclaimed* 31 August, 1876.
*Heir Presumptive*, his brother, Mehemmed Reshad Effendi, *born* 3 Nov., 1844.
*Prime Minister* (*Grand Vizier*), Ferid Pasha.
*Foreign Affs.* (*Khardjie-Naziri*), Tevfik Pasha.
*Interior*, Memdouh Pasha.
*Finance*, Zia Bey.
*Justice*, Abdurrahman Pasha.
*Public Instruction*, Hachim Pasha.
*Marine*, Djelal Pasha.
*War*, Riza Pasha.
*Commerce and Public Works*, Zihni Pasha.
*Pious Foundations* (*Evkafs*), Turkhan Pasha.
*President of Council of State*, Said Pasha.

*Mines and Forests*, Selim Pasha Melhamé.
*Police*, Shefik Pasha.

*Turkish Ambassador to France*, Salih Munir Pasha; *Russia*, Husni Pasha; *Germany*, Tewfik Pasha; *Austria-H.*, Mahmoud Nedim Pasha; *Italy*, Mehemed Reshid Bey; *U.S.A.* (*Minister*), Chekib Bey.
*Ambassador in London*, S. Musurus Pasha Vezir, 69 Portland Place, W.
*Councillor of Embassy*, Abdul Hak Hamid Bey.
*1st. Secs.*, Essad Bey; Tueni Bey.
*2nd do.*, Abdul Hak Hussein Bey.
*3rd do.*, R. Danial Bey.
*Naval Attaché*, Mahmoud Bey.
*Imam*, Mehmed Redjai Effendi.
*Consul-General*, Emin Effendi Férédjullah, 4 Broad Street Place, E.C.

The Ottoman Empire comprises an area of about 66,500 square miles in South Eastern Europe, about 680,000 square miles in Asia, and about 399,000 square miles in Africa, containing altogether about 25,000,000 inhabitants. The Sultan is also suzerain of Bulgaria, Bosnia and Herzegovina, Crete, Cyprus, Samos, and Egypt.

I. TURKEY IN EUROPE, formerly very extensive, is now reduced to 66,500 square miles, with a population (1901) of about 6,000,000, including about 700,000 Turks, 1,500,000 Albanians, and 1,300,000 Greeks, Bulgarians, and Wallachians. About 2,500,000 are Mohammedans. European Turkey comprises the vilayets of Constantinople, Adrianople, Salonika, Monastir, Kossova, Scutari, and Janina. The principal towns are Constantinople, the capital (pop. 1,100,000), Salonika (100,000), and Adrianople (80,000). A great part of the surface is covered with mountains of moderate elevation. The principal rivers are the Vardar, the Struma, and the Maritza. The soil is for the most part fertile, but owing to various causes little progress has been made in agriculture. The cultivated products are maize, rice, cotton, barley, millet, sesame and other oil-seeds and tobacco; the natural products are the pine, beech, Valonia oak, oak, lime, and ash, with the

palm, maple, sycamore, walnut, chestnut, carob, box, myrtle, laurel, &c., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum, and fruit trees in Albania. The breeding of sheep is carried on extensively, and wool constitutes an important article of trade. The mineral products are iron in large quantity, lead blended with silver, copper, sulphur, salt, alum, and coal. Its manufactures are almost entirely domestic, such as woollen and cotton stuffs, carpets, shawls, leather, firearms, with dyeing and printing works. About 1,200 miles of railway were open in 1901.

II. TURKEY IN ASIA, the larger of the two divisions, has a total area of 680,000 square miles, and an estimated population of nearly 17,000,000 inhabitants. *Asia Minor* (pop. about 9,400,000) comprises the following vilayets: Broussa, Smyrna, Castamouni, Angora, Konia, Adana, Sivas, Trebizond, the islands of the Archipelago, and the Mutessarifats of Ismid and Bigha; in *Armenia* (pop. about 2,500,000) the vilayets of Erzeroum, Mamouret, Diarbekir, Bitlis and Van; in *Arabia* (pop. about 2,500,000) Mossul, Baghdad, Basra, Hedjaz and Yemen; in *Syria* (pop. about 3,250,000) Aleppo, Zor, Syria and Beyrout, with Jerusalem (*see* p. 609) and Lebanon. The principal towns are Smyrna (200,000), Baghdad (145,000), Damascus (200,000), Aleppo (125,000), and Beyrut (120,000).

In ARABIA the *Turkish Pashalik of Basra* extends N.W. to Ali Garbi on the Tigris and Kalat-al-Daraj on the Euphrates. The higher basins of these rivers form the *Pashalik of Baghdad*, which extends to Syria and Kurdistan. Not far from the city of Baghdad (pop. 180,000) is Kerbela, the most sacred centre of pilgrimage for the Shia (Persian) Mohammedans. The trade of the Shat-el-Arab and its branches is considerable; much of it is carried by the vessels of the (British) Euphrates and Tigris Steam Navigation Company. The foreign trade is mainly done by the British India Steam Navigation Company. The exports from Bussorah and Baghdad in 1904 were valued at £1,306,000, and the imports at £1,261,000. Beyond these deserts are the Turkish provinces of the *Hejaz* and *Yemen*. The *Hejaz* includes the sacred cities of Mecca and Medina, the home of Mohammed, with the port of Jeddah (pop. 40,000), the mainstay of which is the pilgrim traffic. In 1904 the imports were £1,405,000, and the exports £25,000. The trade with India is large and increasing. The Damascus-Mecca railway has reached the Hejaz. In *Yemen* are the towns of Sanaa, Assir, and Taiz. During 1905 Yemen has been the scene of a serious rebellion. Hodeida (pop. 33,000), its chief port, had a total trade of £918,000 in 1904. Rebellion, piracy, cholera, and famine interfered with business. Coffee is the principal export. Jeddah and Hodeida have a considerable trade. The Sinai peninsula belongs politically to Egypt.

In AFRICA, Turkey rules Tripoli and Barka (*see* p. 623).

*Commerce.* — The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil-seeds, valonia, carpets, &c., and are largely derived from the Asiatic provinces. Recently large quantities of wine and of raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank. Since the establishment of the Anatolian railway, by German enterprise, the export of cereals, chiefly malting barley, has largely increased. The British Chamber of Commerce was established at Stamboul, Constantinople, in 1887, with branches at Smyrna and Salonica, and in the North of England (Manchester); *Pres.*, Sir Wm. Whittall; *Sec.*, H. E. Mountain. The commercial marine of Turkey consisted in 1901 of about 180 steamers, 60,000 tons, and 200 sea-going sailing vessels, 50,000 tons.

There are British Post-offices at Constantinople, Salonica, Smyrna, Beyrut, and Baghdad.

The principal domestic exports to the United Kingdom in 1900 were corn, fruit, wool, and mohairs, and the chief domestic imports from the United Kingdom in 1900 were coal, Manchester goods, metals, and woollens.

*Defence* (for Army, *see* p. 632). The Navy consists of 102 steamers, all of an obsolete type (including 18 ironclads), and 25 torpedo boats, with a total peace strength of about 15,000 men.

*Education* (*see* p. 638).

*Finance.*—Sir Edgar Vincent's report of December, 1896, estimates an annual deficit of £1,253,070, but points out certain reforms by which this can be avoided. The total amount of the loans negotiated since the year 1854, and still outstanding, exceeds £100,000,000, and additional debts bring the total to about £125,000,000 (Russian war indemnity outstanding £25,000,000, out of a total of £32,100,000 originally owed; indemnity to Russian subjects £50,000 out of a total of £318,180, and £275,000 due to the Damascus Railway).

A Federal Republic, consisting of 45 partially independent States, 5 organized and 2 unorganized Territories, occupies the central portion of North America, between the Atlantic and Pacific Oceans, in lat. 25°—49° N. and long. 67°—124° 30′ W., and also the territory of Alaska and the island of Hawaii. The area is estimated at 3,622,933 square miles, of which rivers and lakes cover 55,562 square miles, excluding the water area of Alaska and Hawaii. This area includes the vast district of Alaska, in the extreme north-

west of the continent, purchased from Russia 18 October, 1867, comprising 590,884 square miles. About one-third of the country is estimated to be in a state of cultivation. The population of the whole of the States and Territories, according to the Census of 1900, was 76,356,000. In 1890 the Indians on reservation numbered 133,417; off reservation, 115,836 (including 58,806 civilised Indians); Chinese, 107,475; Japanese, 2,039; and Alaska, 32,052 (23,531 Indians). The increase in the ten years, 1880–1890, was 12,466,467, and 1890–1900, 13,018,609, exclusive of certain districts above alluded to.

Its coast-line on both oceans is reckoned to have a length of about 13,200 miles, excluding the numerous bays and sounds, besides 3,620 miles on the great lakes. The principal river is the mighty Mississippi-Missouri, formed by the confluence of these two noble streams, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico; with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance copper, iron, coal, lime, salt and lead, which in Missouri, Colorado, and Idaho appears inexhaustible; there are also rich lead-mines in Illinois and Wisconsin. California produces silver, copper, and lead, and gold in large quantities.

*Finance.*—The financial condition of the United States of America exerts a great influence on that of other nations. The following is a statement of the debt on 1 Oct., 1905 and 1906:—

| | 1905. | 1906. |
|---|---|---|
| 2 % bonds | $542,909,950 | $625,942,350 |
| 3 % bonds | 77,135,360 | 63,945,460 |
| 4 % bonds and certificates | 275,113,370 | 235,271,390 |
| On which interest has ceased | 1,256,405 | 1,126,375 |
| Bearing no interest | 386,986,617 | 399,173,714 |
| Certificates & Treasury notes offset by cash | 1,003,859,969 | 1,067,323,869 |
| Total debt | $2,287,261,671 | $2,392,783,158 |
| Less cash and reserve in Treasury | 1,290,683,662 | 1,438,536,965 |
| Actual indebtedness | $996,578,009 | $954,246,193 |

The total decrease in the debt since 31 August, 1865, when, after deducting the cash in the Treasury, it amounted to $2,756,431,571, to 1 Oct., 1906, has been $1,802,185,378.

*Balance Sheet for Years ending 30 June, 1905 and 1906.*

| RECEIPTS:— | 1905. | 1906. |

Enlisted men, July 1, 1904 (active list), 29,321; commissioned officers (active list), 1,442; warrant officers, &c. (active list), 649.

*Marine Corps:* Commiss. officers, July 1, 1905 (active list), 273; privates and non-com. officers (do.), 6,797.

*Army* (*see* p. 632).

*Education* (*see* p. 638).

*Constitution and Government.*—The government of the United States is, by the Constitution, entrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on a day appointed, and there vote for a President by ballot. The ballots are then sent to Washington, and opened by the President of the Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex-officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, and others, so that the State can never be without a Head or Ruler.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. Two Senators from each State are elected by the Legislature thereof for the term of six years; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 173,901. The Senate consists of 90 members, and the House of Representatives of 357 representatives and territorial delegates.

The supreme judicial authority is vested in a Chief Justice and eight Justices, who are appointed by the President, by and with the advice and consent of the Senate, to hold their offices during good behaviour.

## TRADE WITH UNITED KINGDOM.

The imports from, and domestic exports to, the U.K. are given below for the past ten years (provisional figures for 1905):—

| | Imports. | Dom. Exports. | Total. |
|---|---|---|---|
| 1896 ..... | $169,963,434 | $401,145,205 | $571,108,639 |
| 1897 ..... | 167,947,820 | 478,448,592 | 646,396,412 |
| 1898 ..... | 108,945,185 | 534,398,302 | 643,343,487 |
| 1899 ..... | 118,488,217 | 505,668,925 | 624,157,142 |
| 1900 ..... | 159,582,401 | 527,784,340 | 687,366,741 |
| 1901 ..... | 143,388,501 | 624,216,404 | 767,604,905 |
| 1902 ..... | $165,746,560 | $542,001,128 | $707,747,688 |
| 1903 ..... | 190,021,658 | 516,986,416 | 707,008,074 |
| 1904 ..... | 165,785,368 | 530,849,224 | 696,634,592 |
| 1905 ..... | 175,811,918 | 518,105,398 | 693,917,316 |
| 1906 ..... | 210,029,437 | 578,023,505 | 788,052,942 |

The chief exports to the United Kingdom in 1905 were:—

| | | | |
|---|---|---|---|
| Animals, living | £7,424,350 | Fish | £620,934 |
| Apples | 935,868 | Hardware | 193,957 |
| Bacon | 5,823,392 | Lard | 3,030,837 |
| „ (Hams) | 2,409,993 | Leather | 2,964,777 |

| Boots & Shoes | 441,289 | Oil seed cake | 976,170 |
| Butter | 401,916 | Oleo-margarine | 339,168 |
| Cheese | 4,5,003 | Paper, &c. | 393,942 |
| Coffee | 375,808 | Paraffine | 970,281 |
| Copper, &c. | 2,451,724 | Petroleum | 3,908,567 |
| Corn, wheat | 2,453,527 | Pork | 403,472 |
| „ Barley | 754,000 | Preserved Meat | 1,803,557 |
| „ Oats | 699,978 | Rosin | 485,798 |
| „ Maize | 4,636,676 | Skins and Furs | 971,196 |
| „ Wheatmeal & flour | 2,896,317 | Sugar | 958,580 |
| Cotton, raw | 38,314,379 | Tobacco | 2,888,147 |
| Drugs | 365,873 | Turpentine | 972,693 |
| | | Wood, all kinds | 3,876,734 |

And the chief imports of domestic produce from the United Kingdom in 1905 were:—

| | | | |
|---|---|---|---|
| Beer and Ale | £240,842 | Leather | £336,028 |
| Books | 439,371 | Linens | 3,227,044 |
| Chemical products | 829,568 | Machinery | 762,652 |
| Cotton manfrs. | 3,203,567 | Metals, all kinds | 2,852,422 |
| „ yarn | 406,709 | Rags, &c. | 318,409 |
| Earth & chinaware | | Silk & manufrs. | 205,680 |
| Fish | 395,234 | Skins and furs | 1,019,049 |
| Hides, raw | 213,239 | Wool | 1,206,914 |
| Jute manufrs. | 1,101,604 | Woollens | 1,887,181 |

MERCANTILE MARINE.—On July 1, 1906, it consisted of 25,006 vessels, of which 9,500 were steamers, and 15,506 other than steamers, the total gross tonnage being 6,674,969.

COMMERCE OF THE UNITED STATES.
Merchandise only (provisional figures for 1906).

| 1906 | 1,743,864,500 | 1,226,562,446 | 2,970,426,946 |

The total domestic exports for the last four fiscal years ending June 30 have been: 1903, $1,392,231,302; 1904, $1,435,179,017; 1905, $1,491,744,641; 1906, $1,717,953,382.

RAILWAYS. For the year ending June 30, 1904, the length of single track mileage was 213,904 miles, an increase of 5,927 since 1903. The mileage of tracks of all kinds for which operations were reported (including 212,243 miles of single track) was 297,073, increase 13,252 miles, and the gross earnings $1,975,174,091; the number of railway employees was 1,296,121.

POSTAL.—The number of Post Offices in the United States, June 30, 1904, was 71,131. The postal revenue was $143,582,624. The number of inland money orders issued was 50,712,168, and the amount $383,452,373. Of international money orders the number issued was 1,888,730, value $37,876,265; postal expenditure, $152,362,116.

PRECIOUS METALS.—Approximate distribution by producing States and Territories of the product of gold and silver in the United States for the calendar year 1905 (as estimated by the Director of the Mint):—

| State or Territory. | Gold. | | Silver. | | Total value (Silver at Commercial value($). |

## TERRITORIAL EXPANSION.

In the year 1898 the U.S.A. became involved in war with Spain on account of the unsettled state of affairs in the neighbouring island of Cuba. The result of the war was the freedom of that island from Spanish control and the cession of the Philippine Islands and the Island of Guam, the Island of Puerto Rico, which was captured during the war, being retained; these conditions were confirmed by a Treaty of Peace signed at Paris (10 Dec., 1898). During the year the independent islands of the Hawaiian group were annexed by a resolution of Congress, and in 1899, under the provisions of the Samoan Convention, those islands of the Samoan Archipelago not annexed by Germany fell to the share of the U.S.A.

In a few months, therefore, the U.S.A. assumed the responsibility of a vast over-sea dominion, with between 9,000,000 and 10,000,000 inhabitants.

*Hawaii* is a group of islands in the N. Pacific in lat. 19° to 22° 15′ N., and long. 154° 48′ to 160° 20′ W., with a total area of about 6,600 sq. miles, and a population of about 100,000 (75,000 Hawaiians, 24,000 Japanese). The capital is Honolulu in Oaku, pop. about 30,000.

*The Samoan Islands.*—By the Anglo-German agreement of 14 Nov., 1899, the island of Tutuila and all other islands in the Archipelago east of 171° E. long. were reserved to the U.S.A.

*In the West Indies:* The Island of PUERTO RICO, captured during the war, has an area of about 3,600 square miles, and 953,243 inhabitants; the capital, San Juan, has a population of 32,048, Ponce (27,952) and Mayaguez (15,187) being also towns of importance. The products are sugar, coffee, and tobacco.

*In the East Indies:* The PHILIPPINE ISLANDS have an area of about 115,026 square miles, with a population (1903) of 7,635,426 (civilised, or partly so, 6,987,686; wild and uncivilised 647,740). The capital is Manila, in the island of Luzon (population 219,928), other large towns being Laoag (34,459), Lipa (37,943), Bauan (39,094), Batangas (33,131). The principal products are hemp, sugar, coffee, indigo, and copra, in addition to the tobacco plant, which is extensively grown in the island of Luzon. The total trade in 1903 was $33,811,384 for imports, and $32,396,746 for exports.

*Guam*, the largest island of the Ladrone (or Marianne) group, is situated in 145° E. and 14° N., and has an area of about 224 square miles, with about 10,000 inhabitants. The capital is Agaña.

FEDERAL CAPITAL, Washington (3,850 miles from London). Pop. 1900, including the District of Columbia), 278,718.

New York (pop. 3,437,202), transit, 6 days (now frequently less); Philadelphia (pop. 1,293,697), 6½ days; San Francisco (pop. 342,782), 11 days; Chicago (pop. 1,698,575), 8 days. There are also three cities with over 500,000, four with over 300,000, eight with over 200,000, and thirteen with over 100,000 inhabitants. Distance, New York to Liverpool, about 3,100 miles.

## URUGUAY.

*President*, José Batlle, *born* 1852, *elected* 1 March, 1903, for four years.
*Foreign Affairs*, Dr. José Romeu.
*Interior*, Claudio Williman.
*War*, General Eduardo Vasquez.
*Education & Public Works*, J. Capurro.
*Finance*, José Serrato.

*Minister Plenipotentiary and Envoy Extraordinary*, Daniel Muñoz.
*Secretary of Legation* (*Chargé d'Affaires*), Dr. Alfonso S. de Zumaran, 104 Victoria St., S.W.
*Consul-Gen.*, Carlos Nery.

A Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25'—57° 42' W., containing an area of 72,172 square miles, and an estimated population of 990,158 (1905); was formerly a dependency of Spain. United to the Argentine Confederation early in the present century, it was afterwards annexed by Portugal, and became later a province of Brazil; but through the bravery of the patriotic "thirty-three" it succeeded in throwing off the Brazilian yoke and declared its independence 25 August, 1825. A war in consequence ensuing between Brazil and the Argentine Confederation, both the Powers agreed, through the mediation of Great Britain, to recognise Uruguay as a sovereign and independent State. The imports from the U.K. are numerous, the principal being woollen and cotton goods, hardware, and coals. The chief exports are wool, hides, horn, hair, tallow, and jerked beef. Wheat, barley, and maize are cultivated, but the wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (7,000,000 in 1906) and sheep (20,000,000 in 1906), the wool of which is of excellent quality. Gold mines exist at Cuñapirú. The principal river is the Uruguay and its affluents, of which the Rio Negro is the chief. There are 1,268 miles of railway open (1906), and 4,025 miles of telegraph in 1891.

## VENEZUELA, REPUBLIC OF.

*President*, General Castro, *born* 12 Oct., 1860, assumed office 24 Oct., 1899, became Constitutional President, 23 May, 1905, for six years.
*Foreign Affairs*, Dr. José de J. Paul.
*Interior*, Dr. Julio Torres Cardenas.
*Finance*, Dr. Eduardo Celis.
*War and Marine*, General Manuel Salvador Aranjo.
*Instruction*, Dr. L. Villanueva.
*Public Works*, Juan Casanova.
*Development*, H. J. R. Herrera Irigozen.

*Minister to Great Britain* (vacant).
*Consul-Gen.*, Dr. Carlos Villanueva.
*Vice-Consul*, J. Steineman.
*Consul at Southampton*, Juan Tinoco.

The most northerly Confederation of South America, situated between 1° 40' S. lat. and 12° 26' N. lat. and 59° 52'—73° 15' W. long. It consists of 14 States and 5 territories, covering an area of 566,159 square miles, with a population, in 1891, of 2,323,527. The chief imports are manufactured goods, provisions and wine. The exports are principally to the U.S., France, and Netherlands, the imports coming mainly from the U.K., U.S., Germany, and France.

The prevailing religion of the country is Roman Catholic, there being but few of the Protestant faith. Education is free, and there are State schools for primary instruction, in addition to secondary schools and two universities. The Army consists of about 8,000 men, while service is nominally compulsory in the national militia. Owing to the proximity of British Guiana and the W. Indies, the United Kingdom is perpetually in relation with the Government of Venezuela. The railways opened and under construction have a length of 370 miles.

# Military Systems of the World.

In the 1906 Edition a detailed account was given of the Military System of each of the under-mentioned countries, on pp. 646–652. The following Table shows at a glance the Peace and War Effectives, the Army Expenditure, and the Military System in vogue in the case of each of the Principal Countries of the World.

| Country. | Effectives. | | Army Expenditure 1905–6. | Military System. |
|---|---|---|---|---|
| | Peace. | War. | £ | |
| Argentine | 12,500 | 490,000 | 1,400,000 | Universal compulsory service. |
| Austria-Hungary | 380,000 | 2,676,000 | 11,600,000 | do. |
| Belgium | 49,600 | 175,000 | 2,000,000 | Vol. supplemented by conscription. |
| Bulgaria | 56,500 | ... | 1,700,000 | Universal compulsory service. |
| Chile | 16,000 | 100,000 | 725,000 | do. |
| China | *40,000* | *80,000* | (?) | Non-existent. |
| Denmark | 14,000 | 75,000 | 600,000 | Universal compulsory service. |
| France | 550,000 | 3,340,000 | 27,000,000 | do. |
| German Empire | 600,000 | 4,000,000 | 29,000,000 | do. |
| Greece | 31,000 | 150,000 | 520,000 | do. |
| Italy | 221,000 | 3,330,000 | 7,500,000 | do. |
| Japan | 160,000 | 1,000,000 | 4,000,000 | do. |
| Mexico | 35,500 | 250,000 | 3,000,000 | Vol. supplemented by conscription. |
| Netherlands | 27,000 | 126,000 | 2,260,000 | do. |
| Norway | 27,000 | 80,000 | 900,000 | Universal compulsory service. |
| Peru | 4,200 | ... | ... | do. |
| Portugal | 34,000 | 174,000 | 1,500,000 | do. |
| Rumania | 64,000 | 175,000 | 1,500,000 | do. |
| Russia | 1,100,000 | 4,500,000 | 40,000,000 | do. |
| Servia | 23,000 | 300,000 | 725,000 | do. |
| Spain | 100,000 | 1,800,000 | 5,350,000 | do. |
| Sweden | 46,000 | ... | 3,000,000 | do. |
| Switzerland | *145,000 | *400,000 | 1,050,000 | do. |
| Turkey | ... | 1,000,000 | 5,000,000 | do. |
| United Kingdom | 200,000 | 900,000 | 30,000,000 | Voluntary enlistment. |
| U.S.A. | 64,000 | 180,000 | †25,000,000 | do. |

* Militia. † Exclusive of £28,000,000 for pensions.

THE following summaries present in as brief a form as possible the various educational systems of the countries of the world. It is impossible to draft a similar account for the United Kingdom, as there is no "system" to epitomise.

### Argentine Republic.

*Primary: Secular, comp. and free.* Age 6–14. Control, in the capital and the 10 territories, by the National Educational Council; in the 14 provinces, by the Provincial Govts. Maintenance, by local taxation, with grants from Central Govt. Public expenditure, over $13,000,000, or £1,148,000, on 4,341 elementary schools, whereat average attendance is 379,120, or 45 p.c. of children of school age. Adult illiterates, however, are numerous.

*Secondary:* 35 normal schools, 16 lyceums, controlled by Central Govt. Average attendance, 6,000.

*Special:* 1 mining, 1 agricultural school; 1 naval, 1 military academy.

*Universities: National,* Buenos Aires, Cordoba. *Provincial,* La Plata, Santa Fe, Parana.

### Austria.

*Primary: Comp. and free.* Age 6–12, 13, or 14, according to the province. Control by the 17 Provincial Diets. Some 21,070 elementary schools are maintained by local taxation, State grants being exceptional. At 33 p.c. of above the language used is German, at 25 p.c. Czech, at 26 p.c. other Slav dialects; in a few cases more than one language is used, whilst Magyar, Italian, and Rumanian are also represented. Average attendance, over 3,800,000, or nearly 91 p.c. of school age.

*Secondary:* Inclusive of private intermediate schools, subject to similar control, 222 gymnasia (collegiate schools with an 8-yrs. course) and 118 realschulen (polytechnics with a 7-yrs. course) prepare for the Universities and the several Government technical high schools (8 of engineering, &c., and the Vienna School of Agriculture). The majority are maintained by local taxation, some by the Central Govt. Pupils attaining a prescribed standard qualify for military service as 1-yr. volunteers.

*Special Schools:* 255 commercial, 1,180 industrial, 179 agricultural, &c., in all, 4,418; 48 theological colleges, mainly Roman Catholic.

*Universities: National, State-maintained,* Vienna, Prague (2), Lemberg, Cracow, Graz, Innsbruck, and Czernowitz.

*Budget, Ministry of Worship and Instruction,* 1906: Kr. 87,260,902 (£3,635,871).

### Hungary.

*Primary: Comp. and free.* Infants' schools, age 3–6, in each commune and parish, with, in some cases, a school for nurses. *First grade* age 6–12; repetition courses, age 12–15. *Second grade* (higher primary), course, 3 years for boys, 2 years for girls. *Burgher* (or "*City High*") *schools,* course, 6 years for boys, 4 years for girls. In all, 18,880 primary schools; average attendance 2,655,000, or 77 p.c. of school age. At 58 p.c. the language used is Magyar, at 18 p.c. Magyar with another tongue; Rumanian and other Slav dialects are also represented, whilst at only 2 p.c. is German alone the medium of instruction.

*Secondary:* 175 gymnasia and 42 realgymnasia, or realschulen, prepare for the University and the Budapest Polytechnic; course, 8 years. Such of these as are not State-maintained are State-aided. There are few private intermediate schools.

*Special:* 570 industrial, 65 agricultural, 155 commerc'l', 6 mining, 40 art, &c.; with 49 theological colleges, of which 29 are Roman Catholic.

*Universities: National,* Budapest, Kolozsvar, Zagrab.

*Budget, Ministry of Worship and Instruction,* 1906: Kr. 5,958,000 (£248,291).

### Belgium.

*Primary: Comp. and free.* 2,600 infants and over 7,000 primary schools are maintained by local taxation, aided by both State and provincial grants. In addition there are many private schools, chiefly under ecclesiastical control, and 54 normal primary schools.

*Secondary:* 128 high schools (of which 40 for girls), 35 Royal colleges, and many private institutions (65 boys' and 150 girls' high schools, and 80 colleges).

*Special:* 8 commercial, 72 industrial, 150 technical schools, the Royal Antwerp Academy of Arts, and numerous conservatoires of music.

*Universities: State,* Liège, Ghent. "Free," Louvain, Brussels. (Louvain alone has a faculty of Theology.)

*Public Expenditure on Education for* 1901 exceeded 42,000,000 francs (£1,750,000).

### Brazil.

*Primary: Secular and free,* but *not comp.* in practice. About 84 p.c. of the entire population is illiterate. Control, within the Federal district by the municipality, in the states by joint state and municipal administrations.

*Secondary: Not free.* The National Gymnasium is under Federal control, and the maintenance of similar institutions in the several states is encouraged. All other secondary schools are private.

*Special:* 1 school of mines, 4 of law, 2 of medicine, besides 1 naval and 4 military academies, are maintained by the Federal Govt.

### Bulgaria.

*Primary: Free and nominally comp.* Age 8–12. About 4,600 primary schools, cost of which is borne by the State to the extent of two-thirds, the remainder being defrayed by local taxation. Average attendance, 345,000.

*Secondary:* Besides the Bulgarian, American, Armenian, French, Greek, Turkish, and Jewish schools are maintained. State bears one-half the cost. In all, 163 intermediate schools, 96 technical and various, besides 16 gymnasia.

*Budget, Public Instruction,* 1906: Lev. 10,669,704 (£426,789).

### Chile.

*Primary: Free,* but *not comp.* 1,970 public and 500 private elementary schools. Average attendance, 139,000.

*Secondary:* State lyceums, for both boys and girls. Provincial colleges; 3 normal schools for men, and 3 for women. National Institute at Santiago. Numerous private secondary schools, of which some (under clerical control) have courses similar to the Government establishments.

*Special:* Provincial schools of agriculture, a National Conservatoire of Music, a School of Arts and Crafts, &c.

*Universities:* 1 State, 1 private (law and mathematics only).

*Budget, Public Instruction*, 1905: Pesos (gold) 135,033, (silver) 15,127,012 (£1,144,652).

## China.

There are signs that the educational paralysis of China is about to pass away. Recent events in the Far East have awakened the desire for Western literature and science, and Japanese influence is asserting itself. Persistent missionary efforts, too, are producing an effect. As yet, however, it cannot be said that any definite educational system is in sight, to replace the time-honoured studies of Chinese literature and moral philosophy, with their attendant system of examinations, so often described elsewhere. A degree in those subjects has, until quite recently, been necessary for all public appointments, examinations for that purpose being held twice in three years at each provincial capital. Examinations for the higher degrees were held once in three years, successful candidates being subjected to further tests until their number was reduced to correspond with the vacancies. The issue of an Imperial Edict has been (Oct., 1905) announced, which prescribes that for the future officials will be selected from amongst those who have received a modern education, and insists upon the desirability of despatching students abroad, especially to Great Britain and the U.S.A. This decided step is due, it is said, to the representations of the enlightened Yuan Shi Kai, who has done so much to modernise the Chinese military system. Mission schools are especially numerous in the coast towns, Roman Catholic predominating. At Pekin the so-called "Foreign College" teaches European languages and science, besides giving a Chinese education. Provincial and other colleges, special and technical schools, are rapidly increasing in numbers, and many Chinese students are finding their way abroad, notably to Japan. In the naval and military schools, too, foreign instructors are necessarily employed.

## Denmark.

*Primary: Comp. and free.* Age 7–14. Some 3,000 elementary schools are maintained by local taxation. Average attendance, 330,000.

*Secondary:* 14 State and 17 private Latin schools. 72 private high schools (State-aided).

*Special:* 99 technical and commercial institutes, 1 polytechnic, 1 Royal Academy of Arts, 1 veterinary and agricultural college, 12 schools of horticulture (State-aided).

*University*, Copenhagen, founded 1479, admits women.

*Budget, Ministry of Worship and Instruction*, 1906: Kr. 8,751,455 (£486,192).

## Egypt.

The Government system of schools consists of primary schools, in which from the earliest years a European language is taught, secondary schools, in which the bulk of the instruction is given through the medium of a European language, and professional colleges (law, medicine, engineering, and teaching), equipped and conducted on European models, in addition to a few special schools (agriculture, veterinary, technical, police cadets, and military cadets), whose courses are more or less in a European language, but are based upon attainments of a lower standard than those of the professional colleges. The system dates back to 1836, and owes its origin to the Europeanising zeal of Mohammed Ali Pasha, the first Viceroy.

In 1906 90 p.c. of the pupils in the schools and colleges under the Ministry of Education were being instructed in English, as compared with only 3 p.c. in French.

Until 1874 the schools were free, and the majority of the pupils were fed, clothed, boarded and maintained at the cost of the State. Since 1874 a more or less sustained effort has been made to establish the fee system in connection with the European system of education. In 1906 92 p.c. of the pupils in the schools of this class under the Ministry of Education were fee-paying, as compared with 30 p.c. in 1881, whilst the revenue from school fees has risen from £E.2,323 in 1881 to £E.107,000 (estimated) in 1906.

These increased resources have enabled the Ministry to extend its control to a number of indigenous schools, called "kuttabs," which have existed from time immemorial (10,000 in 1898, attended by some 200,000 scholars). In 1897 the Ministry of Education endeavoured to bring these "kuttabs" voluntarily under Departmental supervision by means of a simple system of inspection and reward. In 1906 there were 4,432 private "kuttabs" under inspection for grant-in-aid, with an attendance of 147,321 boys and 11,131 girls.

Considerable public support has been given to the movement, and during the last few years over 1,000 "kuttabs" under inspection have been newly established or rebuilt by private benevolence. To improve the teaching staff, the Ministry of Education has instituted weekly holiday classes for teachers at 30 centres, and has recently created 3 normal schools for male teachers in "kuttabs," and one for female teachers. The Ministry of Education also has some 119 "kuttabs," mostly derelict trust schools, under its direct management. The expenditure of the Ministry of Education on elementary vernacular education has grown from £E.3,000 in 1898 to an estimated expenditure of £E.61,38 in 1907.

On December 31, 1905, there were under Government 8 professional colleges, 4 special and technical schools, 3 secondary schools, and 3 primary schools, at which instruction was wholly or partly in a European language, with 748 staff and 10,312 pupils (378 female).

There were also 7 special and technical and 109 primary schools, where instruction was in the vernacular, with 252 staff and 8,350 pupils (1,902 female).

These figures do not include 13 private primary schools and 4,432 private "kuttabs," under the inspection of the Ministry of Education.

In addition to the Government schools, there are numerous primary schools and a few secondary schools belonging to various Protestant and Catholic missions and Moslem and Coptic benevolent societies. Most of these follow the Government syllabus and present candidates for the primary and secondary leaving certificates. The Mosque of Al-Azhar in Cairo has 317 teachers and 9,758 students, and the Mosque of El Ahmadi at Tanta has 70 teachers and 5,0 students.

### The Anglo-Egyptian Sudan.

An educational system is being developed. Elementary (native) schools number 13, higher schools 4, and others are being opened.

*Secondary:* The Gordon Memorial College at Khartum is well equipped, and gives both literary and technical education.

### France.

The educational system is highly developed. The Central Administration comprises: (*a*) The Minister of Public Instruction; (*b*) the Superior Educational Council, charged with the administration of the system; (*c*) the Consultative Committee, whose duties are solely advisory; (*d*) The Educational Bureaux, with their inspection staffs, the heads of which report direct to the Minister. The local administration is twofold, comprising: (*a*) The 17 *académies* (territorial districts), each with its inspection staff, the chief of which recommends teachers to the local council; (*b*) the Departmental Council, presided over by the Préfet, and charged with the management, maintenance, and inspection of the primary schools within its jurisdiction. Teachers are paid direct by the State, save in towns of over 150,000 inhabitants. The anti-clerical policy of the Government has resulted in the closing of many private schools under clerical control, but about one-half of those thus suppressed have been re-opened under lay management. The result, however, is a considerable diminution in the number of teaching establishments. It should be noted that for statistical purposes Algeria is included in French reports and returns.

*Primary Education* (male, female and mixed) is *secular, comp. and free.* Age 6-13. Schools are classified as: I. Infants (écoles maternelles), numbering, in 1904, some 2,570 (125 clerical); 2,050 private (about half clerical) with an average attendance of nearly 680,000. II. Primary and Higher Primary. Over 82,000 in same year, of which 68,000 were public and 14,000 private, with an attendance of over 5,500,000 (exclusive of those attending continuation courses). Adult primary courses attracted 620,000 (two-thirds male), whilst many private and philanthropic societies assist, occasionally with aid from local taxation. Primary certificates are granted on completion of the course. The expenditure of public money on primary education exceeds 238,000,000 frs. (£9,500,000), of which the State Budget contributes 175,000,000 frs. (£7,000,000).

*Secondary Education* (male). Recently re-organised in four distinct courses, 1 purely classical, 1 purely modern, and 2 combining classics with science and modern languages. Schools are classified as (1) public lycées, numbering 110 in 1904; (2) communal colleges, 228; (3) private (lay) establishments, 196; (4) private (clerical) establishments, 345; (5) ecclesiastical seminaries, about 140. The degree of Bachelor is conferred after completion of the 7-yrs. course. Secondary education for females is given in (1) public lycées, 42; (2) communal colleges, 30; (3) extension courses, 69; (4) municipal high schools (free); (5) private (lay and clerical) schools and courses.

*Special Schools*, both public and private, are very numerous, some being under the control of a Minister other than the Minister of Public Instruction. Amongst them are:—

*Under the Minister of Public Instruction:* The Collège de France (advanced literature, mathematics, languages, political economy, &c.); the Ecole Pratique des Hautes Etudes (higher mathematics, science, history, philology, religion, &c.); the Conservatoire of Music and Elocution; the School of Oriental Languages; the Louvre School of Art and Archæology, &c. *Under the Minister of Commerce:* The Conservatoire of Arts and Crafts; the Commercial College; some dozen commercial high schools. *Under the Minister of Agriculture:* Several veterinary and agricultural institutes. *Under the Minister of Public Works:* The Parisian School of Mines; the Ecole des ponts et chaussées, &c. *Under the Minister for the Colonies:* The St. Etienne School of Mines; the Colonial College, &c. *Under the Minister of Marine:* The Brest Naval Academy. *Under the Minister for War:* The Ecole Superieure de Guerre (Staff College); the Ecole Polytechnique; the Saumur Cavalry School; the St. Cyr Cadet College, &c.

*Higher Education*, generally, is given in State Universities and private faculties, the former alone being empowered to grant degrees. The several faculties are: *Paris*—*Law, Sc., Lit.*, Med., Protestant Theology; *Aix*—Law; *Algiers*—Law, Sc., Lit.; *Angers*—*Law, Sc., Lit.*; *Besançon*—Sc., Lit.; *Bordeaux*—Law, Med., Sc., Lit.; *Caen*—Law, Sc., Lit.; *Clermont*—Sc., Lit.; *Dijon*—Law, Sc., Lit.; *Grenoble*—Law, Sc., Lit.; *Lille*—*Law, Med., Sc., Pharmacy, Lit., Theology*; *Lyon*—*Law*, Med., *Sc., Lit., Theology*; *Marseilles*—*Law*, Sc., Lit.: *Montauban*—Prot. Theology; *Montpelier*—Law, Med., Sc., Lit.; *Nancy*—Law, Med., Sc., Lit.; *Nantes*—*Law*; *Poitiers*—Law, Sc., Lit.; *Rennes*—Law, Sc., Lit.; *Toulouse*—Law, Med., *Sc., Lit., Theology.*

(Italics indicate that the faculty is *free.*)

*Budget, Public Instruction*, 1906: Frs. 251,040,956 (£995,097).

### Germany.

The German educ. system is remarkable for the ease with which it accommodates itself to all possible requirements of every social class, and is, moreover, practically homogeneous in all its branches throughout the Empire.

The Prussian administration may be cited as typical, and is briefly as follows:—The Minister of Public Instruction controls all educ. establishments, public and private. The provincial school boards are directly charged with the management of secondary and normal schools and the curricula therein, also the selection and appointment of teachers. The town and other local councils administer the elementary schools within their jurisdiction.

*Primary: Comp. and free.* Age 6-14. 59,350 public and 643 private schools. Average attendance, nearly 9,000,000. Public expenditure, 419,000,000 marks (over £20,000,000), of which the Central Govt. contributed about 120,000,000 marks, or £6,000,000.

*Secondary:* Evening continuation classes for children of working folk. City intermediate schools. 468 gymnasia, some of which are State-maintained, prepare for the University and the learned professions, with a 9-yrs. course. (The standard to qualify for military service as a 1-yr. volunteer is that for advancement from the lower to the upper second class of a State gymnasium). 100 progymnasia are similar, but lack the higher class of the gymnasia; 122 real-gymnasia confine classical instruction to Latin; 48 realprogymnasia bear the same relation to the

above that the progymnasia bear to the gymnasia; 64 oberrealschulen and 265 realschulen make a special feature of modern languages; 185 lehrer-seminarien and 33 fachschulen supply specialised instruction. In addition, there are some 55 private secondary schools, some of which are empowered to grant certificates qualifying pupils for service as 1-yr. volunteers. The secondary educ. of girls is provided for by girls' high schools (Töchterschulen), both public and private.

*Special Schools* for agriculture, commerce, industries, &c., are very numerous throughout the Empire. There are 15 schools of mining, 15 of architecture, 20 for naval engineering, and a very large number of special trade schools. Then there are 9 technical high schools, granting degrees, at Aix, Berlin, Brunswick, Darmstadt, Dresden, Hanover, Karlsruhe, Munich, and Stuttgart, the courses comprising chemistry, metallurgy, engineering, &c.; 9 institutes of forestry, and several brewing academies.

*Universities:* 21 Universities are State-maintained and State-administered, viz.: Berlin, Bonn, Breslau, Erlangen, *Freiburg*, Giessen, Göttingen, Greifswald, Halle, Heidelberg, Jena, Kiel, Leipzig, Marburg, *München*, *Münster*, Rostock, Strassburg, Tübingen, and *Würtzburg*.

(Italics indicate that the faculty of theology is Roman Catholic; Bonn, Breslau, and Tübingen comprise both Protestant and Roman Catholic, the remainder being Protestant.)

The naval and military establishments include the Kiel Naval Academy and School, the military academies of Berlin and Munich, besides several cadet and other schools, and the Technical Military Academy at Berlin.

### Greece.

*Primary: Free*, but *comp.* is not generally enforced. Age 5–12. 3,263 schools are maintained by local taxation, with State grants. Average attendance, over 200,000.

*Secondary:* 285 public high schools, 16 private high schools, 39 State gymnasia, 8 private gymnasia. 10 normal schools for men, 3 for women.

*Special:* 1 commercial, 2 agricultural, 2 industrial schools, industrial academy (Athens), 1 ecclesiastical seminary, 1 polytechnic.

*University:* Athens (founded A.D. 1836), with faculties of law, medicine, philosophy, chemistry, and theology; about 30 p.c. of the students are foreign, Turkish subjects predominating.

### Italy.

A great impulse to educ. has been given by the law of July, 1904, previous to which it was estimated that 49 per cent. of the population over 20 years of age was illiterate.

*Primary: Secular, comp. and free.* Lower grade, age 6–9; higher, age 9–12. Elementary schools, maintained by local taxation, with occasional State grants, comprise over 3,300 infants', 53,250 public, and 8,500 private primary schools. Average attendance, about 3,000,000. In addition, there are evening classes and continuation courses.

*Secondary:* 157 lyceums and 277 gymnasia (State-aided) supply a classical educ. In addition, there are over 700 private schools. 295 technical schools and 72 institutes (also State-aided) give secondary technical instruction.

*Special Schools* comprise 19 mercantile marine, 2 mining, 255 industrial and commercial, 13 Government art schools and 13 private art schools, 34 of agriculture, 5 Government schools of music and 52 private schools of music. The majority of these, if not State-maintained, are State-aided.

*Universities:* The following are *free*:—Perugia (founded A.D. 1276), Urbino, Camerino, and Ferrara. The following are *State Universities*:—Bologna (A.D. 1200), Cagliari, Catania, Genoa (A.D. 1243), Macerata (A.D. 1290), Messina, Modena, Naples (A.D. 1224), Padua (A.D. 1222), Palermo, Parma, Pavia, Pisa, Rome (A.D. 1303), Sassari, Siena (A.D. 1300), and Turin. Many of these enjoy ancient revenues.

*Budget, Public Instruction*, 1906: Lire 61,400,629 (£2,433,636).

### Japan.

*Primary: Lower grade comp. and free.* Age 6–10. 264 kindergarten, over 20,000 elementary schools. Average attendance, over 5,000,000, or 80 p.c. of school age. Of these, some 54 p.c. complete the *Higher grade* course (age 10–14), for which a small monthly fee of 30–60 sen (7*d.*–1*s.* 2*d.*) is demanded. Local charges amount to nearly £3,000,000.

*Secondary:* Schools comprise 270 public intermediate (State-aided), with a uniform curriculum throughout the Empire and a 5-yrs. course. 34 private do. 8 high schools (State-maintained) prepare for the Universities with a 3-yrs. course, largely devoted to the study of foreign languages (in which, owing to the lack of vernacular textbooks, many of the higher branches of education are necessarily pursued). For girls, there are 84 public and 8 private high schools; course, 4–5 years, with extensions of 2–3 years for special subjects. Sixty-four normal schools are either locally maintained in connection with primary, or State-maintained in connection with secondary and high schools.

*Special Schools* comprise 5 of medicine, 1 of languages, 1 of art, 1 academy of music, and numerous industrial, commercial, and technical institutes.

*Universities: State*, Tokio (law, medicine, science, literature, agriculture, and engineering); Kyoto (law, medicine, science, literature, and engineering).

The principal naval and military establishments are: The Naval Cadets' College at Yetajima, the Imperial Naval Academy at Tokio, the (Army) War School, and the several Central and Provincial Cadet Colleges.

*Budget, Public Instruction*, 1906: Yen 4,704,300 (£480,231 approx.).

### Mexico.

Large numbers of the partially civilised native Indian races and many half-castes are entirely illiterate. These forming about 80 p.c. of the total population, the number of illiterates is estimated at nearly 10,000,000, but a yearly improvement is noticeable.

*Primary: Free and nominally comp.* 9,310 schools are maintained by local taxation, with grants from Central Govt. Average attendance, 485,000. In addition, some 2,300 schools are maintained by private associations, mostly under clerical control. Average attendance, 120,000.

*Secondary:* 49 higher schools (12 girls'), and 20 normal colleges (Federal or State).

*Special:* In all, some 65 institutions for commerce, engineering, mining, medicine, law, art, &c.

*Public expenditure*, over $6,000,000 (£1,320,000), of which rather more than half is contributed by the Federal Budget.

**Netherlands.**

*Primary: Comp.*, age 7–13, but private establishments (State-aided) are encouraged rather than public, though the latter are maintained by local authorities (with State subsidies) wherever private institutions are lacking. 1,112 infants' schools (968 private) and 4,796 elementary (1,580 private). Average attendance, over 810,000, or about 95 p.c. of school age.

*Secondary:* 83 intermediate, 29 higher classical, 196 adult (working class), also normal schools, &c.

*Special Schools* comprise numerous institutes of commerce, agriculture, horticulture, art, &c., and a Royal Conservatoire of Music at Amsterdam.

*Universities:* Amsterdam, Groningen, Leiden, and Utrecht, besides a small private university.

*Budget, Public Instructim*, 1906: State Budget, Gl. 1.143,750; Communal Budget, Gl. 1,240,833 (total, £198,716).

**Norway.**

*Primary: Comp. and free.* Age 6½ or 7–14. 8,700 schools and classes locally maintained, with State aid to the extent of 25 p.c. of total outlay.

*Secondary:* 14 (State), 49 (local), and 27 private high schools; 6 public and 4 private normal schools.

*Special:* 52 industrial and technical institutes. (A complete and practical reformatory system is State-aided.)

*University:* Christiania.

*Budget, Public Instruction and Worship*, 1906–7: Kr. 7,680,000.

**Peru.**

*Primary: Free and nominally comp.* 1,870 schools are locally maintained. Average attendance, 77,000, or about 20 p.c. of school age.

*Secondary:* Govt. high schools in the capitals of the 18 departments, small fees charged, also a few private schools under European direction.

*Special:* School of mines and engineering, (Lima), and Agricultural College.

*University:* St. Marks (Lima).

**Portugal.**

*Primary: Free and nominally comp.*, but over 70 p.c. of the population is illiterate. 4,500 public and 1,000 private elementary schools. Average attendance, 200,000. 175 adults' elementary schools.

*Secondary:* A State lyceum in each of the 21 districts, including Madeira and the Azores, and 3 other similar establishments. Girls' high school at Lisbon. Most other secondary schools are private.

*Special:* 4 technical institutes, 2 commercial colleges, a polytechnic, and schools of medicine, agriculture, art, literature, music, &c., all located in Lisbon or Oporto. 1 naval and 1 military academy.

*University:* Coimbra (founded A.D. 1290).

*Public expenditure:* 1,500,000 milrs. (£331,000).

**Rumania.**

*Primary: Free and nominally comp.*, but the number of schools (about 4,100) is quite inadequate, and 70 p.c. of the total population is illiterate. Average attendance, 300,000, or 35 p.c. of school age.

*Secondary:* 107 high schools (75 boys').

*Special:* A few schools of agriculture, engineering, industries, &c.

*Universities:* Bucharest and Jassy.

**Russia.**

One result of the present upheaval in Russia will almost certainly be a betterment of the present unsatisfactory state of educational affairs.

Hitherto, educ. of the masses has been regarded, probably correctly, as tending directly towards subversion of the existing political system, and in consequence all initiative has been not merely discouraged but suppressed. Anything beyond the narrowest form of classical educ. has been regarded with suspicion.

Probably not 7 p.c. of the total population have received an educ. of any kind.

*Primary:* Some 40,000 schools are maintained under the control of the Minister of Public Instruction, at a cost of about 12 million roubles (£1,500,000). Over 42,000 are nominally maintained by the Holy Synod, the governing body of the Orthodox Catholic Church, which receives a large proportion of the annual sum allotted to educ. in the Central Govt. Budget. About 2,000 schools are controlled by other associations, mostly ecclesiastical.

In many cases both equipment and curriculum leave much to be desired—indeed, a large number of schools are said to exist only on paper—whilst the qualifications of the teachers, especially in the remoter districts, are often more than dubious, quite uneducated persons being engaged by the priests.

There are very few private schools, but illiterate army recruits are at least taught to read and write in their regiments.

Average attendance at primary schools is perhaps 4,500,000.

*Secondary:* Some 240 gymnasia and progymnasia for males and 435 for females, 145 real-schools and technical institutes (nearly all of recent date), with about 70 normal schools, are controlled by the Minister for Public Instruction. In addition, the several Cossack *voiskos* maintain 119 gymnasia and progymnasia, of which 31 are for females.

*Special Schools* are comparatively few, comprising some 53 commercial, 70 industrial, &c., controlled by the Minister of Finance, besides 19 schools of agriculture, 5 of law, 1 of forestry, 2 of mining, 5 of medicine, &c.

A private Imperial Cabinet administers the various institutions founded by the Empress Maria (mother of the Tsar Nicholas I.) and called by her name.

The Holy Synod maintains, besides ecclesiastical seminaries, normal and high schools for girls.

There are Armenian, Jewish, and Mahommedan educational institutions in the districts where these nationalities predominate.

*Universities:* Kazan, Kiev, Kharkov, Moscow, Odessa, St. Petersburg, Tomsk, Yuriev, Warsaw, and Helsingfors (Finland, *q.v.*).

*Finland.*

As compared with that of Russia, the educational system is in every way superior.

*Primary:* Over 2,100 schools. Average attendance, 120,000.

*Secondary:* 51 lyceums (24 State-maintained), 38 girls' high schools, 23 real-schools, 8 normal colleges, &c.

*Special:* 59 industrial and technical, 9 com-

mercial, 24 agricultural schools, 1 polytechnic, several navigation, horticultural, and dairy-farming schools.

*University:* Helsingfors (admits women).

### Servia.

*Primary: Free and nominally comp.*, but only about 20 p.c. of school age attend. 1,120 schools (average attendance, 110,000) maintained by local taxation, with State subsidies.

*Secondary:* 5 gymnasia, 6 progymnasia, 2 girls high schools, 2 normal colleges (State-maintained).

*Special:* 1 commercial, 1 horticultural, 1 agricultural school.

*University:* Belgrade (admits women).

*Public expenditure:* Din. 5,207,000 (£208,000).

### Siam.

In the capital much is done for education by British initiative.

*Primary:* 80 schools, of which 4 for girls; 1 purely English school.

*Secondary:* 9 schools, and 1 purely English school; 2 normal colleges.

*Special:* 1 medical, 1 civil service, 1 law school, besides the naval and military academies, police schools, &c.

In the interior, instruction is mainly in the hands of the Buddhist religious orders.

### Spain.

Education is largely in the hands of the religious orders, but recent legislation provides for more stringent Government control.

*Primary: Free and nominally comp.*, but as yet far from being so in practice. 25,340 public and 6,150 private schools, maintained for the most part by local taxation.

*Secondary:* 27 provincial high schools, in which, however, the curriculum is defective.

*Special:* Several schools of agriculture, art, engineering, &c., are State-maintained.

*Universities:* Barcelona, Granada, Madrid, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

*Budget, Public Instruction*, 1905: Pes. 45 million (£1,800,000).

### Sweden.

The educational system is highly developed, and an illiterate Swede rare.

*Primary: Comp. and free.* 12,630 schools maintained by local taxation, with State aid to the extent of 25 p.c. of total outlay. Average attendance, 750,000. Public exp., over Kr. 24 million (£1,335,000).

*Secondary:* 82 high schools, 31 high schools for working classes, 14 normal schools.

*Special:* 8 industrial and technical institutes, 10 navigation schools, besides medical, veterinary and agricultural schools.

*Universities:* Lund and Upsala, besides several private faculties.

*Budget, Public Instruction and Worship*, 1905: Kr. 17,119,229 (£951,000).

### Switzerland.

Although there exists no Federal or central administration, the system leaves little to be desired, and works admirably in the hands of the cantonal and communal authorities, a close connection being maintained between public instruction and military service. There is a compulsory school course (age 16–20) of gymnastics, physical development, and musketry, as a preparation for army service.

*Primary: Comp. and free*, the school age and the measure of enforcement varying in the different cantons, the Roman Catholic never having applied compulsion in the thorough manner characteristic of the Protestant. 800 infants' and 4,700 elementary schools. Average attendance, 520,000.

*Secondary:* 580 high schools, 83 middle schools, 36 normal schools (of which some are private).

*Special:* 298 technical schools (mostly State-aided), 72 commercial colleges of various grades; the Zurich Polytechnic, and several schools of agriculture, horticulture, dairy-farming, &c. (State-aided). Over 200 girls' schools make a special feature of domestic economy.

*Universities:* Basle, Berne, Fribourg, Geneva, Lausanne, Zurich; to which may be added the Neuchâtel Academy.

*Public expenditure:* State, 25,000,000 frs.; local, 27,000,000 frs.; total, 52,000,000 frs. (£2,135,000).

### Turkey.

*Primary educ.* takes the form of instruction given by the Mahommedan priesthood attached to the principal mosques. It is nominally comp. (age 6–10 for girls, 6–11 for boys), but owing to the dubious qualifications of the teachers its efficiency is not great. There are a few intermediate schools, in which modern languages (especially French) and sciences are taught in an elementary manner. The University of Constantinople is of recent foundation (1900), the subjects studied being law, medicine, mathematics, philosophy, and Mahommedan theology. A considerable number of Turkish subjects attend the University of Athens. The various recognised non-Mahommedan religious orders maintain some few establishments of their own (*e.g.*, a Greek school, a theological college, &c.).

### United States of America.

The system of public instruction extends from the kindergarten and elementary schools to the State colleges and universities. Control is vested in the State and local (county, township, and municipal) authorities, there being no Central (Federal) Educational Department other than the Bureau of the Educational Commission charged with the duty of "collecting statistics and diffusing information as to organisation and management." The degree of authority possessed by the chief educational officers differs in the several States, their powers being in some cases plenary, in others merely advisory.

*In 30 States, 1 Territory, and in Columbia educ. is comp.*, but the laws are not invariably enforced. *In 15 States there is no compulsion*, though the machinery is fully maintained. The census of 1900 showed 10·7 p.c. of the total pop. as illiterate, a figure that would stand at under 5 p.c. were it not for the fact that, whilst over 44 p.c. of the coloured pop. is uneducated, there is a constant influx of illiterate immigrants. Statistics as to the *number* of schools of primary and secondary grades are not readily available, but it is said that no home is beyond reach of a school, whilst in some cases pupils are conveyed to and fro at the public expense. These schools are supported mainly by local taxation, the Federal subsidies being for the most part indirect. The primary age is 8–14 yrs.

*Public elementary schools* comprise 8 grades of primary and grammar schools, with near

15,400,000 pupils. There are 1,500 public kindergartens in 15 States, great reliance being placed upon the kindergarten system as a preliminary.

*Evening schools* in the principal towns offer continuation classes to over 229,000 pupils.

*Public secondary establishments* include high schools and academies, numbering some 6,800; they enrol over 590,000 students (4-yrs. course). 173 *public normal schools* mustered 49,400 pupils.

There are reformatories, and Government and "public" schools for Indians; 43 *technical institutes*, granting scientific degrees; 630 *colleges for women*; and public institutions for the educ. of the blind, deaf, and mentally afflicted.

Powerful aid is afforded by private and philanthropic initiative, there being over 3,000 private kindergartens, private elementary schools with over 1,100,000 pupils, private high schools with 169,000, private normal schools with 15,700, commercial schools with 137,000, besides many orphan and other asylums, schools of art, music, &c.

The special or professional schools comprise 153 institutes of theology, 99 of law, 146 of medicine, 61 of pharmacy, 54 of dentistry, 11 of veterinary science, whilst no less than 552 institutions are devoted to the training of nurses.

Passing to the 464 "colleges and universities," it may be noted that the American "college" has no exact counterpart in Europe, its curriculum corresponding somewhat to that of the upper classes of a German gymnasium, or of the higher forms of a British public school. The term "university" is rather misleading, being applied to a large number of establishments of very varying efficiency and status. The institutions at which a university training (as understood in England) is given are: California, *The Catholic University of America*, Chicago, *Clark*, Columbia, Cornell, Harvard, The John Hopkins, Michigan, Pennsylvania, Princeton, Stanford, Wisconsin, and Yale.

All the above, with the exception of those given in italics, are also "colleges."

A salient and characteristic feature of the American system is *co-education of the sexes* throughout, there being comparatively few institutions where the tuition is not *dual*.

## The League of the Empire.

*President*: THE RIGHT HON. LORD TENNYSON, G.C.M.G.
*Hon. Sec.*, Mrs. ORD MARSHALL, Caxton Hall, Victoria Street, Westminster, S.W.
*Hon. Treas.*, Sir Charles Lyall, K.C.S.I.

THE League of the Empire was founded in 1901. Its work is entirely non-political and non-sectarian. Its objects are to further the friendly and educational union of schools and other institutions of the Empire, to bring knowledge of the conditions of the different parts of the Empire within reach of all at the smallest expense and trouble, and to promote co-operation between the different countries for their mutual service.

Schemes for reciprocal education between the schools of the Empire were submitted by the League in February 1903 to the Colonial Governments, through the Agents-General, and later by means of a despatch issued by the Colonial Office. They have received the approval of the Administrative Authorities in all countries of the Empire. Schools of all grades are now affiliated to schools in other countries for valuable mutual work and intercourse.

The League has a Federal Council of Representative members in all parts of the Empire which includes His Excellency the Governor-General of Canada with other Colonial Governors, Colonial Secretaries, and Directors of Education. The President of the Society is Lord Tennyson; amongst the Vice-Presidents and Members of Committees are the Agents-General, the Earl of Meath, the Head Master of Eton College, Dr. S. H. Butcher, M.P., Sir F. Pollock, Sir H. Craik, Professor Bury, the Principal of Trinity College, Oxford, Dr. Mahaffy, Principal Gregory Foster, Principal Reichel, Professor Ray Lankester, the Director of the Dublin Museum, Sir John Bramston, Sir Philip Hutchins, Sir Charles Lyall.

The League holds now a recognised position educationally, having obtained the co-operation of the Education Departments in all countries of the Empire, to a number of which it is the recognised Official Agent in all parts of the world. The work of the Society is sometimes conducted directly through the Education Offices, sometimes by Agents appointed by the Authorities for the purpose, and also by Branch Committees in the different Colonies, States, and Provinces. The work of the League permeates into the smallest Colonies, and the Individual Correspondence Branch of the Society numbers now over 6,000. Through its affiliated schools it already probably influences over 400,000 children. In South Africa the Society has forty local branches and two executive committees. In Adelaide it has over 2,000 members.

The League has a large staff of practised lecturers. During the last three years lectures have been given both in schools and public halls throughout the United Kingdom. Courses of weekly public lectures on the different Colonies have also been given in the Caxton Hall, Westminster. Two courses of popularly written lectures on the "History of the British Empire," and also on the "Great Men of the Empire," fully illustrated by lantern slides, are published by Mr. John Murray, and are on sale or hire at the office of the League.

The education work of the League is directed by committees of experts. The History Section of the League (Chairman, Professor Bury) has undertaken the issue of a graded series of Imperial Text-Books in co-operation with committees and representatives appointed by the Education Departments throughout the Empire. For this scheme a gift of £5,000 has been made the League.

An Exhibition of the "Schools of the Empire" has been held lately in the Crystal Palace, the schools exhibiting ranging from Eton College to the smallest primary school. Time-tables and photographs presented by the different Colonies are now filed in the Society's rooms for reference by teachers and others interested. Other sections for exhibition have been furnished to the Superintendent of Education for British Columbia and to schools in different parts of the Empire. The Reciprocal Education work originated by the League has intellectual as well as material value, the most isolated school being able to obtain comparison with school-work in other countries, and members much knowledge that is useful for their future life.

# Regulations respecting Passports, 1906.

1. APPLICATIONS for Foreign Office Passports must be made in the form printed on the back of the Regulations issued by the Foreign Office, and enclosed in a cover addressed to "The Passport Department, Foreign Office, London, S.W."

2. The charge for a Passport, whatever number of persons may be named in it, is 2*s*. Passports are issued at the Foreign Office between the hours of 11 and 4 on the day following that on which the application for the Passport has been received, except on Sundays and Public Holidays, when the Passport Office is closed. If the applicant does not reside in London, the Passport may be sent by post, and a Postal Order for 2*s*. should in that case accompany the application. *Postage stamps will not be received in payment.*

3. Foreign Office Passports are granted only (1) to natural-born British subjects, *viz.*, persons born within His Majesty's dominions, and to persons born abroad who derive British nationality from a father or paternal grandfather born within His Majesty's dominions, and who, under the provisions of the Acts 4 George II., cap. 21, and 13 George III., cap. 21, are to be adjudged and taken to be natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

4. Passports are granted to such persons as are known to the Secretary of State, or recommended to him by some person who is known to him, or (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations, verified by a Declaration made by any *Banking Firm* established in the United Kingdom, or by any Mayor, Magistrate, Barrister-at-law, Justice of the Peace, Minister of Religion, Physician, Surgeon, Solicitor or Notary, resident in the United Kingdom; the applicant's Certificate of Birth may also be required, especially when his name is of foreign origin; (2) in the case of children under the age of 14 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a form (B), to be obtained upon application to the Foreign Office; (3) in the case of persons naturalised in any of the British Colonies upon production of a letter of recommendation from the Colonial Office; and in the case of natives of British India, and persons naturalised therein, upon production of a letter of recommendation from the India Office.

5. If the applicant for a Passport be a NATURALISED BRITISH SUBJECT, his certificate of naturalisation must be forwarded to the Foreign Office with the Declaration or letter of recommendation. Naturalised British subjects, if resident in London or in the suburbs, must apply *personally* for their Passports at the Foreign Office; if resident in the country, the Passport will be sent, and the Certificate of Naturalisation returned, to the person who may have verified the declaration, in order that he may cause the applicant to sign the Passport in his presence. Naturalised British subjects will be described as such in their Passports, which will be issued subject to the necessary qualifications.

6. Foreign Office Passports may be renewed at the Foreign Office on personal application, or, if the applicant does not reside in London, on the receipt of a letter signed by him, returning the Passport previously issued to him, and enclosing a Postal Order for 2*s*.

7. A Passport cannot be issued by the Foreign Office, or by an Agent at an outport, on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate.

8. The bearer of every Passport granted by the Foreign Office *must* sign his Passport as soon as he receives it; without such signature either the *visa* may be refused or the validity of the Passport questioned abroad.

9. Travellers who intend to visit the Russian Empire, the Turkish Dominions, the Kingdom of Roumania, Persia, Venezuela, Hayti, or Eritrea in the course of their travels, must not leave the United Kingdom without having had their Passports *visés* either at the Russian Consulate-General, 17 Great Winchester Street, E.C.; the Consulate-General of the Sublime Porte, 4 Broad Street Place, E.C.; the Roumanian Consulate-General, 65 London Wall, E.C.; the Persian Consulate-General, 122 Victoria Street, S.W.; the Venezuelan Consulate, Finsbury Pavement House, E.C.; the Haytian Consulate, 32 Fenchurch Street, E.C.; or the Italian Consulate-General (for Eritrea), 44 Finsbury Square, E.C., respectively, or at one of the other Consulates of Russia, Turkey, Roumania, Persia, Venezuela, Hayti, or Italy in the United Kingdom. Travellers about to proceed to any other country need not obtain the *visa* of the Diplomatic or Consular Agents of such country, except as an additional precaution, *which is recommended in the case of Passports of old date.*

10. Although travellers are now permitted to enter most Foreign Countries without Passports, and the rules respecting Passports have been generally relaxed, nevertheless British subjects travelling abroad are recommended to furnish themselves with Passports, for even in those countries where they are no longer obligatory, they are found to be useful as affording a ready means of identification in case of need. British subjects intending to *reside* in Germany or in Switzerland should provide themselves with Passports.

N.B.—A statement of the requirements of Foreign Countries with regard to Passports may be obtained upon application to "The Passport Department, Foreign Office, London, S.W."

# Geographical Progress and Territorial Changes, 1906.

A REVIEW of geographical progress can no longer be restricted to a consideration of exploratory work, and it will be desirable, after speaking of this, to touch upon researches which contribute in other ways to an improved knowledge of the Earth.

## Exploration and Survey.

*Polar Regions.*—The most striking achievements of the year have to do, as has so often been the case before, with the Polar Regions. Almost at the moment of going to press, news has been received of the safe return of the American explorer Peary, who has beaten all records by pushing north, over the icy sea north of Greenland, to 87° 6′, or only a little over 200 miles from the Pole. But full details are not yet to hand. The letters from Capt. Roald Amundsen, which reached this country in November, 1905, describing the work of his expedition during two seasons spent in the neighbourhood of the North Magnetic Pole, were quickly followed by the news that the enterprising traveller had virtually accomplished the North-west passage by reaching the mouth of the Mackenzie in his diminutive vessel the *Gjöa*. Having advanced thus far, the ship was caught by an unusually early approach of winter, and forced to remain until the break up of the ice in 1906. This seems to have taken place much later than usual, and it was only in September that news arrived that the *Gjöa* and her crew had reached Cape Nome, in Alaska, thus completing the passage, which had been accomplished before by no one ship. During the voyage every opportunity was taken of adding to our knowledge of these icy regions, and in particular the east coast of Victoria land was examined by Lieut. Hansen up to 72° 10′ N.

Two other travellers have reached this region in 1906, with the hope of throwing some light on the almost unknown area of the Beaufort Sea, north of the mouth of the Mackenzie. The first in the field was Mr. A. H. Harrison, who went overland to the mouth of the river, carrying out some surveys between the Red and Peel tributaries, and reaching Herschel Island in February. He found it impossible to obtain natives to go north, but paid a visit to Banks land, whither he hopes to return in 1907. The second expedition (that of Mr. E. Mikkelsen, a Dane, supported by funds contributed in this country and America) has secured a small vessel for exploring purposes, and is accompanied by several trained observers. Many difficulties have been encountered, owing to the unfavourable season, which so delayed the ship in its voyage eastward from Bering Strait that Point Barrow had not been passed on August 18, and the leader had little hope of reaching the proposed winter quarters in the western part of the Arctic Archipelago before being frozen in. His plan is, however, to stay out for two or three years, if necessary; and we may hope for some light on the question of the existence of land in the hitherto untraversed ocean to the north, besides valuable observations on various branches of science. A second Danish expedition has started for the east coast of Greenland, another part of the Arctic regions about which fuller information is much needed. It is led by Mr. Mylius Erichsen, who has already done work in West Greenland, and who hopes to trace the hitherto unvisited part of the east coast between Cape Bismarck and Independence Bay, besides making an effort to push on to the Pole, and possibly crossing to the West Greenland coast over the inland ice. A venturesome attempt on the Pole has been planned by the American, Mr. W. Wellman, who has had an airship specially built for the purpose, but, after reaching his base in Spitsbergen last summer, decided to postpone the start until 1907.

An international conference met at Brussels in September with a view to forming an association for the encouragement of Polar research and the co-ordination of the scientific work done by expeditions to the Polar regions. It is yet too soon to form an idea as to the outcome of this organisation. Some of its most active supporters are well-known Antarctic explorers, and of these Dr. Charcot (France), Dr. Nordenskjöld (Sweden), and M. Arctowski (Belgium) are already proposing to return to the far South; while M. Bénard, another French *savant*, hopes to organise a simultaneous expedition to the Arctic regions.

*Asia.*—The most important expedition that has returned from Central Asia during 1906 is that of the American travellers Mr. Barrett and Prof. Huntington, who, after skirting the whole length of the Takla Makan desert and examining the rivers which descend towards it from the mountains to the south, made a wide circuit to the east and north of Lob Nor, securing important observations on the past physical history of the region. Several explorers have set out for this or neighbouring parts of the continent, including Dr. M. A. Stein, who has made his way from Peshawar through the northern borderlands of Afghanistan to Kashgar, and is pushing on through the imperfectly known region of the Nanshan highlands towards China. Besides archæological investigation which is his own special subject, he hopes to add to our knowledge of the geography of the regions traversed. The indefatigable Swedish explorer Dr. Sven Hedin has undertaken a new expedition to Tibet, which he has entered by way of Leh, in Ladakh, after crossing the whole length of Persia in the outward journey. In that country he reports having made many valuable geographical observations. Both a French and a German archæological expedition are at work in Chinese Turkestan, the former under M. Pelliot, the latter under Dr. von Lecoq. An enterprising journey through the borderlands between China, Burma, and Assam has been made by an English engineer, Mr. E. C. Young, who, starting from Tongking, made his way to Tali-fu by the line of the French Yunnan railway, and then struck west towards Sadiya in Assam, crossing the least-known portion of the upper basin of the Irawadi.

In China itself a German geologist, Dr. Tafel, has examined the middle and upper Hwang-ho basin in various journeys, and has entered Tibet from the north-east, though previously forced to beat a retreat owing to an attack by Tibetan robbers. Surveys continue to be made in Northern China by British officers under the direction of Col. Wingate, and the results will be to greatly add to the accuracy of our maps. In Central China some interesting observations on the basin of the Poyang Lake, made by Mr.

Consul Clennell during the voyage of a British gunboat, were published as a Parliamentary Paper in December, 1905. British officers have done good work in several parts of Western Asia, the geography of Seistan, in Eastern Persia, having been described in an instructive paper before the R.G.S. by Sir H. McMahon, the commissioner for the delimitation of the Perso-Afghan frontier; while Major Sykes has also returned from his post in Khorasan, and given interesting accounts of the districts visited by him and their historical associations. Col. Maunsell, who for many years has travelled extensively in Kurdistan and neighbouring regions, has prepared a valuable map of a large part of Eastern Turkey in Asia.

*Africa.*—Recent exploring work in this continent has not, as a whole, been of a nature to attract popular attention. A party of naturalists sent out by the British Museum has visited the snowy range of Ruwenzori and climbed some of its peaks, one of its members, Mr. A. F. R. Wollaston, being a member of the Alpine Club. A minor peak had previously been ascended by Herr Grauer (an Austrian) and Messrs. Maddox and Tegart, of the Church Missionary Society. The Duke of the Abruzzi, well known for his ascent of Mount St. Elias, and for his Arctic expedition, which still holds the record of "Farthest North," has likewise visited the range with a large and well-equipped expedition, and has succeeded in climbing all its chief snowy peaks and in accurately determining their altitude, though the results are not yet generally known. The expedition of Lieut. Boyd Alexander and Capt. Gosling, which began its operations in Nigeria some three years ago, has made its way across the north-eastern part of the Congo State to the vicinity of the Upper Nile, though it has cost the life of Capt. Gosling, the second European to succumb during the course of the expedition. One of the results of the journey was the observation, in its natural haunts, of that recluse animal the okapi, and the acquisition of a complete specimen. In the southern parts of the Congo State a German ethnologist, Dr. Frobenius, has traversed the region first traversed a quarter of a century ago by his compatriots Pogge and Wissmann, and has improved our knowledge of its geography as well as of the native races.

In North Africa French scientific explorers continue to do good work. M. Chudeau, a geologist who was with Prof. Gautier during the first part of the journey carried out by him in 1905, has, like the latter, completed the crossing of the desert by the route to Zinder and Lake Chad, making valuable geological observations and collections. M. Gautier has given a detailed account of his own journey, which has enabled us to look at the past history of the Central Sahara, both physical and human, from several new points of view. One of the most energetic of the French political officers in this region, Col. Laperrine, has made another of his "raids" to the south, and has reached Taodeni, in the desert north of Timbuktu. Another journey across the Sahara, by a more easterly route, has been undertaken by Mr. Hans Vischer, a British official in northern Nigeria, though of Swiss parentage. He set out from Tripoli on July 9, but has since had a hostile encounter with the Tuareg. He hopes to explore the Tibesti highlands, one of the least known areas in the whole of Africa. A serviceable basis for the mapping of Nigeria has been supplied by telegraphic determinations of longitude carried out by Captains Ommanney and Evans. A number of important centres have been fixed in longitude with reference to Lagos, the longitude of which had already been fixed by telegraph from Cape Town.

*America.*—As in Africa, one of the events of the year has been the first ascent of a great mountain peak, in this case the culminating point of the whole of North America. Dr. F. A. Cook, well known for the part which he took in the Belgian Antarctic Expedition, who had previously made the complete circuit of Mount McKinley in Alaska (20,464 feet), returned to the attack in 1906, and this time effected the conquest of the mountain. A full account of the ascent has not yet been received, but the feat is in any case a notable one by reason of the wild and inhospitable nature of the northern region in which the mountain lies. Among the items of geographical work constantly being done by the Canadian Geological Survey, one of the most important in 1906 has been the survey of the little-known region between the Yukon and Mackenzie Rivers, including the course of the Peel River, a tributary of the latter, which was laid down by Mr. Camsell. The interior of Newfoundland, still imperfectly known in spite of its nearness to civilisation, has lately attracted the attention of more than one traveller, and a journey made in 1905 by Messrs. J. G. Millais and J. McGaw in the upper basin of the Gander River has been described by the former in the *Geographical Journal*.

No very striking journey of exploration has been made in South America or in Australia in 1906. The principal work undertaken for the enlargement of our knowledge of the Oceans is the magnetic survey of the Pacific, begun under the direction of the Carnegie Institute, and the voyage of the German surveying ship *Planet* to the Western Pacific by way of the Cape, Colombo and Batavia.

## Physical Geography.

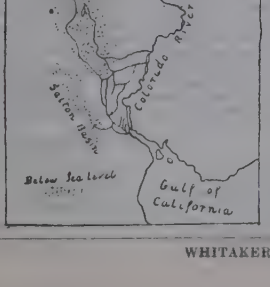
Many questions of importance relating to the constitution and physical history of the Earth continue to receive attention. That of the condition of the interior mass, below the insignificant surface-layer of which it is possible to obtain experimental knowledge, is likely to be a long a subject of debate, but certain directions in which light may be thrown on it have lately been indicated. Thus the accurate records of earthquake shocks now available have shown, according to Mr. R. D. Oldham, that the waves propagated through the interior are such as to indicate that a central core exists, of which the properties differ from those of the bulk of the surrounding mass, though it is premature to express an opinion as to their character. The study of seismic phenomena has received an impetus from the great earthquakes which have shaken the western side of the American Continent with unusually disastrous results, the cities of San Francisco and Valparaiso having been virtually destroyed, the former on April 18, the latter on August 16. Another destructive earthquake had occurred on the Coast of Colombia on January 31. Some new views regarding the origin of earthquakes have been suggested within the last few years by Major E. G. Harboe, of Copenhagen, but it has not yet been possible to pronounce a definite verdict upon them. The great eruption of Vesuvius in April, 1906, was

likewise very destructive of life and property. The attendant phenomena were carefully studied by various scientists, including Dr. Tempest Anderson, Dr. Johnston Lavis, Dr. Matteucci (Director of the Vesuvius Observatory), Dr. Sabatini, and others. A result has been that the pointed profile of the mountain has disappeared, the explosions having scattered the materials which made the summit and lowered the height by some 300 feet. Many other changes in the surface features also took place. A feature of the eruption which was specially noticed was the occurrence of avalanches of hot ashes, presenting the appearance of incandescent clouds.

The study of the oscillation of land levels continues to make progress. From an examination of the ledges or platforms, which are a noticeable feature of the Southern Coast of Cape Colony, Mr. E. H. L. Schwarz has deduced the history of such movements in that part of the world and compared them with those indicated in other regions. He is prepared to believe that vertical movements amounting to many thousands of feet have taken place within comparatively recent geological times, and considers that South Africa has nearly reached the highest point of such oscillatory motion. The effects of former glaciation have been studied in the Andes by Dr. R. Hauthal, who found that while in the ice age there had been a much greater extension of glaciers in the Cordillera of Bolivia and Peru, the climatic variations now prevailing had then also held good.

A change of climate, which comes nearer home to us at the present day, is that which seems to have taken place over a great part of Central Asia (and probably other parts of the world as well), and to which special attention was devoted by Prof. Huntington during the journey already alluded to. He believes that all the more arid part of Asia, from the Caspian eastward for over 2,500 miles, has been subject to a change whereby it has been growing less and less habitable for the last two or three thousand years, and that even the forces now in operation in this direction might be sufficient to account for the great migrations of the Dark Ages.

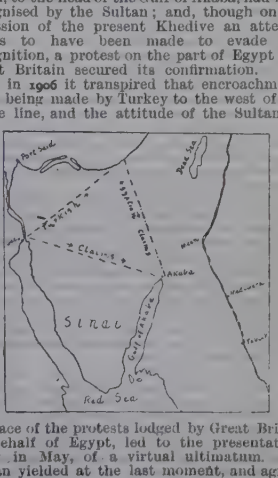
Mention may here be made of a somewhat remarkable, though possibly only temporary, modification of previously existing geography, caused by the irruption of the lower Colorado River, through newly opened irrigation channels, into the depressed Salton basin (see sketch-map), which evidently once formed the continuation of the Gulf of California, but has in recent times been for the most part a salt desert. A lake some hundreds of square miles in extent has thus been formed. Should the river continue to send water in this direction, it is possible that an appreciable modification of the climate of this area might result.



Lastly, the vexed question of the origin of mountain lakes has received some elucidation at the hands of Prof. Garwood, who has shown that in the case of certain tarns of the Canton Ticino, solution seems to have been the most important agent in the formation of the basins, there being nothing to indicate that ice played any real part in producing them.

### Political and Economic.

Of boundary questions, that which has attracted most attention from the threatening position it at one time assumed, has to do with the delimitation of the respective territories of Egypt and Turkey in the region of the Sinai peninsula. During the greater part of last century the rights of Egypt over the whole peninsula up to a line from Rafeh, near El Arish, to the head of the Gulf of Akaba, had been recognised by the Sultan; and, though on the accession of the present Khedive an attempt seems to have been made to evade this recognition, a protest on the part of Egypt and Great Britain secured its confirmation. But early in 1906 it transpired that encroachments were being made by Turkey to the west of the above line, and the attitude of the Sultan, in



the face of the protests lodged by Great Britain on behalf of Egypt, led to the presentation, early in May, of a virtual ultimatum. The Sultan yielded at the last moment, and agreed to the appointment of a mixed commission to lay down the line on the spot in accordance with the British claims. The accompanying sketch shows the line claimed by Turkey as well as that finally accepted. Difficulties which once threatened to arise between France and Turkey have been avoided through the Sultan's abandonment of a projected expedition to the Janet oasis, and acquiescence in the occupation by France of that of Bilma. Another important question, which had long been pending between Great Britain and the Congo State, was settled by an agreement signed on May 9, by which the lease of the Bahr Ghazal territory to the Congo State, which was arranged for in 1894, but never carried out, was definitely annulled, except as

regards the territory known as the Lado enclave, transport facilities by way of the Nile being conceded to the Congo State in return. The question of the frontier further South, in the neighbourhood of the Ruwenzori range, is not touched by this agreement. In West Africa the boundaries of Nigeria, with the French territory to the north and the German on the south, have been laid down in detail by representatives of the Powers concerned meeting in London. France secures a slight extension of territory near Zinder, but in their broad features the boundaries conform to previous arrangements. An international agreement which has settled a controversy of long standing is that between Great Britain, France, and Italy, arrived at in London in July, according to which the three Powers pledge themselves to maintain the *status quo* in Abyssinia—with commercial equality for all nations. The railway from Jibuti to the capital will remain French, but a British and an Italian representative will be added to the Board of Management, on the understanding that no competing line is made from the coast. Italy, however, may, with the consent of the Negus, make a line parallel to the coast to connect Eritrea with her possessions in Somaliland.

Territorial re-arrangements, not of an international character, have taken place in the Niger region, where the old colony of Lagos has been united with Southern Nigeria to form a single colony under the latter name; and in French Congo, where a re-adjustment of limits has been made between the "circonscriptions" of the Gabun and the Middle Congo, while the other two divisions, those of Ubangi-Shari and the Chad territories, are united administratively into a single "Colony."

The convention between Great Britain and Tibet, negotiated by Sir F. Younghusband in 1904, has been confirmed by a treaty with China signed at Peking on April 27, 1906, by which Great Britain engages not to annex Tibetan territory or to interfere in the administration of the country, while China agrees not to permit any other State to do so. Great Britain is, however, permitted to connect the trade marts specified in the 1904 convention with India by telegraph. The long outstanding difficulty with regard to French and British claims in the New Hebrides group in the Pacific seems at last in a fair way to be overcome, a provisional arrangement having been signed in London on February 26 providing judicial and administrative machinery for the group. It is said to have since received the approval of all parties concerned. In another part of the Australasian region the British flag was hoisted on the Ashmore Islands, an insignificant group between Timor and Australia, towards the end of 1905. In South America the boundary between Brazil and Dutch Guiana has been definitely fixed by treaty (May 8, 1906) as following the watershed of the Tumuc Humac range from the headwaters of the Maroni to those of the Corentyn. Lastly, a treaty between Great Britain and Nicaragua, signed April 19, 1905, but not finally ratified until August, 1906, recognises the incorporation in the Republic of the Mosquito territory formerly under the protection of Great Britain, while securing to the natives valuable privileges.

Among the items of progress in the matter of highways of communication, the most important is perhaps the formal opening of the Simplon Tunnel on May 30, 1906. The subsidiary schemes for the fuller utilisation of the new route continue to be subjects of discussion. In Asia, progress has been made with the Turkish railway from Damascus towards the Hejaz, which has reached a point south of the head of the Gulf of Akaba, and already possesses a considerable strategic importance. It was no doubt an underlying consideration in the aggressive action of Turkey with respect to the Sinai peninsula. One of the many projects for the opening of China by railways, to which the consent of China has been secured within recent years, attained completion by the opening of the Shanghai-Nanking Railway on July 18, 1906. Another line (that from Peking to Hankow) had been completed in November, 1905. As regards the long-talked-of utilisation for purposes of trade of the sea route to Siberia, the large expedition despatched to the Yenesei by the Russian Government in 1905 seems to have met with a certain degree of success.

In Africa the most important event has been the opening by Lord Cromer, on January 27, of the line connecting the Nile near Berber with a new port on the Red Sea near Suakin, which has been named Port Sudan. The easy access to the Sudan thus secured for the first time should do much to promote the development of that region. On the Upper Congo, the line intended to provide communication past the Stanley Falls has been completed. Railway construction is proceeding, though not with great rapidity, in various parts of West Africa, and in Nigeria especially surveys have been made and schemes set on foot for an important system of lines.

### Literature.

Not many geographical works of the first rank have appeared in 1906. The following, however, deserve mention:—Professor J. W. Gregory's "Dead Heart of Australia," the account of an expedition to the region of Lake Eyre, with discussions of its past physical history, its inhabitants and their traditions; Capt. H. G. Lyons' "Physiography of the Nile and its Basin," the most complete treatise yet written on the hydrography of the famous river; Sir Harry Johnston's "Liberia," one of the profusely illustrated monographs on African territories to which we have become accustomed from his pen; "The Voyage of the *Scotia*," by three members of the Scottish Antarctic Expedition; and Mr. C. A. Sherring's "Western Tibet and the British Borderlands," the account of the work of a British political agent to the North of the Western Himalayas. The third and concluding volume of Mr. C. R. Beazley's monumental work on "The Dawn of Modern Geography" is, at the time of writing, about to appear almost immediately.

Edward Heawood.

# London Dramatic Summary, 1905–1906.

**Adelphi.** — *Nov.* 25, 1905 — A MIDSUMMER NIGHT'S DREAM revived, with a cast including Mr. Oscar Asche and Mesdames Lily Brayton and Elizabeth Parkina.—*March* 20—MEASURE FOR MEASURE revived. Chief parts played by Messrs. Oscar Asche, Walter Hampden, Harcourt Williams, Chas. Rock, Mesdames Lily Brayton and Frances Dillon.—*May* 15.—A new play by Mrs. Henry de la Pasture, entitled THE LONELY MILLIONAIRES, produced, with a cast including Miss Lily Brayton, Lottie Venne and Oscar Asche. —*June* 2—THE TAMING OF THE SHREW revived, with Mr. Oscar Asche and Miss Lily Brayton in the chief parts.—*Sept.* 4—A new poetical drama by Comyns Carr, entitled TRISTRAM AND ISEULT, produced, with a cast including Messrs. Matheson Lang and Oscar Asche and Mesdames Edith Wynne Matthison and Lily Brayton.—*Oct.* 23—A new poetical drama by Rudolf Besier, entitled THE VIRGIN GODDESS, produced, with Mr. Oscar Asche and Mesdames Genevieve Ward and Lily Brayton in the cast.

**Aldwych.**—*Dec.* 23, 1905—This theatre was opened with a revival of BLUEBELL, in which Miss Ellaline Terriss and Mr. Seymour Hicks appeared.—*March* 19—A new musical play by Seymour Hicks and Cosmo Hamilton, with lyrics by Chas. H. Taylor and music by Robert Haines, entitled THE BEAUTY OF BATH, produced, with Mr. Seymour Hicks and Miss Ellaline Terriss in the chief parts.

**Apollo.** — *Nov.* 14 — A new musical play written and composed by Mr. Paul Reubens, entitled MR. POPPLE, produced, with Mr. G. P. Huntley and Miss Ethel Irving in the chief parts.—*April* 14—A new musical play, entitled THE DAIRYMAIDS, by A. M. Thompson and Robert Courtneidge, with lyrics by Paul Reubens and Arthur Wimperis and music by Paul Reubens and Frank S. Tours, produced, with Mr. Walter Passmore, Mesdames Agnes Fraser, Gracie Leigh, Florence Smithson, and Carrie Moore in the chief parts.

**Comedy.**—*Nov.* 21—A farce, entitled THE MOUNTAIN CLIMBER, adapted from the German of Curt Kraatz by Cosmo Hamilton, produced, with Mr. Huntley Wright in the chief part. He was supported by Mesdames Lottie Venne, Grace Lane, Margaret Halstan and Messrs. Marsh Allen and Graham Browne. Preceded by a one-act comedy by Lloyd Osborne and Austin Strong, entitled THE LITTLE FATHER OF THE WILDERNESS, in which Mr. Huntley Wright appeared.—*Feb.* 21—A new comedy by Robert Marshall, entitled THE ALABASTER STAIRCASE, produced, with Mr. John Hare in the chief part.—*March* 14—Sydney Grundy's A PAIR OF SPECTACLES revived, with Messrs. John Hare, Charles Groves, and Miss Kate Rorke in the chief parts.—*April* 5—A triple bill, consisting of PUNCH, a toy tragedy by J. M. Barrie; JOSEPHINE, a review by J. M. Barrie, preceded by THE DRUMS OF OUDE, by Austin Strong, produced. Chief parts played by Messrs. Dion Boucicault, Graham Browne, Louis Calvert, A. E. Matthews, Kenneth Douglas, Matheson Lang, Mesdames Eva Moore, Grace Lane and Mabel Hackney.—*May* 12—A new comedy by E. W. Hornung and E. W. Presbrey, entitled RAFFLES, THE AMATEUR CRACKSMAN, produced, with Mr. Gerald Du Maurier in the name-part. Other parts by Messrs. Laurence Irving, Dion Boucicault, Graham Browne and Mesdames Sarah Brooke, Lettice Fairfax, and Jessie Bateman.

**Court.** — *Nov.* 28—Bernard Shaw's MAJOR BARBARA revived, with a cast including Mesdames Annie Russell, Rosina Filippi, Messrs. Louis Calvert and Granville Barker, for a series of matinées. Put into evening bill *Jan.* 1.—*Jan.* 16—Professor Gilbert Murray's translation of the ELECTRA of Euripides produced for a series of matinées, with Miss Edith Wynne-Matthison in the name-part.—*Feb.* 6—A QUESTION OF AGE, by L. V. Harcourt, produced for a series of matinées with Miss Fanny Brough and Mr. Fred Kerr in the chief parts. It was followed by THE CONVICT ON THE HEARTH, by Frederick Fenn, with Mr. Edmund Gwenn in the chief part.—*Feb.* 12—THE VOYSEY INHERITANCE, by Granville Barker, revived, with the author, Mr. Frederick Kerr, Mr. Charles Fulton, Miss Mabel Hackney and Miss Edyth Olive in the chief parts.—*Feb.* 27—PAN AND THE YOUNG SHEPHERD, a pastoral play by Maurice Hewlett, produced for a series of matinées, with a cast including Messrs. Norman McKinnel and Henry Ainley and Mesdames Suzanne Sheldon, Grace Lane, and Lillah McCarthy. It was followed by THE YOUNGEST OF THE ANGELS, by the same author.—*March* 12—Revival of the ELECTRA of Euripides.—*March* 20—Bernard Shaw's comedy CAPTAIN BRASSBOUND'S CONVERSION, produced for a series of matinées, with Miss Ellen Terry and Mr. Frederick Kerr in the chief parts.—*April* 16—CAPTAIN BRASSBOUND'S CONVERSION, with Miss Ellen Terry and Mr. Frederick Kerr in the chief parts, transferred to the evening bill.—*April* 24—PRUNELLA, OR LOVE IN A DUTCH GARDEN, by Laurence Housman and Granville Barker, revived for a series of matinées, with Miss Dorothy Minto and Mr. Graham Browne in the chief parts.—*July* 9—YOU NEVER CAN TELL revived, with a cast including Messrs. Henry Ainley, J. H. Barnes, Norman Page and Louis Calvert and Mesdames Henrietta Watson, Dorothy Minto and Lillah McCarthy.—*Sept.* 17—JOHN BULL'S OTHER ISLAND revived, with Miss Ellen O'Malley, Mr. Ben Webster, and Mr. Louis Calvert in the cast.—*Sept.* 25—A new play by Mr. John Galsworthy, entitled THE SILVER BOX, produced for a series of matinées, with Messrs. James Hearn, Norman McKinnel, A. E. Matthews and Mesdames Irene Rooke and Sydney Fairbrother in the cast.—*Oct.* 23—A new comedy by Mr. St. John Hankin, entitled THE CHARITY THAT BEGINS AT HOME, produced, with a cast including Messrs. Ben Webster, Dennis Eadie, Edmund Gwenn and Mesdames May Martyn and Florence Haydon.—*Oct.* 29—MAN AND SUPERMAN revived, with Miss Lillah McCarthy and Mr. Granville Barker in the chief parts.

**Criterion.**—*Feb.* 14—A new farce by Michael Morton, entitled THE LITTLE STRANGER, produced, with Master Edward Garrett in the name-part. Other parts played by Messrs. Graham Browne, Charles Allan, Mesdames Audrey Ford and Sydney Fairbrother.—*May* 23—Mrs. Patrick Campbell opened her season with a play entitled THE WHIRLWIND, translated from the French by Harry Melvill, in which she played the chief part. It was preceded by W. L. Courtney's UNDINE, in which Mrs. Campbell also appeared. —*June* 19—A new play by Edith Lyttleton, entitled THE MACLEANS OF BAIENESS, produced

with Mrs. Patrick Campbell in the chief part.—*July* 16.—A new play by E. W. Peple, entitled THE PRINCE CHAP, produced, with a cast including Messrs. H. R. Roberts, George Shelton, Sam Sothern and Mesdames Janet Alexander, Geraldine Wilson, Betty Green and Hilda Trevelyan.—*Oct.* 13—A new comedy by Mr. W. Kingsley Tarpey, entitled THE AMATEUR SOCIALIST, produced, with Mr. Eric Lewis in the title-rôle. Other parts were played by Mr. E. Dagnall and Mesdames Carlotta Addison and Lilian Braithwaite. It was preceded by a new curtain-raiser, entitled THE LEMONADE BOY, by Miss Gladys Unger.

Robert Evett, Louis Bradfield, Fred Wright and George Graves.—*Oct.* 27—A new comedy-opera, entitled LES MERVEILLEUSES, adapted from the French of Victorien Sardou by Capt. Basil Hood, with lyrics by Adrian Ross and music by Hugo Felix, produced, with a cast including Mesdames Denise Orme and Evie Greene and Messrs. Robert Evett, Louis Bradfield and W. H. Berry.

**Drury Lane.**—*Dec.* 26, 1905—The Christmas pantomime CINDERELLA, by Sir F. C. Burnand, J. Hickory Wood and Arthur Collins, produced, with Messrs. Walter Passmore, Harry Randall, Harry Fragson, Arthur Williams and Mesdames May de Sousa and Queenie Leighton in the chief parts.—*June* 12—The Ellen Terry Benefit Matinée, of which the chief features were: an act from MUCH ADO ABOUT NOTHING, in which Miss Ellen Terry appeared; a scene from the SCHOOL FOR SCANDAL, played by leading actors and actresses; TRIAL BY JURY, with leading dramatists as jurymen; a nigger troupe composed of London's leading comedians; and a series of TABLEAUX VIVANTS arranged by famous artists, in which many leading actors and actresses appeared.—*Sept.* 20—A new drama by Hall Caine, entitled THE BONDMAN, produced, with Messrs. Henry Ainley and Frank Cooper and Mrs. Patrick Campbell in the chief parts.

**Duke of York's.**—*Dec.* 19, 1905—J. M. Barrie's PETER PAN revived, with Miss Cecilia Loftus in the name part. Other parts by Mr. Gerald du Maurier and Mesdames Pauline Chase and Hilda Trevelyan.—*Feb.* 27, 1906—A new comedy by Ernest Denny, entitled ALL-OF-A-SUDDEN PEGGY, produced, with Miss Marie Tempest in the title-rôle. She was supported by Messrs. Gerald du Maurier, Eric Lewis, Alfred Bishop and Mesdames Kate Sergeantson and Ethel Matthews.—*May* 22—A new play by Charles Klein, entitled THE LION AND THE MOUSE, produced. Chief parts played by Miss Margaret Illington and Mr. Edward Breese.—*June* 9—THE MARRIAGE OF KITTY, adapted from the French by Sydney Grundy, revived, with Mesdames Marie Tempest, Ellis Jeffries and Messrs. Eric Lewis and Leonard Boyne. Preceded by a revival of J. M. Barrie's PANTALOON, with Mr. Albert Chevalier and Miss Pauline Chase in the chief parts.—*Sept.* 3—A new comedy, entitled TODDLES, adapted from the French of MM. Tristan Bernard and André Godfernaux, produced, with Mr. Cyril Maude in the name-part, supported by Messrs. Kenneth Douglas, Ivo Dawson and Alfred Bishop, Mesdames Lottie Venne, Gertrude Kingston, Nancy Price, Helen Ferrers and Alice Crawford. It was preceded by a wordless play by Albert Chevalier, entitled THE SCAPEGRACE, in which Miss Pauline Chase appeared.

**Gaiety.**—*Jan.* 8, 1906—A children's play, entitled TWO NAUGHTY BOYS, founded on the Picture Books of Wilhelm Busch and Palmer Cox, by George Grossmith, Jun., with music by Constance Tippett and lyrics by Percy Greenbank, produced, with Mr. Edmund Payne in the chief part, for a series of matinées.—*Sept.* 29—A new musical play, entitled THE NEW ALADDIN, by Messrs. J. T. Tanner, W. H. Risque, Adrian Ross, Percy Greenbank and George Grossmith, Jun., with music by Messrs. Ivan Caryll, Lionel Monckton and Frank Tours, produced, with a cast including Messrs. Edmund Payne and George Grossmith, Jun., and Mesdames Lily Elsie, Adrienne Augarde and Connie Ediss.

**Garrick.**—*Jan.* 22—A new version of the comedy BROTHER OFFICERS, by Leo Trevor, produced, with Miss Violet Vanbrugh and Mr. Arthur Bourchier in the chief parts. They were supported by Mesdames Muriel Beaumont and Kate Sergeantson and Messrs. George Trollope and O. B. Clarence.—*April* 9—First of a series of performances of the old morality play EVERYMAN.—*April* 14—Revival of THE MERCHANT OF VENICE, with Mr. Arthur Bourchier and Miss Violet Vanbrugh in the chief parts.—*April* 26—A new comedy by Alfred Sutro, entitled THE FASCINATING MR. VANDERVELT, produced, with a cast including Mr. Arthur Bourchier and Miss Violet Vanbrugh, Messrs. Aubrey Smith, O. B. Clarence, George Trollope, Mesdames Muriel Beaumont and Henrietta Watson.—*May* 30—A new curtain-raiser by Mr. E. Francis, entitled THE FIRST TIME OF ASKING, produced, with Mr. Bourchier in the chief part.—*July* 24—A new play, entitled DOWN OUR ALLEY, adapted from the French of M. Anatole France by Mr. Arthur Bourchier, produced, with Mr. Arthur Bourchier in the chief part. It was preceded by MONSIEUR DE PARIS, in which Miss Violet Vanbrugh appeared.—*Aug.* 30—A new play by W. J. Locke, entitled THE MORALS OF MARCUS, produced, with a cast including Messrs. Julian L'Estrange and Aubrey Smith, Mesdames Lillah McCarthy and Alexandra Carlisle.

**Great Queen Street.**—Various German plays were produced during the season.

**Haymarket.**—*Dec.* 6—A new comedy, entitled THE INDECISION OF MR. KINGSBURY, adapted from the French by Cosmo Gordon Lennox, produced, with a cast including Messrs. Charles Hawtrey and Sydney Valentine and Mesdames Fanny Brough and Nina Boucicault.—*March* 24—Mr. F. Anstey's farce, THE MAN FROM BLANKLEY'S, revived, with Mr. Charles Hawtrey in the title-rôle. Other parts played by Messrs. Weedon Grossmith, Henry Kemble and Miss Fanny Brough.—*May* 8—A new comedy, entitled OLF AND THE LITTLE MAID, by M. E. Francis, produced as a front-piece to THE MAN FROM BLANKLEY'S, with Mr. Sydney Valentine and Miss Dorothy Minto in the chief parts.—*Sept.* 5—THE MAN FROM BLANKLEY'S revived. It was preceded by a new curtain-raiser, by Keble Howard, entitled COMPROMISING MARTHA.

**His Majesty's.**—*Nov.* 2—Ibsen's AN ENEMY OF THE PEOPLE produced, with Mr. Tree in the chief part.—*Dec.* 26, 1905—THE TEMPEST revived, with Mr. Tree and Miss Viola Tree in the chief parts.—*Jan.* 8, 1906—TWELFTH NIGHT revived, with Mr. Tree and Miss Viola Tree in the chief parts.—*Jan.* 15—OLIVER TWIST revived, with Mr. Tree and Miss Constance Collier in the chief parts.—*Jan.* 18—Ibsen's AN ENEMY OF THE PEOPLE revived, with Mr. Tree in the

chief part. It was followed by a revival of THE MAN THAT WAS, with Mr. Tree in the title-rôle. —*Jan.* 25—A new poetic play by Stephen Phillips, entitled NERO, produced, with Mr. Tree as the Emperor. He was supported by Mesdames Constance Collier, Dorothea Baird and Mrs. Tree and Messrs. C. W. Somerset, Lyn Harding and Basil Gill.—*April* 23–28—Shakespeare Festival Week, during which the following plays were revived: Monday, THE TEMPEST; Tuesday, HENRY IV.[1] (Part I.); Wednesday, HENRY IV., Part I. (matinée), TWELFTH NIGHT; Thursday, HAMLET; Friday, THE MERRY WIVES OF WINDSOR; Saturday, HAMLET (matinée), JULIUS CÆSAR. In all of these Mr. Tree played the chief part, and in THE MERRY WIVES OF WINDSOR he was supported by Miss Ellen Terry. —*May* 29—COLONEL NEWCOME, an adaptation of Thackeray's novel by Michael Morton, produced, with Mr. Tree in the name-part. He was supported by Mesdames Lilian Braithwaite, Marion Terry, Mrs. Tree, Messrs. Norman Forbes, Basil Gill, Lyn Harding and Sydney Brough.—*Sept.* 1— A WINTER'S TALE revived, with a cast including Miss Ellen Terry, Messrs. Charles Warner, Basil Gill, C. W. Somerset, and Miss Viola Tree and Mrs. Tree.—*Oct.* 29—COLONEL NEWCOME revived, with Mr. Tree in the name part.

**Imperial.**—*Jan.* 3, 1906—THE HARLEQUIN KING, a masquerade by Rudolph Lothar, adapted by Louis N. Parker and Selwyn Brinton, produced, with a cast including Messrs. Lewis Waller, Norman Mc Kinnel, A. E. George and Mesdames Mary Rorke, Sarah Brooke and Evelyn Millard.—*March* 3—A new romantic comedy by Sir Arthur Conan Doyle, entitled BRIGADIER GERARD produced, with Mr. Lewis Waller in the name part. Other parts were played by Messrs. A. E. George, Edward O'Neill and Miss Evelyn Millard.—*May* 19—Mr. Martin Harvey opened his season with a new play by B. M. Dix and G. E. Sutherland, entitled BOY O'CARROLL, in which he appeared in the name-part, supported by Mr. Corbett Thalberg and Mesdames N. de Silva and Kate Rorke.

**Lyric.**—*March* 31—A new play, entitled MAURICETTE, adapted from the French by Mr. H. B. Irving, produced, with Messrs. H. B. Irving, Leslie Faber, and Mesdames Dorothea Baird and Marion Terry.—*April* 14—MARKHEIM, a stage version of Robert Louis Stevenson's story by W. L. Courtney, produced as a curtain-raiser to MAURICETTE, with Mr. H. B. Irving in the name-part.—*May* 14—BRIGADIER GERARD, transferred from the Imperial.—*May* 17—OTHELLO revived for a series of matinées, with Mr. Lewis Waller as the Moor. He was supported by Messrs. H. B. Irving, Henry Nevill, Henry Ainley, Mesdames Evelyn Millard and Edith Wynne Mathison.—*June* 17—OTHELLO put into the evening bill.—*June* 28—MONSIEUR BEAUCAIRE revived, with Mr. Lewis Waller in the title-rôle.—*July* 21—The Moody-Manners Opera Company opened their season with LOHENGRIN.—*Aug.* 28—A new melodrama by Baroness Orczy and Montagu Barstow, entitled THE SIN OF WILLIAM JACKSON, produced, with Miss Nina Boucicault and Mr. Ernest Leicester in the chief parts.—*Oct.* 17—A new romance by Henry Hamilton and William Devereux, entitled ROBIN HOOD, produced, with Mr. Lewis Waller in the title-rôle. He was supported by Mesdames Dorothy Minto and Evelyn Millard, and Messrs. Phillip Cunningham, William Devereux and A. E. George.

**New.**—*Dec.* 26, 1905—THE SCARLET PIMPERNEL revived, with Miss Julia Neilson and Mr. Fred Terry in the chief parts.—*April* 14—A new play by Paul Kester and Charles Major, entitled DOROTHY O' THE HALL, produced, with Miss Julia Neilson and Mr. Fred Terry in the chief parts.—*Aug.* 9—A new comic opera, entitled AMASIS, by Frederick Fenn, with music by Philip Michael Faraday, produced, with Miss Ruth Vincent and Mr. Rutland Barrington in the chief parts.

**Prince of Wales's.**—*Jan.* 18, 1906—A new musical play by Owen Hall, music by Ivan Caryll, lyrics by Adrian Ross, entitled THE LITTLE CHERUB, produced, with Mesdames Zena Dare and Evie Greene, and Messrs. Fred Kaye and Maurice Farkoa in the chief parts.—*May* 5—A new musical play, entitled THE GIRL ON THE STAGE, founded on THE LITTLE CHERUB, produced, with Mesdames Zena Dare, Gabrielle Ray and Ruth Vincent and Messrs. Lionel McKinder and Willie Edouin in the chief parts.—*June* 20 —A new comic opera, entitled SEE-SEE, adapted from the French by Charles Brook, with lyrics by Adrian Ross and music by Sydney Jones and Frank Tours, produced, with a cast includin Messrs. Maurice Farkoa, W. H. Berry and Huntley Wright and Mesdames Denise Orme, Adrienne Augarde and Gabrielle Ray.

**New Royalty.**—This theatre was reopened in January with a French Season, during which the following plays were produced:—*Jan.* 8—DÉCORÉ, by H. Meilhac.—*Jan.* 10—HEUREUSE, by Hannequin and Bilhaud—*Jan.* 12.—LA RAFALE, by H. Bernstein—*Jan.* 15.—LE PAON, by F. de Croisset.—*Jan.* 17—CABOTINS, by E. Pailleron.—*Jan.* 19—LES AFFAIRES SONT LES AFFAIRES, by Octave Mirbeau.—*Jan.* 22—LE BARBIER DE SÉVILLE, by Beaumarchais.—*Jan.* 23—BRICHANTEAU, by de Féraudy.—*Jan* 25—LE PÈRE LEBONNARD, by Jean Aicard.—*Jan.* 30—LOUIS XI., by Casimir Delavigne.—*Feb.* 1—LA PETITE FONCTIONNAIRE, by Alfred Capus.—*Feb.* 5—UN CONSEIL JUDICIAIRE, by A. Bisson.—*Feb.* 8—LES SURPRISES DU DIVORCE.—*Feb.* 12—RÉSURRECTION, adapted from Tolstoy's novel by Henry Bataille.—*Feb.* 15—LA MARCHE NUPTIALE, by Henry Bataille.—*Feb.* 19—LE DÉTOUR, by Bernstein.—*Feb.* 23—L'ETINCELLE and ON NE BADINE PAS AVEC L'AMOUR.—*Feb.* 26—MONSIEUR LE DIRECTEUR, by A. Bisson.—*Mar.* 1—JALOUSE, by MM. Bisson and Leclerq.—*April* 18—A new comic opera by Cosmo Hamilton and Eustace Ponsonby, music by Harry Fragson, Chueca and Valverde, produced, with Mr. Harry Fragson and Miss May de Sousa in the chief parts.—*May* 28—The French season opened with M. Coquelin in LES ROMANESQUES, followed by LA JOIE FAIT PEUR.—*June* 18—Mme. Réjane opened her season with a new comedy, entitled LA SUZERAINE, adapted from Henry Harland's novel THE LADY PARAMOUNT, by Dario Nicodemi. *July* 2—Mme. Marthe Brandes opened her season with LE PASSÉ, by Georges de Porto-Riche.—*July* 9—M. Huguenet and Mlle. Jeane Thomassin opened their season with LA BASCULE, by Maurice Donnay.—*July* 23—M. Antoine and his company opened their season with OISEAUX DE PASSAGE.

**St. James's.**—*Dec.* 27—BESIDE THE BONNIE BRIER BUSH, adapted from Ian Maclaren's work by Augustus Thomas and James MacArthur, produced, with Messrs. William, Mollison and Henry Ainley and Miss Lilian Braithwaite in the

cast.—*Jan.* 9—AS YOU LIKE IT, revived for a series of matinées, with Messrs. William Mollison and Henry Ainley and Miss Lilian Braithwaite in the chief parts.—*Jan.* 18 AS YOU LIKE IT put into the evening bill.—*Thursday, Feb.* 1—A new comedy by Arthur Wing Pinero, entitled HIS HOUSE IN ORDER, produced, with Mr. George Alexander and Miss Irene Vanbrugh in the chief parts. They were supported by Messrs. Herbert Waring, Lyall Swete, and Mesdames Bella Pateman, Beryl Faber and Iris Hawkins.

**Savoy.**—*Jan.* 15—LIGHTS OUT, transferred from the Waldorf.—*March* 8—Miss Gertrude Kingston produced a triple bill, consisting of Mr. Laurence Binyon's PARIS AND OENONE, Mr. E. F. Benson's THE FRIEND IN THE GARDEN, and Mr. Bernard Shaw's HOW HE LIED TO HER HUSBAND, for a special matinée, appearing herself in the first and last pieces.—*April* 19—A new play, entitled THE BOND OF NINON, by Clotilde Graves, produced, with a cast including Messrs. Henry Ainley and H. V. Esmond, Mesdames Beatrice Terry and Lena Ashwell.—*May* 12—A new play by Claude Askew and Edward Knoblauch, entitled THE SHULAMITE, produced, with Mesdames Lena Ashwell, Elsie Chester, and Messrs. Henry Ainley and Norman McKinnel in the chief parts.—*June* 12—A new version of THE SHULAMITE produced.

**Scala.**—*Nov.* 16, 1905—A new comedy by Madeleine Lucette Ryley, entitled MRS. GRUNDY, produced, with Mr. Forbes-Robertson and Miss Gertrude Elliott in the chief parts.—*Jan.* 13—A ROYAL DIVORCE revived, with a cast including Mesdames Edith Cole and Cecil Raleigh, and Messrs. Frank Lister and Geo. W. Cockburn. —*Sunday, Jan.* 28—The Stage Society gave a performance of Ibsen's LADY INGER OF OSTRAT. —*March* 10—A new comedy by Mr. Stanislaus Strange, entitled THE SCHOOL FOR HUSBANDS, produced, with Miss Jessie Millward and Mr. Cooper Cliffe in the chief parts.

**Shaftesbury.**—*Jan.* 2—A new play by C. M. S. McLellan, entitled THE JURY OF FATE, produced, with Mr. H. B. Irving in the chief part. He was supported by Messrs. Matheson Lang and Frank Tyars, and Mesdames Chrystal Herne and Lillah McCarthy.—*Feb.* 10—Mr. Nat Goodwin appeared in a new comedy by H. G. Charlton, entitled A GILDED FOOL. He was supported by Messrs. J. H. Barnes, Cooper Cliffe and Mesdames Agnes Thomas and Jessie Bateman.—*Feb.* 22—Madeleine Lucette Ryley's comedy, AN AMERICAN CITIZEN, revived, with Mr. Nat Goodwin and Miss Alexandra Carlyle in the chief parts.

**Terry's.**—*Dec.* 26—CHARLEY'S AUNT revived, with the author, Mr. Brandon Thomas, in the cast.—*Jan.* 24, 1906—A new comedy by Henry Arthur Jones, entitled THE HEROIC STUBBS, produced, with Mr. James Welch in the name-part. He was supported by Miss Gertrude Kingston, Messrs. Dennis Eadie, Eille Norwood, and Sydney Brough.—*March* 13—A new comedy by Brandon Thomas, entitled A JUDGE'S MEMORY, produced. Chief parts played by Messrs. James Welch, James Fernandez, Mrs. E. H. Brooke, and Miss Beatrice Terry.—*March* 31—H. M. Paull's farce, THE NEW CLOWN, revived, with Mr. James Welch in the title-rôle.—*May* 24—CASTLES IN SPAIN, transferred from the Royalty.—*Sept.* 29—Revival of HE'S MUCH TO BLAME, by Thomas Holcroft, followed by the production of a new musical and satirical play, entitled YELLOW FOG ISLAND, by Messrs. Gilbert à Becket and Arthur Sturgess.—*Oct.* 22—HE'S MUCH TO BLAME replaced by a revival of A RESTLESS NIGHT, by Frederick Kay.

**Vaudeville.**—*April* 11—A new musical comedy, entitled THE BELLE OF MAYFAIR, by Charles H. E. Brookfield and Cosmo Hamilton, music by Leslie Stuart, produced, with a cast including Mesdames Edna May, Louie Pounds, and Messrs. Farren Soutar, Arthur Williams, and Courtice Pounds.

**Waldorf.**—*Jan.* 1, 1906—An original fairy play by Messrs. French and Brenden Stewart, entitled NOAH'S ARK, produced for a series of matinées, with Miss Madge Lessing and Mr. Harry Paulton in the chief parts.—*Jan.* 17—Mr. Cyril Maude and Miss Winifred Emery opened their season with a new comedy by Sidney Bowkett, entitled THE SUPERIOR MISS PELLENDER, in which they both appeared, supported by Mesdames Beatrice Ferrar, Dagmar Wiehe, Madge Titheradge and Mr. Robert Bottomley. It was preceded by THE PARTIK'LER PET, by Max Maurey, adapted by Edward Knoblauch, in which Mr. Cyril Maude appeared.—*Feb.* 17—Goldsmith's comedy, SHE STOOPS TO CONQUER, revived, with Mr. Cyril Maude and Miss Winifred Emery in the chief parts. The cast also included Messrs. Paul Arthur, G. M. Graham, and Sydney Brough, and Miss Beatrice Ferrar and Mrs. Charles Calvert.—*March* 20—George Colman's comedy, THE HEIR-AT-LAW, revived at a special matinée, with a cast including Messrs. Cyril Maude, Harry Nicholls, Mesdames Mary Brough and Madge Crichton.—*April* 14—THE SECOND IN COMMAND revived, with Mr. Cyril Maude in the title-rôle.—*May* 21—A play, entitled SHORE ACRES, by James A. Hearne, produced, with a cast including Messrs. Edmund Maurice, Frank Mills and Cyril Maude, and Mesdames Alice Crawford and Mary Rorke.—*Sept.* 20—A new farce by Frank Wyatt and William Morris, entitled MR. TEMPLE'S TELEGRAM, produced, with Miss Sybil Carlisle, Mr. Alan Aynesworth, and Mr. William Morris in the chief parts. It was preceded by a new one-act play by Frederick Fenn and Richard Pryce, entitled HIS CHILD.

**Wyndham's.**—*Jan.* 1, 1906—CAPTAIN DREW ON LEAVE, transferred from the NEW after the Christmas holiday, Mr. Edmund Maurice taking Mr. Louis Calvert's place in the cast.—*March* 21—Justin Huntley McCarthy's farce, THE CANDIDATE, revived, with a cast including Charles Wyndham, Messrs. Edmund Maurice, Rutland Barrington, Mesdames Sybil Carlisle, June van Buskirk, and Helen Ferrers.—*April* 21—A new musical play by Leedham Bantock and Arthur Anderson, music by Howard Talbot, entitled THE GIRL BEHIND THE COUNTER, produced, with a cast including Messrs. Hayden Coffin, Lawrence Grossmith, Mesdames Marie Daintor and Isabel Jay.—*Sept.* 12—A new comedy by Mrs. Henry de la Pasture, entitled PETER'S MOTHER, produced, with Miss Marion Terry in the name part. Other parts played by Miss Hilda Trevelyan and Messrs. A. E. Matthews, Norman McKinnel, and Frederick Kerr. It was preceded by a new curtain-raiser by Mr. C. Hamilton, entitled THE SIXTH COMMANDMENT.

# British Army Reform.

THE numerous attempts at reforming the heterogenous Forces of the British Army in the past were mostly desultory efforts not founded on solid principles. Modelled more or less on Frederick the Great's Prussian army, after 1757 the British system was essentially a regimental one of regiments, battalions, squadrons, batteries, companies, raised at different periods as necessitated by increasing territory. The Army was not permanently organised in brigades, divisions, &c., in peace. In 1743 the national defences had been neglected, and discipline had suffered much from civilian interference. The Duke of Cumberland, Commander-in-Chief in 1745, restored this, and Wm. Pitt (the elder) supported him. In 1792 General Dundas, alarmed by the looseness acquired in the American War, reformed the drill-book system of manœuvres. Sir John Moore, in May, 1803, trained in battalions and brigades the regiments of the Light Division, afterwards so distinguished in the Peninsular War (1808 to 1814), when the Army fought under Wellington in divisions. In 1815 Wellington formed his army which fought at Waterloo in two army corps and a reserve corps. After 40 years' peace the army sent to the Crimea was organised in Divisions only. The Crimean War brought to light many defects of organisation in supply, transport, and medical services. A Royal Commission was held to inquire into them. The medical services were in consequence organised in 1858, and in 1877 complete reorganisation into base and field hospitals and bearer companies on the German system took place. Camps were formed in 1856, and Volunteers raised largely in 1859. Large depôt battalions were formed, comprising the depôt companies of from five to seven battalions, where recruits were raised and trained before being drafted abroad. A large depôt for all regiments in India was formed at Chatham. The want of reserves was much felt, and during the Crimean War a Foreign Legion was enrolled, but disbanded after. During the Mutiny regiments and drafts were hurried out piecemeal to meet the emergency.

A reserve was wanted to reinforce the Army when called on for active service, for the pensioners in reserve after 21 years' service were not allowed to serve abroad; so the Duke of Cambridge (Commander-in-Chief 1856 to 1895) tried frequently to get an Army Reserve established. This was not done until the German victories in 1866 and 1870 drew public attention to their excellent military system. Lord Cardwell, Secretary of State for War, established in 1870–72 the territorial system, by which on a county or district basis each regiment of infantry was given two or more battalions, and had corresponding battalions of Militia and Volunteers affiliated to it. This was done to facilitate recruiting and to carry out foreign reliefs better, there being one battalion at home for every one abroad. Each had two depôt companies at the brigade depôt, as it was now called. These four companies were to form the *cadre* or framework of another battalion, the additional companies being raised on mobilisation (passing to a war footing). This intended expansion was not carried out owing to expense, but would have given a substantial increase of strength. Sixty-nine of these regimental districts, comprising the brigade depôt and the affiliated Militia and Volunteer battalions, under a colonel usually selected from the territorial regiment, were formed. This linked-battalion system answered for battalions of the same regiment; but where battalions hitherto strangers were linked together there were difficulties—overcome, however, eventually by good feeling and zeal—and it worked well for recruiting, but was too small for training, so recruits were soon sent to home battalions for training and discipline. These were reduced accordingly in strength, and became mere nurseries. This territorial system was completed by 1881. The Duke of Cambridge and Lord Wolseley (Adjutant-General) laboured to get home battalions on higher establishment, as, unless kept up, they could not furnish quota of drafts for battalions abroad. It was expensive, as there were so many battalions at home, but enabled an expeditionary force to be rapidly sent out. In 1871 Lord Cardwell established short service,* and was instrumental in bringing about the abolition of purchase of commissions, officially recognised since Charles II.'s time (1683), and approved of by the Duke of Marlborough and the Duke of Wellington, though wrong in principle.

For the Egyptian Campaign of 1882 and the Soudan War, 1885, special Brigades, Divisions, &c., were formed. In 1888 field army establishments and line of communication troops were reorganised, and Lord Wolseley addressed a minute from the Commander-in-Chief to the Secretary of State for War asking for three army corps for home defence; and on December 8 Mr. Stanhope, Secretary of State for War, issued his minute stating the objects for which our Army was maintained, on which a mobilisation scheme was framed. The Army was to consist of three Army Corps, each of three Divisions, and of four cavalry brigades (two army corps and one cavalry division, with line of communication troops, for expedition). There was to be a Volunteer reserve field army, made up of Volunteer field brigades and Volunteer artillery, with guns of position. The remaining Volunteers and other troops available at home were to garrison home fortresses, &c., and defend the capital. The scheme was based on home defence. But troops were still kept on a station basis, and for manœuvres or war brigades, divisions, &c., had to be formed. In July, 1895, a Defence Committee of the Cabinet had been formed. (It was reorganised in 1902.) In 1899, on the Boer War threatening, reserves were not called out till October 7. The ultimatum by the Boers was sent on 9th October, 1899. Ninety-six per cent. of the reservists joined at once, and mobilisation was rapidly and smoothly effected. In India the troops were mobilised in four days and embarked in ten. At home, though the cavalry transports were not ready, an army corps was promptly embarked, and a fifth division sailed on November 11, 1899. In 1902, after the war, Mr. Brodrick, Secretary of State for War, tried to remedy defects in organisation. Strength of forces, though not increased, was to be maintained after the war. Six army corps were to be formed, complete in all requirements, stores, &c. Decentralisation was aimed at, so as to relieve War Office. Each army corps commander was

* That is, 6 years' colour service and 6 years' reserve service in 1867, and 7 years' colour service and 5 reserve service in 1870; so a good Army Reserve was formed.

to have increased powers, and supplies for mobilisation at his disposal. The pay of the men was to be increased, garrison battalions of old soldiers raised, &c. Land was bought on Salisbury Plain, new barracks, &c., built, which cost £1,500,000. Altogether the scheme cost about £2,000,000. Soldiers were to be enlisted for three years' service and nine reserve service, but they would not re-engage, so these terms had to be altered. The Army Reserve was by this, however, increased, and is now 120,000 strong. A Volunteer Reserve was to have been formed, &c.

Though efficiency would have been increased by this scheme, the expense was too great, and it was vigorously opposed as unsuited to the country's needs. It gave no men for an expeditionary force without calling up the reserves. In 1904 **Mr. Arnold-Forster**, Secretary of State for War, who differed from his predecessor in advocating reductions, brought in his scheme. Chief features: Two armies, one for foreign, one for home service—former, nine colour service and three reserve service; latter, two colour service and ten reserve service. Smallest numbers consistent with safety. Reductions: All garrison battalions, 14 home battalions, 38 battalions to 520 each, 26 foreign to 860 each; cavalry reserve, many Volunteer battalions; and greater strictness to ensure efficiency, also fourteen days' camp annually. 33 Militia battalions to be converted to home service battalions, commands reorganised, and brigade depôts to be collected together as grouped regimental districts (like old depôt battalions—see above). Home service reserves paid 4*d.* a day; foreign service ditto, 6*d.* Army Reserve to be periodically trained. 90,000 Army reserves would be produced, efficiency maintained, and a saving of £1,500,000 effected; Militia proposals not formulated when he resigned office with Conservative Government in December, 1905.

*Mr. Haldane's Army Reforms.*—On July 12, 1906, Mr. Haldane outlined his scheme. He differs from his immediate predecessor in all points but reductions, which he emphasises. His object is to cut down all useless expenditure, to give the lead to foreign Powers in Army reductions, and to devise a popular defence force in accordance with national, and to furnish an expeditionary force for war, requirements. Reductions: Two battalions Guards, eight battalions infantry, and six batteries artillery converted to training batteries—some four, some two guns; *cadres* of battalions reduced; total reductions, 20,000. Militia not to feed line, but to be improved, and serve abroad by battalions or companies if required. Volunteers and Yeomanry to garrison coast defences and form field army home defence. Volunteers to be reorganised, raised, and administered by county associations, who provide ranges, &c., but under general officers commanding for training. An expeditionary force for war to be arranged of six infantry Divisions, each of three brigades, and four cavalry Divisions, each of three brigades, and line communication troops=120,000 Regulars (including reserves), 30,000 Militia, with cavalry and artillery, &c., in proportion; total, 154,000. Economies effected by many services now exclusively military being performed by men on Militia basis, &c. On mobilisation for war a depôt battalion to be formed for each territorial regiment to furnish drafts. Terms of service as formerly—seven years' colour service and five years' reserve service; Guards, three years and nine years. No arrangements for training reserves are proposed. Great sanitary reforms to be effected, and trade apprenticeship in spare time in Army. No proposals are made for a great national reserve in case of a great war. It is too soon yet to judge whether this scheme can be carried out. Most people are agreed that the chief duties of our Army are: 1. Defence of possessions abroad. 2. To assist the Navy offensively when required. 3. To secure home defence. And the aim of all Army reformers is to ensure these with efficiency and economy.

Lord Roberts and the National Service League's proposals to this effect, as formulated in 1906, are universal military training—1st, in all schools; 2nd, in cadet corps, boys' brigades, &c., training and rifle shooting under State supervision, until 18 years of age; 3rd, all able-bodied young men not in Army, Navy, or Auxiliary Forces to undergo three or four months' military training to fit them for home service on emergency, and to improve the moral and physical condition of the nation.

*War Office Reform.*—In Charles II.'s time (1661) a Secretary of State to the Forces administered the Army. He was a civil servant of the Crown not responsible to Parliament. In 1667 a Paymaster-General was appointed to disburse pay, which Parliament voted. In 1691 Parliament asserted its right to audit the accounts. In 1710 boards of general officers inquired into administrative matters and reported to the King, who was assisted by the Secretary at War, a subordinate office held by an M.P. In 1793 he was made responsible to Parliament for estimates, accounts, &c., and the office was amalgamated with that of the Secretary for the Colonies. In 1828 a great Board of Ordnance was formed for the supervision of stores and manufactures, contracts, lands, barracks, &c. It kept its own accounts. The Commissariat were under the Treasury, the Militia under the Home Office. This dispersed method continued until after the Crimean War, when (1856) all were concentrated in the War Office, under the Secretary of State for War, who had, however, nothing to do with command or discipline. This had always been vested in the General or Commander of the Forces. In 1793 the office of General Commanding-in-Chief was established, with the Adjutant-General and Quartermaster-General under him. In 1868 an Inspector-General of Reserve Forces (Reserves, Militia, Volunteers, Yeomanry, &c.) was appointed. In the War Office Act 1870, its three great departments were classified and their duties defined, viz.: 1. The Military Department, under Commander-in-Chief. 2. Ordnance Department, under Surveyor-General of Ordnance. 3. Financial Department, under Financial Secretary. In this Act the Parliamentary authority placed Secretary of State for War formally over Commander-in-Chief, and amalgamated the Horse Guards with the War Office. The office of Surveyor-General of the Ordnance was abolished. The Order in Council of Feb. 21, 1888, again divided the War Office into two principal departments—(1) the Civil or Finance Department, (2) the Military Department—and defined the duties of each. In June, 1888, a Royal Commission, under Lord Hartington, sat to consider constitution of War Office. Report (issued May, 1890) recommended appointment of Chief of Staff, a War Office Council, and other changes. A Chief of the Staff

was, however, not appointed. In 1895 the Duke of Cambridge resigned the Command in Chief of the Army after thirty-nine years in chief command and fifty-eight years' service, and Lord Wolseley was appointed Commander-in-Chief for five years; being succeeded by Lord Roberts, K.G., V.C., &c., on Sept. 30, 1900. The changes in 1895 in War Office administration empowered the Adjutant-General and the Inspector-General of the Forces, &c., to report direct to the Secretary of State for War, and not of necessity through the Commander-in-Chief, and reorganised all departments. This continued until after the Boer War of 1899–1902, when a Royal Commission (Lord Esher's) sat and reorganised the War Office somewhat on the lines of the Admiralty. The Commander-in-Chief was abolished and an **Inspector-General of the Forces** appointed. Mar. 1, 1904. The War Office was again divided into departments, and the **Army Council** created: 1. The Chief of the General Staff. 2. The Adjutant-General. 3. The Quartermaster-General. 4. The Master-General of the Ordnance. 5. The Civil Member of the Army Council. 6. The Inspector-General of the Forces. With the exception of the latter all these were constituted members of the Army Council under the Secretary of State for War, which consists of the above-named four officers as Military members, one Civil member, and one Finance member.

LT.-COL. E. GUNTER.

## Real Property Sales of the Season.

As in other recent seasons, so in the not very busy one to be now concisely noticed, changes in the ownership of estates of old and sometimes of historical associations has been a noteworthy feature of the real property market. Lord Willoughby de Broke disposed of large properties in the summer, selling the Thorpe Latimer and Frampton Estates, Lincolnshire (868 acres), for £28,745, and the Bramshall and Coppenhall Estates, Staffordshire (about 3,000 acres), for £66,121. Both sales took place on 19 June, and the auctioneers were Messrs. S. & G. Kingston and Messrs. Morris & Place, respectively. A further portion of his lordship's outlying estates, Poyntington Manor, Sherborne (972 acres), was sold (26 July) by Messrs. Roberts, Son & Tory for £20,000. Part of the Earl of Ancaster's and Lord Willoughby d'Eresby's estates in Lincolnshire, amounting to 943 acres, was sold (20 to 23 July) by Messrs. Simons & Co. for £31,766. A much more extensive sale than this was that of the Meux Estates, in Wiltshire (total area 21,000 acres). Messrs. Giddy & Giddy were the auctioneers here, and obtained for the first and second portions of the property (17 and 18 July and 31 July) about £250,000. The Earl of Portsmouth's property at Coleridge, Devonshire (3,352 acres), was sold by Messrs. J. Hannaford & Son for £39,741 (20 July). The Somerby Hall Estate, Brigg, Lincolnshire (1,150 acres), was disposed of in January by private contract. In such cases the price given does not, as a rule, transpire. The rent-roll, however, was £1,500, and the property, which had been in the Laing family for 200 years, included an entire parish. Messrs. Nicholas Denyer & Co. were the auctioneers. Messrs. Farebrother, Ellis & Co. found, we understand, a client to give about £100,000 for Lissenden Park, Leighton Buzzard, which had been in the Lovett family for over five centuries; and another old property of interest was Sturry Court, near Canterbury (160 acres), which Messrs. Nicholas Denyer & Co. sold privately to Lord Milner for a country seat. The house was originally a convent, and was presented by Queen Elizabeth to Thomas Smythe, a well-known London merchant, and grandfather to the first Lord Strangford. Billesley Hall, Stratford-on-Avon, is mentioned in Domesday Book; it was sold privately (with 550 acres) in February by Messrs. Edmund Smith & Co.; and the same firm (in conjunction with Messrs. Osborn & Mercer) disposed of the Bourton Hall Estate, near Rugby (1,209 acres), including the whole village of Bourton ("Bartone" in Domesday Book). Messrs. Driver, Jonas & Co. on 2 and 3 August, and subsequently, sold for Lord Glanusk portions of the Pembridge Castle Estate, near Ross (2,490 acres). The castle, of course, has a long history; it sustained great damage in 1648, when it was besieged for six weeks by Oliver Cromwell. Messrs. Driver, Jonas & Co. also disposed of portions of the Seamer Estate of Lord Londesborough, near Bridlington, Yorkshire, for a total of over £120,000 (October); and also sold extensive estates belonging to Lord Glanusk, of which 3,794 acres at Routh, near Beverley, fetched close on £80,000, and the Brecon and Radnor Estates £56,600 (11 and 12 October). The Hawkstone Estate, Shropshire (8,500 acres), was sold privately by Messrs. Hannett, Raffety & Co. to Mr. George Whiteley, M.P.

Messrs. Debenham, Tewson & Co. sold the Elizabethan mansion, Stanton Court, Gloucestershire, and 882 acres for £25,200 on 26 June. On 6 July Messrs. Thurgood & Martin obtained £99,000 for the Draycott Estate, near Stoke-upon-Trent (3,800 acres), a number of farms and two villages being included in the sale; and in the early spring Messrs. Young & Gilling disposed privately of the Coverley Court, Prestbury Park, and other estates in Gloucestershire for over £100,000. Other transactions that may be mentioned are: Harefield and Middlesmoor Estate, Pateley Bridge, Yorkshire (2,650 acres), £36,750 (25 May); Lord Leigh's Estate, Leicester (outlying parts), £30,000 (23 August); Stubbings House and Farm, Maidenhead Thicket (291 acres), £25,400 (16 July); Lord Harlech's Cemmaes Estate, Wales (1,443 acres), £20,275 (18 July); Broughton Grange, Melton Mowbray (570 acres), £20,000 (19 June); Red Lodge, Kingswood, Surrey (334 acres), £17,090 (23 May); and Greenside Hill and Hartside Farms, Ingram, Northumberland (2,051 acres, £17,000 (28 August). Private treaty sales were: Old Buckenham Hall, Attleborough, Norfolk (the seat of Prince Dhuleep Singh); Great Thurlow Estate, Newmarket (3,857 acres, belonging to the Hon. W. F. D. Smith, M.P.); Grove Place, Nursling, Hampshire (150 acres, one of Queen Elizabeth's hunting boxes, at one time the property of the late Lord Palmerston); and the Meall Mhor Estate, Loch Fyneside, Argyllshire (1,200 acres).

With regard to residential and other premises in the West End, the leading auctioneers had, as usual, the transference of some important pro-

perties. Messrs. Elliott, Son & Boyton are always busy in this branch. Their sale of the freehold business premises No. 396, Oxford Street, with No. 53, Duke Street, adjoining, for £21,000 (29 October) constituted, we believe, a record. On 25 June they sold the shop premises Nos. 18 and 19, Warwick Street, Regent Street (lease 73 years, net rent £950), for £15,100; and in March No. 148, Oxford Street (lease 35 years) fetched in their hands £7,350. The Vere Street firm also obtained £10,000 for two residences further west, namely, Nos. 10 and 11, Bramham Gardens, South Kensington (lease 67 years). On 13 June Messrs. Edwin Fox & Bousfield sold the freehold of No. 140, Strand for £17,500. £60,000 was the price obtained by Messrs. G. Trollope & Sons for No. 47, Parliament Street, Westminster (the Whitehall Club), a freehold property (area 4,025 ft.), of which the price works out at £15 per ft. Messrs. Trollope also sold No. 27, Green Street, Park Lane, and No. 17, Eaton Square, but these were private transactions and the prices are not available. On 29 March Messrs. May & Rowden sold some high-class properties. Nos. 57 and 112, New Bond Street fetched £31,000. These were gilt-edged "Corporation leases," yielding a rental of £1,095. No. 196, Regent Street was sold privately; and Nos. 11 and 12, Haymarket (area 3,350 ft.) let at £1,450 per annum. Messrs. W. Grogan & Boyd obtained £60,000 for No. 39, Berkeley Square (5 May), and £11,000 for No. 32, Old Bond Street (23 June). They also sold No. 16, Belgrave Square (lease 17 years, ground rent £150) privately, the purchaser being the Duke of Bedford. No. 86, Eaton Square, and No. 19, Stratford Place, were two other fashionable residences which changed hands, the purchaser of the former being Emily, Lady Ampthill. Messrs. Garrett, White & Poland in the spring of the year disposed of two properties held by Corporation lease—No. 40, Conduit Street (yearly rental £450) for £14,500; and No. 17 to 21, Dering Street, Oxford Street (yearly rental £290), for £8,000. For the premises of the Junior Army and Navy Club, King Street, St. James's, Messrs. Glasier & Sons obtained £27,100. Messrs. Barker & Neale sold No. 58, Great Cumberland Place, and No. 2, Lowndes Square, by private treaty; and by the same method Messrs. Hampton & Sons disposed of several notable properties, including No. 117, Victoria Street, S.W., No. 38, Portland Place, No. 30, Hamilton Terrace, and No. 7, Sloane Court; whilst, coming further west, Messrs. Chesterton & Sons on 3 May sold Nos. 113 and 115, High Street, Kensington (Crown leases 44 years, ground rent £130, net income £870), for £13,500, and half-shares in Nos. 29 and 31 in the same ever-improving thoroughfare (freehold, yearly rental £950) for £11,100.

For substantial City properties a special class of buyers is required, and it may be added that such properties are commonly placed by vendors in the hands of a select circle of auctioneers. Messrs. Debenham, Tewson & Co., Messrs. Edwin Fox & Bousfield, and other firms might be cited as examples, but the exigencies of space compel us to be sparing in giving results. Messrs. Debenham, Tewson & Co. on 26 June held a very successful sale of the City and West-end estate of the late Mr. J. Prince, when £24,045 was the amount realised (including £6,000 for No. 13, Watling Street, and No. 208, Upper Thames Street). Messrs. Farebrother, Ellis & Co. sold warehouse premises in Mitre Square, Aldgate (area 3,100 ft.), for £25,000 (25 July); and (28 July) Mr. J. Stower privately disposed of No. 57, Old Broad Street at what must have been a long figure, judging from the sum (£68,500) at which the property was withdrawn when previously submitted at auction. On 19 June Messrs. G. A. Wilkinson & Son let Nos. 6 and 7, Queen Street, Cheapside (area 2,550 ft.), on building lease at £1,300 per annum (*ios. 2d.* per ft.); and on 2 July the same firm sold No. 42, Bishopsgate Street Within, which, with No. 18, North Street, Brighton, made £10,690. Other transactions which may be mentioned are: On 7 November Messrs. Edwin Fox & Bousfield let by auction on a building lease Nos. 7 and 8, Poultry, and Nos. 36 and 37, Bucklersbury (area just on 2,700 ft. super.), at £2,000 per annum. No. 47, Fleet Street (freehold), £20,000 (Messrs. Slade & Butler, 5 May); No. 35, Camomile Street, £14,000 (Messrs. David Burnett & Co., 23 May); Nos. 73, 74, and 75, Minories, £13,000 (Messrs. Herring, Son & Daw, 18 June); and No. 9, Worship Street (freehold), £3,750 (Messrs. Elliott, Son & Boyton, 28 May). Turning to what may be called metropolitan as distinguished from City properties, on 27 March Messrs. Debenham, Tewson & Co. obtained £20,500 for the Church of St. Michael, Burleigh Street, Strand. On 14 June Messrs. Edwin Fox & Bousfield sold for £17,500 a freehold in the same district—No. 140, Strand, part of the estate of the late Mr. Henry Sotheran. The Bedford Head Hotel, Tottenham Court Road, was sold on 24 April by Messrs. Orgill, Marks & Barley for £27,200. The shops Nos. 248, 249, and 250, Tottenham Court Road (Duke of Bedford's estate) realised £9,000 (Messrs. Elliott, Son & Boyton, 26 February); and 41 properties in Vauxhall Bridge Road and the neighbourhood were disposed of in one lot for £60,000 by Messrs. E. & H. Lumley, the area being 49,266 ft., and the yearly rental £1,714.

"Greater London" becomes greater every year, and new trains, "tubes," trams, and motor omnibuses are constantly stimulating the enterprise of builders and of speculators in house and "flat" property. This remark applies, perhaps, with special force to West London and West Middlesex, and one may guess the ultimate purpose to which the late show-ground of the Royal Agricultural Society at Park Royal, Twyford, will be put. This little "lot" (101 acres) was sold in the summer for £28,500 by Messrs. Debenham, Tewson & Co. Ruislip Park, near Harrow (41 acres), was sold by Messrs. Ventom, Bull & Cooper for £9,500 (4 May); and six acres (Church Road, Hanwell), with "The Spring and Hermitage," by Messrs. Humbert & Flint for £4,175 (20 June). Messrs. H. E. Foster & Cranfield (in conjunction with Mr. G. Ravenshear) obtained £10,500 for the freehold of Nos. 1 and 17, The Broadway, Ealing, on which the yearly rental amounted to £653 (1 May). On 2 May Messrs. Edwin Fox & Bousfield disposed of certain freehold and leasehold investments—houses, shops, &c.—in Upper Street, Islington, and the district for £23,145. Important blocks of flats which changed hands were Hurlingham Court, Fulham (lease 99 years, producing £2,630 per annum, ground rent £180), which fetched £12,500 (Messrs. Jones, Lang & Co., 9 April); and Nos. 13, 15, 17, 25, and 27, Delaware Mansions, Delaware Road, Maida Vale, and 8, 12, and 14, Castellain Mansions (leases 75 and 94 years, producing, les

ground rent, £2,715 per annum), for which £14,700 was obtained (Messrs. Dunn, Soman & Coverdale, 15 January). Other suburban sales which may be referred to are: Grove Hall, Bow (building estate, 12 acres), £22,300 (Messrs. Mark Lieli & Son, 24 July); the freehold premises Nos. 52 to 64, Broadway, Stratford, £21,500 (Messrs. David Burnett & Co., 2 July); 162 acres building land, Goodmayes and Chadwell Heath, Ilford, £16,210 (Messrs. A. Savill & Son, 23 July); freehold waterside premises and wharf, Greenwich, £11,500 (Messrs. Edwin Fox & Bousfield, 21 February); Craven Park Estate, Stamford Hill (9 acres), £11,875 (Messrs. Hobson, Richards & Co., 18 July); Mascot House Estate, Watford (16 acres), £12,900 (Messrs. Humbert & Flint, 26 May); building estate (20 acres), Stoat's Nest, Brighton Road, Smitham Bottom, £11,600 (Messrs. D. Watney & Sons, 12 July); 15 lots of freehold property, with certain ground rents, in London Fields, £11,535 (Messrs. Weatherall & Green, 25 June); and Nos. 330 to 334, High Road, Kilburn, and nine other properties, £10,700 (Messrs. Douglas, Young & Co., 23 May).

In those favourite investments, freehold ground rents, two or three exceptional transactions may be recorded. In their final sale (14 February) of properties comprised in the Burrage Estate, Woolwich, previous sales of which have been noticed in this article, Messrs. Debenham, Tewson & Co. (acting in conjunction with Messrs. Matthews, Matthews & Goodman) disposed of freehold ground rents to the amount of £1,400 for a total of £43,490. The seven sales of the Burrage property realised a grand total of £596,940—a record of the favour in which first-class real property investments are held which is not likely to be exceeded for a long time to come. On 23 and 24 July Messrs. G. Gouldsmith, Son & Co. obtained £143,995 for freehold ground rents amounting to £533 secured on 73 Cubitt-built residences in Belgravia belonging to the Lowndes Estate (estimated rental £25,300, reversions in 22 years); and another large deal took place on 25 and 26 June, when Messrs. Moss & Jameson disposed of for £100,185 freehold ground rents (Milner-Gibson Estate, Islington) of £1,736 (reversion in 8 to 21 years). Messrs. Edwin Fox & Bousfield may be said to be specialists in high-class City and other ground rents, and amongst the transactions to the credit of the well-known Gresham Street firm may be mentioned: £11,450 for ground rents of £451 on Nos. 42 and 43, Basinghall Street (7 February); £5,050 for ground rents of £220 on No. 171, Upper Thames Street, reversion in 51 years (27 March); £15,005 for ground rents of £1,138 secured on property in Islington (2 May); £5,440 for ground rents of £225 secured on properties in Fulham and elsewhere (11 April); and £8,555 for freehold ground rents of £353 arising from houses in Shepherd's Bush, Fulham, and elsewhere. Messrs. H. E. Foster & Cranfield on 14 April disposed by private treaty of freehold ground rents amounting to £1,500 secured on Basil Mansions, Belgravia (estimated rental £7,923, lease 90 years); and £12,150 was the sum obtained by Messrs. Wriford, Dixon & Winder for ground rents of £370 arising from No. 132, High Street, Borough, and other properties in Hoxton and elsewhere (29 June). £16,680 for freehold ground rents of £672 on property in Stoke Newington and Lower Edmonton (Messrs. Osborn & Mercer, 16 February); £12,695 for £414 secured on the Norbury Manor Estate (Messrs. Chesterton & Sons, 19 July); £9,315 for £397 on property in Tollington Park (Messrs. Humbert & Flint, 2 May); and £3,560 for a freehold ground rent of £60 secured on No. 2, Angel Court, Throgmorton Street, reversion in 31 years, estimated rental £1,000 (Mr. W. B. Hallett, 13 July), are additions to what is, of course, the briefest of abstracts of ground rent transactions.

1905. James William Lowther.

* Re-elected 1678, but King Charles II. refused to sanction election. † Re-elected 1689, but expelled for accepting a bribe, 1691. ‡ Created Viscount Sidmouth.

THERE is no need to go back fifty or sixty years in order to draw a vivid comparison between the travelling facilities of the Metropolis before and since the advent of the "Tube" railways, motor omnibuses, and electric tramways. Their development has been so rapid that he must be indeed a young man and very unobservant who does not realise the wonderful growth in the means of getting about London during the past six years. Historically, the use of the "Tube" railway dates from the opening of the City and South London Railway in 1890, from the Monument to Stockwell, by the King (then Prince of Wales); but it is more statistically accurate to say that travelling by "tube" really came into vogue with the opening ten years later (also by the King) of the Central London Railway from the Bank to Shepherd's Bush in 1900–1. Down to 1899 the City and South London Railway had only been carrying (exclusive of season ticket passengers) about 6,500,000 passengers per annum, whereas the Central London Railway started in its first year with 41,000,000, the City and South London immediately jumping up to about 19,000,000 per annum. It may, therefore, be said that the Central London Railway made "tube" travelling fashionable, and brought its advantages of economy of time and money under the notice of that large West-end population, not a few of whom were accustomed to go down to the City in cabs. We will, however, for the purpose of this article, survey the various railways in the order of their opening:—

CITY AND SOUTH LONDON.—This railway was the pioneer, having originally been formed as the City of London and Southwark Subway, to construct and work an underground railway along a route about one and one-third miles in length from a point in King William Street, adjacent to the Monument Station of the Metropolitan Railway, and passing under the River Thames, the Borough High Street, and Newington Causeway to the Elephant and Castle. It was extended to Stockwell in 1889, to Moorgate Street, City, and Clapham Common in 1900, to Islington in 1901, and before 1906 is out the engineers will have completed the extension of the line from Islington to King's Cross, St. Pancras, and Euston Stations, the total length being about eight miles.

CENTRAL LONDON.—This railway was constructed to meet the requirements of the immense number of persons who travel daily from the West-end of London to the City. Although powers were obtained to build the line from Shepherd's Bush to Liverpool Street it was not proceeded with beyond the Bank. Its length is about six and a half miles, and it takes a more direct route than any other railway constructed under London streets, the line being practically a straight one between Chancery Lane and Shepherd's Bush. It connects in the City by subways with the City and South London Railway and the Waterloo and City Railway, and at Oxford Circus with the Baker Street and Waterloo Railway, whilst it is fed at Shepherd's Bush by the extensive system of the London United Tramways Company.

GREAT NORTHERN AND CITY.—This company was incorporated in 1892 to construct a line from Finsbury Pavement in the City to Finsbury Park (a distance of three miles forty-one chains), and the whole line was completed and brought into use in February, 1904. The promoters have power to extend the line to Lothbury. This railway enables the City man to travel direct from the City to the busy junction of Finsbury Park (thus gaining access to North and North-west London trains) instead of proceeding from Broad Street or King's Cross.

BAKER STREET AND WATERLOO.—The original extent of this railway when it was incorporated in 1893 was three miles between the points named in the title, but the promoters have materially assisted in the development of the underground system of "tube" railways by extending the line to Elephant and Castle in the south (connecting with the City and South London line) and to Paddington in the north (connecting with the Great Western Railway), the latter portion to be completed shortly. The line is the only means of direct communication between the South-eastern and the South-western parts of London, and has proved a fine piece of engineering work. As an example, it may be mentioned that a shaft was sunk at the top of the Haymarket in Piccadilly, and the engineers had to drive from that towards the stage in the river, without any communication with the outer surface, to meet the tunnel from the river. The tunnels met at the bottom of the Haymarket, and there was less than an inch of deviation. The line from Kensington to Baker Street was opened in March, 1906, by Sir Edwin Cornwall, chairman of the London County Council.

GREAT NORTHERN, PICCADILLY AND BROMPTON.—This line was originally known as the Brompton and Piccadilly Circus, it being the intention of the promoters to connect up South Kensington and the Metropolitan District Railway with Piccadilly by a line of about two miles in length. The advent of the motor omnibus made the development of line on a more extensive scale desirable, and in 1901 the undertaking of the Great Northern and Strand was acquired and the name changed to its present form. The railway is expected to be opened in January, 1907, and when completed will extend from Finsbury Park to Hammersmith, coming to the surface at a point between West Kensington and Hammersmith by arrangement with the Metropolitan District Railway. A spur will connect the Strand (where the station has been built on the site of the old Strand Theatre) with the main line at Holborn.

CHARING CROSS, EUSTON AND HAMPSTEAD.—The difficulty of getting from the South Eastern terminus at Charing Cross to the London and North Western terminus at Euston (now connected by a railway omnibus service) suggested the construction of this line. The lines are in course of construction, and when completed will form the connection mentioned, and also extend from Euston to Camden Town, where one branch will run to Kentish Town and Highgate Hill, and another to Hampstead and Golder's Green. It will connect up the Midland, North Western and South Eastern Railways. It is anticipated that the railway will be opened in June, 1907.

Parliamentary powers have been obtained or are being applied for to construct additional "tube" railways to nearly every part of London and the near suburbs not already opened up by underground lines, but as these undertakings have not yet taken practical shape, they do not come within our survey.

When the six railways, of which details are given, are completed the total amount expended will be nearly twenty-five million pounds. The following table summarises the amounts as given

by the last half-yearly reports of each company, with the approximate cost per mile and equipment. The last column is interesting, but varies considerably owing to the vast difference in the value of the land the railways pass through. Hence the much lower cost of the City and South London line, which is the only one at present running to any distance outside the heart of the Metropolis.

| RAILWAY. | Mileage. Miles. | Mileage. Chains. | Amount expended to June 30, 1906. | Approximate cost per mile. |
|---|---|---|---|---|
| City and South London | 12 | 70 | £2,896,373 | £222,000 |
| Central London | 6 | 34 | 3,907,285 | 600,000 |
| Baker Street and Waterloo | 3 | 10 | 2,818,448 | 939,000 |
| Great Northern and City | 2 | 57 | 2,324,541 | 774,847 |
| Great Northern, Piccadilly and Brompton | *7 | 72 | 5,738,240 | †900,000 |
| Charing Cross, Euston and Hampstead | *8 | 18 | 4,370,879 | ‡721,000 |
| Totals | 41 | 21 | £22,055,766 | £607,820 |

* Nearing completion. † Estimated further expenditure, £1,467,760. ‡ Estimated further expenditure, £2,397,121.

It has already been shown by the results attending the simultaneous development of these underground railways with the improved methods of locomotion overhead, that the increase of traffic facilities in the Metropolis do not tend to reduce the traffic by any particular routes; and the fact that many millions more passengers are being carried underground, whilst the streets are just as crowded as before the "tube" railways were built, goes to prove the truth of the old axiom that traffic facilities beget traffic. Twenty years ago the average passenger journeys of the people of London was eighty, to-day it is one hundred and seventy. Yet we still lag behind the average journeys of other large cities. In New York it is three hundred, in Berlin two hundred and seventy, and in Paris two hundred, so there is scope yet for the development of additional travelling facilities before London is as fully equipped as other leading cities. The following table indicates the total number of passengers carried since 1901 on the different lines:—

| RAILWAY. | Years. 1901 | 1902 | 1903 | 1904 | 1905 | 1906 |
|---|---|---|---|---|---|---|
| | | | | | | (*To June* 30 *only.*) |
| City and South London | 12,896,628 | 19,069,319 | 18,222,512 | 17,628,833 | 17,270,074 | 9,045,120 |
| Central London | 41,188,389 | 45,305,110 | 44,953,988 | 44,875,547 | 44,731,501 | 22,336,489 |
| Great Northern and City | — | — | — | 8,821,289 | 14,911,017 | 8,087,740 |
| Baker Street and Waterloo | — | — | — | — | — | *3,006,276 |
| Total Passengers | 54,085,017 | 64,374,429 | 63,176,500 | 71,325,669 | 76,912,591 | 42,475,625 |

* Sixteen weeks only.

It will be seen from the above figures that although there have been two new lines opened since 1904, the number of passengers carried on the existing lines do not show any decrease. Estimating the passengers carried in one year by the Baker Street and Waterloo Railway on the basis of the sixteen weeks' figures, we find that passengers are being carried on the twenty four and a half miles in operation at the rate of 4,800,000 per mile per annum. Accepting this as a rough working estimate, we arrive at 196,800,000 as the number of passengers that will be carried by the present system of six underground "tubes" when completed and in working order. Yet there are no signs at the present time of reduction in the number of passengers who use the road services, the falling off in the number using the horse omnibuses having been more than compensated for by the numbers making use of the many motor vehicles. It is quite clear, therefore, that Londoners are travelling more since they have had the increased facilities.

A striking example of the facilities now afforded is shown by the fact that it is possible—or will be possible within a few days of this article appearing in print—to descend to the City and South London Railway at Clapham Common and proceed by "tubes" to the City, thence by subway to the Central London line and thus to Oxford Street, by subway to Baker Street and Waterloo line and thus to Paddington, by subway to Metropolitan Electric railway and thus to Gloucester Road, by the Great Northern, Piccadilly and Brompton line and thus to Finsbury Park, returning by the Great Northern and City line to Finsbury Pavement, and back by City and South London line to Clapham Common, having been north, south, east and west of Charing Cross without once coming to the surface, whilst the total expense would be about a shilling. The journey would occupy little more than an hour, as against three hours a few years ago.

HERBERT H. BASSETT.

EXCLUSIVE of quasi-military bodies whose functions are essentially those of police, the land forces of the British Empire may be said to include the troops maintained by the United Kingdom in the British Islands, and in the Indian Empire; the Indian Army proper; special Colonial corps serving at the expense of the Imperial Government; and those retained primarily for their own local defence by the great self-governing Colonies.

In treating of the British military system the purpose of this article will be to describe in some detail so much of that system as pertains more especially to the United Kingdom, to give a brief account of the Army in India, and to confine allusion to the purely Colonial forces within narrow limits.

The British military system differs fundamentally from the systems adopted, in many cases as a result of disastrous experience, by the other Powers of Europe, and by Japan, the great Power of the Far East. In so far as the word "system" implies method, order, regularity, and homogeneity, it is probably correct to say that Great Britain has no military system.

We possess unrivalled resources both of *personnel* and *matériel*, and several forms of machinery for the raising and maintaining of armed forces; but these machineries, operating without co-ordination or common settled purpose, are incapable of organising our resources in a manner ensuring a prompt, effective, or direct response to the call of serious war.

Our armed strength embraces a veritable mosaic of components put together at various times and in divers manners, each designed with the particular object of meeting the particular need of a particular moment.

Inevitable changes, the fruits of development, have not been permitted to exert their legitimate influence upon our military system, which to-day is complex, whereas the essence of a sound system is simplicity; heterogeneous, whereas the utmost attainable degree of homogeneity is a vital feature; full of uncertainties and of possibilities (too often reckoned as certainties), whereas the elimination of all that is doubtful is a prime object of military organisation; inordinately costly, whereas the size of modern armies calls imperatively for cheapness.

Before alluding to the forces themselves, it seems desirable to outline the methods by which these forces are governed. At first sight it might appear more logical to detail the methods by which the forces are raised, but save for certain enactments that have long been in abeyance and are likely to remain so, English law is silent as to the raising of troops, whilst it is eloquent on the subject of their control.

### The Military Code.

Parliamentary control is so complete as to extend to the *annual* giving of Parliamentary sanction to the existence of a Regular Army, a process accomplished by the passing of the *Army Annual Act*, whose preamble, following ancient custom, expressly states that, "Whereas the raising or keeping of a standing Army within the United Kingdom *in time of peace*, unless it be with the consent of Parliament, is against law, . . . and whereas it is considered advisable to maintain a force of . . . therefore . . . .," &c.

The *Army Annual Act*, therefore, legalises the maintenance for the ensuing twelvemonth of a prescribed force of regular troops, at the same time renewing the operation of the Army Act (44 & 45 Vict., c. 58) for a like period, and effecting any necessary amendments in this the Code of Government of persons subject to military law. It also fixes the prices to be paid for billets during the year.

The *Army Act* itself is divided into six parts, dealing with (1) discipline, (2) enlistment, (3) billeting and impressment of carriages, animals, or vessels for military service, offences and punishments in respect of the foregoing, (4) supplemental provisions, (5) application of military law to the several categories of troops, saving provisions and definitions, and (6) schedules relative to oaths, billeting, impressment, &c.

*Rules of Procedure*, made by the Secretary of State on behalf of the Crown, under the authority of the Army Act, lay down in great detail the course and operation of military justice, courts-martial, courts of inquiry, &c.

Throughout the Military Code the salient principle is insisted upon, which prescribes that the officer and soldier remain subject to the ordinary law as any other citizen, civil obligations being limited only in so far as they may conflict with an engagement to serve the Crown in arms. The individual officer or soldier receives no especial consideration, and enjoys no personal privilege as such, save exemption from county, municipal, and jury service, some minor concessions as regards postal charges and the power of making a nuncupative will on active service.

The following are subject to military law at all times:—

(1) All officers and men of the Regular Army on the active list.
(2) Officers of Militia and of Imperial Yeomanry (if commissioned after August 18, 1901).
(3) Officers and men of Colonial Forces maintained at the expense of the Imperial Government.

The following are subject only on the occasions named:—

(1) Regular officers, not on the active list, but employed in military duty.
(2) Officers and men of the Royal Marines when not borne on the books of a ship.
(3) Officers of Volunteers, when in actual military service, ordered on duty with their own consent, attached to troops already subject, and when in command of men subject.
(4) Non-commissioned officers and men of Army or Militia Reserve, when engaged in preliminary drill or training, attached to troops already subject, embodied by Proclamation, or called out in aid of civil power.
(5) Non-commissioned officers and men of Imperial Yeomanry, when at training, attached as above, embodied, or voluntarily assembled in aid of civil power.
(6) Non-commissioned officers and men of Volunteers, when training with or attached to troops subject, when on actual military service. In every case other than actual military service, previous warning must be given of the liability incurred, and opportunity offered for abstention from the duty involving subjection to military law.

In addition, persons not belonging to the Forces, but permitted or directed to accompany

them in the field, are subject to military law, as also are specially raised troops, or the forces of a Colony, when employed in conjunction with Regular Army.

Natives of India, however, are always governed by Indian military law and not by the Army Act.

### Government.

*The Sovereign* is the supreme head, whose signature is appended to the commission of the officer, and to whom the soldier on attestation swears to render faithful service.

The *Military Directorate* comprises the *Army Council*, constituted in accordance with the recommendations of Lord Esher's Committee, by Letters Patent, dated February 6, 1904, and composed of three Civil and four Military members, who, in their individual capacity, superintend each a Department of the War Office, administer the votes allotted thereto, give effect to decisions arrived at in Council, and bring forward such questions as require the decision of superior authority. Collectively, the Council deals with general military policy and preparation for the eventuality of war.

1. The Secretary of State for War is the constitutional adviser of the Crown in Army affairs, but our constitutional practice has never in recent years admitted a soldier to the office.

2. The Chief of the General Staff (1st Military member) is charged with the war training and education of the Army, and with the plans of possible warlike operations.

3. The Adjutant-General to the Forces (2nd Military member) deals with the organisation, discipline, and schools of the Army, administers the Medical Service and the Auxiliary Forces, and is responsible for the mobilisation for war.

4. The Quartermaster-General to the Forces (3rd Military member) deals with matters of transport, supply, railways, movements and quarterings by sea and land, remounts, equipment and Ordnance stores, contracts, and administers the veterinary service.

5. The Master-General of the Ordnance (4th Military member) is concerned with armaments, Ordnance factories, fortifications, barrack maintenance, custody of War Department lands and ranges, the various technical committees on weapons, explosives, &c.

6. The Civil member (Parliamentary Under-Secretary of State) sits in Parliament (in the present Government in the House of Lords), administers barrack construction, the non-effective votes, and the Army Chaplains' Department.

7. The Finance member (Financial Secretary) prepares estimates, examines accounts, and controls the cash transactions of the Army.

Each Military member, as also the Civil and Finance members, is assisted in the administration of his Department by directors, assistant-directors, and staff officers dealing with the several sub-heads above mentioned.

The Inspector-General of the Forces is charged with the personal inspection of the Army, and reports to the Army Council the practical effects of their policy, as shown by the efficiency of the various branches.

The Naval Adviser to the Army Council forms a link with the Admiralty, and assists in co-ordinating naval and military preparations.

The Judge-Advocate-General reviews proceedings under military law, thus ensuring that accused persons brought before military courts do not suffer through any misapprehension of legal intricacies.

The Defence Committee of the Cabinet is not an executive, but a purely consultative and advisory assemblage sitting under the presidency of the Prime Minister, collecting and collating the information, naval as well as military, which must be possessed by the statesmen responsible for the guidance of national policy. Its composition is indefinite, special summonses being issued for each meeting. There is a small permanent Secretariat, whilst expert opinion, representative of naval, military, Indian and Colonial interests, is bidden as may be necessary.

### The Forces.

A recapitulation of the Forces of the Crown written at the present moment must suffer from the fact that many of their components are once more about to be committed to the melting-pot of reform. So far, however, as the home establishment is concerned, there are four principal categories of troops, each separately raised, governed, maintained, and trained by a distinct machinery which competes with the other three machineries for the able-bodied recruit.

*The Regular Army* is charged with the duty of maintaining the permanent garrisons at home and abroad, of policing the Empire, providing the bulk of the first forces to be employed in warfare oversea, and training the numerous classes of second-line and third-line forces. It may be regarded as a small, highly-trained professional Army, itself numerically inadequate for the tasks it may be compelled to undertake without substantial and continuous reinforcement, provision for which is still in the nebulous stages of organisation.

The Regular officer and soldier are, by the conditions of their service and engagement, available for duty in any quarter of the globe, though in practice employment in certain of the more conspicuously unhealthy climates (*e.g.*, the West Coast of Africa) is restricted during peace to volunteers for special service. As regards the soldier in particular, the conditions of enlistment and engagement vary as between the several branches and also from time to time in relation to the exigencies of recruiting. When this languishes, physical standards are of necessity relaxed. When authorised establishments are attained, the influx of recruits is checked by the imposition of an enhanced standard. The total legal period of first engagement being twelve years, its division into periods of Colour and Reserve service is a matter of prime importance, for here peace and war requirements conflict in a most perplexing manner. Peace considerations call for the maintenance of sufficient men bound to a long term of Colour service, which alone can justify on economic grounds their allocation to our various oversea garrisons and forces of occupation by obviating the necessity for reliefs at short intervals, whilst preparation for war imperatively demands the building-up of as strong a Reserve as possible, by passing through the ranks of the active Army the maximum numbers that can be trained by short periods of Colour service.

Attempts to reconcile matters have hitherto taken the form of periodical changes in the terms of enlistment, each resulting in the balance taking too decided a turn in one or the other direction, so that periods of acute difficulty in

finding foreign drafts have alternated with periods of Reserve starvation.

Again, the age at which recruits are accepted is a most significant factor, a consensus of opinion agreeing that twenty years is the minimum at which the young soldier is constitutionally capable of active service, whilst this age is all too young for service in tropical climates. We are compelled, by the conditions imposed by the voluntary system, to accept our recruits at eighteen years, which implies the presence with the Colours of a high proportion of immature *personnel*, the necessity of the home establishment making large demands on the trained Reserve to effect mobilisation, the consequent non-availability of that Reserve for its true function of maintaining the establishments in the field, and a host of concomitant drawbacks, not the least of which is the fact that very many recruits, never having attained proficiency at a trade or employment previous to enlistment, suffer accordingly when transferred to the Reserve and obliged to compete in the labour market with men who have never incurred any such obligations.

Owing, too, to our entire reliance upon voluntary engagement, and to the competition for recruits already noticed, recruiting for the Regular Army (as, indeed, for the other branches) is a quite unstable quantity.

Whilst requirements over a given period of peace-time can be forecasted with tolerable accuracy, no authority can foretell either the number or the standard of recruits who are likely to offer themselves. It is true that the figures of recent years show a remarkable constancy, but there is nothing approaching certainty, no assurance of continuity; and any pronounced increase of oversea responsibilities, any slackening of recruiting consequent upon improved conditions in the trade and employment of the country, is sufficient to upset all estimates.

Two remedies, and two alone, are applicable in the case of a recruiting deficit. An increase of inducements must be effected in the direction of extra pay, &c., a method usually, but by no means assuredly, effective for a time. But such increases tend to swell expenditure to an alarming degree, present no aspect of finality, and cannot be reconsidered after producing their effect. The alternative is a reduction of obligations to meet altered conditions, a policy that may have the disastrous effect of conjuring up fresh series of yet more onerous obligations, as has been exemplified in the recent unrest in Natal, Egypt, and elsewhere. In all probability, too, the reduction and abandonment of garrisons in South Africa, Canada, the West Indies, Malta, &c., are due at least as much to this policy as to any decided progress of these territories in capability for self-defence.

A determined effort to grapple with the problem was made by the late Conservative Government, which introduced a scheme of short-service enlistment concurrently with the engagement for longer terms of men who should be especially available for foreign service. The avowed object was the constitution of a short-service home Army, feeding the trained Reserve, side by side with a longer-service Army mainly employed oversea, whilst the whole were available for world-wide application in war.

This plan, which, in the opinion of many well qualified to judge, promised exceedingly well, has now been abandoned in favour of the policy of reducing obligations, whilst at the same time, by a logical process at present incomprehensible, the total establishment of the Regular Forces is materially reduced. Meantime, the feature of the Cardwell system, which requires the maintenance of foreign establishments by drafts from units on the home roster, is persisted in. The original intention was, as regards infantry, that for each battalion abroad a feeding battalion should be retained at home. The gradual growth of our foreign responsibilities has forbidden the maintenance of this precise equilibrium, which, moreover, is inapplicable to the other arms of the Service. One objectionable result is the annual denudation of the home units by the drafting of their best *personnel*, a result which invited the celebrated comparison with "squeezed lemons."

The Regular Army, then, consists of Cavalry (in numbers all insufficient); Artillery (horse and field, garrison and mountain); Engineers (field, fortress, railway, telegraph, bridging, ballooning, survey, &c.); Infantry (Brigade of Guards, territorial regiments, and non-territorial rifle regiments); Mounted Infantry (formed by *personnel* selected from the Foot battalions); Army Service Corps (Supply and Transport); Army Medical Staff and Corps, Army Veterinary Corps, Army Ordnance Department, Army Accounts Department, Pay Department and Corps, Chaplains' Department, and the several staffs of commands, districts, stations, and field units.

Of the above, only the sixty-seven regiments of territorial infantry possess a territorial organisation, a term implying a species of domicile in an assigned portion of the United Kingdom, within which the regimental headquarters, depôt, record office, &c., are located, and whence the bulk of its recruits are supposed to be drawn.

The Reserve consists legally of two classes—the one available for world-wide service, the other for the internal defence of the United Kingdom only. In point of fact the second class is extinct. Class I. consists of three sections, A, B, and D.

Section A comprises men of Artillery, Infantry, A.S.C., and R.A.M.C., who, by a special contract, are liable to recall if required for service without the United Kingdom when warlike operations are in preparation or in progress. They are not liable to serve for more than twelve months, unless some portion of the Reserve is in permanent service under Section 12, Reserve Forces Act, 1882. This section was constituted to avoid the inconvenience of calling out the Reserve as a whole in minor wars and punitive expeditions. Its numbers are limited to 5,000, and the rate of Reserve pay is 1*s.* a day.

Section B (with which is amalgamated the former Section C) is composed of men who have completed their period of Colour service or converted some portion of Colour service into Reserve service in accordance with regulations. Rate of pay, 6*d.* a day.

Section D (which it is proposed to extinguish) comprises men specially engaged for a period of four years at a time, to an age limit of 50 years, after completing their original terms. Rate of pay, 6*d.* a day.

Reservists are commanded by officers commanding grouped regimental districts in the case of infantry, and by officers holding ana-

logous commands in the case of the other arms and departments. They are liable to certain periods of military training, but this presents grave difficulties, since withdrawal from civil occupations for the purpose prejudices the men's interests, in view of the facts that very few employers recognise its necessity, whilst there are plenty of men available who have incurred no such patriotic obligations.

Reservists are liable also to be called out in aid of the Civil power on requisition made by Civil authority.

Calling-out for permanent service is effected by Proclamation of His Majesty in Council, in case of imminent national danger or of great emergency, the occasion being first communicated to Parliament, if sitting, or declared in Council and notified in the Proclamation if Parliament be not then sitting.

It remains to note that increasing difficulty is being experienced in obtaining officers for the cavalry (of necessity an expensive branch), whilst, though officers' general responsibility and duties have been greatly increased of late years, they have shared in none of the concessions made to the rank-and-file as regards increase of emoluments, &c., these remaining, so far as the commissioned ranks are concerned, at figures fixed somewhere about the time of Queen Anne.

From the foregoing it is clear that even in times of peace our military problems are such as to occasion grave anxiety. This feeling of uneasiness is much aggravated when the condition of the Auxiliary Forces is reviewed, it being borne in mind that these represent our only available reservoir for the expansion of an insufficient Regular Army.

*The Militia.*—An adequate account of the history and constitutional origin of the Militia would exceed the limits of this article. Nevertheless, the subject is one of great importance, as embodying the fundamental principles of British law regarding military service. A study of "Clode's Military Forces" (2 vols., 1869), and of the numerous Acts dealing with the Militia, will repay the student.

The Militia of to-day is the General or Regular Militia, representative of the early Trained Bands, and has, since 1852, been raised exclusively by voluntary enlistment, though the machinery for obligatory service, in the form of a ballot in each county for a prescribed quota, is still held in abeyance, being annually suspended by operation of the Expiring Laws Continuance Act.

It is improbable in the extreme that these latent powers will ever again be applied, if only for the reason that the forces they would call into being would respond to few modern requirements. The age limits for men liable to the ballot are 18 and 30 years, the term of service is five years, and counties are liable to a fine of £10 for each man of the quota deficient. Substitutions are permitted, and there are certain classes of exemptions. It is significant that in the past the great majority of persons balloted for availed themselves of the privilege of finding a substitute.

A local Militia, representative of the still more ancient general levy, might still legally be raised, but is now entirely in abeyance. Its law provides for the application of the ballot on lines similar to those of the general Militia, but the period of service would be four years, no substitution is permitted, there are fewer exemptions, and the fine is £15 for each man deficient.

The maximum period of preliminary training provided for is six months in the case of each category, whilst the original annual training was fixed at a maximum of fifty-six days, though this has recently been extended to meet the needs of such recently-raised Militia Corps as the Field Artillery (Lancashire).

The existing Militia Force includes the above Corps (which contains an important Regular element), regiments of Garrison Artillery, Engineers, Infantry, and Medical units, with a strictly "county" organisation, affiliated to corresponding branches and units of the Regular Army, the closest connection being that between the Line and Militia battalions of territorial Infantry.

The first salient characteristic of the Militia is that of not being available for service without the United Kingdom, save by its own consent, given by each unit on each occasion. It is proposed to make a radical alteration in this respect, by rendering the Militia, as a whole, available for exterior application by constitution; indeed, it is intended to rely upon troops trained "on a Militia basis" for many of the non-combatant and Auxiliary Services of our Field Army. The proposition is at present viewed with some misgivings, which more intimate acquaintance may perhaps dispel.

Amongst the disabilities peculiar to the Militia may be mentioned the difficulty of attracting desirable recruits, and of retaining them when obtained, since many make Militia service a stepping-stone to enlistment in the Regular Army; the serious and increasing difficulties experienced in obtaining and retaining suitable officers, many passing in a similar way into the Regular Service; the difficulty of educating both officers and N.C.O.'s to the needful extent; and the lack of cohesion, discipline, and general military proficiency due to intermittent periods of service. Perusal of the evidence taken by the Duke of Norfolk's Royal Commission on Militia and Volunteers is strongly recommended.

The Militiaman enlists for a period of six years, with the option of re-engaging for periods of four years at a time to the age of forty-five. The recruit is instructed either at the territorial or corresponding depôt, or else with the other recruits of his unit at "preliminary drills" held previous to the annual training. The Force is both armed and clothed by Government, and all ranks receive pay whilst performing military duty. The various units differ very widely in strength, physique, and efficiency, owing to the variation in conditions pertaining to their several staple civil occupations, recruiting facilities, &c. Unfortunately, too, former misconceptions with regard to national defence have led to the creation of certain units (notably Garrison Artillery) in excess of modern requirements, whilst the Force is without staffs or transport, and important specialist branches—such as visual signalling—are in a very rudimentary state of development.

Each unit has a permanent staff of Regular officers and N.C.O.'s, charged with instruction, maintenance, and recruiting both for the unit and for the Regular Army.

With a view to enhancing efficiency the experiment is to be made of drilling the recruits of twenty selected battalions for six months during the present winter under their own Militia officers. These battalions will train for

six weeks in 1907 (*i.e.*, for considerably longer than the normal period), and the experiences gained will probably affect the future of the Force very considerably.

The Militia Reserve—now proposed for extinction—is composed of certain classes of ex-Regular soldiers, together with men who engage therein after completing ten years' Militia service. It was created but recently as a Reserve for the Militia, whereas the old Militia Reserve which it replaced was a Reserve of serving Militiamen bound to join the Regular Army on summons.

The Militia may be embodied in case of imminent national danger or great emergency by Proclamation of His Majesty in Council, the occasion being first notified as in the case of the Army Reserve. Parliament must be summoned to meet within ten days of the above Proclamation.

The establishment and strength on October 1, 1905, were :—

| | Establishment. | Strength. | Deficit. |
|---|---|---|---|
| Militia of the U.K. ... | 132,408 | 92,672 | 39,736 |
| Militia Reserve ..... | 7,500 | 7,657 | 157 (Surplus) |
| Militia of Channel Islands, Malta, and Bermuda ..... | 5 744 | 5,168 | 576 |

N.B.—Service in the Militia of the Channel Islands is legally obligatory upon their inhabitants. Clergy, members of learned professions, and persons in Government service are exempt. The Bermuda Militia is available only for local defence, and is maintained by voluntary engagement at the cost of the Imperial Government.

The *Imperial Yeomanry*, as reorganised since the conclusion of the war in South Africa, constitutes practically a Militia cavalry, maintained by voluntary enlistment on a territorial basis ("county," save in the case of the Irish and certain Scottish regiments).

Like the Militia, the Imperial Yeomanry may be embodied in case of national danger; it may also be called out, and may voluntarily assemble, in aid of the Civil Power or for the duty of escorting the Sovereign.

Generally speaking, the enactments of the Militia Law apply also to the Imperial Yeomanry, but there is no "preliminary drill," and the period of annual training is only fourteen to eighteen days. As in the Militia, each regiment is provided with a permanent staff of a Regular adjutant and Regular N.C.O.'s.

Unlike the Militia, however, the Force is provided by Government only with arms, ammunition, and certain indispensable equipment, whilst a Capitation Grant of £3, £2, or £1 is paid into the corps funds annually in respect of each efficient (*i.e.*, in respect of those officers and Yeomen who are serving on the last day of annual training, and who have completed the following courses of instruction since the training previous : —(1) Recruits' drills, twenty attendances ; or (2) squadron training, ten attendances ; also (3) musketry training and practice ; and (4) regimental training for sixteen days. The Yeoman enlists for a term of three years, with option of re-engaging for periods of one year at a time to the age of forty-seven. He may purchase his discharge for £1.

The Force as a whole does not experience quite the same disabilities as the Militia, finding considerably less difficulty in attracting good recruits, and including in its commissioned ranks many officers who have served with distinction in the Regular Army. Thus establishments are better maintained than in the other Auxiliary branches, but the periods of instruction are all too short for the attainment of real proficiency in mounted duties, whilst the number of rank-and-file in a position to find and use their own horses (as was once almost universally the custom) shows a marked diminution. The consequent incidental expenses of clothing equipment and horse-hire are, therefore, serious, and probably no regiment could be maintained were it not for the liberality of its own officers. The Imperial Yeomanry may then be described as the most efficient of the Auxiliary Forces, with an excellent *personnel* capable of seconding our inadequate Regular cavalry in a serious manner ; indeed, it is now proposed to rely upon it for many of the less exacting mounted functions (divisional mounted troops, &c.) hitherto allotted to Regular cavalry of the Field Army.

At the same time it is proposed to introduce liability to foreign service in time of war—a step which would assuredly raise the status of the Force very appreciably. There is no Yeomanry Reserve.

The establishment and strength on October 1, 1905, were for fifty-six regiments of Imperial Yeomanry :—Establishment, 27,638 ; strength, 25,159 ; deficit, 2,479.

*The Volunteers.*—Much regrettable controversy has of late centred around the future of the *Volunteer Force*. As in the case of the Militia, any sufficient historical notice is impossible.

The Force is, of course, maintained by purely voluntary engagement, is practically unpaid, and is available by its constitution for the internal defence of the United Kingdom alone.

Seeing that the total authorised establishment of the Imperial Forces amounted to 909,123 men in 1905, of whom no less than 341,822, or 37·6 per cent., were Volunteers, the student of our military system (who will already have learned that our chiefest obligations lie beyond the seas, whilst invasion of the British Islands is presumed impossible owing to our command of those seas) may well inquire how it is that so important a force is maintained upon a basis that *ipso facto* excludes it (as a force) from participation in the more probable conflicts that may confront us. He will also notice that the Volunteer Force differs from the Landsturms and Landwehrs of other Powers, in that these are mainly composed of men who have passed through the active Army and the several categories of Reserve, whereas the Volunteer Force is recruited *ad hoc*, in competition with the Regular Army, Militia, and Yeomanry.

Some historical notice is clearly called for.

Originally accepted as individuals in aid of the balloted Militia, it was not until about 1794 that the Volunteers commenced to develop an organisation of their own.

Enrolment in a Volunteer corps thenceforth conferred immunity from the more onerous conditions of Militia service, and it is rational to suppose that much of the rapid growth that

characterised the movement during the early years of the nineteenth century (when over 400,000 were mustered) was due to this feature of the panic legislation precipitated by the threat of Napoleon's invasion.

It is noteworthy, too, that the limited sphere of utility of the Force caused it to be regarded in certain quarters as a danger rather than as a safeguard, in that its existence tended to starve the other and more highly-trained Forces available for offensive action, even then recognised as the soundest defence of all. It is at least certain that the totals disposed of by Wellington in the Peninsula bore but a sorry proportion to those nominally under arms in the United Kingdom. And the Peninsula was a decisive point, whereas the United Kingdom for the time being was an indecisive point. Nor was Wellington at all sanguine as to the capability of the home forces to expel Napoleon, did he but succeed in landing.

In any future review of our military system as a whole this same characteristic of the Volunteer Force (*i.e.*, its non-availability for oversea wars, save as a result of tedious formalities and reorganisations) must claim serious attention, the more so as the Force admittedly contains some of the best *personnel* furnished by our resources. Nothing can be more prejudicial to the well-being and efficiency of a military body than to restrict the possibility of its active employment to a remote contingency, whilst excluding it as an organisation from all more probable contingencies. The more efficient and devoted the individuals composing the Force, the graver the objections to thus locking it up and of excluding its proffered services.

From 1814–1858 the Volunteers languished, together with British military ardour in the abstract. A revival was brought about in the latter year by dread of another invasion and by a misapprehension of the theories of insular defence.

To-day the force is subject to the Volunteer Act of 1863 (26 & 27 Vict., c. 65), as amended by subsequent enactments. Viewed from the standpoint of the military administrator, this Act contains many objectionable features, making inadequate provision for discipline and serious training, besides burdening the Volunteer commander with financial responsibilities out of place in a combatant organisation, conflicting directly with military requirements, and constituting a trust that no combatant officer should be called upon to bear.

Volunteers reorganised in corps of heavy and Garrison Artillery, Engineers, Infantry, Army Service and Medical units. These are affiliated to the corresponding branches of the Regular Army and Militia, but often the connection is ill-maintained owing to the distance at which corps are located from a military centre. The excellence of much of the *personnel* has already been alluded to, but unfortunately the standard of physique constituting the minimum for enrolment has in the past been low, ill-defined, and occasionally not insisted upon, with the result that a serious proportion of the men are not considered capable of enduring military fatigue, for which their civil occupations are often but an indifferent preparation.

Consequently, the standard of physique, like the standard of technical proficiency, varies very greatly. Moreover, the units themselves have not hitherto been raised upon any definite plan, so that Garrison Artillery corps, for example, are maintained in excess of requirements, and often at a prohibitive distance from facilities for exercise, whilst some units are composed largely of men who are, in fact, already serving the State in capacities whose importance would be enhanced by war (*e.g.*, railway, dockyard, and Ordnance factory *employés*).

Each unit includes a permanent staff of Regular N.C.O.'s and a Regular adjutant, recruits for itself, and largely sets up its own standard of discipline, which, since the Force is subject to military law only on the rare occasions already noted, depends very largely upon individual goodwill, *esprit de corps* (often very high), supported by "Corps Rules" made by the unit and approved by the Secretary of State. These Rules may inflict fines for breaches, but such penalties, though recoverable by legal process as civil debts, are not generally relied upon.

The Volunteer enrols for no fixed term, and may claim discharge on giving fourteen days' notice and discharging any liability under his corps rules.

Government provides arms and ammunition only, besides certain allowances for maintenance, including a Capitation Grant (maximum 35*s.*) annually in respect of each efficient member, allowances for camp expenses, and payment at Army rates to officers attached for instruction to schools and Regular troops. Many incidental expenses, including the provision of uniform and equipment, must be met from corps funds, which accordingly are dependent upon contributions received from officers, men, and well-wishers.

Until recently the standard qualifying for "efficiency" was a low one, consisting of only twelve hours' military instruction in the year, with attendance at annual inspection. Soon after the South African War an attempt was made to raise the standard by requiring of the recruit forty-five hours' instruction, of the trained Volunteer fifteen hours, besides attendance at the annual inspection, and at a camp (with his corps, another corps, or attached to a Regular unit) for one week during the training season.

This last requirement in particular was deemed prohibitive by many whose civil vocation did not admit of such an absence, and much unrest ensued. Political pressure was brought to bear, and the objectionable feature has now been removed. So, too, the thorough medical examination, as undergone by the Regular Army recruit, has had to be dispensed with. Whether these concessions make for military efficiency is open to question.

The especial disabilities under which the Force labours, in addition to those alluded to, are:—The increasing difficulty in finding officers with sufficient leisure to first study military art, and then impart it to their men; the difficulty of inculcating responsibility and leadership in the non-commissioned ranks; of obtaining facilities for gun and rifle shooting within practicable distance of headquarters; and of carrying out the military training of the men on any prearranged and systematic plan (attendances may be made at any period of the year, and attendance at any given time is dependent upon the convenience of the individual).

The equipment of the Force is irregular and in many respects unsatisfactory, and provision for transport inadequate. Mobilisation would of necessity present many difficulties, which could

only be overcome by improvisation on the spot. A good deal, however, is being done in the direction of organising the infantry battalions into brigades, provided with at least the nucleus of indispensable staffs. To the command of these brigades ex-Regular and selected Volunteer officers are being appointed, and considerable benefit must ensue.

The establishment and strength on October 1, 1905, were :—

| | Establishment. | Strength. | Deficit. |
|---|---|---|---|
| Volunteers of Great Britain | 341,822 | 252,360 | 89,462 |
| Volunteers of Bermuda | 319 | 171 | 148 |

There is no Volunteer Reserve, but members may continue in the Service to the age of fifty.

Some allusion is necessary to the valuable services rendered by the several Volunteer organisations improvised during the South African War, especially to the Volunteer companies formed and attached to their affiliated Line battalions in the field after a brief period of special preparation.

It would, however, be unsafe to draw inferences from that campaign as to the value of improvisation in general, as opposed to scientific preparation and organisation ; and this application of the Volunteer Force was not one for which previous provision existed.

*The Honourable Artillery Company of London* is representative of an ancient voluntary guild or association, incorporated by charter of Henry VIII. in 1537, for cultivation of the art of "artillery of long-bows, cross-bows, and handguns." It is not subject to the Volunteer Act, being provided for by special Royal Warrant, but the corps is included in the term "Volunteers, &c.," wherever appearing in the Army Act. Its establishment includes two batteries of mounted artillery and a battalion of infantry, but much difficulty appears to be experienced in maintaining the strength.

*The Colonial Corps*, maintained at the expense of the Imperial Government, include :—

The West India Regiment (serving in Jamaica and West Africa).
Indian Native Infantry battalions (serving in China, Mauritius, and the Straits Settlements).
The West African Regiment (Sierra Leone).
*The West African Frontier Force (North and South Nigeria, Gold Coast, Lagos, Sierra Leone, and Gambia).
*The King's African Rifles (Central and East Africa, Uganda, and Somaliland).
The Hong Kong and Singapore Battalion R.G.A. (at those stations).
The Ceylon-Mauritius Battalion R.G.A. (with detachments at each).
The West Indian Battalion R.G.A. (Jamaica and Sierra Leone).
The Sierra Leone Company R.G.A. (at that fortress).
The Royal Malta Artillery, the King's Own Malta Regiment of Infantry (2 battalions).
The Malta Militia Engineers (local companies
Fortress Engineers in Hong Kong and Sier
Leone).
The Bermuda Artillery Militia, and a sma
Bermuda Corps of Volunteer Rifles.

* Of the above, those marked with an asterisk are administered by the Colonial Office.

*The Forces in Egypt* include the British Arm of Occupation, recently reinforced in consequen of unrest, besides the native (Egyptian, Soudanes and Arab) Army proper, which is staffed ar officered by British officers.

The Egyptian Army includes six squadro of cavalry (four Egyptian, two Soudanese) ; fi batteries of field artillery (one of maxim) ; thr garrison companies ; camel corps (three co panies camels, one mules and ponies) ; fifte infantry battalions (nine Egyptian, six Soudanese an Arab corps of mounted infantry ; medica veterinary, ordnance, supply, railway, & services.

### Organisation of Home Army.

In the recent re-organisation of commands a staffs certain important principles conducive decentralisation and specialisation have be followed. The United Kingdom is divided in seven "commands," besides the London d trict, specially treated, viz. :—

| Command. | Headquarters. |
|---|---|
| Aldershot | Aldershot. |
| Northern | York. |
| Southern | Tidworth. |
| Eastern | London. |
| Irish | Dublin. |
| Scottish | Edinburgh. |
| Welsh and Midland | Chester. |

In the staff of each command the distin duties connected with (1) War training of Fie troops, (2) War training of Coast Defence troo and (3) Peace Administration, have been clea differentiated, the distribution of staff dut being based upon that obtaining in the Ar Council.

Thus, the General Officer Commanding-in-Ch of each command, with his general staff, is fre from routine and enabled to devote all energies to war training ; so, too, the Command of Coast Defences in his own sphere, whilst Major-General or Brigadier in charge of Admin tration is invested with extended powers, an Chief Accountant regulates finance, audits counts, and acts as a financial adviser.

Provision is made for the expansion of loc station, fortress, and district staffs when normal staff establishments mobilise with Field Army.

Commanders of Grouped Regimental Distri command and administer the regimental depo Reservists, and arrange for foreign drafts, besi carrying on the recruiting service, whilst offic in charge of records perform the duties su ciently indicated by their titles.

Specially appointed officers conduct the tra ing of non-brigaded Auxiliary units in the seve commands.

As regards the organisation of higher or units (Brigades, Divisions, Army Corps, &c. Regular troops, it is impossible to specify components of each by name or number, ow to the kaleidoscopic changes occasioned frequent movements in relief, exchanges station, &c. The method adopted is an org sation by "stations," "quarters," and e "barracks," the battalion at W. together w those at X, Y, and Z, forming the 4th Brig and so on.

Much of the thought now being devoted to home organisation takes the form of the preparation of an Expeditionary Force, to be ready for embarkation at short notice; and Mr. Haldane has recently announced his plans for this provision in the shape of a body some 154,000 strong, of whom 50,000 would be Regular (active) troops, 70,000 Reservists, and 30,000 (presumably for Auxiliary services only) supplied by forces "trained on a Militia basis." The weak points of the scheme are (1) the hard-and-fast prescription of numerical strength, which may be excessive for certain eventualities, wholly inadequate for others; (2) the high proportion of Reservists; (3) the doubt attaching to the term "Militia basis," to the value of troops thus instructed, and the certainty that some considerable time must elapse before even this dubious organisation is operative; and (4) the necessarily hazy methods of maintaining the strength of such a force in the field.

At the same time it is proposed to hand over much of the management of our Auxiliary Forces (apart from military command and training) to "County Associations" made responsible to the Civil Administration. The progress of any such experiment will naturally be watched with the keenest interest, but it must be confessed that its success is only problematic, in view of the fact that no military organisation worthy of the name can exist in the absence of legally constituted authority exercising an effective disciplinary control.

The provision, inspection, and outfitting of vessels for transport of troops oversea is in the hands of the Admiralty.

## The Army in India.

THE ARMY IN INDIA includes the British Forces, the Indian (Native) Army with its Reserves, a Volunteer Force, partly European, partly Eurasian, to which all employés of State railways must belong, the Imperial Service troops, and some corps of Border Militia, whilst several Native States also maintain Irregular Forces of no great value. The British Forces include representatives of all the Regular combatant branches at their best as regards physique and maturity of *personnel*, but (except as individuals for special duties) British Army Service and Departmental Corps do not serve in India in time of peace, India possessing a complete Departmental organisation of her own, and being in a fair way to become independent of the United Kingdom as regards *matériel* of war owing to recent development of her manufacturing resources.

The Native Indian Army is staffed and officered throughout by British officers, the native ranks being in all cases subordinate. It includes a numerous cavalry of high efficiency (in the opinion of many the most efficient troops for their cost in the world). Thirty-five out of thirty-eight regiments are maintained on the semi-feudal "silahdar" system, under which the individual trooper (*sowár*) owns his horse, uniform, equipment, tent, &c., provides half his own transport, builds his own barracks, and generally finds himself in almost everything except the arms and ammunition supplied by Government. Thus the regiments are largely self-supporting, whilst their deservedly high character is carefully upheld by confining recruiting to classes amongst whom military service is an honourable tradition.

The artillery of the Native Army has been restricted since the Mutiny by reasons of policy, and consists solely of mountain batteries, with one corps of Frontier Garrison Artillery. It has attained a high standard of proficiency, and possesses an extraordinary record in the many frontier campaigns of recent years.

The infantry is considered to include a proportion of units recruited from classes which, being no longer martial by nature, can scarcely be made so by training, and steps are being taken to remedy this defect. Viewed as a whole, however, the native infantry is excellent in quality, distinguished by loyalty and devotion, and of proved value in war. The several corps of sappers and miners, under British engineer officers, constitute technical troops of unusual adaptability. The Indian medical service provides the medical and sanitary establishments of the Native Army. Transport and supply have of late been much improved, whilst the other departmental services are specially adapted to the peculiar circumstances of the country.

The weak point of the Native Army is the paucity of trained Reserves, the majority of enlistments being for long terms; moreover, the infinite varieties of race and religion, characteristic of India, compel an organisation in conformity therewith. Thus some units are composed entirely of men of one race and belief, whilst in others, companies, or even smaller sub-divisions, are constituted in this manner.

Until recently, another most serious defect of the Indian military system has been the lack of higher organisation, the disposition of the various corps not lending itself to the permanent formation of the higher units required for war, in particular for the eventuality of attempted invasion by a European Power.

Under the tonic *régime* of Lord Kitchener much has been done to rectify matters, the various commands have been re-organised, brigades, divisions, and Army Corps trained by their war-staffs and stationed at points most suitable for rapid mobilisation and concentration. Much, however, remains to be done before finality is attained.

The present distribution is as follows:—

| Command. | Headquarters. | Divisions. | Independent Brigades. |
|---|---|---|---|
| Northern (Army Corps.) | Rawal Pindi | 1st (Peshawar) | Kohat Brigade. |
| | | 2nd (Rawal Pindi). | Derajat Brigade. |
| | | 3rd (Lahore). | Bannu Brigade. |
| Western (Army Corps.) | Poona | 4th (Quetta) | — |
| | | 5th (Mhow). | Aden Brigade. |
| | | 6th (Poona). | |
| Eastern (Army Corps.) | Naini Tal | 7th (Meerut) | — |
| | | 8th (Lucknow). | |
| | | 9th (Secunderabad). At present classed as independent, but ultimately to be included. | |

10th (Burma) Division, independent, headquarters Maymyo.

The principal recent reforms include: (1) The organisation of nine districts, each containing a complete cavalry brigade and infantry division, together with the troops necessary for the maintenance of internal order in the absence of the mobilised field army; (2) the grouping of these districts to provide three Army Corps available for immediate action; (3) the closest possible concentration of component units for facilities of training and movement, consistent with due regard to health and well-being; and (4) the permanent provision of the necessary staffs.

The Imperial Service troops are raised and maintained at the expense of the rulers of Independent native States, but are at the disposal of the Indian Government in time of war.

They include cavalry, mountain artillery, sappers, infantry and transport corps. British officers are lent for training, and there is a British inspecting staff.

The Border Militia are a comparatively new formation, under civil control, their functions being to police the ever-anxious borderlands, especially the main highroads of the North-West Frontier, for which purpose the tribesmen of the neighbourhood are enrolled, and in their regular pay and prestige find a solace for gains ill-gotten in the past by brigandage and blackmail.

The Army in India, to which onerous campaigns are an ever-imminent possibility, is a standing monument to the military genius of the British nation, which here finds its freest outlet, and a remarkable proof of the capacity of the British officer to win and retain the whole-hearted esteem of Eastern warrior-races.

## The Self-Governing Colonies.

THE COMMONWEALTH OF AUSTRALIA.—Military organisation is essentially democratic, and in the past politics have been found to interfere unduly in details. The State Forces were amalgamated by Defence Acts of 1903–4, the war in South Africa having kindled interest in military affairs. Military policy is guided by a Council of Defence, administration carried out by a Military Board. Commonwealth troops are available for external operations only by individual consent, and comprise the following categories:—

(1) *Permanent Forces* include general and instructional staffs, artillery, engineer corps, and certain departmental services. Recruited by voluntary engagement, age 20–30, for performance of 3 years' service, and comparatively highly paid.

(2) *Citizen Forces* include (*a*) *Militia*, forming the bulk of the Australian Army, paid for about 16 days' service per annum, recruited by voluntary engagement, age 18–35 years, for performance of 2 years' service, high rates of pay (8*s.* per day for a private soldier), period of training in each year (for light horse and artillery) 6 days' instruction, 8 days' camp, gunnery, or musketry course, and annual inspection; special corps somewhat longer. For infantry, 7 days' instruction, 4 days' camp, musketry course, and inspection. Capitation grant of 40*s.* per head up to maximum authorised establishment is paid to each commanding officer annually in advance for expenses of clothing and maintenance.

(*b*) *Volunteers*, unpaid in peace, recruited by voluntary engagement, age 18–45, with no definite period of service. Period of training in each year 8 half-day and 10 after-dark parades, musketry course, and annual inspection. Capitation grant, 30*s.* per head, plus 20*s.* for each efficient.

(*c*) *Reserve Forces*, composed of men specially engaged after satisfactory service in another branch, members of recognised rifle clubs, &c. Capitation grant to rifle clubs of 5*s.* annually in respect of efficient members.

(*d*) *Cadet Corps* (not available for active service): junior, composed of boys aged 12–14 at school; senior, of boys 14–19 not at school.

The "Citizen Forces" named provide (1) a *Field Force* of partly-paid Militia, available for service anywhere within the Commonwealth, organised in 6 brigades (18 regiments) of light horse, each with a battery of artillery, engineer section, supply column, ambulance, and veterinary department; and 3 brigades (12 battalions) of infantry, each with 3 batteries of artillery, half field company of engineers, supply column, &c. Peace establishments are small, about half the war establishment, but almost the full establishment of officers and N.C.O.'s is maintained.

(2) A *Garrison Force*, primarily for local or State defence, composed mainly of Volunteers (but paid Militia garrison, Thursday Island), organised as an infantry brigade in each State.

Approximate peace effective (1906):—Permanent Forces, 1,380; Militia, 14,500; Volunteers, 4,700; Rifle Clubs, 30,000; Cadets, 8,700.

Approximate war effect (Field Force only), 25,000.

Part IV. of the Defence Act provides that all male inhabitants of Australia, if British subjects, and having resided six months in the country, are liable to serve in the Militia, for which purpose they are thus classified in order of liability:—

(1) Males aged 18–30, unmarried or widowers without children.

(2) Males aged 30–45, unmarried or widowers without children.

(3) Males aged 18–30, married or widowers with children.

(4) Males aged 45–60.

A strong body of public opinion is in favour of introducing universal and compulsory service.

The following contingents were provided by Australia for service in South Africa (1) previous to the institution of the Commonwealth:—

(*a*) State troops at Australia's expense: 290 officers, 5,493 others, and 5,418 horses.

(*b*) State troops at Imperial expense: 323 officers, 5,765 others, and 6,649 horses.

(2) After the institution of the Commonwealth: 235 officers, 4,070 others, and 4,247 horses.

In all—848 officers, 15,327 others, and 16,314 horses.

Previously, in 1885, a New South Wales contingent, some 770 strong, had taken part in the Suakim Campaign, this being the first instance of the employment of Colonial forces in British wars.

THE DOMINION OF CANADA.—The military system of Canada is undergoing reorganisation, and may now be said to rest on a basis more satisfactory than in the past, when politics were suspected of playing a not unimportant part.

Control is vested in a Militia Council, constituted on the lines of the Imperial Army Council. Good progress is being made with staff and general organisation, but much remains to be done.

The forces consist exclusively of Militia, and include the following categories:—

(1) *Permanent Forces*, limited to an establishment of 2,000 in all, whose units form instructional schools for the Canadian Army. The *personnel* is enrolled by voluntary engagement for continuous service for 3 years, and forms the corps of Royal Canadian Dragoons, field artillery (2 batteries), garrison artillery, mounted rifles, and 5 depôts of Royal Canadian Infantry.

(2) *Active Militia*, comprising corps raised by voluntary enlistment for terms of 3 years, and cadres for corps raised by ballot. The peace establishment of each unit provides for a "peace training establishment," including the full allotment of officers and N.C.O.'s, with a proportion only of rank-and-file, a "war establishment," and a "duplicate" or "second-line" cadre for the training of a similar second-line unit. All officers and N.C.O.'s are obliged to attend peace training, but a percentage of the rank-and-file may engage for war service only.

The *Active Militia* units include 17 cavalry corps, 17 batteries of Canadian artillery, 83 battalions of infantry, with a few detached companies, and 6 regiments of garrison artillery, with 1 detached company.

(3) *Reserve Militia* (organisation in abeyance).

All males (with certain exemptions in time of peace) aged 18–60, being British subjects, are liable to serve in the Militia, and are classified in order of age and liability as follows:—

(1) Age 18–30, unmarried or widowers without children.

(2) Age 30–45, unmarried or widowers without children.

(3) Age 18–45, married or widowers with children.

(4) Age 45–60.

But all males capable of bearing arms are, without exemption, liable to serve in the *levée en masse*.

The ballot may be applied if voluntary engagements are insufficient to meet the needs of training or any emergency, but substitution is then permitted.

Period of annual training is from 12–30 days.

Cadet corps are liable to serve only in the *levée en masse*.

Approximate peace establishment: 4,900 officers, 41,100 others.

Approximate war establishment: 105,000 of all ranks.

Canada furnished over 4,000 of all ranks for service in South Africa.

CAPE COLONY.—The Defence Department is a branch of the department of the Colonial Secretary, but routine administration is carried out by a commandant-general assisted by a small staff.

The forces include (1) *Permanent troops*, including (*a*) the Cape Mounted Rifles, organised in 10 squadrons and an artillery troop; (*b*) the Cape Medical Corps. With these must be mentioned the Cape Police, mounted and dismounted. Recruits for the Cape Mounted Rifles are obtained by voluntary enlistment of British or naturalised subjects for periods of 5 years, with option of re-engaging for terms of 3 years. Rates of pay are high (5*s.* to 7*s.* 6*d.* for a private soldier), and special pay is granted for proficiency in Dutch and native dialects. (2) *Volunteers*, of whom the artillery corps are partly paid. There are 2 corps of volunteer field artillery (3 batteries in all), 1 corps of garrison artillery, 2 regiments of light horse, 2 of mounted rifles, 10 infantry battalions with cyclists, 6 mounted rifle clubs, and a volunteer medical corps, besides a small corps of naval volunteers.

Nominally, all males aged 18–50 are liable to military service, but no organisation for the purpose exists.

Approximate strength of Cape Mounted Rifles, 700 all ranks; Volunteers, about 10,000; Cape Police, about 2,000.

P. R. COLES.

## ATHLETICS.

AMATEUR athletics in 1906 were not notable for many great performances, although, naturally, great interest was aroused by the Third Olympian International Championships held at Athens in April. As will be gathered later on, British athletes did not meet with any great measure of success therein. At a meeting of the General Committee of the A.A.A. held in London on Jan. 20, Alfred Shrubb, of the South London Harriers, appealed against the suspension passed upon him by the Southern Committee of the Amateur Athletic Association for violation of the laws relating to amateurism, but unsuccessfully, and a very prominent figure thus disappeared from the world of amateur sport permanently. At the same meeting, with regard to the Olympic Games Committee's offer of 5,000 francs towards the expenses of British athletes to compete at Athens in April, the committee ruled that the same was a *bonâ fide* international competition within the meaning of the A.A.A. rule, and therefore the payment of the travelling and hotel expenses of competitors might be made, provided they were not paid direct to the competitors themselves; but a proposition that a representative team be chosen by the Association, and that a sum not exceeding £130 should be voted towards the expenses, was lost. The only cross-country event of the winter of 1905 that need be commented on here was the Oxford *v.* Cambridge contest decided at Roehampton on Dec. 9, 1905. Cambridge won by 22 points to 32, the first three men home being A. H. Pearson (Queens', Cambridge), A. R. Welsh (Trinity, Cambridge), and O. F. Huyshe (Keble, Oxford). Pearson's time—41 mins. 11 secs.—beat the previous record for the course by 66⅘ secs.; it was 42 mins. 17⅘ secs. made by A. R. Churchill (Cambridge) in 1904. The Southern Counties C. C. Championship (10 miles), decided at Imber Park Court, Esher, on Feb. 24, was won by the Highgate Harriers, for whom G. Pearce finished first in 61 mins. 9⅘ secs. C. J. Straw, Sutton Harriers, finished first in the Northern Championship (about 10 miles) at Haydock Park on Feb. 17, his time being 61 mins. 7 secs., and the winning club the Crewe Harriers. Indeed, Straw proved himself the best cross-country runner of the year, for on March 3, at Haydock Park, he was first man home in the National Championship (Sutton Harriers 1st, Highgate Harriers 2nd, Haddington Harriers 3rd), his time being 61 mins. 12 secs., whilst a week later he came in ahead of all competitors for the International Championship, at Caerleon racecourse, in 57 mins. 32 secs. England won with a score of 24 points to Ireland's 86 and Scotland's 106. Birchfield Harriers won the Midlands Championship (10 miles) at Coventry on Feb. 17, W. G. Dunkley (Alpine Harriers) finishing first in 58 mins. 1 sec. The 43rd Annual Inter-Varsity meeting took place at the Queen's Club, West Kensington, London, on March 24, 1906. Comparisons of the performances at the home meetings of the rival Universities seemed to point to a victory for Oxford, and this duly came about, they winning by 7 events to 3.

Rain proved a spoil-sport, and consequently the path performances were not so good as home performances of the University athletes had suggested. However, the Hon. G. W. Lyttelton (Cambridge) scored his third successive win in the weight putting, and excelled his previous year's performance by nearly 5 in.; and A. R. Welsh (Cambridge) made time in the Mil that had only three times previously bee bettered. H. Fyffe (Oxford) took the Hamme Throwing with a cast of 136 ft. 3 in., easily record under the revised conditions. In additio it is the next best to the 138 ft. 3 in. and 138 f accomplished under the old rules in 1876 and 187 by G. H. Hales, of Trinity College, Cambridg It may be interesting to know that in practic the previous week Fyffe did 144 ft. 3 in. Th winners were:—Hundred Yards, K. G. Macleo (Cambridge), 1st, S. C. Denison (Oxford), and time 10⅘ secs. Half Mile, K. Cornwallis (Oxford 1st; R. P. Crabbe (Cambridge), 2nd; time 1 mi 56⅘ secs. Long Jump, P. M. Young (Oxford 22 ft. 3 in., 1st; S. Abrahams (Cambridge 21 ft. 3 in., 2nd. Putting the Weight, Ho G. W. Lyttelton (Cambridge), 38 ft. 3¼ in., 1s P. G. Masters (Cambridge), 36 ft. 9 in., 2nd. O Mile, A. R. Welsh (Cambridge), 1st, W. E. Schu (Oxford), 2nd; time 4 min. 21⅕ sec. Throwi the Hammer, A. H. Fyffe (Oxford), 136 ft. 3 i 1st; P. G. Masters (Cambridge), 126 ft. 10 i 2nd. 120 Yards Hurdles, E. R. J. Hussey (Oxfor 1st, F. H. Teall (Cambridge), 2nd; time 16⅘ sec High Jump, P. M. Young (Oxford), 5 ft. 7¼ i 1st; P. Munro (Oxford), 5 ft. 5¼ in., 2nd. 4 Yards, K. Cornwallis (Oxford), 1st, E. H. By (Cambridge), 2nd; time 51 secs. Three Mil N. F. Hallowes (Oxford), 1st, A. R. Welsh (Ca bridge), 2nd; time 16 mins. 14 secs. As usu the first instalment of the Amateur Athlet Association Championships, the Ten Miles R and the Seven Miles Walk, took place early the year. A. Aldridge, of the Highgate Harrie followed up his previous year's victory in t former, winning in 54 mins. 7⅘ secs.; whilst F. Carter, Queen's Park Harriers, won the walk 53 mins. 20⅕ secs. Nothing particularly noticeal occurred at the ordinary athletic meetings pri to the championships, which were decided at t Stamford Bridge Grounds, Fulham, on Saturd July 7. The weather was favourable, and th was a splendid attendance of about ten thousa spectators. There was a notable lack of t American and French element, and no reco were beaten, but in the Quarter Mile W. Halsw did 48⅕ secs., the previous best at the sports be H. C. L. Tindall's 48⅕ secs., in June, 1889, wh is also the British amateur record; whilst Butt field ran a fast mile, being only 2⅘ secs. outside Binks's British amateur record of 4 mins. 16⅘ se made in July, 1902. Of previous holders, Den Horgan (the weight-putter), H. A. Hyman ( yards champion), T. R. Nicolson (hamm thrower), G. E. Larner (the walker), and Ferna Gonder (pole jumper) did not compete. On t other hand, J. W. Morton (100 yards), R. Stronach (hurdles), A. Russell (steeple-chas Pat O'Connor (long jump), Con Leahy (h jump), G. Butterfield (one mile), and Wyndh Halswell (quarter mile), retained challenge cu the new champions being A. Astley, Salford (half mile); A. E. A. Harrigan, Trinidad (p jump); T. Kirkwood, Liverpool (weight puttin C. H. Jupp, L.A.C. (220 yards); F. H. Hulfo Birchfield H. (four miles); A. T. Yeoumans, Sw sea A.C. (two-mile walk); and H. A. Lee Cambridge University (hammer throwing). winners were:—J. W. Morton (South Lon Harriers); time 10⅘ secs. Putting the Wei (16 lbs. from a 7 ft. square), T. Kirkwood (8th V King's (Liverpool) Regt.), 45 ft. 4½in. One Mile Butterfield (Darlington H.); time 4 mins. 18⅘ s Long Jump, P. O'Connor (Waterford A.C.); 2

5¼ in. Half Mile, A. Astley (Salford H.); time 1 min. 57⅘ secs. 220 Yards, C. H. Jupp (L.A.C.); time 22⅗ secs. 120 Yards Hurdles, R. S. Stronach (Glasgow Academicals); time 16⅖ secs. Throwing the Hammer (16 lbs. from a 9 ft. circle), H. A. Leeke (C.U.A.C.); 123 ft. 1 in. Pole Jump, A. E. A. Harragin (Trinidad and Herne Hill), w.o. Four Miles, F. H. Hulford (Birchfield Harriers); time 20 mins. 27⅖ secs. 440 Yards, W. Halswell (Edinburgh H.); time 48⅕ secs. Two Mile Walk, A. T. Yeoumans (Swansea A. & C.C.); time 14 mins. 20⅗ secs. Two Mile Steeplechase, A. Russell (Walsall H.); time 11 mins. 14⅕ secs.

For various reasons the English contingent taking part in the Third Olympian International Games at Athens was not quite representative, and very few successes were secured by British athletes. The winners of the various events were :—100 Metres, A. Hahn (America); time 11⅕ secs. 110 Metres Hurdles, R. G. Leavitt (America); time 16⅕ secs. 400 Metres, H. Pilgrim (America); time 53⅕ secs. 800 Metres, H. Pilgrim (America); time 2 mins. 1⅕ secs. 1,500 Metres, J. D. Lightbody (America); time 4 mins. 12 secs. Five Miles, H. C. Hawtrey (England); time 26 mins. 11⅕ secs. Marathon Race (26 miles), W. J. Sherring (Canada); time 2 hrs. 51 mins. 23⅗ secs. Standing Long Jump, R. Ewry (America); 10 ft. 10 in. Running Long Jump, P. Myer (America); 23 ft. 7 in. Standing High Jump, R. Ewry (America); 5 ft. 2 in. Running High Jump, Con Leahy (Ireland); 5 ft. 11¼ in. Hop, Step, and Jump, P. G. O'Connor (Ireland); 14 metres 75 cent. Pole Jump, F. Gonder (France); 11 ft. Putting the Weight, Sheridan (America); 43 ft. 4 in. 1,500 Metres Walk, G. Bonhag (America); time 7 mins. 12 secs. 3,000 Metres Walk, Stantits (Hungary).

In the way of records mention must be made of A. T. Yeoumans' mile walk in 6 mins. 10⅗ secs. at Bath on Aug. 18, 1906, and the same athlete's two miles in 12 mins. 53⅕ secs. at Swansea, on Sept. 8, 1906. On Sept. 22, 1906, A. J. Butler lowered the London to Brighton walking record to 8 hrs. 23 mins. 27 secs.

The offices of the Amateur Athletic Association are at 10, John Street, Adelphi, London, W.C. Hon. Sec., Mr. P. L. Fisher.

## BILLIARDS.

The billiard season of 1906 may be referred to in a very few words. Perhaps its most notable feature was the retirement of John Roberts, who, without any doubt, was the greatest personality in the game for a period extending over twenty-five years. Whether at the time of his giving up the game he was the equal of such players as H. W. Stevenson and Charles Dawson is a debatable point. Owing to internal dissensions the Billiard Association lost most, if not all, of its influence, and Dawson and Stevenson remained firm in their refusal to play Championship matches under the rules of that body. A pleasing feature of the season was a return to health of Edward Diggle, the Manchester professional, whilst W. A. Lovejoy, the ex-amateur champion, improved vastly and gave promise of joining the first class before long. Otherwise there was little of note to chronicle beyond the fact that E. C. Breed secured the Amateur Championship, whilst in Jan. W. Cook beat his own record cannon break by making a run of 180, and on Oct. 12 M. Inman scored 300 off the red ball alone in a match against Cecil Harverson in London. Amongst amateurs the game increased vastly in popularity, and big handicaps were frequent.

## CRICKET.

Although no visit was paid by an Australian team, the first-class cricket season of 1906 was decidedly eventful. For one thing, the County Championship was in doubt when the last week of the season opened, and finally first place was gained by Kent, who had not previously headed the list since the official recognition of the M.C.C. was secured for the Championship competition. Middlesex occupied premier place in 1903, but with that exception no Southern county has been successful since the run of luck Surrey had in the nineties.

All told there were 172 matches in the competition in 1906, as against the 170 of the preceding season. Regrettable differences between the various executives caused the games between Kent and Notts, and Somerset and Surrey, to be dropped. As a set-off, Gloucestershire renewed their fixtures with Essex; whilst, though Leicestershire could not fix up games with Sussex, they were able to substitute Kent. Perhaps the most satisfactory feature of the whole series was the fact that of the 172 matches only 43 were left unfinished—a percentage of 25·00. That in such a dry season (it is many years since the rainfall was so slight) was most notable, and there is no doubt that the abandonment—wholly or partial—of the artificial preparation of wickets, the crusade against the abnormal "stonewalling" tactics of some batsmen, and a general improvement in fielding greatly brightened the game, and earned for it more public patronage than it had enjoyed for some seasons past. The table of results reads :—

The County Championship.—Final Record.

| | County. | Played. | Won. | Lost. | Drawn. | Points. | Per-centage. |
|---|---|---|---|---|---|---|---|
| 1 | Kent | 22 | 16 | 2 | 4 | 14 | 77·77 |
| 2 | Yorkshire | 28 | 17 | 3 | 8 | 14 | 70·00 |
| 3 | Surrey | 28 | 18 | 4 | 6 | 14 | 63·63 |
| 4 | Lancashire | 26 | 15 | 6 | 5 | 9 | 42·85 |
| 5 | Notts | 20 | 9 | 4 | 7 | 5 | 38·46 |
| 6 | Warwicksh. | 20 | 7 | 4 | 9 | 3 | 27·27 |
| 7 | Essex | 22 | 9 | 6 | 7 | 3 | 20·00 |
| 8 | Hampshire | 20 | 7 | 9 | 4 | — 2 | —12·50 |
| 9 | Glo'stershire | 20 | 6 | 10 | 4 | — 4 | —25·00 |
| 10 | Sussex | 24 | 6 | 12 | 6 | — 6 | —33·33 |
| 11 | Middlesex | 18 | 4 | 10 | 4 | — 6 | —42·85 |
| | Nthmptnsh. | 16 | 4 | 10 | 2 | — 6 | —42·85 |
| | Somerset | 18 | 4 | 10 | 4 | — 6 | —42·85 |
| 14 | Worcestersh. | 20 | 3 | 8 | 10 | — 6 | —60·00 |
| 15 | Leicestersh. | 22 | 3 | 14 | 5 | —11 | —64·70 |
| 16 | Derbyshire | 20 | 2 | 7 | 11 | —15 | —78·94 |

According to the rule laid down by the M.C.C., "One point shall be reckoned for each win; one deducted for each loss; unfinished games shall not be reckoned. The county which during the season shall have, in finished matches, obtained the greatest proportionate number of points shall be reckoned champion county."

In addition to the foregoing there are many matters worthy of comment. Kent, splendidly captained by the old Etonian C. H. B. Marsham, got the first chance of rising to the head of the table when Gloucestershire defeated Yorkshire at Bristol by one run. To lose but two games out of twenty-two was a remarkable achievement, the more so as A. P. Day, Alec Hearne (the oldest member of the team), Fairservice, Hubble, and

Harding were frequently absent, whilst such cricketers as E. W. Dillon, C. J. Burnup, J. R. Mason, and R. N. R. Blaker only came into the side late in the season. Kent's success was, without doubt, due to the fast bowling of Fielder, whose record of **158** wickets for his county

The following table will show at a glance the result of every match in the recent Championship series. The top line gives the outcome of the home fixtures, the bottom line the result of those played away :—

| County. | | Derbyshire. | Essex. | Gloucester. | Hampshire. | Kent. | Lancashire. | Leicester. | Middlesex. | N'th'mpt'n. | Notts. | Somerset. | Surrey. | Sussex. | Warwick. | Worcester. | Yorkshire. |

W Won. L Lost. D Drawn.

(average 19·74) had never before been equalled by a Kentish player. Blythe (**90** wickets for 19·16 runs each), Woolley (**42** for 20·04), Mason (**31** for 20·83), and Fairservice (**39** for 23·43) rendered excellent assistance in this department of the game. The batting averages fell little short of the wonderful, C. J. Burnup and K. L. Hutchings heading the list with 69·75 for nineteen innings and 64·66 for twenty-five innings respectively. Dillon, Mason, and Blaker all exceeded **40** runs per innings, and there were seven others who averaged more than twenty.

Despite the fact of their failing to retain the Championship, Yorkshire had much about the same measure of success as in **1905**, but undoubtedly they were not such a good side. Rhodes fell off in his bowling to a regrettable extent, and the Hon. F. S. Jackson was only able to play in two matches. Indeed, the ex-champions would have cut a very sorry figure but for George Hirst, who fairly earned the right to be considered the best all-round player of the day. In county matches he scored **1,771** runs in forty-six innings, averaging **43·19** ; the next highest being David Denton, who in forty-six innings totalled **1,619** runs, average **36·79**. Hirst was one of the few batsmen to hit a century against Kent bowling, and he also made hundreds against Warwickshire, Sussex, and Somerset. Against the latter county at Bath, in August, Hirst scored **111** and **117** (not out) ; and in this connection it is worthy of note that Denton, in June, at Trent Bridge, made **107** and **109** (not out) against Nottingham. The bowling of Hirst was quite up to the standard of his batting, for he secured **182** wickets at an average cost of **14·84**. His fielding was as brilliant as ever.

Early in the season it appeared quite likely that Surrey might regain the Championship. With the advent of August, however, signs of staleness became apparent, and successive defeats from Kent, Yorkshire, and Lancashire extinguished their chance. Nevertheless, they finished third in the table—a rise of one place from the preceding season—and actually won more matches than any other county. For this they were largely indebted to the veteran of the team—T. Hayward. The year **1906** was the most successful in his brilliant career. For all first-class matches he totalled **3,518**, with an average of **66·37** for **61** innings. The aggregate is a record, the previous best being **3,309**, compiled by Abel, also of Surrey, in **1901**. For his county Hayward totalled **2,814**, and averaged **70·35** for **47** innings. The famous professional provided a sensation in Whit-week, as four successive innings against Notts and Leicestershire resulted in totals of **144** (not out), **100**, **143**, and **135** from his bat. Altogether Hayward played thirteen three-figure innings (the highest was **219**, *v.* Northamptonshire in May)—a feat only performed once previously, viz., by C. B. Fry in **1901**. Several times during the season rumour declared that Hayward contemplated retirement at the close of the campaign, but these reports were ultimately contradicted by the player himself. Never in his career previously had he played such bright crisp cricket.

Turning to individual players, it must be noted that Tyldesley, the popular Lancashire professional, played the highest innings of his life against Kent at Manchester on June 7th, when he scored **295** not out. W. G. Grace is no frequently seen in first-class cricket nowadays but nevertheless he secured the creditable average of **26·77**, and celebrated his **58**th birthday on July 18 by securing **74** runs for the Gentlemen *v.* Players at Kennington Oval. Prominent amateurs who, owing to business or other reasons, took but little part in the game, may be mentioned in Major R. M. Poore, C. L. Townsend, L. C. H. Palairet, and R. E. Foster, whilst indifferent health prevented A. C. Maclaren doing himself justice.

Leicester compiled the highest total of the year, viz., **701** for four wickets (when the declared) against Worcestershire, at Worcester in July. That match also yielded the highest aggregate, **1,425** for **26** wickets, and a dozen other instances of over **1,200** runs being scored occurred Worcestershire were responsible for the lowest total of the year, viz., the **25** for which Yorkshire dismissed them at Hull in the last week of July. In addition to Hirst, the following accomplished the double feat of making **1,000** runs and securing **100** wickets : J. N. Crawford, Thompson (G. J. Gunn (John), Relf (A. E.), and Rhodes. Of these the last three also did so in **1904** and **1905**. Hirst sent down more overs than any other bowler, viz., **1,306** and a ball ; others who delivered upwards of **1,000** being Lees (**1,258·5**), Field (**1,159·3**), Dennett (**1,145·5**), Relf (A. E.) (**1,100**), Mead (W.) (**1,079·1**), and Hargreave (**1,034**). Mo

runs were hit from Fielder (3,756); though Hirst (3,434), Lees (3,402), Buckenham (3,258), Dennett (3,096), Thompson (G. J.) (3,020), and Rhodes (3,018) were all punished to the extent of 3,000 runs.

Altogether twenty-two batsmen secured an average of forty runs or upwards, the leaders being C. J. Burnup, innings 21, runs 1,207, highest 179, average 67·05; Hayward, innings 61, runs 3,578, highest 219, average 66·37; K. L. Hutchings, innings 34, runs 1,597, highest 176, average 53·23; B. J. T. Bosanquet, innings 8, runs 415, highest 101, average 51·87; Arnold, innings 39, runs 1,767, highest 166, average 50·48; Iremonger, innings 43, runs 1,794, highest 200 (not out), average 48·48; P. A. Perrin, innings 43, runs 1,893, highest 150, average 47·32; Tyldesley, innings 52, runs 2,270, highest 295 (not out), average 46·32; Hirst, innings 58, runs 2,385, highest 169, average 45·86.

In bowling Huddlestone actually headed the list with 234·1 overs, 50 wickets, average 12·26. Next come Cuttell, 442 overs, 67 wickets, average 13·56; Haigh, 971·3 overs, 174 wickets, average 14·59. Other noteworthy averages were Hirst, 1,306·1 overs, 208 wickets, average 16·50; Hallam (A.), 832·2 overs, 104 wickets, average 16·50; Dennett, 1,145·5 overs, 175 wickets, average 17·63; Bestwick, 776·1 overs, 115 wickets, average 18·46; N. A. Knox, 754·5 overs, 114 wickets, average 19·63; Blythe, 886·5 overs, 111 wickets, average 19·90; Mead (W.), 1079·1 overs, 133 wickets, average 20·18; Fielder, 1,159·3 overs, 186 wickets, average 20·19; Lees, 1,258·5 overs, 168 wickets, average 20·25; Hargreave, 1,034 overs, 112 wickets, average 21·58; and Gunn (John), 876·4 overs, 112 wickets, average 21·66.

The only discordant note sounded during the season was in connection with University cricket, which scarcely commands the respect of a few years ago. Some great personality, such as that of A. G. Steel, the Lyttletons, the Studds, R. E. Foster, T. C. O'Brien, K. J. Key—to mention only a few names—is sadly needed to restore interest. The programmes of both Oxford and Cambridge were much as usual, but the victory of the Cantabs at Lords on July 7 (gained by 94 runs) was clearly foreshadowed by the fact that the Light Blues had previously won five and drawn one of ten engagements, whereas of eight preliminaries the Oxonians had lost seven. The scores in the Lord's match were: Cambridge, 360 (W. M. Payne 64, R. A. Young 150, and L. G. Colbeck 63) and 248 for six wickets (declared); Oxford, 187 (G. N. Foster 41) and 327 (G. N. Foster 77, E. L. Wright 79, E. G. Martin 56). For Oxford N. R. Udal was the most successful bowler, taking seven wickets in the first innings for 133, and three in the second for 33. For Cambridge G. G. Napier took five wickets in each innings for 68 and 91 runs respectively.

The Lord's Gentlemen *v.* Players match was won on July 11 by the Gentlemen by 45 runs. Their eleven was certainly not representative, lacking, as it did, the services of A. C. Maclaren, "Tip" Foster, and, with the exception of K. L. Hutchings, the Kent element. As a set-off, Hirst was unable to assist the Players. The Gentlemen scored 167 (B. J. T. Bosanquet 56) and 321 (R. H. Spooner 114, H. K. Foster 67, and G. L. Jessop 73). The Players totalled 199 (Hayward 54) and 244 (Hayes 55, Lees 51). On the first day Fielder created a sensation by taking ten wickets for 90 runs, but in the Gentlemen's second innings Lees carried off the honours with six wickets for 92. N. A. Knox bowled finely for the Gentlemen, securing five and seven wickets for 73 and 110 runs. It was the centenary fixture. The Oval came under the same title, which finished on July 18, was contested by very unrepresentative teams, and resulted in a draw. The Players scored 365 (King 89) and 335 (Hardstaff 104 and King 88), to 258 (C. J. B. Wood 68) and 277 for seven wickets (J. N. Crawford not out 71, W. G. Grace 74).

There was a splendid finish to the Eton *v.* Harrow match at Lord's on July 14, the Etonians winning by four wickets. They had five old choices, and Harrow four. Eton made 165 (P. Pearson 99, K. L. Gibson 77, C. A. Gold 57) and 96 for six wickets (P. Pearson 45). Harrow compiled 230 (R. E. Eliéart 54, E. H. Crake 68) and 229 (M. Falcon 79, A. W. Griffin 40). The chief Eton bowlers were C. Hatfeild, F. Sprot, and Finch Hatton, M. C. Bird doing best for Harrow.

A team of West Indians visited England, and met with a fair amount of success, but on the whole did not prove to be up to the form of our best counties.

During the winter of 1905–6 an English team visited South Africa, under the auspices of the M.C.C. The team was far from representative of English cricket, and was beaten in all three test matches played.

## CYCLING.

THE cycle race season of 1906 was very uneventful, and was chiefly notable for a dearth of fresh riders and new records. The National Championships were divided between Newcastle-on-Tyne, Newport, Mon., and the Crystal Palace. Ernest Payne, of Worcester, won the Quarter Mile and Mile Championships on June 23rd at the first-named place, his time for the Quarter being 32⅖ secs., and for the Mile 2 mins. 45⅘ secs. In events outside the championships he was a most consistent performer, and at the end of the season easily headed the list of prize-winners. The remaining championships under the auspices of the National Cyclists' Union were won as follows:—Five Miles Amateur, W. A. Edmonds, Bristol, time 14 mins. 24 secs., Aug. 25th, Newport, Mon.; Twenty-five Miles Amateur, H. Crowther, Leeds, time 69 mins. 25 secs., Aug. 25th, Newport, Mon.; Fifty Miles Amateur, W. J. Pett, Putney A.C., time 1 hr. 45 mins. 32⅘ secs., Sept. 1st, Crystal Palace; One Mile Tandem Championship, J. Matthews and A. Rushen, Sept. 1, Crystal Palace, time 2 mins. 10⅘ secs.; Quarter Mile Professional, S. Jenkins, Cardiff, time 33 secs., Aug. 25th, Newport, Mon.; One Mile Professional, S. Jenkins, Cardiff, time 2 mins, 33⅕ secs., Aug. 25th, Newport, Mon.; Five Miles Professional, R. Reynolds, Dublin, time 14 mins. 34 secs., Aug. 25th, Newport, Mon. British Empire Championships:—Quarter Mile Championship, D. Flynn, Scotland, time 33⅘ secs., June 30th, Ulster Grounds, Belfast; One Mile Championship, E. Payne, England, time 2 mins. 50⅖ secs., June 30th, Ulster Grounds, Belfast; Five Miles Championship, H. D. Buck, England, time 14 mins. 14 secs, June 30th, Ulster Grounds, Belfast.

The success of Edmonds in the Five Miles was the more noteworthy from the fact it was his seventeenth year on the path. At Athens, in the Olympian games, the Italian Verri (who has since gone over to the professional ranks) came into prominence by winning all three of the sprint races, and he followed up the feat by winning the Grand Prize of Paris and the Cham-

pionship of the World. Altogether five British riders took part in the Athens games, and of five path events in which they contended won two and were second in the others. The successes were by W. J. Pett in the 20 Kilometre Humanpaced Race, and by Matthews and Rushen in the 2,000 Metre Tandem Race. Bardonneau won the 100 Kilometre World's Championship, defeating L. Meredith, Paddington, but the latter subsequently derived some satisfaction by vanquishing Bardonneau in two motor-paced races in Paris.

A good many minor records were made during the year, but the chief rides were as follows:—On May 16th Henry Green lowered the 50 miles road record to 2 hrs. 4 mins. 46 secs. During the first week in June Leonard Drake lowered the London to Brighton and back bicycle record to 6 hrs. 24 mins. 46 secs., whilst in July Reginald Shirley beat the London to Portsmouth and back record, his time being 7 hrs. 29 mins. 4 secs. At the beginning of August Paul Guignard, at Munich, raised the 1 hour professional record to 59 miles 86 yds., and the same rider, the first week in October, improved the 2 hours professional record to 105 miles 247 yds. On Oct. 5 E. Bardonneau in Paris improved the 1 hour amateur record to 47 miles 1,713 yds. For the rest the year was noticeable as being an exceedingly prosperous one for the trade, whilst there was not so much loafing in handicaps as previously. The Cyclists' Touring Club Offices are in Victoria Street, Westminster, S.W., and the National Cyclists' Union Offices (S. R. Noble, Secretary) are at 27 Chancery Lane, London, W.C.

## FOOTBALL.

No decrease of public interest in football was noticeable during 1906, the tendency as regards "gates" being in an upward direction. As regards the quality of the play, however, there was great divergence of opinion. There is reason to think that so far as the Association game is concerned there was at least no all-round improvement. It is too early yet to gather what the educational effects of the tour of the New Zealanders have been, but judging by the success that, up to the end of November, attended the efforts of another touring combination, the South Africans, British Rugby players have still a great deal to learn. For seasons past the Football Association has been urging district associations under its jurisdiction to legislate for professional clubs within their respective areas. With this end in view the London Football Association at a Special General Meeting passed a resolution rendering professional clubs eligible for membership to the L.F.A. The opponents of the movement, consisting principally of the old public schools element, alleged informality in the voting and demanded a scrutiny of the voting papers. This was denied by the Council of the L.F.A. on the ground that the rules of the Association do not provide for the same. Many representatives of the dissenting clubs formed themselves into an Amateur Defence Federation, and great friction occurred between the rival forces. A final solution of the difficulty had not been arrived at at the time of going to press. The Rugby Union made a small departure from its previous attitude towards the Northern Union by passing a resolution whereby soldiers should not be debarred from playing in regimental matches in consequence of having previously taken part in games under N.U. rules.

### Association.

As in the previous season, England retained the International Championship at the end of the season of 1905–6. They began by beating Ireland, at Belfast, by 5 goals to-none, but only just scrambled home against Wales at Cardiff. The England *v.* Scotland match was played at the splendid New Hampden ground, and the home eleven, largely made up of Anglo-Scottish players, won by 2 goals to 1. It was somewhat curious that Wales defeated Scotland by 2 goals to 0, that Scotland vanquished Ireland by 1–0, and yet that Wales and Ireland, who met at Wrexham, drew 4–4. The relative positions of the four countries were:—1st, England; games 3, won 2, lost 1, drawn 0, points 4, goals 7 for, 2 against. 2nd, Scotland; games 3, won 2, lost 1, drawn 0, points 4, goals 3 for, 3 against. 3rd, Wales; games 3, won 1, lost 1, drawn 1, points 3, goals 6 for, 5 against. 4th, Ireland; games 3, won 0, lost 2, drawn 1, points 1, goals 4 for, 10 against. The teams in the England *v.* Scotland match on April 7, 1906, were:—England: J. Ashcroft (Woolwich Arsenal), goal; R. Crompton (Blackburn Rovers) and H. Burgess (Manchester City), backs; B. Warren (Derby County), C. Veitch (Newcastle United), and H. Makepeace (Everton), half backs; R. Bond (Preston North End), S. H. Day (Old Malvernians), A. Shepherd (Bolton Wanderers), S. S. Harris (Old Westminsters), and J. Conlin (Bradford City), forwards. Scotland: P. McBride (Preston North End), goal; D. McLeod (Glasgow Celtic) and W. Dunlop (Liverpool), backs; A. Aitken (Newcastle United), A. Raisbeck (Liverpool), and P. McWilliam (Newcastle United), half backs; C. Stewart (Edinburgh Hibernians), J. Howie (Newcastle United), A. Mentzies (Heart of Midlothian), G. Livingstone (Manchester City), and A. Smith (Glasgow Rangers), forwards. In the International League games England, as in the previous year, defeated both Ireland and Scotland. The Final Tie for the Football Association Challenge Cup, played at the Crystal Palace in April, attracted an enormous attendance. The clubs competing were Everton and Newcastle United, and the former won by 1–0. It was the first time of their winning the Cup, although they had twice previously reached the Final. Newcastle United thus played the part of runners-up in two successive years. The League Championships were never more interesting, and Liverpool accomplished a somewhat astonishing performance. At the end of the season of 1905 they were at the head of the League Second Division, and this they supplemented in 1906 by winning the First Division championship with 51 points. Preston North End were second with 47 points, and Sheffield Wednesday third with 44 points. There were 380 First League games played during the season, and an examination of official "gate" returns showed that they attracted 4,847,060 spectators. Bristol City won the Second League Championship with 66 points out of a possible 76, Manchester United (62) being second and Chelsea (53) third. There were 306 games in the Southern League, and the aggregate attendance thereat was well over 2 millions. The Championship was won by Fulham, mainly on their defence, for only 15 goals were scored against them, Southampton being the only club to obtain more than one in any single engagement. Southampton were second in the competition and Portsmouth third. The meeting of the

Army and Navy was repeated at Stamford Bridge on March 10, but did not receive, as in the previous year, Royal patronage. The Army won by 5 goals to 2. The University teams were well up to the average, but the match itself was spoilt by wet weather and an accident to O. T. Norris, the Oxford captain. Cambridge won by 3 goals to 1, bringing their number of wins for the series of matches up to 17 against 15, one match having been drawn. Liverpool won the Sheriff of London Charity Shield, defeating the Corinthians at Fulham by 5 goals to 1. The Amateur Cup, which has only four times in thirteen years been won by a Southern club, was wrested from the North for the first time since 1903 by Oxford City, who defeated Bishop Auckland in the final at Stockton by 3-0. Amongst Challenge Cup winners may be mentioned: London, New Crusaders; Dunn Memorial, Old Carthusians; Army, Royal Engineers; Irish, Shelbourne; Scottish, Heart of Midlothian; London Charity, London Caledonians; Southern Charity, Woolwich Arsenal; Middlesex, West Hampstead; Middlesex Charity, West Hampstead. In the final tie for the English Schools Championship, Sheffield beat Manchester by 4-2.

Reference has already been made to the dispute between the London Association and some of its clubs. At a meeting of the Football Association Council held on Nov. 5, the explanation of the Amateur Football Defence Council (or Federation) was discussed, and by a majority it was decided that the same was not satisfactory; that their circular asking certain clubs to abstain from entering the London Cup Competitions was unjustifiable; and that the body in question was contrary to the Rules, and clubs must withdraw therefrom.

The Football Association Offices (F. J. Wall, Secretary) are at 104, High Holborn, W.C.

### Rugby Union.

The principal feature of the season of 1905-6 was the visit of the New Zealand team. Landing on our shores on September 8 they, a week later, commenced a programme of 33 games by administering a severe defeat to Devon, who were afterwards destined to become the champion county. Thenceforward their tour was one of triumph, every game being placed to their credit with the exception of the one fixture with Wales, in which they were defeated at Cardiff by a try to nil. In all matches they scored 868 points to 47, the complete record of results being as follows:—

| | Won. | Drawn. | Lost. | Total. |
|---|---|---|---|---|
| International Matches | 4 | 0 | 1 | 5 |
| County Matches | 12 | 0 | 0 | 12 |
| University Matches | 2 | 0 | 0 | 2 |
| Club Matches | 14 | 0 | 0 | 14 |
| | 32 | 0 | 1 | 33 |

As regards the International programme, England once more had an unsatisfactory season. Ireland and Wales were bracketed first on actual results, although the former scored a few more points than the Welshmen. England lost to Wales (16 points to 3) at Richmond and to Ireland (16 points to 3) at Leicester, but drew with Scotland (3-3) at Edinburgh. Wales beat Scotland by 9 points to 3, but at Belfast succumbed to Ireland (11-6), whom Scotland had previously vanquished at Dublin (13-6). The relative positions of the countries were as follows:—

| | | W. | D. | L. | Pts. | For. G.T.Pts. | Agst. G.T.Pts. |
|---|---|---|---|---|---|---|---|
| 1 | Ireland | 2 | 0 | 1 | 4 | 3 6=33 | 3 4=25 |
| | Wales | 2 | 0 | 1 | 4 | 2 7=31 | 2 3=17 |
| 3 | England | 1 | 0 | 2 | 2 | 0 6=18 | 4 5=35 |
| | Scotland | 1 | 0 | 2 | 2 | 4 1=19 | 0 8=24 |

England also played France on March 22, at Paris, and won by 4 goals 5 tries (35 points) to a goal and a try (8 points).

The Inter-University match was played at Queen's Club, West Kensington, on Dec. 25, and proved one of the best for many years past. It was won by Cambridge, who scored 3 goals to 2 goals and a try (15 points to 13). Devon won the County Championship. The visit of a South African team has already been alluded to.

The Rugby Union Offices (P. Coles, Secretary) are at 35, Surrey Street, Strand, W.C.

### Golf.

The golf year of 1906 was the most satisfactory in the annals of the game. The increase in the number of courses, clubs and players was little short of phenomenal, and at the season's close there was every indication that the forward movement had by no means ceased. Experts claim that in England alone there are now about two thousand clubs and over three hundred thousand golfers, whilst the amount of money spent on the game during the year was put down at something like four millions. During the third week in April W. R. Lonie (of Warlington) won the Professional Tournament of the Tooting Bec Club, in which 36 couples took part; and in the same month Ranelagh Club defeated the House of Commons by 12½ points to 5½, Barristers beat the Lords and Commons at Woking on May 7 by 7 matches to 5, and a few days previously London Solicitors defeated London Press by 4½ points to 4½. The Ladies' Championship, decided at Burnham in May, was productive of a crop of surprises, and eventually Miss Bertha Thompson had to succumb to Mrs. Kenniar, the first married lady to succeed in the event. There was a large entry, and in the final Mrs. Kenniar won by 4 up and 3 to play. The Amateur Championship, which reached its majority, was held under the auspices of the Royal Liverpool Club, and brought into prominence several players hitherto almost unknown. The winner was J. C. Robb, who in the final defeated C. C. Luigen, Sunningdale G.C., by 4 and 3. There was a record entry of 166 players. During the first week in June Portmanock won the Senior Cup and Knock the Junior trophy at the Irish Close Championship, the actual Championship going to H. A. Boyd. The Amateur Championship of France at La Boulie was competed for by, amongst others, the Rt. Hon. A. J. Balfour. In the final Mr. R. G. Graham, of Harrogate, defeated Mr. C. H. Gray, the winner in the two previous years. The Professional International between England and Scotland was decided during the second week in June at Muirfield, East Lothian. England, for the first time, won easily, securing 8 matches to 4 in the singles, whilst in the foursomes England won 4 matches to 2. The Open Championship was also decided at Muirfield in June. Jas. Braid, of Walton Heath, again proved successful, J. H. Taylor, Mid-Surrey, and Harry Vardon, Totteridge, having the next best aggregates. The amateur division was headed by Mr. John Graham (Royal Liver-

pool G.C.). The French Open Championship on July 1 was secured by Armand Massey, formerly of North Berwick. The St. George's Challenge Cup, at Sandwich, the most important event outside the Amateur Championship, was spoilt through the absence of Mr. Jas. Robb. It was won by Mr. Muir Ferguson (Royal St. George's) after a tie with Mr. R. Harris (Acton). Mr. Byers won the American Championship from 122 competitors. Capt. McCallum won the Calcutta Cup at St. Andrews in August. Mr. Geo. Renwick, jun., a Tynesider, won the Welsh Amateur Championship, and the customary International matches between the championship competitors at the Irish Open Championship Meeting resulted, during the first week in August, in Scotland scoring 31 matches, England 24, and Ireland 15. The competition for £240 in prizes, together with medals, both of which were presented by the proprietors of the *News of the World*, was played on the Hollinwell course, Nottingham, on October 2, 3, and 4. Previously, qualifying competitions had been held for Scotland, Ireland, Wales, North of England, South of England, and the Midlands. Thirty-two players qualified for the final, and the following is a list of the principal prize winners:—Alexander Herd (Huddersfield), £100 and gold medal; C. H. Mayo (Chipstead), £30 and silver medal; George Duncan (Timperley), £15 and bronze medal; Rowland Jones (Wimbledon Park), £15 and bronze medal.

## GYMNASTICS, BOXING, AND FENCING.

THE boxing year opened with the Oxford and Cambridge contests at Oxford on March 9. There was a distinct improvement in the skill displayed by the Oxonians, who proved successful in all five events. The results were:—Bantams: G. C. R. Cooke (Hereford, Ox.) beat A. H. Pearson (Queens', Cam.); Feather Weights: J. L. Walker (Trinity, Ox.) beat T. D. Richardson (Trinity Hall, Cam.); Light Weights: C. E. Wilson (Queen's, Ox.) beat Sir Phillip Brocklehurst (Trinity, Cam.); Middle Weights: C. Overy (Christ, Ox.) beat G. A. C. Hearsey (Jesus, Cam.); Heavy Weights: R. C. Wingfield (Trinity, Ox.) beat R. W. L. Oke (Corpus, Cam.). In the fencing (foils) the results were:—First String: J. C. Henry (Downing, Cam.) beat G. G. Doyne (Trinity, Ox.); Second String: T. D. Roberts (Christ, Ox.) beat R. Piller (Emanuel, Cam.); Sabres: E. M. Lee (Merton, Ox.) beat J. Greenwood (Peterhouse, Cam.). The Amateur Championships at the Northampton Institute, on April 3, proved more successful than ever, Wells and Parks were the only men to retain titles gained the previous year. The results were:—Bantams: T. Ringer (Lynn B.C.) beat W. Webb (17th Midd.); Feather Weights: A. J. Miner (Lynn B.C.) beat C. Morris (Polytechnic B.C.); Light Weights: M. Wells (Lynn B.C.) beat H. Collins (Eton Mission); Middle Weights: A. Murdock (Belsize B.C.) beat J. W. Smith (Newton's School of Arms); Heavy Weights: F. Parks (Polytechnic B.C.) beat H. G. Hall (City Police). On April 6 the Public Schools Competitions were decided at Aldershot, with the following results:—Boxing—Feather Weights: W. G. Gabain (Charterhouse) beat M. Payne-Gallwey (St. Paul's); Light Weights: R. K. Shaw (St. Paul's) beat J. D. Grafton-Wignell (Clifton); Middle Weights: L. F. Rickard (Clifton) beat D. Podway (Felstead); Heavy Weights: T. M. Whittaker (Felstead) beat F. de F. England (Harrow). Gymnastics: Dean Close School, Cheltenham (W. G. and F. J. Lidderdale). Fencing (Foils): R. Bernard (Bedford Grammar) beat M. C. Kachorn (Harrow). Sabres: M. H. Mackintosh (Bromsgrove School) beat M. C. G. Matthew (Eltham College). The various competitions under the auspices of the Amateur Gymnastic Association resulted as follows:—International Teams Championship, at Belfast, on April 14: England, 243¾ points; Scotland, 225½ points; Wales, 152½ points; Ireland, 192½ points. International Clubs Championship, at Belfast, on April 16, teams of six: Dolobran G.C., 211, 1st; Belfast Y.M.C.A., 196½, 2nd. Individual Championship, at the Liverpool Gymnasium: Marlow (Halifax), 1st; Collins (Halifax), 2nd; Hanson (Bradford All Saints), 3rd. The Amateur Fencing Championships, at the Caxton Hall, Westminster, in March, were won by E. Seligman (foils) and C. A. Wilson (sabres).

The Hon. Sec. of the A.G.A. is E. L. Levy, Liverpool Chambers, Cherry Street, Birmingham.

## HOCKEY.

GREAT advance in popularity was made by Hockey during 1906. H.R.H. the Prince of Wales consented to become president of the Hockey Association, and from Oct., 1905, till the end of March, 1906, each week brought its crop of interesting matches. What may be termed the first class programme opened with the South *v.* West match on Jan. 5, which was won by the former. Indeed, the West country teams were not at all strong and lost to the North by 2—1, and to the Midlands by 9—1. The Midlands had excellent forwards out in all their matches, and against the North, at Derby, in February, scored 4—1, and against the South, at Bromley, 5—1. The North *v.* South match was won by the latter by 7—2. The International programme was a regular triumph for England, who won all three engagements. At Dublin the Irishmen were defeated by 2—1, at Manchester Wales had a score of 13—2 against them, and at Glasgow the Scots were vanquished by 3—0, so that England scored 18—3 in the competition. As in the previous years, the English teams were drawn largely from metropolitan clubs. Oxford and Cambridge met at Surbiton, the latter winning, thanks to their very smart forward line, by 4—1. There are now a large number of County Associations affiliated to the Hockey Association, the Hon. Sec. of which is Mr. H. M. Tennent, 12 Lee Terrace, Blackheath, but the game is one to be played rather than watched. Being strictly confined to amateurs, the question of gate-money enters but slightly into it, but it may be interesting to note that the receipts in the England and Wales match amounted to £25.

## LAWN TENNIS.

THERE was a great revival of interest in lawn tennis in 1906, and more people witnessed the Championship Meeting at Wimbledon than had ever been the case previously. Unfortunately some friction arose between the officials of the All England Lawn Tennis Club and the Lawn Tennis Association, there appearing to be a growing feeling that the Championship Meeting should be controlled by the Association rather than by any club affiliated to it. Starting the first week in April and running well into October tournaments were in progress in some part of the country almost daily. The London season started on April 23 with the Covered Courts Championships at the Queen's Club, West Ken-

sington. H. L. Doherty opened by taking the Gentlemen's Singles, and Miss D. K. Douglas the Ladies' Singles. The Gentlemen's Doubles went to H. L. and R. F. Doherty. F. L. Riseley, destined to play a big part later on at Wimbledon, won the Irish Championship at Dublin, and, with A. H. Porter, also took the Doubles. Miss W. A. Longhurst won the Irish Ladies' Championship. The various County Championships were won as follows: Middlesex, Gentlemen, Mr. J. G. Ritchie—Ladies, Miss D. K. Douglass; Midlands, Gentlemen, J. M. Boucher—Ladies, Miss C. M. Wilson; Northern, Gentlemen, F. L. Riseley—Ladies, Miss D. K. Douglass; Surrey, Gentlemen, S. H. Smith—Ladies, Miss T. Lowther; Kent, Gentlemen, A. W. Gore—Ladies, Miss D. K. Douglass; Northumberland, Gentlemen, G. W. Hillyard—Ladies, Miss M. Sutton. F. L. Riseley had a most successful season as, in addition to winning the events already specified, he proved successful in winning the Championship of Europe at Leicester during the third week in June. A. M. Mackay won the Scottish Championship, the lady champion being Miss A. M. Ferguson. S. H. Smith, the Surrey champion, also secured the Welsh Championship, at Newport, where Miss D. K. Douglass took the highest honours amongst the ladies. Mr. J. G. Ritchie secured the Singles Championship of London at the Queen's Club, Miss E. W. Thompson taking the Ladies' Singles. All other tournaments were eclipsed by the Championship Meeting at the All England L.T.C. ground, Wimbledon, on June 25 and following days. In the Singles, Riseley, as in 1903 and 1904, ran up to H. L. Doherty, but obtained some slight consolation in the Doubles, which he won with S. H. Smith as partner. Miss D. K. Douglass emulated the feat of Miss Sutton, the previous year, in the Ladies' Singles, as she reached the final without losing a set. She then defeated Mrs. Sterry for the Championship, and, with F. L. Riseley as partner, won the Mixed Doubles. The Ladies' Doubles resulted in the success of Mrs. Hillyard and Miss C. Meyer.

### RACKETS AND TENNIS.

As usual, the first important racket matches of the year 1906 were those for the Military Championship at Prince's. In the Doubles, the 2nd Batt. Highland Light Infantry (H. Balfour-Bryant and P. Bramwell-Davis) won for the third year in succession. Balfour-Bryant (holder) did not retain the Singles, which went to Major S. H. Sheppard, D.S.O., R.E. The R.M. College, Sandhurst, renewed the previous year's form with the R.M. Academy, Woolwich, by winning both Singles and Doubles. In the Amateur Championships at Prince's those old-time performers, E. H. Miles and H. Dames-Longworth, secured yet another victory in the Doubles, whilst a new holder was found for the Singles when Major S. H. Sheppard followed up his military success. H. J. Walton and W. G. Pound won the Doubles for Cambridge against Oxford, but the latter secured the Singles by the aid of yet another member of the famous Foster family, viz., G. N. The Public Schools Championship fell to Charterhouse, represented by V. Hooman and R. U. Garnett. The principal tennis events of the season were won as follows:—The Professional Championship—C. ("Punch") Fairs. The Amateur Championship—E. H. Miles. The M.C.C. Prizes, Gold—E. H. Miles; Silver—Major A. Cooper Key. Inter-'Varsity: Doubles, Oxford—Hon. N. Bruce and H. A. Walker; Singles, Oxford—Hon. N. Bruce.

### ROWING.

WITHOUT question the rowing season of 1906 was remarkable in many ways, although, unfortunately, it brought no revival of the professional side of the sport. Professional sculling and rowing are lost arts as far as the British Isles are concerned, nor do they appear to flourish in the Colonies or in America. The increase in eight-oared races, noted in 1905, continued at the leading regattas, which were, almost without exception, favoured with fine weather, and the general quality of the racing was fully up to the average of recent seasons. That remark scarcely applies to what it is the custom to term the Putney clubs, for Thames and London representatives invariably found their superiors when opposed at the principal regattas by University crews. Indeed, the "Eton style" fully maintained the supremacy attaching to it for many seasons past.

The Inter-University Boat Race was decided over the usual Putney to Mortlake course on Saturday, April 7th, the conditions being so perfect that winning the toss for stations conferred practically no advantage on the Oxonians. There were four Old Blues in the Oxford boat, viz., L. E. Jones, H. C. Bucknall, L. P. Stedall, and E. P. Evans, of whom the last-named also rowed in 1904; but the Cambridge crew only included two old choices, B. C. Johnstone and R. V. Powell, both of whom appeared for the third time. As a race, the event was a great disappointment, for Cambridge led from the very first stroke, and won by three lengths and a half in the fair time of 19 mins. 24 secs. The contest was witnessed by more people than for many years past. Two noticeable features were that D. C. R. Stuart, the winning stroke, was a Freshman, and that he stroked the crew from the bow side. The school he came from—Cheltenham—has not a reputation for turning out high-class oarsmen, but there is little doubt that his personality had not a little to do with the victory of Cambridge. Throughout the race the Cambridge stroke was kept as steady and regular as possible, and no doubt the Cantabs could have covered the course in much faster time had their opponents been capable of extending them. The style was more akin to sculling than anything hitherto seen in the University match. Only once before had the experiment of stroking from the bow side been made—that was in 1876, when T. C. Edwards Moss attempted it for Oxford, without success. This year the idea was really adopted to suit the Old Blue, R. V. Powell, who was originally selected to occupy the eighth thwart. During the practice, however, Powell went to No. 6, and Stuart to stroke, with the happiest result. The ending somewhat upset certain theories as to weight, for, all round, the Oxford men were slightly heavier, their average working out at 12 st. 3 lb. to the 11 st. 13 lb. of Cambridge. The question was raised as to whether such heavy men should not have used broader blades, but that is a question that only experiment in the future can answer. The crews were:—Cambridge: G. D. Cochrane, Eton and Third Trinity (bow), 10 st. 8½ lb.; J. H. F. Benham, Fauconberge and Jesus, 11 st. 6 lb.; H. M. Goldsmith, Sherborne and Jesus, 12 st. 6½ lb.; M. Donaldson, Charterhouse and First

Trinity, 13 st. 9½ lb.; †*B. C. Johnstone, Eton and Third Trinity, 12 st. 6½ lb.; †*R. V. Powell (President), Eton and Third Trinity, 12 st. 6½ lb.; E. W. Powell, Eton and Third Trinity, 11 st. 6 lb.; D. C. R. Stuart, Cheltenham and Trinity Hall (stroke), 11 st. 1½ lb.; A. G. L. Hunt, Ipswich and Lady Margaret (cox.), 8 st. Oxford: G. M. A. Graham, Eton and New (bow), 10 st. 13 lb.; C. H. Illingworth, Radley and Pembroke, 11 st. 13 lb.; J. Dewar, Rugby and New, 12 st. 4½ lb.; *L. E. Jones, Eton and Balliol, 13 st. 12 lb.; A. G. Kirby, Eton and Magdalen, 13 st. 8 lb.; †*E. P. Evans (President), Radley and University, 13 st. 6 lb.; A. C. Gladstone, Eton and Christ Church, 10 st. 7½ lb.; *H. C. Bucknall, Eton and Merton (stroke), 11 st. 3 lb.; *L. P. Stedall, Harrow and Merton (cox.), 8 st. 5 lb.

Henley Regatta was decided on July 2nd, 3rd, 4th and 5th, the weather on all four days being splendid, whilst the wind was seldom sufficiently strong to render the Bucks station much superior to the other. The entry was a record one in point of numbers, and for the first time four whole days had to be set for racing; but the public scarcely seemed to realise the fact, and the first day's attendance was very thin. The international character of the meeting was well maintained, but it is probable that a crew as good as the Vesper (of America) or Leander, of the previous year, was not seen. British amateur oarsmanship received a bad set-back, as, for the first time since its institution in 1839, the Grand Challenge Cup for eights went to a foreign crew. The winners were the Club Nautique de Gand, Belgium, whose methods, both of training and rowing, afforded a direct contrast to those to which Englishmen are accustomed. Each man was allowed to eat and drink just what he chose, most of them smoked, and as for the rowing they exhibited nothing like our "swing," and finished the stroke all sitting upright in the boat. Their oar blades were of a peculiar "scoop" shape, measuring seven inches across the centre—which was the widest part. H. T. Blackstaffe, of the Vesta R.C., realised his ambition at last by winning the Diamond Sculls. This was remarkable, inasmuch as he is thirty-nine years of age. It was his thirteenth appearance in the competition, and he had participated in seven previous finals. The winners of the eight trophies were:—The Grand: Club Nautique de Gand, Belgium—Urbain Molmans (bow), 10 st. 7 lb.; Albert Heye, 11 st. 6 lb.; Alphonse Van Roy, 12 st. 5 lb.; Guillaume Visser, 11 st. 5 lb.; M. Orban, 11 st. 10 lb.; R. Orban, 12 st. 10 lb.; Oscar de Somville, 12 st. 2 lb.; Rudolph Poma (stroke), 10 st. 12 lb.; Raphael Van der Waerden (cox.), 8 st. 10 lb. (time, 7 mins. 9 secs.). The Belgians defeated Trinity Hall, Cambridge (stroked by D. C. R. Stuart), in the final. Ladies' Challenge Plate: First Trinity, Cambridge—A. B. Close-Brooks (bow), 10 st. 13 lb.; S. W. Steane, 11 st. 9 lb.; J. Walmsley, 11 st. 2 lb.; W. B. Savory, 12 st. 6 lb.; J. S. Burn, 12 st. 6 lb.; H. G. Baynes, 13 st. 3 lb.; M. Donaldson, 13 st. 6 lb.; F. W. Burn (stroke), 9 st. 13 lb.; B. H. Nixon (cox.), 8 st. 1 lb. (time, 7 mins. 23 secs.). Thames Challenge Cup: Christ College, Cambridge, beat First Trinity, Cambridge (time, 7 mins. 23 secs.). Stewards' Challenge Cup: Leander R.C. beat Third Trinity, Cambridge (time, 7 mins. 36 secs.). Visitors' Cup: Third Trinity, Cambridge, beat Jesus, Cambridge (time, 7 mins. 49 secs.). Wyfold Cup: London beat Thames (time, 7 mins. 58 secs.). Silver Goblets: Third Trinity, Cambridge (B. C. Johnstone and R. V. Powell, stroke) beat Sport Nautique de Gand (U. Molmans and G. Visser, stroke)—time, 9 mins. 15 secs. Diamond Sculls: H. T. Blackstaffe, Vesta, beat Capt. W. H. Darrell, Household Brigade, by six lengths, in 8 mins. 36 secs. In a private match (fours), Royal Engineers beat Royal Artillery (time, 8 mins. 20 secs.).

On July 13 the veteran H. T. Blackstaffe, Vesta R.C., easily retained his title of Amateur Champion by defeating A. H. Cloutte, London R.C., in the race for the Wingfield Sculls, in 23 mins. 10 secs. Blackstaffe's previous success at Henley, for the Diamond Sculls, caused the entry for the latter event to drop down to three, of whom St. Geo. Ashe was beaten in the preliminary heat on July 11 by Cloutte. Blackstaffe thus tied the record of Guy Nickalls by winning the Wingfields four times, his first victory being gained as long ago as 1897. His time for the full course—Putney to Mortlake—was the fastest made in the race since Capt. C. V. Fox, of the Guards Brigade, won in 22 mins. 50 secs. in 1900.

The Amateur Punting Championship, on July 24, was won, for the third time, by J. H. Secker, but in the Doubles Championship he and his partner—H. Graves—were defeated by C. R. Mullins and W. Colin Romaine. William Haines, of Old Windsor, who first won in 1891, and altogether has been successful eight times, secured the Professional Punting Championship for the third year in succession; the distance is a mile, with one turn at Maidenhead Bridge. On July 28, on the Parramatta River, at Sydney, Geo. Towns, holder, defeated J. Stanbury in a race for the World's Championship and £500 aside. The course was 3 miles 330 yards long, and Towns, who scaled 11 st. to Stanbury's 12 st. 8 lb., finished twenty lengths ahead in 19 min. 53¼ secs. Towns thus avenged a defeat Stanbury inflicted upon him, over the same course, in July, 1905.

Without doubt the most interesting event of the whole season of 1906 was the eight-oared race which took place on the Thames, Putney to Mortlake, on Saturday, September 8, between Cambridge and Harvard Universities. It was talked of for months beforehand, and was witnessed by a tremendous concourse of people. It was the first time that Harvard had sent a crew to this country since 1869, when Oxford defeated a four from the American University. Cambridge had almost the same eight as defeated Oxford earlier in the year, but A. B. Close-Brooks and E. W. Baynes superseded Cochrane and E. W. Powell., The Americans, who had defeated Yale, arrived in England per s.s. *Cedric* on August 4, and it was fortunate that they brought spare men with them, for accident and illness dogged some of them, and although both crews underwent about five weeks' training, it was only in the last fortnight thereof that the American order of rowing was finally settled. In preliminary practice Harvard did some smart performances, and a week before the contest got within 3 secs. of the fastest time ever recorded in the University match. In the race, however, they were left after the first half minute and never got on terms again. Cambridge won by two lengths in 19 mins. 18 secs. The crews were:—Cambridge: A. B. Close-Brooks, Winchester

Johnstone, Eton and Third Trinity, 12 st. 8½ lb.; *D. C. R. Stuart, Cheltenham and Trinity Hall (stroke), 11 st.; *B. S. Scott, St. Paul's and Trinity Hall (cox.), 8 st. 5 lb. Spare man: H. Shimwell, Shrewsbury and Trinity Hall, 12 st. 3 lb. Harvard: §R. M. Tappan, Nobles and Harvard (bow), 12 st.; §S. W. Fish, Groton and Harvard, 11 st. 12 lb.; P. W. Flint, Worcester and Harvard, 12 st. 0½ lb.; §C. Morgan, Harrow and Harvard, 12 st. 6½ lb.; §J. Richardson, Nobles and Harvard, 12 st. 13 lb.; §R. L. Bacon, Groton and Harvard, 13 st. 3¾ lb.; §D. A. Newhall, Haverford and Harvard, 12 st. 13 lb.; §D. O. Filley (stroke), Rugby and Harvard, 11 st. 12 lb.; §M. B. Blagden, Groton and Harvard (cox.), 7 st. 5 lb. Spare men: R. M. Faulkner, Volkmann and Harvard, 12 st. 4 lb.; L. K. Lunt, Middlesex and Harvard, 12 st. 8 lb.

The Hon. Sec. of the Amateur Rowing Association is Mr. G. M. Gridley, Leander R.C., Putney, or Henley-on-Thames.

## SWIMMING.

THE outstanding features of 1906 were the visits of C. M. Daniels, the American Champion, and C. Healy, the Australian, to England, and the wonderfully fine form shown by H. Taylor, of Chadderton, who proved himself far and away the best swimmer of the year. On the whole, the Amateur Swimming Association's championships fell rather flat. They started with the 100 Yards at Richmond, and it will be noticed from the following list that in one event there was not an English competitor sufficiently enterprising to go to the post. In the Half Mile and the Long Distance, records were made, and W. Taylor's Plunge was also a best on record:—100 Yards, C. M. Daniels 1st, C. Healy 2nd, J. H. Derbyshire 3rd; time 58⅘ secs. 200 Yards (Breast Stroke), F. H. Naylor 1st, W. J. Rowe 2nd, I. Vaczi 3rd; time 2 mins. 58⅘ secs. 220 Yards, C. Healy (w.o.); time 2 mins. 37⅘ secs. 440 Yards (Salt Water), H. Taylor 1st, P. Radmilovic 2nd, F. Holman 3rd; time 5 mins. 42⅘ secs. 500 Yards, H. Taylor 1st, P. Radmilovic 2nd, T. S. Battersby 3rd; time 6 mins. 24⅘ secs. Half Mile, H. Taylor 1st, P. H. Lister 2nd, T. S. Battersby 3rd; time 11 mins. 25⅘ secs. One Mile, H. Taylor 1st, P. H. Lister 2nd, A. G. Harvey 3rd; time 27 mins. 9 secs. Long Distance, J. A. Jarvis 1st, H. Taylor 2nd, A. G. Harvey 3rd; 63 mins. 40 secs. Club Water Polo, Weston-super-Mare beat Polytechnic (6—4). Plunging, W. Taylor 1st, J. A. Barker 2nd, G. Harrison 3rd; 82 ft. 7 in. The Long Distance is not recognised by the A.S.A. The King's Cup of the Royal Life-Saving Society was competed for on June 30th and July 2nd at Highgate Ponds and the Bath Club, London. The winner proved to be F. J. Matthews, of the Liverpool S.C. At the Bath Club, on June 29th, Mrs. Edgar Syers won the Ladies' Championship. Notable in the South was the success of A. J. Harvey, who won all the Southern District championships—viz., 100 Yards, 150 Yards, 440 Yards, and the Mile. The Southern Counties Team Championship was won by the Otter S.C., whilst the Richmond Life Saving Competition fell to the share of the Edinburgh City Police, the Liverpool City Police being second. The Ladies' National Cup for Swimming and Life Saving was won by Glasgow ladies. On Oct. 12, at Glasgow, England beat Scotland at Water Polo. Amongst professionals David Billington easily proved himself foremost. During the season he swam 200 yards in 2 mins. 18⅘ secs., 300 yards in 3 mins. 35 secs., 500 yards in 6 mins. 22½ secs., 880 yards in 11 mins. 37 secs., and 1,000 yards in 13 mins. 52½ secs., all of which beat Nuttall's times. At Blackpool he gave Greasley two minutes' start in a mile and beat him by 180 yards in 28 mins. 35 secs. British swimmers did not fare very well in the Olympian games. The 100 Metres race there went to C. M. Daniels, New York, the 400 Metres to O. Sheff, Austria, and H. Taylor secured the only English success by taking the 1,609 Metres. Hungary won the Team Race, and E. Walz, Germany, the Diving. During the season the A.S.A. sent deputations to the Railway Clearing House with a view to inducing the various companies to place the sport on the same footing as other games, and to the Board of Education. The object of the latter was to urge the Board to allow swimming to be taken up in all schools as an alternative to physical exercise. Mr. W. Henry, of 8 Bayley Street, London, W.C., is Hon. Secretary of the Royal Life-Saving Society, and Mr. G. W. Hearn, 1 Manilla Crescent, Weston-super-Mare, is Hon. Secretary of the Amateur Swimming Association.

## THE TURF.

VERY eventful was the turf year of 1906. Its chief features were the continuous reversals of form amongst the leading three-year-olds; the (presumed) brilliancy of quite a batch of two-year-olds; the defeat, for the first time in England, of the famous mare Pretty Polly; and, we regret to say, a noticeable increase of foul, or at least careless, riding on the part of many leading jockeys. The evil became so pronounced that towards the end of the season Col. E. W. Baird, one of the stewards of the Jockey Club, called the riders engaged at one of the Newmarket meetings together and publicly admonished and warned them as to their future conduct. Another striking feature of the year's racing was the wonderful success in important events that attended the efforts of the Irish-American jockey, D. Maher, who, in addition to riding the winner of the Derby and Oaks, scored heavily at Ascot, besides taking the Jubilee Stakes at Kempton, the Manchester Cup, the Eclipse Stakes at Sandown, Duke of York Stakes, Cambridgeshire, Grand Prize of Paris, and many other important events.

When the Keeper of the Match Book published his estimate of the best two-year-olds of 1905, in the shape of the annual Free Handicap, Lally was reckoned as the best of the juveniles, being adjudged 15 lb. the superior of Spearmint; and above the latter were placed such as Admirable Crichton, Sarcelle, Black Arrow, Flair, Colonia, and Sweet Mary. Alas for the reliability of even the most experienced judgment! Lally was winter favourite for the Derby, but the only event of any consequence that he won was the Newmarket Stakes at the Second Spring Meeting, and the most coveted prizes of 1906 fell to horses unknown, or lightly esteemed when the previous

* Old Blues. † Rowed in 1904. ‡ Rowed in 1905.
§ Rowed against Yale.

season closed. Early in the year there were rumours to the effect that the King possessed a high-class three-year-old in Nulli Secundus, but Richard Marsh had more than ordinary difficulty in training him. The colt ran very badly in the Derby, and subsequently gave evidence of want of courage and unmistakable dislike for racing. The King ran a good many horses during the year, but the success attending their efforts was paltry. For the first big handicap of the year—the Lincolnshire (£1,445)—Dean Swift was made favourite, but was beaten a head by the five-year-old French horse Ob, who only arrived in this country a day or two beforehand and was consequently overlooked by English speculators, although French visitors were credited with winning a good sum. The Liverpool Spring Cup (£925), over a distance of 1 mile 3 furlongs, the same week, went to an extremely moderate horse, Flax Park, 4 yrs., 7 st. 4 lb. (F. Hunter); and on the Friday Mr. Aubrey Hastings, the well-known polo player, won the Liverpool Grand National Steeplechase (£2,175) on a horse trained by himself. This was Ascetic's Silver, an aged animal who carried 10 st. 9 lb. and started at 20 to 1 in a field of twenty-three. The time for the 4 miles 856 yds. was 9 mins. 34⅘ secs. More than a dozen competitors fell. On Wednesday, May 2, came the Two Thousand Guineas (£3,700), which resulted in a great surprise. By this time Gingal had been frequently mentioned in connection with the Derby, and the best offer against him for the Guineas was 100 to 30, whilst Gorgos was practically friendless at 20 to 1. Beautifully ridden by Herbert Jones, however, Gorgos won by a head from Sancy, with Ramrod third. The future running of the two latter animals proved the winner to be extremely moderate. On the following Friday Sir D. Cooper's Flair, ridden by B. Dillon, won the One Thousand Guineas (£4,000) so easily from eleven opponents that she was at once regarded as the probable Derby winner. The daughter of St. Frusquin and Glare subsequently went amiss, however, and did not run again during the season. Nevertheless, the blue riband winner was destined to emerge from the same stable—Gilpin's, at Newmarket—and the price at which he started was undoubtedly due to the belief entertained by many experts that it was exceedingly improbable two animals capable of winning a Derby could be sheltered under one roof in the same season. On Saturday, May 12, Donnetta (6 yrs., 8 st. 11 lb., Maher) carried off the Jubilee Stakes at Kempton (£2,655) from fourteen opponents; and on the 16th came the Newmarket Stakes (£2,110). When first instituted in 1889, this race was the cause of an outcry to the effect that it discounted interest in the Derby. In some seasons it may have done so, notably when both events were won by Donovan (1889), Isinglass (1893), Ladas (1894), Galtee More (1897), Diamond Jubilee (1900), and Cicero (1905), but this season it had an opposite effect. There were only four starters, and Lally (B. Dillon) rehabilitated himself in the eyes of many by winning by a short head from Malua (Higgs), Gorgos, the Two Thousand Guineas winner (H. Jones), being no nearer than third. When the great event at Epsom came—on the 30th of May—Spearmint, who had not previously run as a three-year-old, put all his contemporaries in the shade. Ridden by the irrepressible Maher, he won the Derby (£6,450) by a length and a half from Picton (Mr. G. Thursby) and Troutbeck J. H. Martin). Lally started favourite in a field of 22 (4 to 1), and finished nowhere. Spearmint, whose price was 6 to 1, won in the record time of 2 mins. 36⅘ secs.—a feat due to the terrific pace set by Troutbeck, who led until turning into the straight by Tattenham Corner. Spearmint was the first son of Carbine to win the Derby; and on June 10 he followed up the feat by taking the Grand Prize of Paris (£10,008) from twelve others, starting at 100 to 9 on: time, 3 mins. 18⅕ secs. for the 1 mile 7 furlongs. Unfortunately, the Derby winner later on fell victim to a coughing epidemic that broke out in Gilpin's stable, and did not race again. That he was quite up to, if not above, the average of Derby winners was proved by the later performances of Troutbeck. The Duke of Westminster's colt started in six other races and won them all, viz., the Triennial Stakes (£770) at Ascot; the Sandringham Stakes (£1,724), at Sandown; the Sussex Stakes (£597), at Goodwood; the City of London Breeders' Foal Plate (£1,180), at Kempton; and the St. Leger (£4,275). In the latter race he started at 5 to 1, Keystone II., who was favourite at 5 to 4, getting no nearer than fourth. Troutbeck, who was ridden by Stern, an English jockey long resident in France, beat Prince William (Halsey) by a head, Beppo (Higgs) being another head in the rear. Keystone II. had previously, on Friday, June 1, won the Oaks (£4,950); and as she also won the Coronation Stakes at Ascot (£2,800), Spearmint's form reads remarkably well. At Ascot one of the sensations of the year was the defeat in the Gold Cup (£3,870) by Bachelor's Button (9st. 4lb., Maher) of Pretty Polly (9 st. 1 lb., B. Dillon) in the record time of 4 mins. 23⅕ secs. Achilles (7 st. 7 lb., Templeman) was third, and the previous year's Derby winner, Cicero (9 st., H. Jones), a bad fourth. Although it was plain to see that Pretty Polly was not at her best, belief in her was so great that odds of 11 to 4 on were laid. The mare had previously cantered away with the March Stakes (£465) at the Newmarket First Spring and the Coronation Cup (£1,470) at Epsom, but she never recovered from the great strain put upon her at Ascot, when not quite fit, and did not run again. Prior to Ascot Bachelor's Button (Maher riding) had won the Manchester Summer Cup (£2,570) from thirteen opponents, carrying 9 st. and starting favourite at 2 to 1 against. In October he won the Jockey Club Cup at Newmarket, giving his solitary opponent, Achilles, 28 lb., and was then retired to the stud. Of the so-called "ten thousand pounders," Dinneford (4 yrs., 8 st. 4 lb., Madden) won the Princess of Wales' Stakes (£7,435) at Newmarket on July 5; Llangibby (4 yrs., 9 st. 13 lb., Maher) took the Eclipse Stakes (£9,285) at Sandown on July 20; and Beppo (3 yrs., 8 st. 1 lb., Higgs) the Jockey Club Stakes at Newmarket on Oct. 27. Reference to some of the big handicaps not dealt with here will be found in the records. Of Ascot events not already touched upon, Traquair won the Coventry Stakes (£1,800) for two-year-olds, Pradella (aged, 8 st. 4 lb., Madden) the Ascot Stakes (£1,845), My Pet II. the 40th Biennial (£1,484) for two-year-olds, Dinneford (4 yrs., 7 st. 8 lb., Madden) the Royal Hunt Cup (£2,120), Poussin the Ascot Derby (£1,150), Slieve Gallion the New Stakes (£2,004 10s.), Black Arrow the St. James's Palace Stakes (£1,750), Hammerkop the Alexandra Plate (£1,405), and Golden Gleam (4 yrs., 8 st., Higgs) the Wokingham Stakes. At Goodwood, the Steward's Cup (£457) fell to Rocketter

(3 yrs., 7 st. 6 lb., Higgs), who defeated twelve others; the Goodwood Plate (£825) went to Winwick (4 yrs., 6 st. 13 lb., Plant); the Goodwood Cup (£1,570) was won by Plum Tree (3 yrs., 7 st. 2 lb., Madden); and the Prince of Wales' Stakes (£3,000) for two-year-olds was won by Prince of Orange.

The two-year-old form was rather perplexing, but there is reason to regard it as better than the average of the past few seasons. Really smart performances were at times accomplished by Slieve Gallion, by Gallinule out of Reclusion; Polar Star, by Pioneer—Go On; Galvani, by Laveno—Gallinaria; Traquair, by Ayrshire—Chelandry; My Pet II., by Perth—My Mary; and Gnome, by Isinglass—Queen Fairy. Reference has already been made to the achievements of some of these. Unfortunately, Traquair is undoubtedly affected in his wind; and Slieve Gallion tarnished his reputation by succumbing to Galvani in the Middle Park Plate (£2,115). Then, again, in the Criterion Stakes (£906) Galvani was easily defeated by Polar Star, who won all twelve races for which he was started. My Pet II., whose last success was in the Dewhurst Plate (£1,257), had previously won five times, but in the Champagne Stakes at Doncaster was beaten by Slieve Gallion, and in the Gimcrack Stakes at York (£950), in August, could only finish fifth to Polar Star. The latter has, therefore, every right to be recognised as the champion two-year-old. Unfortunately, this colt is not in any of the classics of 1907, and My Pet II. only claims an engagement in the Two Thousand.

Turf statistics up to Nov. 12 showed that Keystone II. had won 5 races, of the value of £5,832; Troutbeck 9, of the value of £10,950; Bridge of Canny the same number, value £10,225; and Dinneford 3, value £10,017. Amongst the two-year-olds Polar Star won most races—12, bringing in £5,937; but Traquair's total of £8,117 for 4 successes beat his value. Lord Derby headed the list of winning owners with 20 horses, whose 43 successes brought in £31,106; the next largest sums being credited to Major Loder, 7 horses, 11 races, £17,749; Mr. W. Hall Walker, 7 horses, 24 races, £14,355; and Mr. Sol. Joel, 12 horses, 24 races, £13,852. The leading stallions at the same period were Persimmon, whose stock had won 29 events, of the value of £19,817; Ladas, 30½ races, value £19,713; and Gallinule, 30 races, value £16,114. Amongst trainers P. P. Gilpin led with 14 winning horses, who accounted for 19 races of the aggregate worth of £32,771; Hon. G. Lambton coming next with 21 horses, 44 races, £32,052; and A. Taylor third with 18 horses, 36 races, £26,335. The principal winning jockeys up to the same date were W. Higgs, 138; D. Maher, 103; O. Madden, 98; E. Wheatley, 89; G. McCall, 74; and H. Randall, 66.

## YACHTING.

It cannot be claimed that the racing of the season surpassed in excellence that of any more recent years, but there were unmistakable evidences of the sport arousing more general interest than it has of late years, and many enthusiasts entertain hopes that we are within measurable distance of a revival of big class racing. That yachtsmen are keenly alive to the best interests of their sport was shown in more ways than one. To begin with, the season in regard to regatta dates was almost entirely remodelled, the big class racing opening on the Clyde, instead of as hitherto on the Thames.

International conferences were held during the year, at which a rating rule was adopted which will be observed by all European nations.

A "class" of big racers was formed, *i.e.*, the big yachts always sailed together under their recognised official time allowances, instead of upon handicap terms. Mr. Kennedy's *White Heather* was altered from yawl rig to that of a cutter to sail in this class. Sir James Pender purchased *Kariad*, and sailed her with, however, little success, and the class also included *Nyria*, a very smart cutter, built for Mr. R. W. N. Young by Nicholson of Gosport. This last-named vessel was very successful, although she had the misfortune to be dismasted during the Ostend Regatta. A similar mishap befell *Merrymaid* at Cowes during the Squadron Regatta.

The 52-footers, from the fact of their being all built to the one rating, and therefore racing without time allowance, are still regarded by many as the most interesting class extant, and there were many keen struggles between them, races often being won by a margin of a few seconds. The class was composed of three vessels—Mr. W. P. Burton's *Britomart*, which came out champion of the class; Mr. J. W. Leuchar's *Moyana*; and Mrs. G. Turner Farley's *Sonya*. The last-named is a Herreshoff design, and an undoubtedly smart craft, but she met with an exasperating number of mishaps to her gear during the season, which robbed her of several races. There was some very interesting racing amongst the ex-52-footers, which sail under handicap conditions with limited time allowances. The regular competitors in this class included *Gauntlet*, *Camellia*, *Senga*, *Induna*, *Viera*, and *Nan*.

The Cowes Week was socially one of the best on record, which may be attributed in a great measure to the presence of the King and Queen of Spain. As usual, there were many yachts put in commission solely for this week. The two principal prizes of the week were won by Sir Maurice Fitzgerald's yawl *Satanita*: these were the King's Cup and the Emperor's Cup. There was another King's Cup raced for during the season—at the Royal St. George Yacht Club Regatta at Kingstown. This was won by *White Heather*, and was the first Royal trophy ever won by Mr. Myles Kennedy, notwithstanding his long racing career. *Merrymaid* won the race from Cowes to the Clyde, which was actually the first big event of the season. She is owned by Mr. J. E. Terry, a recruit to yachting. The Kursaal Cup, sailed for at the Ostend Regatta, was won by *Nyria*. The Heligoland Cup was won by *Betty*. The splendid racing between *White Heather* and *Nyria* was quite a feature of the season; the new vessel scored one victory by one second. Persistent rumours were also afloat during the autumn in regard to another challenge being made by Sir Thomas Lipton for the America Cup, and some colour was lent to these reports by a visit which Sir Thomas paid to America. The matter was discussed, but if another contest is ultimately arranged, it cannot take place during the ensuing year.

Amongst the most successful yachts of the year were:—*Britomart*, which won 21 first and 9 second prizes; *Moyana*, 18 first and 9 second; *White Heather*, 11 first and 7 second; *Nyria*, 16 first and 4 second; *Creole*, 17 prizes; *Navahoe*, 13. *L'Amoureuse*, champion of the South Coast one-design class, 17 first, 16 second, and 6 third.

## Automobilism.

THE motorist's year may be said to commence and end with the Exhibition of Automobiles and their accessories, now organised in November of each year by the Society of Motor Car Manufacturers and Traders—a body which may assuredly be said to represent the whole industry in this country, from the manufacturer to the agent. This Society, which during the past three years has grown hugely in power, influence, and strength, was urged to the institution of this Exhibition at Olympia, the only building within easy reach of the centre of London which goes even a part of the way towards providing the space demanded by exhibitors. The area available in this huge building for the exhibition of last year was not nearly adequate to the requirements of all branches of the industry, so that in the Show of 1906 we note the absence of motor-boats and heavy vehicles, it being intended to provide another Exhibition for these productions early in 1907.

The Society of Motor Car Manufacturers were well advised to anticipate the great French Show in the Palais de l'Industrie last year, for the attention of British agents and purchasers was thereby attracted primarily to the numerous home productions, and the importations of English agents, which were displayed under West Kensington's great roof. So important at present is the British export trade to the French automobile industry that many of the leading French constructors were obliged to exhibit their 1906 patterns in England before they saw public light in France, and this fact will again be evident in connection with the Society's Show of the present year.

So far as motor car design and construction are concerned, the exhibits at last year's Show did not present any very remarkable departures, but a most satisfactory advance in the perfection of detail was noticeable throughout all the native-born vehicles.

Of this particular Exhibition it might fairly be said that makers showed some tendency still further to follow the lead of the Napier Co., and supply six-cylinder cars to the demand of the more affluent section of motor purchasers. In the matter of four-cylinder engines there was seen a distinct tendency to cast cylinders in pairs, and to place both induction and exhaust valve chambers to one side or the other of the castings, so that but one half-time shaft was necessary. Two English firms showed motors with the four cylinders in one casting, and this was also noticeable in connection with two well-known French cars. An English firm which has sprung into existence since then, and has secured the services of one of the leading designers in this country, has adopted the four-cylinder single casting. The heart, soul, and spirit of an internal combustion engine designed for the employment of petroleum spirit as fuel is the carburetter; and as the attention, thought, and inventive genius of automobile engineers is continually directed towards this essential apparatus, it was only reasonable to expect improvements in this direction. As a matter of fact, the sum total of thought expended upon the carburetter resulted in the provision of more sensitive automatic air-valves, and in some cases mechanical petrol control, but no great departure was evident. The use of a mechanically driven pump for circulating the cooling water through the cylinder water jackets and the radiator was very general. A few firms only pinned their faith to thermo-syphon circulation, whereby convection alone is relied upon to circulate the water.

What is called the gate change, for changing the speed gear, introduced by the great German firm who build the Mercedes cars, is gradually gaining ground, to the exclusion of the slotted sector once so universal. Metal aprons for the under protection of crank case, clutch, gear-box, and universal joints were very general; ball bearings seemed almost universal except to the crank shaft, although two or three firms had even adventured upon these. Pressed steel frames almost entirely ousted the flitch-plated and tube variety, and this elimination has continued since. It is not likely that a flitch-plated or tubular frame, except for very small cars, will be found in this year's Exhibition. There was a distinct tendency to automatic forced lubrication all round; but that much remains to be done to effect just enough, but not too much oiling, the public throughout the country are only too well aware. Shock absorbers—very necessary fittings for cars used over rough roads—were occasionally seen, but their use has considerably increased since the Show. High-tension magneto ignition was observable in some cases, but this form of firing has yet to grow into anything approaching favour. The evidence of the 1905 Show suggested the gradual displacement of side chain by live axle drive. The rough statistics of the Exhibition showed that 140 exhibitors showed 496 vehicles, and of these more than half were British.

In the month of November Mr. R. L. Jefferson succeeded in driving a small 8-h.p. single-cylinder car from Coventry to Constantinople, *viâ* Harwich, the Hook, through Holland, Germany, Austria, Servia, and Bulgaria, over the Balkans. His experiences were such that no one has since shown themselves anxious to follow his example.

The Motor Union has, under the direction of its officials, done excellent work during the past year. But for their activity local bodies would have succeeded in many cases in speed limiting and closing roads to motorists in an unnecessary and arbitrary manner; but the case for automobilism has been so potently and persuasively laid before the Local Government Board by the Union that these local bodies have only prevailed in a few isolated cases. Where a speed limit has been imposed it has always been reasonable, and the Union has concurred, as at St. Albans. This, and the extension of legal advice and assistance to its members particularly and motorists generally (for the Motor Union is by no means catholic) in urgent cases, is this body's daily work; but wherein the Union and its prominent officials deserve the gratitude and recognition particularly of all automobilists is the manner in which the huge amount of evidence for the motoring side was collated, marshalled, and presented to the Royal Commission on Motor Traffic appointed by the late Government. The voluminous report of this Commission has since been issued, and it is not possible to doubt that the reasonable views and recommendations of the Commissioners upon the whole subject are largely due to the monumental labours of the Motor Union, supplemented in a very able manner by that of the Automobile Club and the Society of Motor Manufacturers and Traders. The sum total of the recommendations are a

slight increase of taxation on motor-cars, the abolition of the present absurd speed limit, and the devotion of money received from automobilism to the amelioration of the roads. No better work has ever been done for the cause of self-propelled road traffic than that performed by the Motor Union in connection with this Commission.

The Exhibition held by the French Club in the Palais de l'Industrie in December surpassed our own in display, but so far as mechanical productions were concerned it produced but little variation from the exhibits at Olympia. The special feature of the Exhibition was the presence of automobiles constructed by Italian firms, of which there were three or four, the chassis exhibited being comparable in every way with the presentations of the leading French houses. Two years ago Italian cars were practically unknown; to-day the titles of two makes at least are almost as familiar in the mouth as Panhard or Daimler. Six-cylinder cars were conspicuous by their absence, but the general note of the Exhibition was greater attention to detail design, better finish, and a striving after simplicity hitherto somewhat foreign to French design. Cylinders cast in one piece were favoured by several leading French constructors, but critics across the Channel are by means persuaded that such castings *le bloc moteur* have come to stay.

In a review of the year, however brief, the work of the Automobile Association cannot be passed over. This Association, conceived by Colonel Bosworth and others, was formed for the purpose of safeguarding its members over stretches of road on which the installation of a police trap showed that the authorities—in many cases for reasons only divinable by themselves—considered a speed exceeding the legal limit to be dangerous to all and sundry. Common sense would dictate a warning notice or verbal caution in such case, but that is not the police method. This obvious duty, neglected by the officers of the law, the cycling scouts of the Automobile Association most ably discharge, with the result that when scouts are posted upon any main road police traps disappear. Nevertheless, the police in one case proceeded against a motorist, not an Association scout, for cautioning a driver not to exceed the legal limit at a particular point whereabout certain police officers were hidden, on the ground that he was obstructing the officers of the law in the execution of their duty, although they had no proof that the law had been broken, or indeed was about to be broken, at the moment the advice was given. The summons was most properly dismissed, and although the police gave notice of appeal, with a prospective waste of public money, nothing more has been heard of the matter.

The driving of motor-cars has shown some signs of growing in favour with ladies, although at present feminine motorists are few and far between. In the early part of the year a series of lectures on motoring, the care and conduct of cars, was delivered before the Ladies' Automobile Club, and numerously attended.

In the commencement of the present year some little concern was felt amongst a section of the manufacturers by the announcement that the owners of the Mercedes patents for the gate change were about to take action against infringers in this country. A flutter had previously been caused by some threats on behalf of the Renault patents in connection with the direct drive, but the latter were shown to be anticipated in this country, and the German action has not advanced, although a well-known patent lawyer has stated that this gate change patent is valid.

The action of the French Club having made a repetition of the Gordon-Bennett race impossible, and the club's hands being forced by the members of the French industry with regard to holding a speed competition wherein France might enter as many cars as she liked, while other nations were limited, the French Club announced that a two days' race, 750 miles, would be held over a selected course in the Department of the Sarthe, close to the town of Le Mans.

At the end of January a great Speed Meeting was held on the Ormonde Beach, Daytona, U.S.A., when some remarkable speeds were achieved. A flying kilomètre was covered by Chevrolet on a 200-h.p. Darracq in $19\frac{2}{5}$ secs. = 115'2 m.p.h., while the flying mile was achieved by a Stanley steam car in $28\frac{1}{2}$ secs. = 127'65 m.p.h. Finally the Frenchman, Demogeot, drove two miles in $58\frac{1}{5}$ secs. = 122'4 m.p.h., in the "Two Miles a Minute Contest," all the above performances being world's records.

In March of this year the Automobile Club promoted some tyre, lamp, and speedometer trials, all three adjuncts being fitted to cars running 4,000 miles. These trials did not in any way apply to the tyre and lamp, for there were but two tyre and four lamp entries. Also only four speedometers were tested.

As the Motor Act, 1903, expires this year, much concern was felt in the early part of the year as to the intentions of the Government, should the report of the Royal Commission on Motor Traffic, then sitting under Lord Selby, not be delivered in time for the introduction of legislation, but in the middle of March Lord Carrington, replying to Lord Montagu in the House of Lords, said that in the above case the present Act would be continued for twelve months.

The annual report of the Motor Union, issued in March, showed the growth of that body to be 4,010 members in twelve months, making a total of 11,265. The number of clubs included was 64, and the membership was steadily increasing. Indeed, at a meeting held towards the end of October, the membership was reported to have reached 13,800, while the affiliated clubs had increased by sixteen.

With April the season may be said to have opened, and Mr. Jarrott's drive from London to Monte Carlo on a Crossley car in $37\frac{1}{2}$ hours led later to further efforts of this kind. At the Monaco Motor Boat Races, held during the third week in April, an English boat, the Yarrow-Napier, won the 50 kilomètres race very handsomely, although her hull had been rather badly damaged on her passage to the Mediterranean. This boat also achieved a most sensational victory in the Racers' Handicap.

The Automobile Co-operative Association, for the purchase of automobiles by members on co-operative principles, was formed during this month.

The race for the Targa Florio, promoted in Sicily by the Chevalier Florio, although boomed in the Continental press, hardly proved so successful as was expected. Two Italian cars finished first and second, and a French car third, no British car competing.

In the early part of May the Hon. C. S. Rolls made a very fast run from Monte Carlo to London on a car built to compete in the Tourist Trophy race in September, the distance between the two points (road distance only 846·2 miles) being covered in 37 hrs. 28½ mins. But the car waited 3 hrs. 11 mins. for the boat at Boulogne.

In the second week of June the Western Section of the Scottish Automobile Club held their annual Reliability Trials over a course considerably more extended and difficult than those of former years. The competition occupied four days, starting at Glasgow and passing through Ayr, Dumfries, Peebles, Edinburgh, Stirling, Perth, Blairgowrie, Braemar, Aberdeen, Keith, Grantown, Pitlochry, and Inverary to Glasgow. During this severe itinerary four trying hill climbs were introduced, one of them being at the Spital of Glenshie, up Cairnwell, which steep boasts the celebrated Devil's Elbow. Forty cars started, of which twenty-one made absolute non-stop runs throughout, and twenty-five, mechanical non-stops.

On 23rd June the Automobile Club carried out a hill climb up South Harting Hill, this and the Tourist Trophy Race being the only open competitions apart from trials promoted by the senior club during the year.

On 26th and 27th June was decided, over the circuit de la Sarthe, the one-nation race for the Grand Prix which the French Club instituted to take the place of the suppressed Gordon-Bennett. In order to sicken manufacturers of such events, which cost the French Club huge sums of money, the race was extended over two days, the cars being parked after the first day's racing. The total distance covered by the cars that finished was 750 miles. The winning car was a 105-h.p. Renault driven by Sisz, a professional driver, who accomplished the distance at an average speed of 61¼ m.p.h. Nazzaro, on a F.I.A.T., an Italian car, was second, 32 mins. 19 secs. behind the winner, and a Bayard-Clement, driven by M. A. Clement, finished third, 3 mins. 20 secs. only in rear of the Italian. The race was won on detachable rims, *jante amovible*, which relieved driver and mechanic of much exhausting labour and saved a vast amount of time. It was a race of tyres.

The first volume of the long-expected Royal Commission Report was issued towards the end of July, and motorists were gratified to find that on the whole the recommendations of the Commissioners were not unreasonable. The chief features of the various recommendations, with which, indeed, all motorists and thinking people accord, are the abolition of the speed limit and some slight increase in the license fees payable on cars, with the proposal that such moneys should be ear-marked for road maintenance and improvement.

In the beginning of August the price of petrol was suddenly raised, but whether this was due to increased demand, reduced supply, or the avarice of the "Oil Ring" is not determinable. That such unaccountable and inconvenient fluctuations in the price of the automobilists' prime necessary can take place is the strongest plank in the alcohol platform.

The 1st and 2nd August saw the Motor Yacht Club's Reliability Trials conducted from the Club House Boat in Southampton Water, the late Admiralty yacht *Enchantress*, in which twenty-six motor boats of various types and powers took part. The second week in the month was remarkable for the fifth celebration of the classic circuit des Ardennes, in Belgium, in which a De Dietrich car, driven by Duray was successful by less than 2 mins. from Hannot, on a Darracq. Duray's speed throughout was equal to 66 m.p.h.

In Southampton Water, the race for the International Motor Boat Trophy was won by the Yarrow-Napier, the boat chronicled as doing so well earlier in the year at Monaco.

Early in September it was seen that, by the regulations of the Commissioners of Inland Revenue, made by powers of the Revenue Bill and the terms of the Report of the Committee on Industrial Alcohol, alcohol as a present motive fuel for automobiles had been altogether disregarded by the authorities. In the first half of the month "The Autocar" announced that taxation at £1 per horse-power was contemplated by those responsible for the Act that is to displace that of 1903, and this possibility has caused consternation in the ranks of the industry and users alike. At the moment of writing no official denial is forthcoming, and petitions against so heavy an impost are in course of preparation.

The end of September was chiefly remarkable for the Tourist Trophy Race held in the Isle of Man, perhaps, with last year's event, the most interesting and valuable competitions ever organised by the Automobile Club. Twenty-nine cars started, and the event fell to the 20-h.p. Rolls-Royce car, driven by the Hon. C. S. Rolls, which completed the four rounds of 40 odd miles at an average speed of 39·3 m.p.h., and with one pint one ounce of spirit to spare over and above the allowance of one gallon per 25 miles. Nine cars finished on the consumption at averages ranging from that abovementioned to 23·2 m.p.h.

The Vanderbilt Cup Race (297 miles), contested at Long Island, N.Y., on Oct. 6, was won by Wagner, 100-h.p. Darracq, in 4 hrs. 50 mins. 10 secs., but the competition was badly hampered by the spectators crowding on to the track.

Racing practically came to a close with a well-handled speed meeting at Blackpool, in which the world's record for the standing kilomètre was reduced to 32⅘ secs. = 69·0 m.p.h., by Mr. Lee Guinness with a 200-h.p. Darracq. The record for the standing mile for light racing cars was reduced to 54⅘ secs. = 65·9 m.p.h., by Mr. Huntley Walker with an 80-h.p. Darracq.

## Motor Marks.

COUNTIES.—Anglesey, E.Y.; Bedford, B.M.; Berks, B.L.; Brecon, E.U.; Bucks, B.H.; Cambridge, C.E.; Cardigan, E.J.; Carmarthen, B.X.; Carnarvon, C.C.; Cheshire, M.; Cornwall, A.F.; Cumberland, A.O.; Denbigh, C.A.; Derby, E.; Devon, T.; Dorset, F.X.; Durham, J.; Ely, Isle of, E.B.; Essex, F.; Flints., D.M.; Glamorgan, L.; Gloucester, A.D.; Hereford, C.J.; Herts, A.R.; Hunts, E.W.; Kent, D.; Lancs, B.; Leicester, A.Y.; Lincs. ## THE WORLD'S PRODUCTION OF GOLD AND SILVER, 1896–1905.

| Year. | British Empire. | | Other Countries. | | Total. | |
|---|---|---|---|---|---|---|
| | Gold. | Silver. | Gold. | Silver. | Gold. | Silver. |
| 1896 | £19,969,000 | £6,786,000 | £23,442,000 | £48,524,000 | £43,411,000 | £55,310,000 |
| 1897 | 25,837,000 | 6,833,000 | 23,222,000 | 47,299,000 | 49,059,000 | 54,132,000 |
| 1898 | 33,938,000 | 6,498,000 | 25,485,000 | 50,177,000 | 59,423,000 | 56,675,000 |
| 1899 | 38,706,000 | 5,539,000 | 26,360,000 | 46,407,000 | 65,066,000 | 51,946,000 |
| 1900 | 25,302,000 | 5,554,000 | 27,319,000 | 48,687,000 | 52,621,000 | 54,241,000 |
| 1901 | 24,981,000 | 4,785,000 | 29,447,000 | 47,198,000 | 54,428,000 | 51,983,000 |
| 1902 | 31,654,000 | 4,244,000 | 29,606,000 | 44,506,000 | 61,260,000 | 48,750,000 |
| 1903 | 37,803,000 | 4,139,000 | 28,092,000 | 46,533,000 | 65,895,000 | 50,672,000 |
| 1904 | 40,385,000 | 5,540,000 | 29,432,000 | 48,646,000 | 69,818,000 | 54,186,000 |
| 1905 | 45,097,000 | 6,094,000 | 30,830,000 | 50,343,000 | 75,927,000 | 56,437,000 |
| Totals ... | £323,673,000 | £56,012,000 | £273,235,000 | £478,320,000 | £596,908,000 | £534,332,000 |

The figures given in the above table are based mainly on Returns prepared by the Director of the United States Mint and published in his annual Reports, and on those contained in "The Mineral Industry," published by the *Engineering and Mining Journal*.

Gold has been valued in the table at the legal rate of £3 17*s.* 10½*d.* per troy ounce standard, and silver at its *coining* value in this country, namely 5*s.* 6*d.* per troy ounce standard.

## BRITISH AND COLONIAL COINAGE, 1891–1905.

| Year. | Gold. | | | Silver. | Bronze. | Total. |
|---|---|---|---|---|---|---|
| | London Mint | Australian Mints. | Total. | | | |
| 1891 | £6,723,600 | £5,422,600 | £12,146,200 | £1,000,548 | £89,535 | £13,236,283 |
| 1892 | 13,907,800 | 6,325,700 | 20,233,500 | 849,932 | 58,556 | 21,141,988 |
| 1893 | 9,266,300 | 6,587,800 | 15,854,100 | 1,008,971 | 46,664 | 16,909,735 |
| 1894 | 5,678,100 | 7,233,900 | 12,912,000 | 942,856 | 33,485 | 13,888,341 |
| 1895 | 3,811,200 | 6,923,900 | 10,735,100 | 1,196,168 | 40,995 | 11,962,263 |
| 1896 | 4,808,900 | 7,110,400 | 11,919,300 | 1,235,161 | 122,860 | 13,277,321 |
| 1897 | 1,778,300 | 7,662,600 | 9,440,900 | 982,001 | 107,230 | 10,530,131 |
| 1898 | 5,780,600 | 8,107,100 | 13,887,700 | 1,312,306 | 84,555 | 15,284,561 |
| 1899 | 9,010,900 | 9,642,800 | 18,653,700 | 1,616,246 | 130,065 | 20,409,011 |
| 1900 | 13,103,700 | 10,024,100 | 23,127,800 | 2,013,381 | 168,295 | 25,309,476 |
| 1901 | 2,604,000 | 9,889,000 | 12,493,000 | 914,201 | 120,280 | 13,527,481 |
| 1902 | 7,119,000 | 11,421,300 | 18,530,300 | 937,202 | 148,399 | 19,615,901 |
| 1903 | 9,928,000 | 11,118,100 | 21,046,100 | 557,247 | 113,894 | 21,717,251 |
| 1904 | 11,042,000 | 11,266,700 | 22,308,700 | 605,801 | 77,895 | 22,992,396 |
| 1905 | 7,300,000 | 11,288,000 | 18,588,000 | 510,490 | 100,325 | 19,198,875 |

*Note.*—Since 1871, inclusive, the designs adopted for gold coins have been identically the same in the four Mints of London, Sydney, Melbourne, and Perth. They are distinguishable, however, in that the Australian coins bear minute "Mint Marks" immediately above the date on the reverse side; the letter S being borne by Sydney coins, M by those issued from Melbourne, and P by those issued from Perth.

## TIDES AND TIDAL WAVES.

IT is not possible within the limits assigned to this article to enter minutely into all the causes which produce the complex phenomena of the tides, though the most prominent factors may be explained without having recourse to the higher mathematics necessary to a full comprehension of this difficult subject.

The Newtonian law of gravitation teaches us "that every particle of matter in the universe attracts every other particle, with a force varying inversely as the square of their mutual distances, and directly as the mass of the attracting particle."

Suppose the Earth to be a sphere covered by a sea of uniform depth, and the Earth and Moon relatively at rest, then the layer of water immediately under the Moon will be attracted more per unit of mass than the Earth, and heaped up towards the Moon; the layer of water on the opposite side of the Earth will be attracted less than the solid Earth per unit of mass: being further off, the water here will be heaped up away from the Earth and Moon. At these opposite places there will be high water, though in this latter case not quite so high as in the former. The sea will thus have very nearly the form of a prolate spheroid, with the major axis passing through the Earth and Moon. At places situated on a circle 90° from the major axis there will be low water.

As the Moon revolves around the Earth, and the Earth rotates on its axis, this figure never has time to perfect itself, and an imperfect form of it travels round the Earth in a lunar day, which is longer than a civil day by about 50 minutes. So that high water occurs, generally speaking, about that time later at the same place each day.

Besides the Moon, the Sun exerts a considerable disturbing force, producing tides exactly similar to those produced by the Moon, but smaller in effect, for although the mass of the Sun is immensely greater than that of the Moon, yet his distance from the Earth is such that the ratio of his tide-producing force to that of the Moon is as 1 to 2¼. The observed tide, therefore, is the effect of the superimposed lunar and solar tides. Calculation shows that the difference between the major and minor axes of the spheroid due to the Moon alone amounts to 58 in., and according to the ratio above would make the same difference due to the Sun alone about 25¾ in.

At New or Full Moon these two bodies are acting in concert, and as a consequence the tides are higher and lower; with the Moon in quadrature they are acting in opposition, and these tides are neither so high or low: in the former we have the Spring, and in the latter the Neap tides. It is not strictly true to say that high water takes place immediately under the Moon, because, owing to the irregular distribution of land and water, with the variation in the depth of the ocean, an amount of friction is caused which retards the passage of the tidal wave, making it come later than it otherwise would. This retardation is a matter of observation peculiar to each locality, and known technically as the Establishment of the Port. The actual high tide being that produced by the united action of the Sun and Moon, makes it necessary to correct the Establishment of the Port, in calculating the times of high water at any place, by a quantity depending upon their relative positions; thus, at the intermediate phases of the Moon between New Moon and First Quarter, the Sun passes the Meridian before the Moon and, pulling the tidal wave towards the West, accelerates the time of high water: this is called the priming of the tides. On the other hand, between First Quarter and Full Moon the tide lags. In like manner, between Full Moon and Last Quarter the tide primes, and from Last Quarter to New Moon lags. Since Newton's time the theory of the tides has been improved by the several mathematicians who have taken the problem in hand, but, from our want of knowledge of the depth of the ocean and the geography of its bottom, cannot yet be considered perfect.

With our actual geography many local complications arise: seas like the Mediterranean, Baltic, or Euxine offer so small an area that the Moon can only act upon each as a whole, and there is practically no tide. The disturbing action requires a very wide expanse of deep water, such as the great Southern Ocean, or the S. Pacific; and there, accordingly, is assigned the birthplace of our great tidal wave, to which many tides in distant seas are referred. One mighty pulse enters the Pacific in a N.W. direction, and another the Atlantic, both to be modified by the depth of water and the form of the coasts, and both extending to the bottom of the ocean. Owing to the islands of the Pacific the tides there become small as the impulse travels north; but in the long deep trough of the Atlantic the tidal force attains a velocity of from 600 to 650 miles an hour. The western impulse across the S. Pacific reaches Tasmania in 12 hours, and in 12 hours more dashes against Hindostan and S. Africa. Another 12 hours and the tidal wave has reached Newfoundland on the West, and the African Cape Blanco on the East. Turning eastward across the N. Atlantic, the tide in 4 hours is split into two waves at Land's End, one of which goes slowly up the shallow English Channel, while the main branch is borne round the North of Scotland—to bring high water to Aberdeen and the coasts of Norway and Denmark—and finally reaches the mouth of the Thames in 48 hours after leaving the Antarctic Ocean. The Atlantic, being deep and free of islands, produces an independent tide, which helps to modify the tidal impulse from the South, one result being the famous high tides of the Bay of Fundy.

The tides are locally affected by the configuration of the coasts, and also to a slight extent by the changes of atmospheric pressure. Where the tidal wave enters gulfs or estuaries which open in its direction, the difference between high and low water is much increased—*e.g.*, Bristol Channel, 40 to 60 ft.; St. Malo, in the English Channel, 50 ft.; Chepstow, 60 ft.; Bay of Fundy, 70 ft. up to 100 ft. in the highest spring tides. The "bore" or "eagre" on certain rivers occurs when the advanced portion of the tidal wave moves so slowly, owing to shallowness or other circumstances, that the succeeding waters gather in a heap—*e.g.*, Severn "head," 3 ft. high; Hoogly, 5 ft.; Amazons, 12 to 15 ft.—that on the Tsien Tang in China has been estimated to flow up the river with a velocity of 25 miles an hour. Another curious local modification of the tides is seen at Southampton, Poole, Weymouth, &c., where two tides occur in 12 hours; a similar anomaly near Clackmannan, on the Firth of Forth, is known as the "leaky tides."

The following heights of tides on the Thames, with the distance of their respective stations from the mouth of the river, are from *Phil. Trans.* (cxxiii. 204):—

| | Height. | Distance. |
|---|---|---|
| | ft. in. | m. |
| London Docks | 18 10 | 60 |
| Putney | 10 2 | 67½ |
| Kew | 7 1 | 73 |
| Richmond | 3 10 | 76 |
| Teddington | 1 4½ | 79 |

The lunar tides, according to the results of recent investigation, are by friction slowly interfering with the Earth's rotation, and therefore lengthening our day. This must go on through countless centuries till the Earth's time of rotation is equal to a lunation, when the lunar tides will no longer exist, and our seas be disturbed only by the weak action of the solar tides.

## OUR SEASONS.

The revolution of the Earth in its annual orbit round the Sun has the effect of causing the latter body, seemingly, to describe a complete revolution among the Stars in the course of a year. If the plane of this apparent path had been parallel to the Earth's Equator, the Days and Nights would be equal all over the Globe, and each place on the Earth would have one constant Season, the character of which would depend on its geographical latitude. Instead of this coincidence of planes, the Equator and Ecliptic (as this apparent path of the Sun is called) are mutually inclined to each other at 23½°; consequently, the Sun is alternately seen above and below the Equator by this amount, causing the phenomena of Summer and Winter: giving long days and Summer to the Northern Hemisphere when the Sun is North of the Equator, and short days and Winter when South of it.

This inclination of the two planes will cause the Sun to cross the Equator twice in the year, viz., once in the Spring, and again in the Autumn, at which times the Days and Nights are equal all over the world; and we experience for a day or two what would be the constant state of our climate if the Sun moved in the plane of the Equator.

From Spring, through Summer to Autumn, the Sun traverses exactly one-half of the Ecliptic, and from Autumn, through Winter to Spring, the other half; but that these halves are not travelled over in equal times will be seen by an inspection of the times at which the different Seasons commence. It appears that the Sun is longer in performing the Summer than the Winter half; this is caused by the eccentricity of the Earth's orbit and the Law of Areas, as it is called by Astronomers—a law which requires that an imaginary line, joining the Earth and Sun, shall sweep over equal areas in equal times. To do this, the Earth when nearer to the Sun, as at the Winter Solstice, must move more quickly than when farther away, at the Summer Solstice; because then the line joining the two bodies is shorter than in the latter case; the effect is to detain the Sun about eight days longer in the Northern than in the Southern Hemisphere.

The Earth's sensible atmosphere is generally supposed to extend some forty miles in height, probably farther, but becoming, at only a few miles from the surface, of too great a tenuity to support life. The condition and motions of this aërial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the Sun; and, when laden with clouds, hindering the Earth from radiating its acquired heat into space. The amount of heat absorbed in its passage through the atmosphere will depend upon the thickness of the stratum which the rays have to penetrate, and this on the meridian altitude of the Sun.

If the surface of the Globe were smooth, and consisted entirely of land or water, the mean temperature of our Seasons would depend solely on our geographical latitude, and we should then find that all places on the same parallel would enjoy the same temperatures; but being, as it is, made up of water and land very unequally distributed, the former occupying two-thirds of the entire surface of the Globe, the temperature of the Seasons at places on the same parallel of latitude is modified by the surrounding masses of land and water. The great capacity of water for heat, and its low power of radiation, make the great Ocean, extending from Pole to Pole, the reservoir which stores up for us the heat it has received from the Sun; while the land, radiating again its heat very quickly, would soon grow cold. The principal medium by which this heat is conveyed to the land is that of the Winds, which, receiving their warmth and moisture from the water, pass over the land, and compensate for the loss of heat which the latter suffers from radiation. From this cause it is that islands enjoy more equable Seasons than inland countries, being neither so cold in Winter nor so hot in Summer; since the same clouded skies that retard the cooling of the land by radiation also shield it from the rays of the Sun in Summer. But in the interior of continents, where the winds have lost their moisture on their passage from the coast, great extremes are known to prevail between the Summer and Winter temperatures. Moscow has a difference between its Summer heat and Winter cold of 82°, London of 57°, while in the Shetland Islands, and at Penzance, in Cornwall, the differences are only 46° and 48° respectively. Beyond the fact of the presence of water, we must not forget that the oceans and seas are traversed by currents of warm water from the Equatorial regions, which greatly promote the distribution of heat.

## VARIABLE STARS.

Although the Stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known, and the most remarkable amongst this class of Stars, is one situated in the constellation Cetus, and known by the name of o Ceti, or Mira Ceti. It has a period of nearly 331·6 days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. The month of October is the best time for observing it. It

will be found in R.A. 2*h.* 14*m.* 39*s.* and South Declination 3° 24′.

Another remarkable Variable Star is Algol, β Persei. This has a very short period—not quite three days—and has a range of magnitude from 2·2 to 3·7. It continues at its maximum for two days and a half, then begins to decrease very suddenly, and in rather more than three hours is reduced to a Star of nearly the fourth magnitude; after remaining at this magnitude for a quarter of an hour, it again attains to its maximum in the same time that it took in passing from it to the minimum. This Star will be found in R.A. 3*h.* 2*m.* 7*s.* and North Declination 40° 36′. It can be well observed in October and November.

U Ophiuchi varies from the 6th to the 6¾ magnitude, with a period of 20*h.* 8*m.* It may be observed in June, southing about midnight on the 9th. Will be found in R.A. 17*h.* 11*m.* 49*s.* and North Declination 1° 19′.

The Variable Star β Lyræ is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this Star—that, although the two maxima are equal, the minima are unequal. It is situated in R.A. 18*h.* 46*m.* 39*s.* and North Declination 33° 15′. The best time for observing it is in the months of June and July. Bright lines are occasionally seen in the spectrum of this Star.

The Star δ Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of 5⅓ days. In passing from the minimum to the maximum it occupies less time than that required for it to reach the minimum again—in the proportion of 38 hours to 91. It is to be found in R.A. 22*h.* 25*m.* 43*s.* and North Declination 57° 56′. August and September are the best months in which to observe it.

There are two hypotheses suggested to explain the phenomena exhibited by the variable or periodical Stars; one of which endeavours to account for the variations in magnitude by supposing that opaque bodies are revolving around these particular Stars, and that at certain times they are interposed between the Earth and the Star, and so cut off from us a portion of the luminous rays of the latter. The other hypothesis suggests that the Stars themselves may have portions of their surface of unequal brightness, and that in their rotations they present to us in turns these more or less bright parts, and so cause the variations that we observe. This theory fails to explain the changes observed in the stars of the Algol type, and is only applicable to such as are quite regular in their fluctuations. Professor Pickering has shown that none of the theories put forward to account for the variability of the light of such stars as Algol will satisfy the observed changes, except that of an opaque or less bright satellite. Adopting this theory (which is now generally accepted), he finds theoretically a satellite whose position and movements would agree with the observed facts.

The above-mentioned "variables" are but a very small portion of the Stars which are *known* to experience fluctuations of magnitude. Our knowledge concerning variable Stars and their distribution in space is being greatly increased by the examination of the photographic plate taken for the chart of the Heavens.

## TERRESTRIAL MAGNETISM.

Magnetism is that property possessed by certain bars of steel, called Magnets, of attracting pieces of iron and also other magnets; beyond this idea very little, if any, meaning is popularly attached to the term Magnetism.

Every magnet has two poles, each pole having, as the term implies, exactly opposite properties such that if we suspend one magnet by a thread free to move in any direction it will be found that on bringing another magnet, held in the hand, near to one end of the suspended magnet if the opposing poles of each are of like properties, they will repel each other, but if of unlike they will be attracted towards each other. In the mariner's compass we have a case of this kind where the compass-needle is so suspended as to be free to move in the horizontal direction, the Earth itself being the other magnet, with its South Pole near to the Earth's North Pole, and its North Pole near to the Earth's South Pole; so that the North Pole of the compass will always point to the Magnetic South Pole of the Earth differing from the true or astronomical north by a quantity called the "variation." The variation of the compass is not only different for different places on the Earth, but is, moreover, liable to slow variation from year to year. In 1580, at London, the needle had an eastern variation of about 11½°; between 1657 and 1666 its direction coincided with the plane of the astronomical meridian; that is to say, the variation, or declination, as it is generally called, was zero; since then it travelled westwards, and reached the maximum western declination in 1815, and is at the present time (1907) slowly moving towards the East.

The compass-needle, being constructed to move in a horizontal direction only, exhibits that component of the total magnetic force which determines the declination; but if the needle had been mounted on a horizontal axis, placed in the magnetic meridian, and left free to move in a vertical plane, it would have been found to *dip*, as it is technically called, or be inclined at an angle to the horizontal plane, the North Pole of the needle being depressed. The value of this *inclination* or *dip* varies in different places on the Globe, increasing towards the Poles, so that in the Northern Hemisphere, at the Magnetic Pole, we shall have the north end of the needle pointing directly downwards.

This North Magnetic Pole was found by Sir James Ross to be situate in 97° W. longitude and 70° N. latitude. The South Magnetic Pole is situated in about 168° E. longitude and 76° S. latitude. Between these points there are found places of no *dip*; all such places are said to be situated on the Magnetic Equator, a plane not far removed from the terrestrial Equator. The *dip*, like the declination, is subject to secular and other variations, the true laws of which are not yet understood, but for the investigation of which magnetic observatories have been established all over the world and elaborate series of observations made on the motions of suspended magnets (their movements in most observatories being automatically recorded by photography), furnishing a continuous record from hour to hour, and year to year, of the forces acting upon them.

## FORECASTING THE WEATHER.

All outdoor pursuits, undertaken for profit or easure, depend so much upon the weather that e can imagine mankind to have taken an interest its study from very early times; and, as a atter of fact, the popular ideas about weather ognostics are much the same as those which re in vogue in the earliest ages. Aristotle, in s book on Meteors (which, in his time, were pposed to have an atmospheric origin), col- cted all the then known prognostics of the eather, but in this work no serious attempt is ade to explain the phenomena observed. In e cases where the attempt is made, the ex- anations offered are often very absurd, and ow entire ignorance of the principles of ysical science.

The observation of the state of the sky taught e meteorologists of early times when to expect riations in the weather, and the result of these servations, formulated into short and pithy yings, made up, until quite recent times, the ience of weather prognostics.

Birds and beasts are all more or less sensitive coming changes in the weather, and by ob- rvation of their movements, warning of changes the weather may be obtained. Among other stances, it is observed that sea birds, as stormy eather comes on, fly inland in search of food; ild fowl leave the marshy grounds for higher calities; swallows and rooks fly low before and iring bad weather; frogs are unusually noisy fore rain; sheep huddle together near bushes d trees.

It was not until the discovery of the baro- eter, in 1643, that the first great step was made owards a knowledge of the nature of our atmo- here. We were then, by its help, enabled to certain the weight and pressure of the great rial ocean which surrounds us, and to learn hen and where it was in a state of calm or orm. The invention of the thermometer, ortly afterwards, gave the means of deter- ining its temperature. The hygrometer, for owing the amount of moisture it contained, d the anemometer, for giving the direction d force of the wind, are also instruments of eat importance to the meteorologist. The dications of these instruments, combined with e careful observation of atmospheric appear- nces, interpreted by the results of former servations, will enable the individual observer nerally to predict the kind of weather that ay be expected in his immediate locality for a y or sometimes longer in advance.

A strip of sea-weed forms a very useful hygro- eter for practical purposes, provided it be not pt in a room warmed artificially. In fine eather it will keep dry and have a somewhat sty feeling, but with an increase of moisture the air will become limp and sticky, indicating robable change of weather in the shape of rain.

Since the time of Admiral FitzRoy the science weather forecasting has made much progress its details, but, for the individual observer, the thod remains much the same now as then. The incipal rules in use for forecasting the weather ay be briefly stated as follows:—

A rising barometer usually foretells less wind rain, and a falling barometer more wind or n, or both; a high barometer, fine weather, d a low one the contrary.

If the barometer has been *about* its ordinary ight at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west; a fall of the barometer, with low thermometer, foretells snow.

With the barometer *below* its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather. If the barometer falls and warmth continues, the wind will probably *back*, and more southerly or south-westerly winds will follow.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A considerable and rapid fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

When a gale sets in from the east or south-east, and wind *veers* by the south, the barometer will continue falling till the wind becomes south-west, when, after a lull, the gale will be renewed.

The north-east wind tends to *raise* the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

Predictions founded solely on the indications of the barometer and thermometer may be made with more certainty if combined with careful observation of the appearance of the sky, and the atmospheric effects peculiar to the particular locality.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is, when the first signs of the dawn appear on the horizon), all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are seen above a bank of clouds) presages wind.

From the clouds we may draw the following conclusions:—Soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

At the present day, by the help of the electric telegraph, the meteorologist can obtain from as many stations as he desires the height of the barometer, direction and force of wind, &c., data which will inform him of the condition and movements of the aërial ocean at a definite time. He then marks on a map the height of the barometer at each place, and, drawing lines through

all the places where the quicksilver stands at the same height, at any convenient interval he obtains a series of lines of equal pressure or weight, called shortly *isobars*, which show the height or depression at those places as the contour lines on a map show the different altitudes of the mountains and valleys. The thermometer readings, treated in the same way, are called *isotherms*. To make these synoptic charts (as they are called) complete, the force and direction of the wind, the amount of humidity, character of clouds, and other weather signs are also marked down, so that the chart may furnish a view of the weather at that particular time over the area from which reports have been obtained.

Supposing now that at the same time the next day a new set of data are received and marked on another chart, a comparison of the two will show the nature and direction of the change going on, and enable the meteorologist to predict, to a certain extent, what will be the immediately coming weather. This is a general description of the way in which the forecasts of weather, printed in the daily papers, are made. The interpretation of these synoptic charts may not appear to the reader to be a very difficult operation, but it must be remembered that meteorology is purely a science of observation, and as such will be most successfully handled by the observer of the greatest experience. From want of knowledge concerning the laws which govern the fluctuations of the weather, failures in the forecasts must happen now and again, and no reason can be given why certain states of the atmosphere, which previous observation would lead us to believe should be stable, suddenly break up without any apparent warning.

The extended use of the telegraph, due to the introduction of wireless telegraphy on board ships, especially on the great liners between Great Britain and America, has already done much, and will probably do still more in the future, to improve our means for forecasting the weather.

Besides the meteorological instruments mentioned above, there is one often used to indicate weather changes which is known as the chemical weather-glass, camphor-glass, or storm-glass.

Though sold in London more than a hundred years ago, no scientific explanation of its indications seems to have been attempted till the late Admiral FitzRoy took it in hand. He considered that this instrument had a scientific value, used in conjunction with the barometer and thermometer, in predicting local storms. Some other writers are at variance with the Admiral on this point, affirming that the weather indications of the storm-glass are not to be relied on; another, that light and temperature are the agents that bring about the changes observed.

The instrument itself consists of a mixture of camphor, nitrate of potassium, and muriate of ammonia, partly dissolved in alcohol, with a little water. This solution is placed in a long glass vial or tube, with some air, and hermetically sealed. Some authorities say that a small hole should be left in the top to admit the external air.

At one time the upper part of the liquid in the tube will appear quite clear, the bottom portion being occupied by a shapeless mass like melting white sugar. Again, the liquid portion will be more or less filled with crystallizations like fern-leaves or hoar-frost, and under some circumstances, like stars.

The general rules given for interpreting readings of the storm-glass are as follows:—

(*a*) If the undissolved substance lies low, smooth at the bottom of the tube—fine weather.

(*b*) If it rises gradually in the shape of fern feather-like crystallizations—rain.

(*c*) If it rises much higher than in (*b*), and the liquid portion is less clear, with star-like cry in motion, high wind or storm will follow.

## RIGHT ASCENSION.

The Right Ascension of any heavenly body its angular distance measured along the Equa from that point of intersection of the Equa and Ecliptic known as the Vernal Equinox. the time of the ancient astronomers this po was situated in the constellation of Aries, a called by them the "First Point of Aries," b it has since then retrograded considerably behi that constellation, and is at present in the c stellation Pisces. Modern astronomers, howev still speak of this zero point, whence Rig Ascensions are measured, as the "First Point Aries." The Right Ascension and Declinati are the two co-ordinates which define t position of any point on the celestial sphe with regard to the Equator as a fundamen plane, just as those of longitude and latitu define the position of any place on the terrestr globe; the meridian of Greenwich being tak as the starting-point by geographers from whi to reckon their longitudes, while the astror mer reckons his from the meridian passi through the Vernal Equinox.

Since a well-regulated astronomical clo should show $0^h.\ 0^m.\ 0^s.$ when the Fir Point of Aries is on the Meridian, the Rig Ascension may be called the Sidereal time Southing, and the approximate Mean time corr sponding to it may be easily found for any obje whose Right Ascension is given in this Almana by means of the column headed Sidereal Time Mean Noon, printed on the second page of eac month. The rule may be thus stated:—*From t given Right Ascension subtract the Sidereal tim at the preceding Noon, and further diminish t result at the rate of* 10 *secs. an hour.* If the Rig Ascension should be smaller than the Sidere time to be subtracted, then 24 hours must b added to it. As an example:—At what time wi $\alpha$ Orionis South on March 4?

| | |
|---|---|
| R.A. of $\alpha$ Orionis + $24^h$. ..... | $29^h.\ 50^m.$ 8 |
| Sidereal time at Mean Noon (sub.) | $23^h.\ 44^m.$ 23 |
| | $7^h.\ 5^m.$ 45 |
| Diminish by the Acceleration for $7^h.\ 5^m.\ 45^s.$ at $10^s.$ per hour ..... | $1^m.$ 11 |
| Approximate Mean time of Southing, March 4 ..... | $7^h.\ 4^m.$ 34 |

In a similar manner the Sidereal time corresponding to any Mean time may be found b adding the Mean time to the Sidereal time a Noon of that day. As an example, let it b required to find the Sidereal time correspondin to $9^h.$ P.M. on September 16.

| | |
|---|---|
| Sidereal time at Mean Noon | $11^h.\ 37^m.$ 8 |
| Mean time ..... (add) | $9^h.\ 0^m.$ 0 |
| | $20^h.\ 37^m.$ 8 |
| Add for Acceleration for $9^h.$ at $10^s.$ per hour ..... | $1^m.$ 30 |
| Approximate Sidereal time Sept. 16 at $9^h.$ P.M. ..... | $20^h.\ 38^m.$ 38 |

PPARENT DIMENSIONS OF SATURN'S RING, 1907.

The figures in the second and third columns of he preceding table give the apparent dimensions f Saturn's Ring as seen from the Earth, and refer o the outer limit of the outer Ring. The sign + gnifies that the northern surface will be visible, nd − the southern surface. The Ring will be isible when its plane passes through either the entre of the Sun, centre of the Earth, or when he Sun and Earth are on opposite sides of the lane of the Ring.

The figures in the fifth and sixth columns epresent respectively the illuminated portions f the discs of Mercury and Venus.

ILLUMINATED PORTIONS OF THE DISCS OF MERCURY AND VENUS, 1907.

also varies, from hour to hour, in a similar manner to the declination. The declination and dip are also subject to secular variations, the duration of which is not accurately known. Accidental perturbations, due to magnetic storms, affect the needles. These variations in the position of the magnets occur with great suddenness, deflecting the needle right and left with great rapidity, almost like ordinary telegraphic signalling, and are, generally speaking, coincident with the passage of great outbursts of sun spots across the sun's central meridian.

## MAGNETIC ELEMENTS.

The following table of mean magnetic elements derived from the observations made at Greenwich in the respective years, and applies to Greenwich only.

The diurnal variation of the magnetic declination at Greenwich is about 12′ in summer and 7′ in winter. The needle occupies its mean position about 10*h.* a.m., and again about 6*h.* p.m., throughout the year. It reaches its most westerly position about 2*h.* p.m., and its most easterly position during the night or early morning, according to the season of the year. The inclination or dip

## THE GRAND PRIORY OF THE ORDER OF THE HOSPITAL OF ST. JOHN OF JERUSALEM IN ENGLAND.

(INCORPORATED 14 MAY, 1888, WITH ADDENDA 1888 AND 1890.)

*Sovereign Head and Patron* ..... H.M. King Edward VII.
*Grand Prior* ..... H.R.H. The Prince of Wales, K.G.
*Sub Prior* ..... The Marquess of Lindithgow, K.T.
*Bailiff of Eagle* ..... H.R.H. The Duke of Connaught, K.G.

EXECUTIVE OFFICERS.

*Prelate*—His Grace the Archbishop of York.
*Chancellor*—The Earl Egerton of Tatton.
*Secretary-General*—*Col.* Sir Herbert Jekyll, K.C.M.G., M.P.
*Receiver-General*—Edwin Freshfield, D.C.L.
*Chaplain*—The Rev. Canon Duckworth, C.V.O., D.D.
*Registrar*—*Maj.-Gen.* Lord Chelmsmore, C.V.O.
*Genealogist*—Sir Alf. Scott Scott-Gatty, C.V.O. (Garter).

*Director of the Ambulance Department*—The Marquess of Breadalbane, K.G.
*Lieutenant*—*Lt.-Col.* R. Holbeche.
*Secretary*—*Colonel* Sir Herbert C. Perrott, Bt., C.B.
*Chairman of the British Ophthalmic Hospital, Jerusalem*, The Earl Egerton of Tatton.
*Chief Secretary of the Ambulance Department*, *Col.* Sir Herbert C. Perrott, Bt., C.B.

ASSISTANT EXECUTIVE OFFICERS.

*Assistant Director of Ambulance Department*—*Lieut.-Col.* Sir Richard Temple, Bt., C.I.E.
*Assistant Librarian*—Cyril Davenport, V.D., F.S.A.
*Assistant Secretary*—Lockhart Stockwell.
*Accountant*—William R. Edwards, A.C.A.

*Honorary Secretary of British Ophthalmic Hospital, Jerusalem*—*Lt.-Col.* J. T. Woolrych-Perowne.
*Assist. Hon. Sec. for Scotland*—J. H. Stevenson, M.A. (Unicorn).

# Summary of Celestial Objects and Phenomena for Observation, 1907.

THE following is a description of the more interesting and striking astronomical occurrences and of the positions and configurations of the planets in 1907. The information is presented in a popular form so that it may be readily understood by those who do not possess a technical knowledge of astronomy. It is intended, in fact, for that numerous class of observers who make a "hobby" of the science and find a pleasure in the contemplation of the heavenly bodies, and in witnessing some of the curious changes and attractive appearances which they present from time to time. We have necessarily confined our references to those particular events and objects which are capable of being definitely predicted. There are certain other phenomena which are irregular and occasional in their apparitions; amongst these may be included Temporary Stars, new Comets, Sun Spots, displays of Auroræ Boreales, and brilliant Meteors or Fireballs. Examples of some, if not of all, of these spectacles will be sure to offer themselves for observation in 1907, but it is not possible to specify the exact times and positions of their appearances. Those persons who are most vigilant in observing the sky are likely to be the most successful in detecting objects of the kind alluded to. We make reference to them in the hope that amateur astronomers will maintain a diligent watch of the firmament, and record and publish anything they may notice of special interest. New comets are usually announced in the newspapers a few days after they have been discovered, and such references are often accompanied with information which will enable any one to detect them; but a telescope is generally necessary in the observation of these bodies, as they are often very faint and beyond the reach of the naked eye. Fugitive objects, such as large Meteors, confine their apparitions to a few moments of time: Auroræ are more lasting, and are sometimes displayed for several hours without intermission, under a series of changeful aspects. It is obvious that spectacles of this character cannot be announced beforehand, as their individual apparitions follow no exact laws and regular cycles of recurrence; they are therefore usually witnessed by such persons only as are favourably situated for such observations and maintain a pretty constant look-out for them.

*Eclipses.*—During the year 1907 there will occur four eclipses, viz., two of the Sun and two of the Moon. The times at which these phenomena take place are given in another page of this Almanack (72), and our remarks here will be merely of a general character.

The first eclipse of the year will happen on January 14, and will affect the Sun, but it will be invisible at Greenwich. It will be total at some places. At Madras and Hong Kong a partial eclipse may be observed, the Sun being nearly half hidden at the time of greatest phase.

The second eclipse will occur on January 29, and will form a partial obscuration of the Moon, but it will be invisible in this country, the Moon being below the horizon.

The third eclipse will be an annular one of the Sun on July 10, but it will be only visible in the Southern Hemisphere.

The fourth eclipse will occur on the morning of July 25, and will be a partial obscuration of the Moon, partly visible at Greenwich. At the time (4*h.* 22*m.* A.M.) of the middle of the eclipse rather more than 6-10ths of the Moon's disc will be involved in the Earth's shadow. But the Moon will set at 4*h.* 10*m.* A.M., or 12 minutes before the time of greatest obscuration. The event will therefore necessarily be witnessed under unfavourable conditions, as our satellite will be low in the West-by-South sky. In order to view the event the observer must occupy a position commanding an open view of the region named. Even then, however, the spectacle is not likely to be without its disadvantages, owing to the profusion of vapours usually congregated in the vicinity of the horizon. But should the atmosphere be sufficiently free from clouds at the time the observer should carefully notice whether the shadowed portion of the Moon's disc still remains visible or is apparently blotted out of the sky. There are great variations in the opacity of the Earth's shadow projected on the Moon in different eclipses, for while on some occasions our satellite remains distinctly visible, on others her disc is nearly, if not quite, obliterated. It is desirable, therefore, to accumulate careful observations with regard to this changeful feature, so that the effects produced may be clearly understood and explained.

It will be seen from the foregoing notes that though the year 1907 includes four eclipses only one of them will be perceptible to observers in the United Kingdom, and this will happen under bad circumstances. It is to be hoped that the lunar eclipse of July 25 will be presented at a time when the sky is clear, and this condition of weather may be considered very probable, as the Moon, when at the full, seems to possess the faculty of dispelling clouds. Apparently, as a consequence of this, the great majority of lunar eclipses are successfully observable.

*Transit of Mercury.*—This phenomenon will occur at about mid-day on November 14, and may be witnessed at Greenwich. The planet will begin to enter upon the Sun's eastern margin at 10*h.* 23*m.* 40*s.* A.M., will be nearest the Sun's centre (12′ 38″ distant) at 0*h.* 6*m.* 51*s.* P.M., and will leave the Sun's western margin at 1*h.* 49*m.* 58*s.* P.M. The whole transit therefore occupies 3*h.* 26*m.* 18*s.* The apparent diameter of Mercury will be 9″·8″, and of the Sun 32′ 23″·4′, so that Mercury will exhibit a diameter only 1-198th part that of the Sun. When in transit the planet will appear as an intensely black circular spot, and a pretty good telescope must be employed if the event is to be effectively witnessed. Some interesting features have been detected in the aspect of Mercury when crossing the Sun on former occasions. The small black disc has been surrounded by a luminous ring or annulus, and a bright point has been placed near or at the centre. The ring was first noticed during the transit of November 11, 1736, but the bright point had been seen 39 years previously, viz., on November 3, 1697. Whether one or both of the appearances alluded to are mere optical illusions is not quite certain. They are not always seen, and when observed the descriptions of them are by no means accordant. Some observers have seen two bright spots on the disc

Mercury ; others have referred to the annulus different in width and colour. It is highly obable that the bright spot or spots are origi- ted by the telescopes employed, and have no istence on the surface of Mercury. Spectators the coming transit should carefully scan e disc of the planet for phenomena of the nd alluded to. Optical illusions rarely affect perienced observers who adopt suitable pre- utions to avoid them and apply proper tests any suspicious appearances that may be esented. Another feature may be noticed as casionally visible just as the planet reaches e edge of the Sun's disc prior to its egress ; it s then been seen to assume a pear-shaped rm, but this, similarly to the other features uded to, is not invariably observed, and rtainly has no physical reality. The last ansit of Mercury occurred on November 10, 94 ; the next will take place on November 6, 14.

*Occultations.*—None of the bright planets or ars will be occulted by the Moon in 1907 ; in ct, the various objects hidden by our satellite ll be comparatively small, the principal ing :—γ Capricorni (mag. 3·8) on April 8, Tauri (mag. 3·9) on November 20 and Decem- r 18, ζ Tauri (mag. 3·0) on November 22, and Geminorum (mag. 3·6) on November 24. The act times at which these phenomena will occur e, however, given in the calendar portion of the manack. In monthly traversing the zodiacal nstellations the Moon frequently passes near anets and a number of conspicuous stars with- t actually occulting them. Her conjunctions th Venus, Mars, Jupiter, and Saturn in 1907 ll take place on the undermentioned dates at e distances assigned. Astronomical time, unted from noon to noon, is employed in this d three following tables.

| Dec. 11 | 15 56 | 2 44 |

At the times of her conjunctions Venus will be N. of the Moon until August 7, when she will be S., and also for the remainder of the year. Mars will be S. of the Moon at all the conjunctions except those of November 12 and December 10. Jupiter will be N. to July 10, then S. from August 7 to the end of 1907. Saturn will be N. of the Moon at all his conjunctions during the year.

*Planetary Conjunctions* sometimes furnish very attractive spectacles, and, being usually observable without instrumental means, are often witnessed, the only essential being a favourable sky.

| | | |
|---|---|---|
| Feb. 20, 23*h.* 17*m.* | Mercury | 1° 40′ N. of Saturn. |
| Apr. 21, 2*h.* 41*m.* | Venus | 0° 38′ N. of Saturn. |
| May 1, 11*h.* 12*m.* | Mars | 0° 46′ S. of Uranus. |
| May 21, 13*h.* 0*m.* | Jupiter | 1° 0′ N. of Neptune. |
| Aug. 1, 4*h.* 47*m.* | Venus | 0° 18′ N. of Jupiter. |
| Aug. 10, 14*h.* 24*m.* | Mercury | 2° 6′ S. of Jupiter. |
| Dec. 31, 2*h.* 56*m.* | Mars | 1° 50′ N. of Saturn. |

In the conjunctions of May, when Uranus and Neptune are implicated, it will be necessary to employ a field-glass or telescope, as the planets named are faint, owing to their great distance.

*Jupiter's Satellites.*—Amateurs possessing telescopes of moderate dimensions will find the four bright Galilean satellites of Jupiter very attractive objects for study. They can be distinctly perceived in any small glass, and the circumstance which, more than any other, renders them so interesting is that their relative places vary from hour to hour and from night to night. The different positions they successively occupy are entertaining to the observer, who experiences no feeling of monotony such as is apt to result from a view stationary in all its details. And the satellites not only change their positions at brief intervals, but frequently become eclipsed in the shadow of Jupiter or occulted by the large globe of the planet. They also make transits across the disc, and it is at these times that they occasionally become visible as circular dark spots projected on the bright surface of Jupiter. The shadows of the satellites are also to be distinguished on the face of the planet at such times, and a telescope will sometimes reveal the gratifying spectacle of two or three black spots coursing along the line of the Jovian belts and imparting quite an abnormal appearance to the planet's scenery. The satellites are not generally known by distinguishing names, it being customary to refer to them by the Roman numerals I., II., III., IV., V., VI., and VII., but of late the idea of employing the names given the first four by Simon Marius, soon after their discovery in 1610, has been more favourably regarded The fifth satellite, discovered by means of the great 36-inch refracting telescope at the Lick Observatory in California on September 9, 1892, is exceedingly faint and close to the planet, so that it requires a large instrument to reveal it. The sixth and seventh satellites, discovered by photography at the same Observatory by Perrine in 1905, are also far beyond the reach of ordinary appliances. The Satellites III. and IV. are the two outermost bright ones from Jupiter, and they are frequently transformed into dark spots when in transit. Under such circumstances they are fairly conspicuous objects even in small instruments. Appended are the occasions in 1907

when Satellite III. may be distinguished in transit :—

SATELLITE III. (Ganymede).

| 1907. | Ingress. | | Egress. | | Duration of Transit. | |

| ,, 17 ..... | 14 | 0 | 17 | 42 | 3 | 42 |

Similar transits of Satellite IV. (Callisto) will take place as under :—

| Date. | Ingress. | | Egress. | | Duration of Transit. | |
|---|---|---|---|---|---|---|
| | H. | M. | H. | M. | H. | M. |
| Feb. 1 ..... | 12 | 56 | 14 | 43 | 1 | 47 |
| ,, 18 ..... | 4 | 30 | 6 | 26 | 1 | 56 |
| April 9 ..... | 8 | 58 | 11 | 27 | 2 | 29 |
| Oct. 11 ..... | 13 | 19 | 17 | 57 | 4 | 38 |
| Nov. 30 ..... | 18 | 49 | 23 | 39 | 4 | 50 |
| Dec. 17 ..... | 10 | 48 | 15 | 39 | 4 | 51 |

A telescope of about three inches aperture will exhibit the satellites Ganymede and Callisto and their shadows during these transits, for the dark circular spots representing them will be very obvious on the bright surface of the planet. The shadows are larger and more prominent than the satellites themselves, and mistakes in identifying them from one another are frequently made. The times of occurrence included in the foregoing tables should, however, prevent errors of this kind, for, except at the period of opposition, the satellites and their shadows will differ materially in their times of transit. Before opposition the shadows precede the satellites ; after opposition the order is reversed, the satellites taking precedence of their shadows.

Thus, on September 22, rather more than four months *before* opposition, Satellite III. (Ganymede) commences its transit *4h. 6m. after* its shadow ; while on April 3, about three months *after* the opposition of Dec. 28, 1906, the same satellite begins its transit *5h. 8m. before* its shadow. The intervals between the satellite and shadow-transits of IV. (Callisto) are even greater, for they occasionally amount to 12 hours.

The third satellite of Jupiter is so bright that it has been occasionally glimpsed with the naked eye. All four of the old Galilean satellites would be visible without telescopic aid but for the brilliancy and bordering position of the planet. The fifth, sixth, and seventh satellites are only objects for the professional astronomer who has an exceedingly large telescope at his command. Their periods of revolution are :—

| *Satellite.* | *Period.* D. H. M. S. | *Discoverer and Date.* |
|---|---|---|
| Fifth ... | 0 11 57 22·7 | Barnard, 1892, Sept. 9 |
| Sixth ... | 242 . . . | Perrine, 1904, Dec. 3 |
| Seventh | 259 17 . . | Perrine, 1905, Jan. 2 |

The two latter have very long periods, which have not yet been very exactly determined.

The four bright satellites are usually seen arranged in a line approximately parallel with the belts and with the planet's equator, but there are notable exceptions. Sometimes they are symmetrically arranged, two being on one side and two on the other. On certain dates they are placed three on one side and one on the other, while occasionally they are all clustered on one and the same side of Jupiter. The following are some of the dates when they may be observed in the latter position :—

| *Satellites on East side of Jupiter.* | | *Satellites on West side of Jupiter.* | |
|---|---|---|---|
| February | 10 P.M. | January | 3 P.M. |
| ,, | 17 ,, | ,, | 17 ,, |
| March | 3 ,, | February | 7 ,, |
| ,, | 17 ,, | ,, | 21 ,, |
| April | 22 ,, | March | 29 ,, |
| May | 6 ,, | April | 12 ,, |
| ,, | 27 ,, | ,, | 26 ,, |
| August | 17 A.M. | June | 2 ,, |
| September | 22 ,, | August | 27 A.M. |
| October | 6 ,, | September | 10 ,, |
| ,, | 27 ,, | October | 16 ,, |
| November | 24 P.M. | ,, | 30 ,, |
| December | 16 A.M. | November | 6 ,, |
| ,, | 30 ,, | ,, | 20 ,, |
| | | December | 4 ,, |

Interesting conjunctions of three of the satellites will occur on the evenings of January 1, Feb. 10, April 18, 25, and mornings of Sept., 9, 22, October 4, November 14, 20, and 27. Only one satellite will be visible (the others being occulted, eclipsed, or in transit) on March 16, *7h. 44m.* to *10h. 1m.* P.M., August 31, *3h. 16m.* to *3h. 33m.* A.M., September 23, *3h. 44m.* to *6h. 20m.* A.M., Oct. 18, *1h. 5m.* to *1h. 31m.* A.M., and December 18, *2h. 0m.* to *2h. 35m.* A.M.

The four brighter satellites of Jupiter deserve only form one of the first and certainly one of the most attractive natural pictures viewed by the young telescopic observer, for they may be detected and followed with great facility, taking up, as they do, a series of extremely interesting positions as a result of their different periods of revolution. The student may find a little agreeable entertainment in watching the satellites and delineating on a number of diagrams their change in relative position on different nights. The satellites may be individually identified by reference to the calendar portion of this Almanack, which contains a monthly column exhibiting their daily configurations. It often happens that two of the satellites approach each other so closely as to be scarcely separable with moderate powers, the appearance being analogous to that of a difficult double star.

The *Sun*, forming as he does the great central source of light and heat and the mainstay of planetary life, naturally receives marked attention from everyone interested in astronomy. A mighty orb, exhibiting evidences of great activity and capable of exerting physical influences of far-reaching and forcible character, it is not to be wondered at that he has always been regarded with earnest attention, and that the study of solar phenomena is considered to be of the highest importance. Many persons have heard something about the "spots on the Sun," but comparatively few have ever seen these curious formations. That an object so dazzlingly luminous to our conception

the Sun should exhibit dark markings is a cumstance very surprising in itself, but when is stated that these markings are often of ormous dimensions (individual spots may be ,000 miles in diameter, while groups may be 0,000 miles or more in length), and that they dergo exceedingly rapid changes, sometimes pearing or disappearing in a few hours, the ention becomes riveted on phenomena of such ment. The spots are occasionally sufficiently ge to be distinguished without instrumental ; indeed, their discovery antedates the inven- n of the telescope by many centuries. When- r this instrument is employed for solar ob- vation a dark-tinted glass should be attached the eye-piece, in order to moderate the intense lliancy of the Sun, for unless precautions of this d are taken serious damage may result to the erver's sight. A very convenient plan of ecting observations of the Sun is to detach the oured glass from the instrument, and to allow telescopic image of the Sun to fall upon a ce of white cardboard. The details of the ts may be readily perceived in this manner, d the speckled appearance of the whole disc l be displayed satisfactorily. This method is be recommended for general purposes, inas- ch as it prevents possible injury to the eye d affords an easy means of exhibiting the spots several persons at the same time. For critical mination of sun-spot structure and variation detail, we must, however, resort to the or- ary plan of direct vision as decidedly the most ective. The present is rather a favourable iod for watching solar phenomena, as the ts are likely to prove comparatively frequent 1907. They are abundantly displayed at ervals of about eleven years with intervening es of minima. We may look at the Sun ny times during two or three successive years, scarcely ever see a large dark spot amid the ht stippling of the solar surface. In other rs we shall see spots distributed in plentiful ay along zones lying not far N. and S. of the ator. Thus in 1901 and 1902 the Sun was ctically free from conspicuous spots, while in last two or three years they have been very ndantly presented. In October, 1905, two y large spots were observed. At the end of y, 1906, another fine individual spot was seen. se, with some others, were distinctly visible the naked eye. The maximum of these phe- nena is now past, and in the immediate ure the sun's disc may be expected to assume ore quiescent condition. But with a decline these solar disturbances students will find e time to engage in investigating the large y of significant facts which have accumulated recent years and which promise some con- rable additions to our knowledge of the ject.

or a long period it had been known that sun- ts and magnetic storms presented some gestive coincidences in their times of occur- ce, but the nature and extent of the con- tion remained doubtful for the want of lable and sufficient data. Recently, however, whole question has been ventilated, with the ult that the sun-spots and magnetic storms ear to be directly and closely associated. But ugh the main fact may be said to have been onstrated on conclusive evidence, the subject complicated and difficult one, and further ob- ations and comparisons are necessary before problem will be fully and completely solved.

The spots apparently transit the solar surface in about 13½ days, and merit close study when near the margin of the disc, for certain modern observers object to the idea that they represent cavities in the sun's atmosphere. When the dimensions of a sun-spot reach one minute of arc, it may be considered large enough to be distinguished by the naked eye. A spot of this size can generally be well seen through a piece of smoked or coloured glass, or possibly near the times of sunrise or sunset if the sun's light is sufficiently moderated by fog, mist, or thin cloud.

The *Moon* admittedly forms the most diversified, attractive, and distinct object in the firmament for telescopic study. Her invariable features present a striking contrast to the evanescent formations which disturb the luminous atmosphere of the Sun. The lunar landscape is, it is true, subject to many apparent variations quite altering the visible aspect of the features in detail; but these are merely due to the constantly changing angle at which the Sun's rays fall upon them. Objects differently illuminated undergo some curious tranformations of aspect; but real changes in the actual surface formations of the Moon have never been conclusively proved, though often suspected. The expanse of hill and valley, mountain, crater and ridge, with extensive plains here and there, seen on our satellite are permanent features liable to no rapid alterations of shape or size, though it is perhaps quite possible that many of them undergo slight modifications during long periods of time. Evidences of great activity in the earlier stages of the Moon's existence are distributed abundantly over the lunar orb, but the markings have settled down into a rigid, immovable state so far as the imperfect and somewhat limited evidence afforded by our telescopes enables us to judge. The most suitable period at which to view the craters and mountainous regions of the Moon is when her disc is only partly illuminated, and she is in a crescent form, near the first or last quarter. At these periods the shadows of the various inequalities of landscape near the terminator are strikingly manifested, and the diversified character of the formations most attractively portrayed. This is not the case at the period of full Moon, for lunar objects are then placed under a vertical Sun, and their shadows have disappeared, so that the features seem to have lost their distinctive characters. The great brightness of the full Moon is also an impediment to successful observations, especially when a large telescope is employed. Let the observer, therefore, avail himself of the period near the first quarter, for the Moon is then very conveniently situated in the evening sky and other conditions are favourable. The surface of our satellite has already been thoroughly surveyed, but there remains much to be done in the re-examination and drawing of details in regard to which our knowledge is far from perfect. Observers should specially search for evidences of active change, and compare reliable charts of the Moon with new observations at the telescope. Splendid photographs of our satellite have been obtained in late years in America and elsewhere, and these exhibit a surprising amount of detail far more accurately reproduced than the best drawings. Should any marked differences be discovered between old and new records, the observer should not too hastily infer the occurrence

of real changes. There are imperfections and errors in the best charts of the Moon, some delicate features have been omitted altogether, while others have been incorrectly delineated. And it must be remembered that as the Sun's altitude above a lunar object varies so does the object change its aspect. Fair comparisons can therefore only be instituted when the conditions are identical. It is fair to suppose that we must look to photography, rather than to direct telescopic observation, to supply us with new facts and clear up some long-standing mysteries, in connection with the visible details of the lunar surface.

In past years, several interesting instances of supposed real change on the Moon have been discussed and investigated, but without definite issue as regards proof of the alleged variation. The crater Linné, in the Mare Serenitatis, was thought to have been filled up, and a depression near the cleft of Hyginus, in the Mare Valorum, was said to have materially altered its character; but these instances could not be demonstrated on sufficient evidence. We are now in a much better position than we were a generation ago to detect cases of lunar activity, should they occur, for drawings and photographs have multiplied to such an extent that we possess tolerably full and reliable means of comparison. Selenographical students should, therefore, by the most accurate means available, continue to apply themselves to the search for instances of change, as it forms a most attractive branch of investigation on a wonderfully diversified and beautiful object.

*Mercury* will shine in the evening sky near the close of February and beginning of March, and the conditions will greatly favour his detection at this period. He will reach his extreme elongation East on March 2, when he will be distant from the Sun 18° 9′. The times of his setting and those of the Sun, with some other data, are given in the following table :—

| 1907. | Mercury sets. | Sun sets. | Interval. | Illuminated Disc of Mercury. | Apparent Diameter. |
|---|---|---|---|---|---|
| | P.M. | H. M. | H. M. | | ″ |
| Feb. 20 | 6 38 | 5 20 | 1 18 | ·833 | 5·6 |
| ,, 21 | 6 45 | 5 22 | 1 23 | ·807 | 5·8 |
| ,, 22 | 6 51 | 5 25 | 1 26 | ·779 | 6·0 |
| ,, 23 | 6 57 | 5 27 | 1 30 | ·748 | 6·1 |
| ,, 24 | 7 3 | 5 28 | 1 35 | ·712 | 6·2 |
| ,, 25 | 7 8 | 5 30 | 1 38 | ·672 | 6·4 |
| ,, 26 | 7 13 | 5 32 | 1 41 | ·629 | 6·6 |
| ,, 27 | 7 17 | 5 33 | 1 44 | ·586 | 6·8 |
| ,, 28 | 7 21 | 5 35 | 1 46 | ·542 | 7·0 |
| Mar. 1 | 7 24 | 5 37 | 1 47 | ·499 | 7·2 |
| ,, 2 | 7 26 | 5 38 | 1 48 | ·455 | 7·4 |
| ,, 3 | 7 27 | 5 39 | 1 48 | ·412 | 7·6 |

During this period the planet will be well visible on clear evenings about an hour after sunset just above the western horizon. He will appear to be brighter before the date (March 2) of greatest elongation than after it, so that about February 24 and 25 will be the best dates for observation, though he will not remain so long visible after sunset as on a few later dates. No other really bright planet will be placed near Mercury at this period, nor will the Moon be in the same region of the sky. But on February 21 the planet Saturn will be a few degrees to S.W. of Mercury; it will, however, require good eye and a very clear atmosphere to ena the pair of planets to be detected in the str twilight, as they set about 1*h.* 20*m.* after Sun. Mercury will again present his glitte lustre in the evening sky at Midsummer, but be seen with more difficulty than in Febru He will again reach eastern elongation Junction June 27 (25° 28′), and will set nearly 1¼ ho after the Sun during the period June 15–20, times of his setting, &c., being as under :—

| 1907. | Mercury sets. | Sun sets. | Interval. | Illuminated Disc of Mercury. | App ent d met |
|---|---|---|---|---|---|
| | H. M. | H. M. | H. M. | | ″ |
| June 15 | 10 0 P.M. | 8 16 | 1 44 | ·619 | 6· |
| ,, 16 | 10 1 ,, | 8 16 | 1 45 | ·599 | 6· |
| ,, 17 | 10 2 ,, | 8 17 | 1 45 | ·580 | 6· |
| ,, 18 | 10 1 ,, | 8 18 | 1 43 | ·561 | 6· |
| ,, 19 | 10 0 ,, | 8 18 | 1 42 | ·542 | 6· |
| ,, 20 | 10 0 ,, | 8 18 | 1 42 | ·523 | 7· |
| ,, 21 | 9 59 ,, | 8 18 | 1 41 | ·505 | 7· |
| ,, 22 | 9 59 ,, | 8 19 | 1 40 | ·487 | 7· |
| ,, 23 | 9 57 ,, | 8 19 | 1 38 | ·469 | 7· |
| ,, 24 | 9 54 ,, | 8 19 | 1 35 | ·451 | 7· |

| ,, 26 | 9 51 ,, | 8 19 | 1 32 | ·416 | 8· |

The conditions will be such that the plan will be brighter and much easier to observe about June 15 to 18 than on the day of greate elongation (June 27). Mercury will be in co junction with Jupiter on June 15 at 8*h.* 30 P.M., when the latter planet will be situat 1° 41′ S. of the former, and probably appe rather the brighter of the two. This occasi will prove very useful for making comparati observations of the two planets, but the lig of a June sky will render them fainter th usual.

In August Mercury will again become visibl but must be looked for in the morning sky abo an hour before sunrise. He will be at his greate western elongation on August 13, and the tim of his rising, &c., will be as under :—

| 1907. | Mercury rises. | Sun rises. | Interval. | Illuminated Disc of Mercury. | Appa ent D mete |
|---|---|---|---|---|---|
| | H. M. | H. M. | H. M. | | ″ |

| ,, 20 | 3 17 ,, | 4 54 | 1 37 | ·695 | 6·1 |

On the morning of August 11 Mercury will b 2° 6′ S. of Jupiter, and this conjunction wi afford an interesting repetition of the spectac afforded on June 15. For the fourth time in th year observers will have an opportunity of seein Mercury with the naked eye early in Decembe for he will attain his greatest western elongatio

20°)-on December 1, and his rising, &c., will ake place as follows :—

| 1907. | Mercury rises. | Sun rises. | Interval. | Illuminated Disc of Mercury. | Apparent Diameter. |
|---|---|---|---|---|---|
| | H. M. | H. M. | H. M. | | ″ |

| ,, 8 | 6 4 ,, | 7 54 | 1 50 | ·788 | 5·7 |

This planet will be near the waning crescent f the old Moon on the mornings of December 3 nd 4. At 6.30 A.M. the relative positions ill be—

Dec. 3, Mercury 11° E.S.E. from the Moon.
,, 4, Mercury 4° W. from the Moon.

This sparkling little planet never departs more han 28° from the Sun, and there are many diffiulties attendant upon observing him, except uring a few short intervals in the spring and utumn, when he becomes visible either as an vening or morning star.

There is always a peculiar satisfaction in etecting the planet which is said to have defied he efforts of Copernicus, who, though regarded s the greatest theoretical astronomer of the 5th century, appears to have invariably failed o his efforts to obtain a naked-eye view of ercury. The incident is scarcely more than a radition, however, and the story hardly seems redible, unless, indeed, we assume an undue revalence of obscuring vapours in the lowlands ordering the river Vistula near Thorn, where opernicus resided. There is really no serious bstacle in the way of securing observations of his orb if his position is tolerably well known, nd if the attempt is made at a suitable time of he year, and when the atmosphere is sufficiently ear for the purpose.

Should the observer fail to distinguish the lanet with the naked eye, a field-glass should be rought into requisition, and this will soon enble him to be picked up, but the search must be ade in the right direction. In our text-books n astronomy the planets generally are stated to ine with a steady light, in contrast to the fluctating light of the fixed stars; but Mercury rnishes a notable exception to the rule, for e emits a fitful, flashing lustre. The ancient reeks recognised this feature and called him the strongly sparkling one."

It is reckoned a feat of importance to obtain view of the planet, and it forms one of the rst endeavours of the astronomical student, ho regards this fugitive object with a sort of omantic interest. In some climates there is no fficulty in viewing Mercury many times in a ar, but in England cloudy skies are apt to uit such observations. The telescopic examiation of Mercury is rendered unsatisfactory by e planet's constant proximity to the Sun, but appears that his disc exhibits irregular spots ke those apparent on Mars, though they have ver been sufficiently studied. Hence the rotation of Mercury is still a somewhat open question, though the probability is that the period lies between 24*h*. and 25*h*. No recent observations, furnishing a reliable basis for a new determination of the rotation period, have been obtained. About a century ago Schroeter made the rotation period 24*h*. 4*m*., while Harding concluded it to be 24*h*. 5*m*. 28*s*. But Schiaparelli, the eminent Italian observer, states that the planet rotates on his axis in a precisely similar time to that which he occupies in revolving around the Sun, but this conclusion is certainly not final. It may be useful to remind observers that this object appears in his greatest lustre a few evenings before his easterly elongations in the first half of the year, and on a few mornings after his westerly elongations in the last half of the year.

*Venus* has from the earliest times upheld her title to be considered the most replendent and the most beautiful of all the planetary members of our system. But in the year 1907 not much will be seen of this attractive object. It is true that during the first two months of the year she will be brilliantly visible as a morning star, and will be noticed by everyone who looks eastwards before sunrise. But after the first half of March the planet will rise such a short time before the Sun that she will become practically invisible. And throughout the spring and ensuing summer Venus will be absent from the sky; it will be late in autumn and during the week or so preceding Christmas that she will come into prominence as an evening star. At the middle of December she will set about 1½*h*. after the Sun, and this will have increased to 2*h*. at the close of the year.

During her favourable presentation as a morning star in January and February, the planet travels from 3° N. of $\beta$ Scorpii to the eastern borders of Sagittarius. She will attain her maximum brilliancy on January 4, and reach her greatest elongation West (46° 53′) on Feb. 9. She will be in conjunction with $\alpha$ Libræ and only 5′ N. of that star on the morning of Oct. 27, but these objects will be near the Sun and invisible. On the morning of December 12 Venus and Uranus will be only 1° apart, and may be seen in the same field of view of a telescope. Taking the whole disc as equal to 1·000, the illuminated portion will vary as follows :—

| | | | |
|---|---|---|---|
| Jan. 1 | 0·232 | Feb. 20 | 0·554 |
| ,, 11 | 0·315 | Mar. 2 | 0·599 |
| ,, 21 | 0·388 | ,, 12 | 0·639 |
| ,, 31 | 0·450 | Dec. 17 | 0·922 |
| Feb. 10 | 0·505 | ,, 27 | 0·906 |

Thus she increases from a crescent to a fully illuminated disc at the time of her superior conjunction with the Sun at the middle of September, 1907, and will thereafter exhibit a slight defect from the circular form. Being so striking an object to the eye, Venus naturally encourages the hope that her telescopic picture will provide interesting material for discussion, but this has rarely been realised. Her phases are easily observed and always entertaining, but the disc is apparently free from conspicuous dark spots, belts, or definite markings of any kind. It is true that mountains, dusky canals, and seas have been said to visibly diversify the surface of this orb, but, as telescopic features, they are certainly not to be recognised and cannot be truly objective. The origin of such formations can indeed be distinctly traced to optical illusion. Venus is a severe test of instrumental capacity; her

brilliancy is apt to exaggerate defects and to provide unreliable observers with a fruitful cause of misconception. It must necessarily be admitted that our knowledge of the physical aspect of Venus is of very doubtful character. Of observations we have an abundance, but of well-assured results, calculated to afford useful information, we possess very few. Though the telescope has been employed on Venus during nearly three centuries, we are yet doubtful as to her rotation period. Certain determinations have suggested a period of *23h. 21m.*, which is a little shorter than a terrestrial day, but Schiaparelli considers the evidence convincingly in favour of the long period, *224* days *17* hrs., which corresponds with the time of her revolution round the Sun. The question is a difficult one to dispose of satisfactorily, but observers should continue to examine Venus, whenever she is suitably displayed, with a view to gathering evidence capable of finally solving the problem of the rate of her axial motion. Obviously in the case of a planet revolving in about *24* hours, and only suitably visible for a relatively short time every day, it must be difficult to trace motion in very faint, indefinite markings, which are doubtfully seen and usually defy very exact location. However, many of the mysteries of astronomy have been unravelled by perseverance, and the time is probably not far distant when the true rotation period of our beautiful sister planet, Venus, will be ascertained with precision.

*Mars* will be brightly visible in the summer months of June, July, and August. He will arrive at opposition to the Sun on July **6**, when his diameter will be *23″*. But his altitude will be very low, his South declination being *25°* on June **1**; *27½°* on July **1**; and *29°* on August **1**. Thus, though he will be tolerably near the Earth, and present a pretty large disc, it will be almost impossible in English latitudes to obtain successful views of the surface markings. The telescopic images of planets situated at small altitudes are generally very disappointing: the dense air strata through which they have to be observed cause undulations and impair definition to such a degree that delicate features are obliterated, and the forms and positions of the plainer ones rendered very uncertain. But at southern observatories the position of Mars will be very favourable, and it is hoped that the opportunity to re-study the planet's lineaments will be fully utilised.

At the opening of the year Mars will be in the eastern portion of Virgo, and moves westward in succeeding months through the constellations Scorpio and Sagittarius. On June **6** he becomes stationary, and during the next two months will slowly retrograde in Sagittarius, after which he again moves eastwards, successively passing through Sagittarius, Capricornus, and Aquarius, and at the close of the year will be found occupying a position just below the equator in Pisces. In his course he will pass near several fairly conspicuous stars in the southern zodiacal signs referred to. Thus, on January **8** he will be placed about *¾°* N. of *α* Libræ (mag. *2·9*); on February **8**, *⅓°* S. of *β* Scorpii (mag. *2·7*); on April **12**, *2°* N. of *λ* Sagittarii (mag. *2·9*); on April **28**, *2½°* N. of *σ* Sagittarii (mag. *2·1*); on July **5**, *⅙°* S. of *τ* Sagittarii (mag. *3·5*); on July **15**, *2¼°* S. of *σ* Sagittarii; and on September **2**, *1¼°* S. of the same star. The planet will be visible either as a morning or evening star during the whole year, and his fiery red light will be sure to attract a good deal of attention. His approximate times of rising or setting, with his apparent diameter and defect of illumination, will be as follows:—

| | Rises. H. M. | Apparent Diameter. ″ | Defect of Light ″ |
|---|---|---|---|
| Jan. 1 ..... | 2 55 A.M. | 4·99 | 0·37 |
| Feb. 1 ..... | 2 38 ,, | 5·92 | 0·57 |
| Mar. 1 ..... | 2 15 ,, | 7·18 | 0·78 |
| April 1 ..... | 1 32 ,, | 9·30 | 1·06 |
| May 1 ..... | 0 33 ,, | 12·54 | 1·22 |
| June 1 ..... | 11 8 P.M. | 17·59 | 0·87 |
| July 1 ..... | 9 14 ,, | 22·39 | 0·06 |
| Aug. 1 ..... | 6 47 ,, | 21·62 | 0·79 |
| Sept. 1 ..... | 11 29* ,, | 17·00 | 1·79 |
| Oct. 1 ..... | 10 48 ,, | 13·11 | 1·85 |
| Nov. 1 ..... | 10 39 ,, | 10·25 | 1·54 |
| Dec. 1 ..... | 10 41 ,, | 8·29 | 1·17 |

*Minor Planets.*—These small bodies, revolving between the orbits of Mars and Jupiter, lie quite beyond the sphere of popular observation. About *600* of them have been discovered up to the present time, and hundreds of others await detection. One only of the large number mentioned moves in a path the mean distance of which falls between the Earth and Mars. This particular planet is named Eros, and is the most important minor planet known, since its occasional near approaches to the Earth will enable the Sun's distance to be determined more accurately than is possible by any other object or method. Eros, however, is usually extremely faint, and may be dismissed as beyond our scope for it is only visible as a tiny telescopic star. A really favourable opposition will not occur until **1924**. Of the ordinary members of this abundant family, four are of some importance, viz.: Ceres, Pallas, Juno, and Vesta. They were discovered early in the **19**th century, and are brighter than the others.

*Ceres* arrived at opposition on December **5**, **1906**, and will be observable during the opening months of **1907**. On January **4** she will be *2½°* N. of *ε* Tauri (mag. *3·7*). A telescope will be necessary to view this little planet, as her magnitude will be only *7½* under the best circumstances. Whenever it is desired to identify

* This and the values for the three succeeding months are the times of his setting. As an object suitable for telescopic study, and with an apparent diameter exceeding 10″, Mars will be invitingly presented between April **9** and Nov. **4**, so that there will be seven months of the year available for observers. It is to be hoped that the results obtained will be on a scale of interest and importance consistent with so prolonged an opportunity. The principal markings on Mars appear to represent real surface formations of permanent character. In fact, the spots seen at the present day are the same features as those which attracted the notice of Hooke, Huygheus, and Cassini about two and a half centuries ago. Certainly these spots appear subject to slight variations from time to time, but the changes are only temporary, and probably induced by the different angles under which they are viewed from the Earth, and by Martian vapours passing over them occasionally. In this Almanack for **1905**, p. **686**, we mentioned that "possibly the year **1905** would virtually terminate the discussion" with regard to the objective existence of the "canals" supposed to profusely diversify the planet's surface. And it has done so, for some of the "canals" were photographed in the year named. This unequivocal testimony as to the canaliform aspect of Martian scenery formed the most important advance in our knowledge of planetary details effected in recent years. The features on this planet are not precisely of the shape and character delineated by Schiaparelli, nor are the canals double, as he alleged, but in the main his charts are correct and may be regarded as a great improvement upon the work of his predecessors in the same field.

Ceres, or any other object of similar character beyond reach of the naked eye, its exact position relatively to a known star should be found and the telescope directed to the place. The observer should then construct a diagram of the small stars visible, and on succeeding nights, by comparing this diagram with the same spot in the heavens, the object sought for will reveal itself by its motion.

*Pallas* will not be in opposition to the Sun in 1907, having passed that point on October 2, 1906. This planet is even fainter than Ceres, and must be looked for in the evenings at the early part of the year, or in the mornings during the closing months. On January 1 he will be placed 2° E. of 3 Ceti (mag. 2·2); on February 23, 1½° S. of 7 Ceti (mag. 3·9); and on December 23, 2° S. of 5 Crateris (mag. 3·8).

*Juno* will be in opposition on April 29, 1907, and may therefore be seen to advantage in the spring months, when she will be situated in the N.E. region of Virgo. On August 4 a very favourable opportunity will present itself for picking up this object, as she will be very closely S. of the star $\phi$ Virginis (mag. 4·9), the positions of the objects being:—

| | R.A. | Dec. |
|---|---|---|
| | H. M. S. | ° ′ |
| $\phi$ Virginis ..... ..... | 14 23 25 | S. 1 49 |
| Juno at transit, Aug. 4 | 14 23 1 | S. 1 59 |
| ,, ,, Aug. 5 | 14 23 37 | S. 2 5 |

Juno will be in conjunction with the Moon on the morning of January 9, and only 1° 14′ N. of that luminary. Juno is the faintest of the four minor planets discovered in the early years of the last century, and her computed opposition magnitude in April, 1907, will be only 8·65.

*Vesta* is the brightest of all the minor planets, and is occasionally very distinctly visible to the naked eye. She will be favourably presented in the evening sky during the first quarter of 1907, and as she comes to opposition in January, 1908, may also be well seen during the last quarter of the year in the morning sky. Her position in January and February will be in Pisces. On January 6 she will be little more than 1° S. of 30 Piscium (mag. 4·6). During the months from September to December the planet will be in Gemini, and on the nights of December 18 and 19 will be placed about ½° S. of the star δ Geminorum (mag. 3·6). At this time the magnitude of Vesta will be 7, and it will be interesting to watch the planet pass the above star from E. to W., her motion being retrograde at the time of the conjunction. There will be some interesting appulses of Vesta and the Moon in 1907, as follows:—

| | | | | ° ′ | |
|---|---|---|---|---|---|
| Feb. 16 | ... | 8 A.M. | Vesta | 0 42 | S. of Moon. |
| Mar. 16 | ... | 3 P.M. | ,, | 0 7 | N. ,, |
| Aug. 4 | ... | 12 ,, | ,, | 0 52 | S. ,, |
| Dec. 21 | ... | 10 A.M. | ,, | 0 59 | S. ,, |

From measures obtained with the 40-inch refractor at the Yerkes' Observatory in 1900, the diameters of the chief minor planets were: Ceres, 477 miles; Pallas, 304 miles; Juno, 120 miles; Vesta, 239 miles. The light-reflecting capacity of Vesta and Juno must be very much greater than that of the others.

*Jupiter*, the "giant planet," forms an object of very special interest to all telescopic observers. In 1907 he will be visible under favourable conditions, being above the horizon during the greater part of the night in the first three months, a brilliant evening star throughout the spring, and an equally lustrous morning star during the last four months. In June, Jupiter will draw near to the Sun and be lost in his rays, until in the latter part of August he will again present himself as a conspicuous object. Rising earlier every day, he will be beautifully displayed in the dawn of September and October mornings. His angular diameter will apparently be a little less than in several preceding years, but his altitude will be considerable, and this will more than compensate for the slight reduction in size. The following figures will exhibit the variation in his position, diameter, &c., during the last six oppositions:—

| Opposition. | Declination of Jupiter. | Apparent Polar Diameter. |
|---|---|---|
| | ° ′ | ″ |
| 1901, June 30 ... | 23 10 South | ... 43·4 |
| 1902, Aug. 5 ... | 17 57 ,, | ... 45·0 |
| 1903, Sept. 12 ... | 6 3 ,, | ... 46·0 |
| 1904, Oct. 18 ... | 8 18 North | ... 46·0 |
| 1905, Nov. 24 ... | 19 28 ,, | ... 45·0 |
| 1906, Dec. 28 ... | 23 13 ,, | ... 43·6 |

The next opposition will occur at the end of January, 1908.

During the first five months of the year the planet will be placed in the western region of Gemini, moving slowly westwards until February 25, when he will appear stationary, and after that date will be directed eastwards. On January 12 and April 10–11 he will be ¾° and 2°, respectively, N. of the star $\mu$ Geminorum (mag. 3·2), and on January 30 and March 24 1° N. of the variable star $\eta$ Geminorum. He will be visible during nearly the whole night in the first quarter of the year. On May 1 he will set soon after midnight, and on June 1 at 10*h*. 33*m*. Continuing to approach the Sun, the planet will scarcely be seen in the sky after the middle of June, and will be in conjunction with the Sun on July 16. On September 1 he will rise nearly 3 hours before the Sun, and this interval will have increased to nearly 5¾ hours by October 1. During the last four months of the year Jupiter will occupy a position in Cancer, and move gradually eastwards a little S. of the star-cluster Præsepe.

One of the most interesting planetary markings ever observed is that of the Great Red Spot on Jupiter. Possibly this feature is identical with a similar object seen by Hooke, Cassini, and others in 1664 and later years. It varies considerably in its appearances, having been sometimes conspicuous and at other periods invisible. It has endured for such a long period that it may be almost considered a permanent feature of the planet. It first came under general observation in July, 1878, when it was of an intensely red colour. This object is still faintly visible, and it seems to exhibit a variable motion as well as to undergo remarkable changes in tone and tint. No doubt its appearance is affected by the atmospheric vapours surrounding it, which in recent years appear to have covered the spot with a lighter material. Schwabe, a German observer, made drawings of Jovian features 75 years ago, and amongst them we may clearly recognise the peculiar surroundings of the red spot, if we cannot identify the object itself. The mean rotation period of the spot during a very long period has been 9*h*. 55*m*. 37*s*., but the rate has varied between about 9*h*. 55*m*. 33*s*. and

9*h*. 55*m*. 42*s*. During the last few years the velocity has shown some remarkable oscillations: thus in the 16 months from January, 1905, to May 4, 1906, the mean rate of rotation was 9*h*. 55*m*. 41*s*., whereas during the three months from May 4 to August 8, 1906, it was only 9*h*. 55*m*. 34*s*.

For the guidance of those observers who may desire to examine the faint remains of the great red spot and its neighbouring features, a list of some of the times when it may be expected to present itself on or very near the central meridian of the planet is given below. The observer may readily calculate for himself the times of transit on other nights, should he require to know them, by adopting the rotation period of 9*h*. 55*m*. 40*s*., which is equivalent to the interval elapsing between successive returns of the same marking.

TRANSIT TIMES OF RED SPOT ON JUPITER.

| 1907. | H. | M. | 1907. | H. | M. |
|---|---|---|---|---|---|
| Jan. 3 ... | 7 | 13 | Feb. 22 ... | 8 | 28 |
| ,, 5 ... | 8 | 51 | Mar. 6 ... | 8 | 26 |
| ,, 7 ... | 10 | 29 | ,, 18 ... | 8 | 22 |
| ,, 10 ... | 7 | 58 | ,, 30 ... | 8 | 19 |
| ,, 15 ... | 7 | 6 | Dec. 13 ... | 12 | 23 |
| ,, 17 ... | 8 | 44 | ,, 23 ... | 10 | 38 |
| ,, 29 ... | 8 | 38 | ,, 25 ... | 12 | 16 |
| Feb. 10 ... | 8 | 32 | ,, 27 ... | 13 | 54 |

These predictions are made on the basis that the position of the spot remains the same as at present, with a longitude of 15°, which enables it to follow the transits of the zero meridian of System II. of the Ephemeris in 25 minutes.

At intervals of 12 days (which include 29 rotations) the spot becomes central on Jupiter at nearly the same times as before. These remarks only have a special reference to the red spot, for it is found that different latitudes furnish different periods of rotation. Some of the markings have exhibited a proper motion so rapid that they complete a circuit of Jupiter in 8*m*. less time than others. These features are doubtless of an atmospheric character, and are certainly influenced by currents of different velocity operating far above the sphere of the planet. As to the red spot, it is desirable that it should continue to be watched and its further changes of tint and motion duly recorded. Though it cannot be a formation cohering with the actual surface of Jupiter, it must possess elements of remarkable permanency. Notwithstanding the large amount of observation which in past years has been given to the planet, there still remain a great number of interesting facts to be gleaned respecting his atmospheric currents and the many curious light and dark spots carried along at different velocities in them.

*Saturn*.—The conditions attending the annual apparitions of this planet are successively repeated with little change, as the dates of opposition are only about 12 days later every year. The rings are now almost invisible, being in nearly the same plane as the Earth; the major axis on September 21 will be 44·99″, and the minor 0·34″. The planet will probably appear ringless early in October, and again early in January, 1908. Observers with good telescopes should attentively survey Saturn at these times, and ascertain whether the rings absolutely disappear, or whether there remains a narrow line of light or bright points marking their position. The planet will arrive at opposition to the Sun on September 18, and will be seen to advantage during that and the succeeding autumn months. In recent years Saturn has been badly placed for observers living in high northern latitudes, but his position is now markedly improving in this respect, as he is gradually assuming a greater altitude. His southern declination, which on the date of his opposition in 1900 was 22½° S., will have decreased in 1907 to 4¾°, and the few following years will find him still coming northwards and bettering his position as an object for telescopic study in this country. In January, 1907, the planet will be faintly visible in the evening twilight, but will soon draw too near to the Sun for successful observation. His conjunction with that luminary will occur on March 9, and he will reappear as a morning star at the close of May. He will be placed in the western region of Pisces, and the extent of his motion will not exceed 6¾ degrees during the last seven months of the year. On September 13 he will be situated about 1½° N. of the small star 20 Piscium (mag. 5·7), and will be close to Mars on the last evening of the year. Of all the objects presented in the sky the astronomical observer will find Saturn the most picturesque, for his luminous rings possess a unique charm. No other body in our solar system is distinguished by a similar appendage; in fact, this orb displays a beauty without any parallel, so far as our powers of observation enable us to judge. The rings and globe are visible in a comparatively small telescope, but large instruments and high powers are necessary to exhibit the planet to the best advantage.

Though Saturn presents a far more novel configuration than Jupiter, the former appears very much smaller, owing to his greater distance, and his disc does not present that wealth of fairly conspicuous detail and expansive panorama of changing scenery such as the surface of Jupiter reveals. Under prolonged study there is usually a sameness in the image of Saturn which is apt to make us weary of the picture, most attractive as it is on first inspection. But Saturn, akin to his giant brother Jupiter, is apt to rouse his latent forces and to exhibit indications of widespread energy and change. In the summer of 1903 several very large white spots appeared in his northern hemisphere and in the light zone dividing the N. equatorial belt from the N. polar shading. These new markings were attentively followed, and they enabled the planet's rotation period to be determined as 10*h*. 37*m*. 52·9*s*. In 1794 Sir W. Herschel determined the period as 10*h*. 16*m*. 0·4*s*., and Professor A. Hall in 1877 found it 10*h*. 14*m*. 23·8*s*. The two latter values were the most reliable ones ascertained in former years. It is true that many observers had seen, or thought they had seen, spots on Saturn; but other persons, with excellent sight and powerful telescopes, had failed to detect anything of them.

The irregular markings on Saturn, like the similar features on Jupiter, are evidently influenced by proper motions of considerable extent. In fact, different latitudes of these planets give discordant rotation periods, as there are a number of atmospheric currents of different velocities circulating round them. Saturn has ten satellites, but only half of this number are visible in ordinary telescopes. The brightest satellite, appropriately designated Titan, is visible in any small glass, and Iapetus is some-

imes to be glimpsed with very small instruments, but Mimas and Hyperion require far greater power. Instances are recorded where the fainter satellites are supposed to have been detected with telescopes apparently quite incapable of such a feat, but these results may generally be dismissed as mere efforts of the imagination. A ninth and tenth satellite of the planet have been recently discovered on photographs taken by Professor W. H. Pickering in America. The period of the ninth satellite (named Phœbe) has been computed to be 547 days, and its distance from Saturn eight millions of miles. The period of the tenth satellite is, approximately, 21 days, and its distance a little less than that of the eighth satellite, Hyperion (about 900,000 miles). The motion of the ninth moon is said to be retrograde, which is a surprising departure from the direction of motion followed by the other satellites; but our knowledge of the new bodies is somewhat uncertain, and further observations must be awaited.

*Uranus* will be in opposition to the Sun on the evening of July 3, and may therefore be seen to advantage during the summer months of the year, but his southern declination of 23½° will limit him to low altitudes as viewed from European stations. As a telescopic object the planet offers little inducement, as his tiny disc will appear ill defined in the vapours near the horizon. The extent of his motion during the year will be comprised within 5° in Sagittarius. He will be near the following stars :—

| | | | |
|---|---|---|---|
| June 19, | Uranus | ½° S. of $\nu^2$ Sagittarii | (mag. 5·2) |
| ,, 23, | ,, | ½° S. of $\nu^1$ | ,, ( ,, 5·0) |
| Aug. 11, | ,, | 1° S. of 28 | ,, ( ,, 5·6) |

On June 18 and December 10 the planet will be found in the region 3° N. of $\sigma$ Sagittarii. These various stars will enable the planet to be picked up with a little care on the part of the intending observer. With the naked eye he may be seen as a star of about 6th magnitude, and in a telescope may be readily identified by his disc. If an instrument of low power is directed towards the place of the planet, and a diagram made of the stars visible in the field, he will reveal his presence by motion if comparisons are made on subsequent nights. The most suitable time for observations of this sort will be in July and August, when the Moon is absent from the sky. The four small satellites revolving round this distant orb are beyond the reach of ordinary telescopes, but the outermost pair (Titania and Oberon) have sometimes been glimpsed with moderate appliances. The planet emits a pale blue light, and probably exhibits a belted aspect, like Jupiter and Saturn, but markings of irregular character, likely to afford a clue to the rotation period, have very seldom, if ever, been certainly observed. This period is likely to be a short one, and intermediate between that of the larger planets Jupiter and Saturn and that of the smaller planets Mercury, Venus, the Earth, and Mars. Uranus will be only 0° 46′ N. of Mars on May 1 at 11*h.* 12*m.* P.M., and will be near the Moon on the evening of July 23.

*Neptune*, revolving on the farthest limits of the planetary system, will arrive at opposition on January 2, and in a very suitable position for observation during the first quarter of the year. He will also be favourably placed at the last quarter, but chiefly in the morning sky. His motion will extend over about 5° during the year, in Gemini. There will be an excellent opportunity to identify this distant planet on January 24, for on that date he will be only ¼° N. of the star 36 Geminorum (mag. 5·2). During about the last half of January and first week of February the planet and star may be well seen in the same field of view, with a telescope of low power. On December 31 and on the first few nights of January, 1908, the planet may be picked up 1¼° N. of the variable star $\zeta$ Geminorum. On May 21, at midnight, Neptune will be just 1° S. of Jupiter. The planet is quite invisible to the naked eye, as he shines no brighter than a star of the 8th magnitude. A pretty good telescope must be employed in searching for this faint and rather difficult object. Everyone has viewed Venus, the brightest and most beautiful of the major planets, but few persons have ever beheld Neptune, the faintest. There is a satellite attending the latter, but it does not come within reach of small telescopes.

*Periodical Comets.*—These objects form an interesting class, and our knowledge of them has exhibited a rapid increase in recent times. Not a single year passes without the return of a periodical comet. The diligence of modern observers has enriched this branch with many important discoveries, but it appears that though new comets of short period are being introduced by means of planetary perturbations (for which Jupiter is mainly responsible), there are others which meet with disturbances in pursuing their paths sufficiently forcible to endanger, if not to terminate, their visible existences. Biela's double comet has not reappeared during the last half-century, and its material seems to have been distributed into a stream of shooting stars. Brorsen's comet has also been missing, and may have followed the same fate. The materials of which these presumably lost comets were composed no doubt still exist and revolve round the Sun in regular periods, but it is doubtful whether they will ever be viewed again under the same aspect as formerly. As an example of the increase in the number of known periodical comets, it may be stated that during the 16 years from 1880 to 1896 no less than 16 new comets of short period were discovered. The following table includes details of those comets which are expected to appear during the ensuing few years :—

| Date of Return. | Period in Years. | Name of Comet. |
|---|---|---|
| 1907. Oct. ..... | 6·878 | ... Giacobini (1900). |
| Oct. ..... | 8·687 | ... Denning (1881). |
| 1908. April ..... | 3·303 | ... Encke. |
| May ..... | 5·534 | ... Tempel-Swift (1869). |
| 1909. Jan. ..... | 7·419 | ... Denning (1894). |
| Oct. ..... | 5·595 | ... Brooks (1886). |
| Oct. ..... | 6·441 | ... Perrine (1896). |
| 1910. Jan. ..... | 7·186 | ... Swift (1895). |
| Feb. ..... | 6·647 | ... Giacobini (1896). |
| May ..... | 76·370 | ... Halley. |

A few of these must necessarily be considered uncertain, as they have only been observed at a single apparition. In some cases the circumstances will be unfavourable, and the objects will probably escape observation at their next passage through perihelion. The majority of those included in the list will doubtless return at the computed times, and be suitably observed. It forms a most entertaining branch of astro-

nomical work to trace a small comet threading its way amongst the neighbouring stars from night to night. Large comets appear promiscuously and with more or less suddenness, so that in the present state of our knowledge it is impossible to definitely predict the times of their apparitions. The only intimation of their approach is that given by diligent observers who regularly sweep the firmament in quest of such objects, and are sometimes fortunate enough to sight them and give warning of their appearance before they have visibly developed the conspicuous features which belong to comets of the largest class.

*Meteoric Showers Visible during the Year.*—Meteors, Bolides, meteorites, shooting stars, or falling stars, as they are variously called, are visible on every clear night of the year, and at certain epochs are presented in such numbers as to form abundant and imposing showers. There were brilliant showers of Leonids near the middle of November in the years 1799, 1833, 1866, 1867 and 1868, and it was confidently anticipated that the phenomena would recur in 1899 and 1900, but little or nothing was seen of the expected meteor storm. There occurred, however—quite unexpectedly—a marked revival of the display in 1901 and 1903, and it was witnessed in the United States and in England respectively. The experience of those years proves that the rear portion of the meteoric group has not been attracted away from the region of the earth's orbit. There is little prospect that the shower will be strongly maintained at the middle of November, 1907, for the parent comet (Tempel 1866 I.) and the denser part of its closely associated meteor-stream passed through perihelion in 1899 and are now far off, rapidly speeding their way outwards to beyond the orbit of Neptune. In 1907 the Moon will be ten days old and partly obscure the meteors, but should the shower actively return it ought to be fairly well observed if clear weather allows. Whenever any conspicuous meteors are seen, whether during a known shower or on an ordinary night, their paths amongst the stars should be carefully recorded. The same advice applies to occasional fireballs, which often appear suddenly and startle spectators by lighting up the heavens very vividly for two or three seconds. Observers should always remember that mere descriptions of the brilliancy or general situation of these phenomena are practically useless. What is required by those who critically discuss such observations relates specially to the exact path of the object in the heavens and to the duration of its visible flight. The following is a table of the most prominent meteoric streams visible during the year :—

| No. | Epoch. | Radiant Point. R.A. | Radiant Point. Dec. | Name of Shower. |
|---|---|---|---|---|
| | | ° | ° | |
| 1 | Jan. 2–4 | 230 | +53 | Quadrantids. |
| 2 | Jan. 11 | 220 | +13 | $\zeta$ Bootids. |
| 3 | Jan. | 147 | −12 | $\lambda$ Hydrids. |
| 4 | Feb. 5–23 | 75 | +41 | $\alpha$ Aurigids. |
| 5 | Feb. 20 | 263 | +36 | $\rho$ Herculids. |
| 6 | March 1–4 | 166 | + 4 | $\gamma$ Leonids. |
| 7 | March 13–24 | 161 | +58 | $\beta$ Ursids. |
| 8 | April 12–24 | 210 | −10 | $\alpha$ Virginids. |
| 9 | April 17–22 | 218 | −31 | Hydrids. |
| 10 | April 20–22 | 271 | +33 | Lyrids. |
| 11 | May 1–6 | 338 | − 2 | $\gamma$ Aquarids. |
| 12 | May 5—June 17 | 253 | −21 | $\mathrm{d}$ Scorpiids. |
| 13 | May 7–18 | 231 | +27 | $\alpha$ Coronids. |
| 14 | May 24–27 | 194 | +58 | $\epsilon$ Ursids. |
| 15 | May 26–31 | 310 | +80 | $\kappa$ Cepheids. |
| 16 | May 29—June 4 | 333 | +27 | $\eta$ Pegasids. |
| 17 | June 4–13 | 322 | +61 | $\alpha$ Cepheids. |
| 18 | June 10–28 | 335 | +57 | $\delta$ Cepheids. |
| 19 | June—Aug. | 302 | +24 | $\eta$ Sagittids. |
| 20 | July 6—Aug. 22 | 284 | −13 | $\lambda$ Aquilids. |
| 21 | July—Aug. | 269 | +48 | $\gamma$ Draconids. |
| 22 | July 6—Aug. 16 | 315 | +48 | $\alpha$ Cygnids. |
| 23 | July 15–28 | 304 | −10 | $\alpha$ Capricornids. |
| 24 | July 15–30 | 23 | +43 | $\gamma$ Andromedids. |
| 25 | July—Oct. | 30 | +36 | $\beta$ Triangulids. |
| 26 | July 23—Aug. 4 | 47 | +43 | $\alpha$–$\beta$ Perseids. |
| 27 | July 27–29 | 339 | −11 | $\delta$ Aquarids. |
| 28 | July—Oct. | 310 | +79 | $\kappa$ Cepheids. |
| 29 | August 10–12 | 45 | +57 | Perseids. |
| 30 | August 5–16 | 292 | +53 | $\kappa$ Cygnids. |
| 31 | Aug.—Oct. 2 | 346 | + 1 | $\beta$ Piscids. |
| 32 | Aug. 12—Oct. 2 | 74 | +41 | $\alpha$ Aurigids. |
| 33 | August 21–25 | 291 | +60 | $o$ Draconids. |
| 34 | Aug. 21–Sep. 21 | 62 | +37 | $\epsilon$ Perseids. |
| 35 | Aug. 25–Sep. 16 | 353 | −11 | $\psi$ Aquarids. |
| 36 | Aug. 4—Sep. 22 | 64 | +22 | $\epsilon$ Taurids. |
| 37 | Sep. 15—Oct. 11 | 14 | + 7 | $\epsilon$ Piscids. |
| 38 | Sept. 27 | 75 | +15 | $o$ Orionids. |
| 39 | Oct. 4 | 133 | +79 | Ursids. |
| 40 | October 11—24 | 40 | +20 | $\epsilon$ Arietids. |
| 41 | October 17–20 | 92 | +15 | Orionids. |
| 42 | October | 100 | +13 | $\xi$ Geminids. |
| 43 | Nov. 2–3 | 55 | + 9 | $\epsilon$ Taurids. |
| 44 | Nov. 13–15 | 150 | +23 | Leonids. |
| 45 | Nov. 13–28 | 155 | +40 | Leo Minorids. |
| 46 | Nov. 17–23 | 25 | +43 | Andromedids. |
| 47 | Nov. 23—Dec. 1 | 189 | +73 | $\chi$ Draconids. |
| 48 | Nov. 30—Dec. 9 | 162 | +58 | $\beta$ Ursids. |
| 49 | Dec. 1–14 | 108 | +33 | Geminids. |
| 50 | Dec. 7–10 | 119 | +29 | $\alpha$ Geminids. |
| 51 | Dec. 22–29 | 194 | +32 | Canis Venaticids. |

The Perseids (No. 29 in the foregoing list) display some singular characteristics, for they probably continue visible for more than a month, during which period their radiant point exhibits a diurnal motion of about 1° to the E.N.E. The places of this radiant on alternate days during about four weeks of the chief activity of the shower are as follows :—

DATES AND POSITIONS OF PERSEID RADIANT.

| Date. | Radiant R.A. | Radiant Dec. | Date. | Radiant R.A. | Radiant Dec. |
|---|---|---|---|---|---|
| | ° | ° | | ° | ° |

| Aug. 2 | 33·9 | +55·0 | ,, 18 | 55·9 | +58·4 |

On August 21, 1905, there was a violent earthquake shock at Savaii, in the Samoan group of Islands. It was followed by an extensive volcanic eruption in the district of Matanta, where three craters appeared in great activity. Large stones were discharged to great elevations, and the flow of lava covered four miles of the surrounding country. A native chief and a number of his followers lost their lives by falling into a crevasse on the hill slopes, where they were overwhelmed with lava. On September 8 a violent earthquake shock was felt over a wide area in southern Italy. In Calabria the visitation was severe, and the towns of Pizzo, Monteleone, and Martirano were wrecked, while others received considerable damage. Many villages were practically destroyed, and the number of persons killed was estimated at 2,000. The seismic disturbance was distinctly felt at Messina, and more moderate shocks were experienced at Castellammare, Naples, and they extended as far north as Florence. On September 9 further shocks affected Calabria, but they were not of the same violence as the one of September 8. On succeeding days additional shocks occurred, and though not of very serious character they were sufficient to keep the inhabitants in a state of alarm. Further damage was reported from several places. The telegraph station at Cosenza was shaken to such an extent as to become uninhabitable. In Nevada, at Rye Patch, a new volcano ejecting lava was discovered by some cattlemen who had never previously observed such an occurrence in the locality. On September 21 the Stirling district of Scotland was visited by a slight shock of earthquake, but no damage resulted. Houses were shaken, and the vibrations at one place lasted ten seconds. The tremor appears to have been in a direction from N.W. to S.E. The first shock occurred shortly before midnight, and a second appears to have come soon after midnight, for many people in Perthshire felt the latter disturbance. On the afternoon of September 26, at Lundby, Hisingen Island, Sweden, subterranean rumblings were heard, and buildings were shaken so severely that in many cases the walls were cracked. The ground subsided and fissures were formed in the earth. On October 22 some severe shocks of earthquake were experienced at Mahdia, Tunis, and the visitation extended all over the country near Cape Bon. In the second week of November an earthquake shook the peninsula of Athos, and damage to the extent of £25,000 was done to the church of the Russian Monastery at that place. On November 25 a slight earthquake was felt at Manchester and Salford, and the vibrations appear to have been continued for several minutes. On November 26, at 8 A.M., several rather severe shocks were experienced in Italy, and tremors were noticed in the N.E. of France. At the end of November earthquake shocks were reported from places in Lincolnshire. But there was some doubt as to the real character of the disturbance, and a correspondent of *The Times* pointed out that it was probably due to the explosion (or explosions) of a large meteorite or bolide high in the air, which would set up waves of sound and aerial shock. On December 7 the south-west region of Switzerland was subjected to a series of earthquakes. People in the canton of Valais and in the district of Geneva and Annecy allege that two violent shocks occurred in a direction from east to west. The principal area of disturbance comprised the mountainous districts near Geneva. The people were much alarmed and ran from their houses, but no damage was done. On December 10, at 10.40 P.M., a slight earthquake visited Cheshire, and was sufficiently pronounced to awake many persons and to give an impression that a violent explosion had taken place in the neighbourhood. Houses rocked, windows and crockery-ware rattled, and some alarm was caused. In January, 1906, another volcanic eruption took place in the Samoan Islands, and at Savaii all the plantations and buildings, with the exception of two churches, were destroyed. On about February 15 there was an earthquake with a rising of the sea at Tumaco (Colombia) and Esmeraldus. At the former place eighteen shocks occurred, and the population were panic-stricken. Some of them were killed and many injured by falling *debris*. On February 16, at St. Lucia, Dominica, two severe shocks were felt, and at Castries many buildings were seriously damaged. At Fort de France a severe earthquake occurred at *1h. 35m.* P.M. Several people were injured. On about March 10 an earthquake took place at Bashahr, in India. At Rampur and Kakoola several persons lost their lives and many were injured. On March 17 repeated shocks of earthquake effected considerable damage at Kagi, Island of Formosa, in the Pacific. A great number of buildings were wrecked, and several hundred persons were either killed or wounded. Early in April Vesuvius exhibited signs of increasing activity, and soon developed remarkable energy. People living near the foot of the mountain had to flee for their lives, and found a refuge in Naples. The lava spread over a large area and wrought much damage. Some lives were lost. Earthquake shocks visited Naples on April 8, and were doubtless the effect of the volcanic disturbance, for the most intense activity was displayed on the night of April 7, when the sides of the cone subsided and immense streams of lava poured down the mountain, accompanied with the usual electrical phenomena, thunder and lightning. Boulders and fiery scoriæ were ejected from the crater on a scale of grandeur certainly not witnessed by the present generation. The fall of ashes was so great that some of the houses were crushed under the weight. The eruption occurred chiefly between April 5 and 17, with a maximum on the 7th and 8th. After the 17th the convulsion had evidently exhausted its energy. The rain of ashes became less, but it was some time before Vesuvius regained its normal condition. On April 18, at 5 A.M., a terrible earthquake devastated San Francisco, California, and an appalling fire completed the work of destruction. The damage to property was estimated as £60,000,000, while—what was far more serious and lamentable—several thousand lives were lost; but the number will never be exactly known. Bodies continued to be found amid the wreckage three months after the date of the earthquake. The disturbance was accompanied by a loud roaring or rumbling sound which quite drowned the noise of falling chimneys and buildings, and the cries of the wounded. The rumbling and rocking of the earth continued for eight or nine seconds. Houses cracked and fell, many entirely collapsed, especially in the poor

quarter of the town, where the greatest loss of life occurred. The streets were torn up, and two storeys of the Valentia Hotel disappeared into the earth. Smoke and fire soon burst from the ruined town and completed the work of destruction. Fourteen other towns near San Francisco felt the calamitous effects of the earthquake, and Los Angeles, nearly 500 miles distant, was visited by two shocks. On April 19 a comparatively slight shock of earthquake was recorded at Sarajevo, in Bosnia. On April 23 a rather violent shock was felt at Oregon, and in the town of Eureka the windows were broken, but no serious effects ensued. On May 9 an earthquake shock was experienced at Fort William. On June 27, *9h.* 45*m.* A.M., a pretty smart shock of earthquake was felt in South Wales and the west of England. The tremors seem to have lasted two or three seconds, and though many people were startled at the sudden sensation little damage resulted. In some of the collieries of South Wales the rumbling noise and rocking of the earth caused a panic among the miners, and some hundreds of them ceased work and went home. The shocks were distinctly felt at Bristol, Bath, Devizes, Holyhead, Birmingham, and other towns. Early on the same morning two violent shocks were registered at the Seismographic Institution at Gottingen, Germany. On June 28 two shocks affected Lancashire and Cheshire. On June 30 vibrations were noticed at Caterham, Croydon, and other places, but they were of a comparatively trivial nature. On about July 20 a series of earthquake shocks were felt at Socorro, in Texas, and they caused great destruction of property. The people abandoned their homes, fearing the collapse of the buildings. On August 17, at about 8 P.M., a terrible earthquake, similar in its calamitous results to that which devastated San Francisco on April 18, visited Valparaiso and other Chilian towns (South America). The day had been unusually warm and pleasant, and in the quiet of evening the people were far from anticipating any natural catastrophe. Suddenly the whole city seemed to swing backwards and forwards. Then there came a jolt of such mighty force that whole rows of buildings toppled to the ground. Two shocks appear to have mainly occasioned the disaster, one of four minutes' duration, the other of two minutes. Fire immediately added to the horrors of the earthquake, and many of the wounded were roasted to death in the flames. Nearly all the terror-stricken inhabitants had fled from the city, and those who remained were not in a condition to render assistance. About three thousand persons lost their lives, a still greater number were injured, while about 100,000 were rendered temporarily homeless. Many other towns were in part or wholly destroyed, and amongst these may be mentioned Santiago, Santa Rosa, Quillota, Limache, Illapel, and San Felipe. One person writing from the scene of the disaster stated that every city and village within 100 miles of Valparaiso was in ruins. A tidal wave inflicted slight damage at Penco. Valparaiso, which lies on the Pacific coast, had a population of about 200,000, and the extent of the catastrophe can hardly be realised. The statement that 150 persons were shot by the military for looting adds to the horrors of the event. The loss of property was estimated as exceeding £50,000,000. The shocks, which were numerous, overthrew nearly everything, and even the more substantially built public offices were involved in the common ruin. Amid the widespread disorder, lack of implements and water, it was impossible to cope with the flames which ensued. The people retired to the neighbouring hills, where they looked down upon the smouldering *débris* of their erstwhile gay and prosperous city. To add to the trouble, the railways, telegraphs, &c., were wrecked, so that material assistance could not be immediately afforded to the sufferers. One curious fact as a possible result of the earthquake is that Crusoe's Island, discovered by Juan Fernandez in 1563, and situated about 150 miles west of Valparaiso and from the Chilian coast, has disappeared! The island was 13 miles long, 14 miles wide, and had been inhabited by German colonists since 1868. (Earthquakes appear to be frequent in this part of the world. In 1822 there was a disturbance during which the coast of Chili was permanently raised. In 1851 an earthquake destroyed about 400 houses in Valparaiso.) On the morning of August 27 two distinct shocks of earthquake affected Derbyshire. At Matlock Bath the visitation was rather severe. People were awakened by the noise of rattling furniture and the smashing of crockery, which occasioned a good deal of alarm. The earth movement is stated to have lasted only 3 seconds, and to have formed a double shock with a direction E. to W. The vibration was felt over a wide area in the villages outlying Derby, and many persons heard a rumbling sound. (England is fortunate in being singularly free from the alarming and destructive phenomena of earthquakes. Professor Milne recently stated that, though some 30,000 earthquakes are experienced throughout the world in one year, there are but six or seven in England.) In August several earthquake shocks were felt in the New Hebrides, but not of sufficient force to occasion serious damage.

## Telescopic Powers Essential for Observing Celestial Objects.

COMETS, and large nebulæ such as those in Orion and Andromeda, require very low powers and an extensive field of view, so that the objects may be presented in their entirety, and their light sufficiently concentrated to display the fainter portions. If it is decided to critically examine the structure of a comet's nucleus or details of form in a nebula, then powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the Sun may be very distinctly seen in any small telescope, care being taken to protect the eye with deeply-tinted glass. A 3-in. refractor, powers from 60 to 100, reveals the spots in great detail and under many varieties of form and grouping. The craters, mountains, clefts, and ridges of the Moon are satisfactorily seen in general outline with about 50 and 75, though, for very minute features, powers of 300 and 400 are necessary on a 10 or 12 in. glass. Solar and lunar eclipses are best visible under low powers, with fields sufficiently

ample to include a picture of the whole phenomenon.

The phases of Mercury may be discerned with 75; those of Venus are plain with far less power. These planets appear under the most satisfactory aspect near the times of sunrise or sunset, and indeed all observations of conspicuous planets are best made at such times. When the image is surrounded with dark sky the glare from a bright object is sometimes troublesome, for it is apt to aggravate telescopic defects and obliterate faint details.

The chief spots on Mars, such as the *Syrtis Major* and *Acidalium Mare*, may be distinguished with 90 on a 3-in. refractor, but powers of 300 and 350 and an 8-in. refractor or 10-in. reflector are desirable to exhibit the outlines of the fainter, narrower markings, many of which are delicate, intersecting lines suggesting a canaliform structure of surface.

Jupiter's equatorial belts are visible in a 1½-in. telescope, power 40, but for studying their variable appearances and the different velocities of the bright and dark spots 200 and 250 are requisite on a much larger instrument. The four bright satellites are visible in an opera-glass. Dark transits of Satellites III. and IV. and their shadows may be observed with a 3-in. refractor and power of 120 or 150.

Saturn usually appears well defined under higher powers than Jupiter. The division in Saturn's ring and his principal dark belt are to be readily glimpsed, when the system is sufficiently inclined, with a 2½-in. glass, power 120. But magnifiers of 250 to 350, and greater aperture, are essential to reach the delicate features of the planet, such as the spots which appeared in his northern hemisphere in 1903. A good 4½-in. refractor will occasionally show Encke's division in the ring when this feature is visible, but at the best it is only a faint pencil-like marking; also the interior crape ring and five of the satellites; but the night must be good. Titan is visible in any small telescope, and Iapetus is sometimes an easy object, but Tethys, Rhea, and Dione are much more difficult, requiring careful scrutiny of the region just outlying the rings, where they will be usually recognised as tiny points of light.

Occultations of stars by the Moon may generally be well observed with a 3-in. glass, power 75.

For double stars the powers required will depend in a great measure upon the character of the object. For very close pairs, high powers, such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as Vega, Polaris, or Rigel, then a moderate power, such as 100 or 150, will give excellent results. For showing variable stars a good field-glass is to be recommended. For groups of stars a comet eyepiece, power 25 or 30 and field about 1½°, will be best. The latter would also be well adapted for comet-seeking, and for general views of large comets and nebulæ.

It should always be remembered that on nights of good seeing, when the air is tranquil and planetary features very sharply defined, telescopes will bear much higher powers than on less favourable occasions. The observer should not fail to remember that his personal capacity really counts for more than the size or efficiency of his telescope. A really able student will accomplish more valuable work with an indifferent instrument than an incompetent man with the very best appliances.

# The Variable Star Algol (Beta Persei).

This is one of the most conspicuous and noteworthy variable stars in the heavens. Its remarkable fluctuations of light were probably known to the ancient observers, but the first definite record of its discovery is by Montanari, in 1669, and the accurate determination of its period was not effected until 1782 by Goodricke. At that time the star passed through all its gradations of brilliancy in *2d. 20h. 48m. 59s.*, but the period seems decreasing, for Chandler has recently found it 8½ seconds less. The star is usually a little fainter than 2nd mag., and remains so for about *2d. 11h.*, when it rapidly declines in lustre, and in about 4½ hours arrives at a minimum of 3¼ mag. There is then a revival of its brilliancy, and in 5½ hours it reaches its normal magnitude of 2¼. The following are the computed times of minima in 1907. From the end of March until the beginning of August the star is not favourably visible, being immersed in the vapours and twilight over the northern horizon; but in the autumn and winter months it may be viewed with advantage. Astronomical time is employed in the table.

The corrections derived from the above Table are all additive. To make them so, the above quantities have been increased by 1*s*, and therefore the final result must be diminished by that amount.

## TO CHANGE INTERVALS OF MEAN SOLAR TIME INTO THE EQUIVALENT INTERVALS OF SIDEREAL TIME.

| Hours of Mean Time. | Sidereal Equivalents. | | | Minutes of Mean Time. | Sidereal Equivalents | | Minutes of Mean Time. | Sidereal Equivalents | | Seconds of Mean Time. | Sidereal Equivalents. | | Seconds of Mean Time. | Sidereal Equivalents. | |

| | | | | 25 | 25 | 4·11 | 55 | 55 | 9·04 | 25 | 25·07 | | 55 | 55·15 | |
| | | | | 26 | 26 | 4·27 | 56 | 56 | 9·20 | 26 | 26·07 | | 56 | 56·15 | |
| | | | | 27 | 27 | 4·44 | 57 | 57 | 9·36 | 27 | 27·07 | | 57 | 57·16 | |
| | | | | 28 | 28 | 4·60 | 58 | 58 | 9·53 | 28 | 28·08 | | 58 | 58·16 | |
| | | | | 29 | 29 | 4·76 | 59 | 59 | 9·69 | 29 | 29·08 | | 59 | 59·16 | |
| | | | | 30 | 30 | 4·93 | 60 | 60 | 9·86 | 30 | 30·08 | | 60 | 60·16 | |

To obtain the Sidereal Time corresponding to any given Mean Time by means of the above tables, it is required is to take the Sidereal Time at the preceding Mean Noon (which will be found in the second page of each month) and add to it the Sidereal Equivalents opposite to the hours, minutes, and seconds of the given Mean Time. If the sum of these numbers comes out more than twenty-four hours, twenty-four hours must be subtracted from it. For example:—

Let it be required to find the Sidereal Time corresponding to the Mean Time 9*h.* 22*m.* 24*s.* on April 24:—

| | H. | M. | S. |
|---|---|---|---|
| Sidereal Time at Mean Noon, on April 24 | 2 | 5 | 28 |
| Mean Time intervals and equivalents from table above: 9*h.* | 9 | 1 | 28·71 |
| 22*m.* | | 22 | 3·61 |
| 24*s.* | | | 24·07 |
| Corresponding Sidereal Time | 11 | 29 | 24·39 |

This table may also be used to show the acceleration of Sidereal on Mean Solar Intervals, by subtracting the Mean Time arguments from their Sidereal Equivalents.

# Table for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for all practical purposes, the times of sunrise and sunset for any place situated between latitudes 1° and 66½°.

To use the table: With the Sun's declination, in the first column, and under the required latitude on the horizontal line, will be found the apparent time of sunset. Subtracting the time so found from 12*h*. will give the apparent time of sunrise. To obtain the mean or clock time, the numbers in the column headed *before* or *after* clock (which will be found on the second page of each month), giving the difference in time between the mean and true sun for each day in the year, must be applied to the apparent times of sunrise and sunset, as the particular case may require; that is to say, if the true sun is *before* the clock the equation of time must be subtracted from the apparent to obtain the mean or clock time, and if *after*, added.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator by changing the declination from North to South and *vice versâ*.

If the time of sunrise or sunset should be required for any declination or latitude falling between the arguments in the table, these times may easily be found by simple proportion.

| Declination. | LATITUDE. | | | | | | | | | | | | | | | | | | | | | |

To obtain the Mean Time corresponding to any given Sidereal Time by means of the above tables, take the Mean Time at the preceding Sidereal Noon (which will be found on the second page of each month) and add to it the Mean Time Equivalents of the given Sidereal Time.

Let it be required to find the Mean Time corresponding to the Sidereal Time $13^h.\ 49^m.\ 45^s.$ on July 18:—

| | | H. | M. | S. |
|---|---|---|---|---|
| Mean Time at Sidereal Noon, July 17 | | 16 | 20 | 41 |
| Sidereal intervals and Mean Time equivalents from table above | $13^h. =$ | 12 | 57 | 52·22 |
| | $49^m. =$ | | 48 | 51·97 |
| | $45^s. =$ | | | 44·88 |
| Corresponding Mean Time, July 18 | = | 6 | 8 | 10·07 Aft. |

## SOME ELEMENTS OF THE PLANETARY SYSTEM.

| Name. | Mean Distance from Earth in Millions of Miles. | Sidereal Period of Revolution round Sun. | Time of Axial Rotation. | Real Diameter in Miles. | Volume ⊕=1. | Density ⊕=1. |

* The periods of rotation of Mercury and Venus have not been definitely ascertained.

N.B.—The numbers in the third column refer to the mean distances at inferior conjunctions for the inferior planets; at opposition, for the superior planets.

*Asteroids.*—At the present time (October, 1906) nearly 580 of these minor planets are known, and this number may probably be somewhat exceeded before the end of the year. The following numbers have been given names:—406, Erna; 520, Francisca; 522, Helga; 542, Susanna; 544, Jetta; 565, Marbachia; 566, Stereoscopia; 568, Cheruskia; 543, Charlotte; 456, Herodias; 538, Friederike; 545, Messalina; 548, Cressida; 563, Suleika; 547, Praxedis; 556, Phyllis; 564, Dudu; 567, Eleutheria. Felicia (294), which had been lost sight of since its discovery in 1891, was rediscovered by Professor Wolff in May last.

In an interesting paper on the perturbations of Eros by the major planets, Herr Dziewulski shows that, as the orbit of Eros interlocks with that of Mars, there will come a time when the two orbits intersect each other. The calculations show that the next period of one of these intersections will occur about the year 8800. On this occasion a near approach of the two planets may be expected, producing such perturbations as will perhaps greatly modify the orbit of Eros. The author suggests that a succession of such near approaches, in past times, may have produced the present orbit.

An asteroid, provisionally lettered T.G., is found by Dr. Berberich to have a mean distance only a little greater than that of Jupiter. The near equality of their mean motions should make the investigations of the perturbations of T.G. by Jupiter an interesting study. Whether or no the orbit is identical with that of Jupiter can only be determined after the further observations which may be obtained towards the end of the year.

Several of these small bodies have been found on photographic plates some of which were taken long before the date of discovery. Peraga (554) is a case in point. It has been found on a photograph, among the Pleiades, which was taken on September 30, 1900, and so escaped detection at the time.

*The Sun.*—Activity on the solar surface was much less in the early part of this year than in the corresponding period of 1905. The last phase of the maximum spot period seems to have begun in the earlier half of 1906. A comparative calm prevailed till May 12, when a great outburst of solar activity occurred. At the end of July two large spots appeared, both of which became visible to the naked eye. The preceding spot, which was the larger of the two, passed the Sun's central meridian on July 30. When first seen, two days earlier, it appeared as quite a small spot, and in the course of three days had grown to 10° in length and 6° in breadth.

Dr. C. L. Poor, as the result of his discussion on the figure of the Sun, derived partly from a study of the solar photographs of the Rutherford series, extending over several years, and also from the heliometer measures made by the German Transit of Venus Expeditions, concludes that the ratio of the polar to the equatorial diameter of the Sun is a variable quantity, and has relation to the presence or absence of solar spots.

The discussion of the heliometer measures of the Sun's diameter by Schur and Ambronn showed no definite variation of the Sun's diameter in relation to the spot period; but by treating these data in a different manner, Dr. Poor considers that he has sufficient evidence for concluding that the ratio between the polar and equatorial diameters of the Sun is a variable and periodic quantity.

*Jupiter.*—Both the sixth and seventh satellites have been frequently photographed at Greenwich with the 30-inch reflector. The seventh satellite is a very difficult object, requiring a long time of exposure, though, on one exceptionally fine night, an image was obtained under an exposure of only 17 minutes. To obtain good images, under fair atmospheric conditions, 90 minutes is required, and from 2 hours to 3 hours is sometimes found necessary. The orbital motion of this satellite was supposed, in the early days of discovery, to be retrograde; but subsequent observation has shown that, like the sixth satellite, the motion is direct, with a period of about 257 days, the plane of its orbit being inclined about 30° to Jupiter's equator.

Many interesting physical changes have been observed on the surface of the planet in the past year. In this connection, Mr. Denning remarks on the appearance of a dark material in the region of the red spot, and that a slanting attachment to the north side of the north equatorial belt appears to be spreading, and will probably form a new and conspicuous belt quite round the planet. A like phenomenon was observed in the early part of 1860.

*Mars.*—The markings called *canals*, seen by many observers on the surface of the planet, have been ascribed at different times to various causes, and their existence attributed to optical effects, either in the telescope or the eye of the observer. The question of their reality appears to be now answered in the affirmative by Mr. Lampland, of the Lowell Observatory, who succeeded, during the opposition in 1905, in actually photographing these markings. The question as to whether they consist of continuous or discontinuous lines is still an open one, and can hardly be proved by a photograph. Mr. Lampland's photographs have been examined by experts, and it appears that they show the principal, and well-known, *canals*.

*Saturn.*—The tenth satellite has been named Themis. The ninth satellite, Phœbe, was observed in July last with the 40-inch Yerkes telescope, and was seen on some photographs taken in May and June at Arequipa.

*Neptune.*—The satellite was photographed many times at Greenwich with the 26-inch refractor, the planet being hidden by an occulting shutter. The accuracy of the measurements obtained from the plates is considered very satisfactory. It has been remarked that the satellite exhibits some variations in brightness which cannot be attributed to atmospheric conditions, but which seem to bear some relation to the longitude of the satellite in its orbit. Another interesting fact is that it appears to be one of the few bodies in the solar system which are brighter photographically than optically.

*Comets.*—(*b*) 1905, a comet of the 7th magnitude, discovered by M. Schaer on November 27 at Geneva, situated only 4° from the North Pole, and moving very rapidly in the opposite direction to the Earth, from which it was only 22 millions of miles distant. It became just visible to the naked eye in November. Two sets of elements have been computed—one giving an elliptical orbit, with a period of 160 years, and another, by Herr Wedemeyer, a parabolic orbit fairly satisfying the observed places.

(*c*) 1905, a comet of the 8th magnitude, discovered by M. Giacobini on December 6, and increasing in brightness. Unfortunately, when at its brightest, it was too near the Sun for observation. Photographs were obtained at Greenwich early in January, 1906, when it was

fairly bright, with a tail 2° in length. On return from perihelion passage it was observed by Herr Wirtz, at Strassburg. It then appeared as of the 11·5 magnitude, surrounded by a nebulosity 2′ in diameter without nucleus.

(*a*) 1906, a rather bright comet of the 9th magnitude, discovered by Brooks at Geneva, U.S.A., on January 26, in R.A. 6*h*. 20*m*. and 47° North declination. This, like (*b*) 1905, was also a circumpolar comet. It was at first supposed to be identical with either (*d*) or (*e*) of 1905, but later observation showed that this could not be the case. It was described by Professor Barnard as large, round, and very diffused, gradually brighter in the middle, and having an ill-defined nucleus of the 12th magnitude.

(*b*) 1906, a comet discovered photographically by Herr Kopff at Heidelberg on March 3. At time of discovery it was moving very slowly nearly in the Ecliptic in R.A. 11*h*. 35*m*. 56*s*. and declination 2° 40′ North. The perihelion distance, derived from observations made in March and April, appears to be greater than that of any other known comet except that of 1729. Dr. Wolf, when examining some earlier photographs, found this comet on a plate taken rather more than a year before its discovery on March 3, when it had already passed perihelion. Photographs were obtained at Greenwich which show a well-defined outline and but little nebulosity.

(*c*) 1906, a comet discovered at Melbourne by Mr. Ross on March 18, of the 8th magnitude, 3′ in diameter, and condensed centrally. It had already passed perihelion at the time of discovery, and was steadily fading.

(*d*) 1906, Finlay's comet, was observed, on its third return after discovery, by Herr Kopff, of Heidelberg, on July 16, 6*m*. West and 1° South of the place given in the Ephemeris. It was described as bright. A more recent Ephemeris, compared with observations made at Utrecht, requires a correction of 12*m*. 58*s*. in R.A. and 1° 52′ in declination. The perihelion passage took place on September 8. Photographs were obtained at Greenwich with the 30-inch refractor, with an exposure of 20 minutes. The image was not conspicuous.

Holmes' Comet has been observed on this, its third return after discovery in 1892, at Heidelberg, on a photographic plate. It was a faint and difficult object on the second return, in 1899, and is now of the 15th magnitude.

(*e*) 1906, a faint comet discovered by Herr Kopff at Heidelberg on August 23, appears to be moving in an elliptic orbit, with a period of about 6½ years. At the date of discovery it was noted as of the 11th magnitude.

A large number of variable stars have been discovered in the past year. Among them one, in Perseus, is of the Algol type, having a period of little more than 13 days; its place (1855) in R.A. 4*h*. 10*m*. 12*s*. and declination North 41° 57′. It has a maximum magnitude 9·4. Another in Cepheus, R.A. 1*h*. 8*m*. 8*s*. and declination North 74° 36′ (1900), of magnitude varying from 9·3 to 10·5, with a period of about a year. One in the same constellation may also be mentioned, in R.A. 0*h*. 7*m*. 4*s*. and declination North 73° 18′ (1900), of the 10·8th to 13th magnitude, and having a period of about 282 days.

A further extension of the zone system of Standard Time, referred to Greenwich, has recently been adopted by the Government of the Seychelles. The meridian chosen is that of 50° East, or 4 hours fast on Greenwich mean time. It is expected that the Government of Mauritius will also ultimately adopt the same meridian. The longitude of the Mauritius is 57° 30′ East of Greenwich, which means 3 hours 50 minutes fast on Greenwich time.

*Obituary.* — Dr. Ralph Copeland died on October 27, 1905, at the age of 67. He matriculated at the University of Göttingen, and shortly afterwards was appointed Assistant at the Observatory. He was one of the scientific staff attached to a German Arctic Expedition, and on his return thence took charge of Lord Rosse's great telescopes. Dr. Copeland went to the Mauritius, to observe the Transit of Venus, in June of 1874; but was unsuccessful owing to bad weather. At Jamaica, in 1882, he was successful in observing the Transit of that year. Between these times he was appointed Assistant at the Observatory of Trinity College, Dublin. In 1889 he was appointed Astronomer Royal for Scotland, an appointment which he held till his death. Mr. F. W. Dyson, Chief Assistant at the Royal Observatory, Greenwich, was appointed to succeed Dr. Copeland as Regius Professor of Astronomy and Astronomer Royal for Scotland.

The Rev. S. J. Johnson, who died on October 9, 1905, was born in 1845. He graduated at Oxford, and for the last 24 years was Vicar of Melplash, in Dorsetshire, where much of his spare time was devoted to astronomical pursuits. The monthly notices of the Royal Astronomical Society contain many papers from his pen, chiefly on eclipses and occultations. In 1874 he published a little book on "Eclipses Past and Future," with a supplement in 1889. A much larger edition of "Eclipses Past and Future" appeared in 1896.

The Rev. W. R. M. Waugh, who died on November 25, 1905, was born in London in 1818, and early joined the Congregational ministry. He was one of the original members of the British Astronomical Association, and Director of the Jupiter Section. His principal contributions to astronomical science will be found in the Journals of the Association.

Professor C. J. Joly died, after a long illness, on January 4. In 1897 he was appointed, in succession to Dr. Rambaut, Andrews Professor of Astronomy in the University of Dublin, and Royal Astronomer of Ireland—a post which carries with it the Directorship of the Dunsink Observatory. His genius lay not so much in astronomy as in pure mathematics of the highest order. He was elected a Fellow of the Royal Astronomical Society in 1898, and took part in the Spanish Eclipse Expedition in 1900, under the auspices of the Royal Dublin Society and Royal Irish Academy. His new edition of Hamilton's great work on Quaternions is said to have created a great revival in quaternion analysis.

Sir William J. L. Wharton, born in London 1843, entered the Navy at the age of 14, was promoted to the rank of Rear-Admiral (retired) in 1897, when he received the honour of knighthood. He took great interest in astronomy, and his influence with the Admiralty, when holding the office of Hydrographer between 1884 and 1894, was frequently used in furthering the interests of the Greenwich and Cape Royal Observatories. He was successful in observing the Transits of Venus in 1874 at Rodriguez, and in 1882 in the Straits of Magellan. He joined the British Association on the occasion of their visit to South Africa, and, while the guest of Sir David Gill, at the Cape Observatory, contracted the fever of which he died.

## THE WEATHER IN THE BRITISH ISLANDS DURING THE YEAR ENDING OCTOBER 31, 1906.

THIS summary of the weather experienced in the British Islands during the year commencing November 1, 1905, and ending October 31, 1906, has been mainly compiled from the data contained in the daily and weekly reports issued by the Meteorological Office. It is hoped that the remarks on each month will be useful for purposes of reference and for comparison with current weather, when considered in relation to the daily results of the Greenwich observations given for each day in the pages of the Calendar.

*November*, 1905.—The mean temperature was normal; the rainfall was much above normal in the west and south, nearly normal in the north, and about half in the east, where it fell on 16 days. Five days were decidedly stormy and excessively variable. The lowest temperature was reported at Braemar on the 18th, 5°; highest at Durham on the 25th, 57°. Large simultaneous differences of temperature appeared at 8 A.M. Greenwich time: on 1st, Dungeness 51°, Birr Castle 31°; Pembroke 48°, Bath 28°; 9th, Roche's Point 49°, Nairn 28°; 10th, Roche's Point 52°, Nairn 32°; 19th, Stornoway 42°, Spurn Head 42°, Leith 22°; 21st, Blacksod Point 49°, London 26°; 22nd, Blacksod Point 51°, London 28°; 25th, Scilly 50°, Bath 30°; 29th, Scilly 48°, Birr 25°. Rain measured at 8 A.M., 2nd, at Scilly 1·02; 11th, Donaghadee 1·0; 23rd, Stornoway, 1·02; 26th, Blacksod Point 1·42, Valentia 1·08; 27th, Malin Head 1·12; 28th, Holyhead 1·17 inch. Electrical storms occurred on the 3rd off the south-west; 4th and 6th, on north of Ireland; 8th, at Eastbourne. Aurora was seen from various stations in Great Britain on 15th, and Wick on 23rd. Atmospherical pressure was least on 1st, 29 inches; 13th, 28·9; 26th, 28·8; greatest on 18th, 30·25. Fog was noted in the Midlands 1 day, in the south-east 2, east 1; mist in places 4, south-east 2; fog or mist in all districts on the 18th. Bright sunshine, estimated in percentage of possible duration, varied between 34 in the south-east and 17 in the north district. On the 6th a waterspout fell at St. Ives. On the 15th a very cold N.E. wind gave snow and hail to various parts of England.

The *Autumn* temperature was seasonable, with a fair duration of sunshine. The rainfall, 2 inches below average, was a good sign for the harvest of 1906.

*December*, 1905, had high pressure, high temperature, small rainfall; very uncommon relation. The west had 6° of warmth to the good, the east 2·5. Rain fell on about 12 days in England, and less than half the usual supply. The highest temperature was reported at Geldeston on the 6th, 57°; lowest at Braemar on 30th, 20°. At 8 A.M., 4th, while Blacksod Point had 51°, Nottingham had only 31°; 30th, Roche's Point 48°, Nairn 23°; 31st, Valentia 53°, Nairn 22°. An electrical storm occurred in Scotland on the 7th. Mist was noted in places on 5 days, Ireland 4, south and south-east 2; fog in south-east 5, over England 1, east 1, north 1. The air was generally hazy, damp, and gloomy. On 11th extraordinary fog the entire day and the most part of the next, delayed trains, steamers, and traffic, entailing loss to traders and gain to gas companies. Atmospherical pressure was least on 7th, 29 inches; greatest on 12th, 30·9. At least 6 days were stormy. The wind came from the east side on 8 days. Bright sunshine varied between 21 per cent. in the west and 12 in the north district.

*January*, 1906.—The weather was mild, wet, and boisterous. The highest temperature was reported at Hereford on 27th, 57°; lowest at Nairn on 1st, 17°. At 8 A.M., 1st, Valentia had 52°, Oxford only 30°; 6th, Dungeness 51°, Wick 29°; 23rd, Blacksod Point 46°, Nottingham 26°; 24th, Blacksod Point 50°, Dungeness 28°. On 16th 1·75 inch of rain was measured at Southampton; 25th, Stornoway 1·02; 29th, Blacksod Point 1·1. Electrical storms were reported on 5th in the Channel; 9th and 18th, south-west Ireland; 9th and 10th, south England; 12th and 13th, Scotland; 13th, Wales. Atmospherical pressure was least on 10th, 28·8 inches; greatest on 23rd, 30·65. Mist was noted in Ireland on 4 days; in the south-east 3, and fog there on 2. During 5th and 6th a violent cyclonic gale traversed the greater part of the Kingdom. Local storms, with lightning, thunder, rain, and hail, passed over London on 9th and 16th. At least 9 days were generally stormy. Bright sunshine varied between 28 per cent. in south England and 13 in north Scotland.

*February*, 1906.—The weather was most variable and boisterous. The mean temperature was normal, the winds always fresh, frequently violent. The highest temperature was reported at Killarney on 23rd, 53°; lowest at Balmoral on 12th, 11°. At 8 A.M., 6th, Valentia 46°, contrasted with Bath 23; also 22nd, Valentia 45, Oxford 25. During the 8th a terrific gale raged over the

Kingdom, with destructive electrical disturbances in various parts, heavy rain, much hail, some snow. Temporary floodings invaded some districts; Lancashire claimed 2 or 3 feet of water on most land. Next day heavy snowfalls were reported in Scotland and Wales, with lightning, thunder, and cold N.W. wind. After the finest day, 20th, the sky was sunless and there was much rain, with tendency to frost and snow. Atmospherical pressure was greatest, 30·45 inches, on 7th; least, 28·6, on 10th and 25th. Fog was noted in the south-east on 2 days, Midlands 1; mist 1 in Ireland. Gales prevailed on 6 days. Bright sunshine varied between 40 per cent. in east Scotland and 26 in north Scotland.

The *Winter* was mild, very damp, boisterous, and stormy, with unusual electrical displays.

*March*, 1906.—The weather was less rough than expected, temperature normal, rainfall scanty, little dust, though 7 days were stormy. The 6th was bright, warm, and balmy; temperature rose to 66° in London, the highest for 55 years. Similar fine weather on 7th, and the 17th, 18th, and 19th were very fine, though breezy. The latter part of the month was very cold, with hail and snow, like mid-winter, in Great Britain. Intervals of mildness rendered changes from spring to winter exceedingly trying. For some days temperature was 15° below normal. Changes so sudden and large have seldom been experienced in March. The highest temperature was reported at Cambridge on 7th, 67°; lowest at Fort Augustus on 13th, 8°. At 8 A.M., 1st, while at Valentia the air was 50°, Sumburgh Head had only 28°; 10th, Valentia 50°, Nairn 26°; 14th, Valentia 45°, Stornoway 22°. Rain at Fort William on 19th was 2·92 inches; snow in places. In the west of Scotland the rainfall was very heavy and made serious floods. Snow and hail showers alternating with sunshine, with chilly, searching winds, were constantly shifting about various districts during the latter part of the month, but the 31st broke the severe cold spell by a brisk rise of temperature. Frosty nights and blizzard-like winds set in about the 11th. Fog was noted in Ireland on 3rd, in the south-west 7th; mist in places 1st, Ireland and England 16th, in southern districts on 31st. The least atmospherical pressure, 29 inches, was on 11th; the greatest, 30·6, 20th. Bright sunshine ranged between 38 per cent. in the south-west and 26 in the north district. There was 50 per cent. in the east of England during the week ending 10th, the same for the week ending 24th in the west of Scotland; the Channel Islands had 41 for the month.

*April*, 1906.—The temperature was below normal, most so in the north, where the rainfall was much less than usual. The highest temperature was reported in London, 71°, 12th; lowest at Balmoral, 21°, on 19th. Electrical storms occurred on 13th in the south-east, east 22nd, many parts of England 23rd, Hastings 24th, north-east 28th, south-west 29th, east and south-east 30th. Some snow and frost were experienced. The month ended colder than the beginning. A spell of spring-like weather, fine and dry, suddenly changed to wintry cold and blast on 17th, with frequent local heavy showers and north-westerly winds onward. The 21st and 29th were very stormy. More or less snow fell in various districts on 24th. Winds from eastward prevailed on 8 days; fog 1 in south-east, Ireland 1, Scotland 1; mist in places 4, Ireland 4, south-east 2, over England 1, over the Kingdom 1. Atmospherical pressure was greatest on 9th, 30·7 inches; least on 28th, 29·1. Sunshine abounded, diminishing towards the close, giving 64 per cent. to the second week, 52 to the month; ranging between 59 in south-west and east, and 39 in the north district.

*May*, 1906.—The weather was cold, with wind from eastward on 9 days, much rain, scanty sunshine. The highest temperature was reported at Southampton on 8th, 77°; lowest at Balmoral on 10th, 23°. Electrical storms were numerous. On 8th they gave to central England floodings. During the night 14th–15th there was a succession of them from north Scotland to south England, leaving floods about. Others occurred on 8th in places, 12th in east, 13th Norfolk during 12 hours, 14th Wales, 23rd Channel, 24th north-east, 27th at Lairg. Unsettled, inclement weather continued to 25th, when fog settled off the Severn until 3rd, on which day the *Montagu* was stranded. Mist was noted on 6 days, chiefly in Ireland. Hail, snow, and some frost had to be reckoned with, as well as damage from floods and lightning. Atmospherical pressure was low: least on 3rd, 29·3 inches; greatest, only 30·25, on 14th. The 3rd and 27th had violent wind. Bright sunshine varied between 37 per cent. in the south and 21 in the north district.

The *Spring* was cold, with normal rainfall and much sunshine in the middle part.

*June*, 1906.—The weather was for the most part fine, temperature seasonable, rainfall somewhat deficient. The highest temperature was reported at Dumfries on 12th, 83°; lowest at Tunbridge Wells on 7th, 28°. There were only 6 days for rain at Scilly; 29th, 2·07 inches fell at London between 12 and 8 A.M., and extraordinary rain fell over south England. In the early morning of 24th, London and a large part of south England experienced a prolonged severe electrical storm; and others occurred on 1st over southern England; 12th and 17th, Lancashire; 16th and 23rd, in south-east; 22nd, Lincolnshire; 24th, over England. At 9.45 A.M., 27th, a slight earthquake was felt in south Wales and west England. Atmospherical pressure was least on 1st and 27th, 29·4 inches; greatest on 4th and 21st, 30·4. Wind came from eastward on 12 days. Mist was noted in places on 10 days, in south-west 1, south 1, on Atlantic 1; fog in north-east 2, south-west 1, Channel 2, Atlantic coast 1. Bright sunshine varied between 53 per cent. in the south and 30 in the north district. During the week ending 9th Jersey had 80 per cent.; Greenwich 80·6 hours, range of temperature 26·6°, humidity 65, and 4 morning frosts. On 26th London had 15·4 hours sunshine. Some days were cold enough for fires and overcoats.

*July*, 1906.—The weather varied very much in different districts at varying intervals. Temperature north and south was less than in the median latitudes. Rain fell on 29 days in the west, only 6 in the east; and the quantity was greatly deficient in England. Stornoway had 1·03 on 18th. The 17th and 18th gave 4·9 inches to Fort William, 4·4 to Glencarron. The highest temperature was reported at Wisley on 18th, 83°; lowest at Lairg on 1st, 33°. Electrical storms were frequent: 3rd, in south-west and Wales; 6th, east and Midlands; 10th, east; 12th, south; 23rd, Lincolnshire; 27th, south-east and Midlands; 30th, Midlands; 31st, Scotland. Atmospherical pressure was least on 1st, 28·9 inches, also 19th, 29·1; greatest on 9th, 30·35. Mist was noted 1 day in the north-east, 1 places 1 Ireland, 4 on Atlantic, 1 south-east, 2 east; fog 1 places, 1 Dover,

1 Channel and Wales. Bright sunshine varied between 53 per cent. in the south and 29 in the north district.

*August*, 1906, throughout a typical month, had the usual variation—several days of oppressive heat, several chilly nights, ending with sultry heat. The mean temperature was normal, but the range was large: lowest reading, 32°, at Lairg on 23rd; highest, 94·3°, in sunshine 152°, at Greenwich, 31st. On this day a short spell of surprising heat set in for the Kingdom. In the north the temperature was 5° below the normal, in the east 3° above, south-west and central about normal. The rainfall was excessive in the east, though only on 10 days. On 1st 1 inch was measured at Aberdeen; 2nd, 1·85 at Pembroke; 3rd, Holyhead 1·13; 4th, Sumburgh 1, Yarmouth 1·34; 9th, Rauceby 1·41 between 10 and 11.30 A.M.; 12th, Pembroke 1·75. Between 9 A.M. and 2 P.M. 2nd, Tavistock had 1·85, Llandudno 1·37, Aspatria 1·76, Alnwick 1·70. On this day electrical storms were very severe in most districts; on 3rd, in north-west England; 4th, east and north-east; 7th, north and north-east; 8th, central east, and south-east; 13th, England and Ireland; 14th, north and south-west England; 15th, north Scotland, north Ireland, north-east England; 16th, east coast; 17th, east England; 21st, south Ireland; 23rd, north Wales. Fog was noted on 6 days in the south-west; mist in Ireland south 1, all over 2, west 3; in the south-west 1, places 5, north-east 1, south 1. Atmospherical pressure was least on 14th, 29·3 inches; greatest on 8th, 30·4. On 24th a cyclonic disturbance from south-west of Ireland travelled to the north-east of England by next morning. Bright sunshine varied between 55 per cent. in the south and 26 in the north. Blue sky was prevalent during the last week, and the sunshine unprecedented: 61 for the Kingdom, 74 in the east, while the Midlands, south, north-west, and south-west districts had more than 70, Ireland 57.

The *Summer* weather was rather better than normal as regards mean conditions, with a steady monthly 42 per cent. of sunshine, numerous electrical storms, frequent fog or mist.

*September*, 1906, opened with the spell of heat, most intense in central, east, and south England, scarcely less in all other parts; and proved a very fine month—temperature above, rainfall much below normal, air quiet. Rain fell on six days only, at Scilly; the amount was one-half in the east, one-third in the west, less than that in the south, about one-fifth in the north, below the usual quantities. On the 5th 1·68 inch of rain was measured at Ventnor, 1·98 at Glencarron, 1·87 at Fort William. The highest temperature on the 1st was 95° at Colly Weston; 2nd, Bawtry 96; 3rd, Hillington 93. Temperature attained 90° or more over England, 87° or more over Scotland, 78° or more over Ireland. At Greenwich on 1st the temperature in sunshine attained 147·8°; 2nd, 149°, humidity 41 per cent.; 3rd, 151·8° and 44. Afterwards the temperature fell quickly in all parts. On the 10th frost was experienced in east England, on several other mornings in various places. The lowest temperature, 29°, was at Balmoral on 27th. On 15th electrical storms were reported at Ventnor and Dungeness; 17th, east England; 16th, aurora was seen at Nairn; 22nd, at various places in Scotland. Atmospherical pressure was least on 15th, 29·25 inches; greatest on 26th, 30·6. Wind was from eastward on 7 days. Mist was noted in places on 7 days, England 3, north-west 2, south-east 1, south-west 1, Ireland 9; fog in the Midlands 2, England 1, in the south-east on the last 4 days. Bright sunshine varied between 61 per cent. in Jersey, 56 in south-west, and 41 in the north. The week ending 29th was very fine, with much sunshine—77 at Jersey, 60 for the Kingdom.

*October*, 1906, at once began to replenish water. The rainfall was much in excess of the normal in the west, and less than it in the east. The air was mild, the winds variable, easterly on 5 days. The highest temperature was at Greenwich on 1st, 72°; lowest at Lairg on 30th, 21°. On 10th, while Yarmouth had 61°, Birr had only 39°; 30th, Dungeness 53°, Nairn 25°. On 5th 1·36 inch of rain was measured at Holyhead, 1·02 at Pembroke; 7th, 1·02 at Valentia; 29th, 1·31 at Newcastle; 30th, 1·34 at Worthing. Electrical storms occurred in England on 1st, Dungeness 9th, in N.E. 10th, 13th, Laudale 16th, Lowestoft 22nd, Wales 30th. Aurora was seen at Wick on 9th. Extraordinary damage was done by lightning to Ingham Church on 14th. On 28th heavy rain in Lancashire produced floodings. A cyclonic storm off the south-west of Ireland on 2nd traversed England to Holland; another from the same region on 4th attained the north of Scotland; one formed in north England on 18th was centred off the Tyne next morning, and on 20th was off Aberdeen: it gave snow to various districts in Scotland. Stormy weather of an erratic kind prevailed over the Kingdom during the last week, and on 30th much rain fell in south-east England. Atmospherical pressure was greatest on 25th, 30·35 inches; least on 29th, 29·05. Mist was noted in places on 7 days, in the north 1, south-east 2, Ireland 3, north-east 2; fog over Great Britain 1, in the south-east 1; some snow on 30th at Newton Rigg. Bright sunshine varied between 37 per cent. in south England and 23·4 in north-west.

*The Year's Weather and the Crops.*—The autumnal rainfall of 1905 having been less than 10 inches, 2 below average of these summaries since 1881, was a favourable omen for the harvest of 1906. In November, however, the rainfall was above average, and prevented work on the land to some extent. In December high temperature and damp ground were forcing on the young crop too rapidly. The furrows were wanting the friable action of frost. Too much rain in January still led on the growth, but kept back work on the land. No frost to speak of, mild damp weather, though the winds were boisterous. In February variable weather was unfavourable for settled field work. Some night frosts occurred, but none diurnal. March was more like winter, with frost and frequent snow, but not staying. Evaporation hardened the soil. Snow, rain, and fitful sunshine retarded the spring sowing. The first part of April was favourable for agricultural work—dry, quiet, sunny—so that progress could be made in sowing cereals, planting potatoes and mangels. Moisture in the soil was still sufficient for pastures. A spell of fine, dry weather extending over three weeks in many parts of the Kingdom was beneficial. Some morning frosts were followed by hot sunshine, sometimes with very keen wind, for the air itself was cold. The latter part of April was wintry, nipping to vegetation, the autumn-sown wheat suffering less than that of spring. Grasses appeared to require rain, and were in poor condition. Snow in more or less quantities fell in various districts. Stormy winds

and frosts damaged fruit trees and green crops, chiefly in west and central England. The brilliant spell of weather suddenly changed on April 18th, and the finish had N.E. wind, cold, and blasts. Showers of hail or snow were experienced from Cape Wrath to the Land's End. In the *Quar. Jour. Roy. Met. Soc.* for April, C. W. Mawley stated, regarding autumnal weather, that it is necessary "for a deep-rooted plant like wheat to obtain at the start a firm root-hold of the ground, and, having obtained this, it becomes independent of all ordinary weather changes which may follow" until the harvest. Up to the middle of May autumn-sown wheat was getting on well. Spring-sown barley and oats were also forward. Grasses were backward, wanting showers and more warmth. The latter days of May were dull, cold, and wet; scant sunshine alternated in time and locality with rain in dribblets, or large showers, and some frosts in the early hours. Clear, warm weather from June 3rd to 13th was important for the crops. Then followed varied conditions, with some heavy rains and strong wind; nevertheless, the weather of June suited the crops; hay was delayed, but the aftermath benefited. In July hay proved a better crop than was expected, but hops were backward, roots were wanting moisture, which subsequently came with welcome. July altogether was favourable for wheat and beans; slightly depressive of other crops, as roots and hops. August found the cereals—wheat, barley, oats—likely to exceed the average yields of recent years. September proved the estimate of August, for wheat, barley, oats, potatoes, roots, and hay were fairly above average, and the harvest was gathered under favourable conditions. Fruit has varied: apples plentiful, pears scarce, bush fruit good, stone fruit a failure, hops a very small crop but of good quality. Thus the propitious conditions of the autumn of 1905 may be considered as influential of the splendid wheat crop. By September farmers agreed that the crops gave general satisfaction; the grain of the cereals proved large and heavy, the straw rather short. The month was exceptionally suited for work on the land. October did its duty by attention to the supply of water. Want of rain was felt during the growing period. The *Times* remarked: "The wonderful weather which prevailed through the harvest months and preceding harvest was fraught with blessings for agriculturists as well as for the entire population"; and "the aggregate corn harvest of 1906 is a record which cannot be beaten for a long period," which is a pessimistic forecast. On October 2nd the same authority stated: "Compared with other years, presumably since the Board of Agriculture began to publish estimates, wheat is finally adjudged to be 5 per cent., barley 4, oats 2, roots above the average." Potatoes have been pronounced a good crop. "Wheat loves heat, and requires little rain after it is in ear; hence hot years are wheat years, and it is noticeable that wheat years are vintage years." The rains of October were very serviceable after the long period of scanty supply. Showers with high temperature were good for pastures without preventing very much work on the land, so that tillage and sowing made good progress.

## Storms and Floods in 1905–1906.

[1 Nov., 1905, to 31 Oct., 1906.]

It is possible to give only a summarised account of the disastrous effects of storm and flood in the period under survey, but such subscribers as preserve upon their shelves the preceding editions of the ALMANACK have ready for reference a handy and convenient series of epitomised accounts of exceptional tides and storms as they occurred in different parts of the world.

On November 3rd, 1905, it was reported from Uruguay that a prolongation of the rains had caused considerable damage to crops and property in consequence of the flooding of many districts. On 7th a typhoon produced wide desolation at Oshian and some of the adjacent Japanese islands; nearly 2,000 dwellings were destroyed, and a steamer was wrecked. During 26th–27th a cyclonic storm raged over the British Isles, and although the centre travelled N.N.E. from the west of Ireland to Norway, great damage was done to telegraphs and to shipping in the Channel ports. On 27th a storm swept over the Great Lakes of America, and occasioned considerable loss to shipping.

December 13th, Tunis was visited by storms of wind, which destroyed shipping and tore down the breakwater at Bizerta, washed away the railway at Beja, and inundated dwelling-houses at Byonville.

January 7th, 1906, during the night a tidal wave visited the Society Islands, and a subsequent hurricane at Tahiti completed the work begun. Between 6,000 and 7,000 lives were lost, and the damage was estimated at $5,000,000.

On February 7th and 8th a hurricane again raged over the islands. Papieta was deluged and about 1,000 lives lost, the damage being estimated at $500,000. The British Consulate had to be abandoned. During this hurricane the wind attained a velocity of 120 miles an hour between 12 and 4 A.M. On 27th the rivers Wye and Derwent overflowed after the heavy snow and rain.

March 2nd, a sudden storm off Norway scattered a large fishing fleet, and amid very rough sea and blinding snow squalls eleven boats foundered, with a loss of 33 lives. On 6th a tornado, travelling 77 miles an hour, struck Meridian, Mississippi. Its path was 600 feet in width and about one mile in length. Numerous fires were caused, but torrential rains supervened. The damage was estimated at $1,000,000, and 121 lives were lost. On 9th Scotland was visited by floods, and damage sustained by graziers, while the railways were partly flooded. On 12th a gale swept over the British Isles, with high seas on the east coast. The air was bitterly cold, and 2 inches of snow fell in London, and wharves and buildings were swamped along the Thames. On 17th a violent storm raged at Rio de Janeiro, causing the loss of 70 lives. It was reported from Iceland that on the 23rd heavy gales had been raging over the island for a fortnight; though three trawlers and 70 lives were lost, the damage experienced was otherwise but slight. On 26th Hamilton and Hico, in Texas, were devastated by a tornado; and Bellevue, 120 miles north, was also completely destroyed. In this disaster 12 lives were lost.

In May floods occurred in different parts of the United Kingdom, those in the East Lothians on the 21st being amongst the most severe.

It was reported in the *Times* on 9th June that an extraordinary hailstorm broke over Bullmora, in the county Cork. Over £800 damage was caused on one farm alone. "The hailstones were as large as oranges, and when the downpour ceased were found to a depth of nearly two and a half feet upon the ground." From the 15th to 17th of this month a great storm raged over Newfoundland, many fishermen being drowned and much craft destroyed. About this time the railways in Chile were very severely damaged by floods. On the 28th of this month 2·09 inches of rain in London caused the bursting of sewers and flooding of cellars.

On the 2nd August a series of electric storms progressed from the neighbourhood of Paris over England. This disturbance extended to the north of Scotland, and was felt in the centre of Ireland. Some loss of life was caused by lightning, and much havoc was effected by the hail. It is stated that at Bettws-y-Coed 1·79 inch of rain was registered. By the 7th very heavy rain forced the river Colorado to burst its banks, causing much loss of life. In New York the downpour flooded the underground railways; in 16 minutes no less than 1·5 inch fell. An electrical storm occurred on the 8th of August in the Midlands and Eastern Counties, and the crops suffered considerable damage. On the 10th it was reported that floods in Texas had destroyed property to the value of £100,000, had rendered hundreds of persons homeless, and caused the death of at least 25 persons. By the 16th unprecedented floods spread over the Darbhangali district of Bengal. Nearly 20 inches of rain fell in a few days, and many people were drowned. At Arras on the 20th a violent storm destroyed the crops and rendered many people destitute. It is estimated that on the 27th of this month property to the amount of £800,000 had been destroyed in the province of Senegal. At the end of the month the floods in Mexico had ruined a large part of the city of Mazatlan, making hundreds of people homeless, and causing a loss of 20 millions of dollars to the sugar planters in the vicinity.

The province of Behar suffered on 4th September from disastrous floods. The crops were destroyed, bridges swept away, and the inhabitants reduced to starvation. At about this date the Tagus and its tributaries overflowed the banks, and on the 10th of the month a waterspout burst over Bilbao. It is stated that the water stood 3 feet deep in the streets, and torrential rain was experienced in the neighbourhood of Lisbon. About the 17th a storm off the coast of Labrador was the cause of many wrecks. On the 18th a sudden typhoon, lasting two hours, inflicted on Hong Kong and Kowloon tremendous destruction. Property to the value of 20 millions of dollars was destroyed, and over 10,000 lives were lost. About the 26th of this month storms in Alicante caused great damage, and on the 27th a hurricane in the Gulf of Mexico spread disaster over a wide area: 75 persons were drowned, 5,000 rendered homeless at Port of Mobile; and at Pensacola 25 people were drowned, 2,000 lost their homes, and much property was destroyed and damaged. The loss sustained has been estimated at millions of dollars. In Tarragona, Valladolid, Murcia, and Valencia much injury was experienced by torrential rain, and many people were drowned. The Xycar overflowed its banks, and at about the same date a typhoon occurred in the Philippine Islands.

On 2nd October a gale was experienced over the southern portion of the United Kingdom. The sea front at Hastings suffered somewhat severely, and the Channel Islands did not escape from damage. On the 5th a tornado at New Orleans wrought great destruction in the neighbourhood, especially at Pontchatoula, 50 miles distant. This disturbance was preceded by a thunder-like noise, and many people were killed or injured. Early in the month a tidal wave, attendant on shocks of earthquake near New Orleans, devastated villages on the coast near Finch Haven. On the 16th a cyclonic storm raged from Majorca to Messina; and on the 18th and following days a hurricane caused an inundation on the coast of Florida; 110 persons were killed at Havana, and great damage was done to property. It is stated that the velocity of the wind varied from 80 to 120 miles per hour. This hurricane continued its course into Mexico, and 100 people were drowned at Coatepec. Sulphurous water was ejected by the Chulo volcano, which inundated Panchinalco and killed most of the inhabitants. On the 20th it was reported that storms had been raging for 10 days at Salvador, flooding the valleys and destroying crops and cattle. On the 21st an Irish mail train, passing through a flooded path, had two coaches separated; the water was several feet deep owing to the spring tide. In the States of Kansas and Dakota a severe blizzard was experienced on the 22nd.

## Wheat and Flour Imports, 1899–1903.

* Return for 1868 incomplete.

IN the first half of the seventeenth century 1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of *rails* for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the waggons in the vicinity of some of the coal-mines at Newcastle; and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1789 that "edge rails" were introduced, the credit of their adoption being assigned to William Jessop, on the Loughborough and Nanpantan line. James Watt had conceived the idea of utilizing steam for locomotion; and there is a record of a model locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line 9½ miles long from Wandsworth to Croydon. In 1804 an Act was

passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the County of Glamorgan, and for the hauling or drawing of waggons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise." On the 21st of February, 1804, Trevithick's patent locomotive steam engine was tried at Penydarran, near Merthyr, and conveyed along a tramroad 10 tons of bar iron, and about 70 persons, a distance of 9 miles. The application passed the third reading as a railway or tramroad. The word "otherwise" was evidently intended to cover the use of Trevithick's engine, and this Act may therefore be considered the first in which steam was contemplated as the motive power. The line is now known as the Swansea and Mumbles Railway. Then followed the Kilmarnock and Troon, the Severn and Wye, the Gloucester and Cheltenham, Plymouth and Dartmoor, Stratford-on-Avon and Moreton, and other small undertakings, about twenty-five in number altogether with an aggregate of 325 miles, and an authorized capital somewhat over a million. It is almost unnecessary to add that animal power only was contemplated in their working. The Stockton and Darlington Act was obtained in 1821, with a capital of £102,000; and it is remarkable that while animal power has to be relied upon for working the line, the clause in the Act states "with men and horses *or otherwise*." George Stephenson came upon the scene immediately after this Act was obtained, and was appointed engineer of the line; and at his urgent request Edward Pease, the promoter, applied for a new Act empowering the company to work the railway with locomotive engines. Great opposition was encountered, but the Bill finally passed in 1823, and the line, which was 25 miles in length, was opened on the 27th of September, 1825. A duplicate system of working was at first adopted, the passenger traffic being conducted by single one-horse coaches, while that of minerals was

orked by a locomotive engine made under tephenson's own directions and bearing the mple but significant designation of "No. 1." he first train consisted of 33 coal waggons with ne passenger carriage in the rear, and during portion of its journey it attained a speed of fteen miles an hour. It appears to have been everal years, however, before horse-power was holly displaced by steam locomotives. The bove notable engine was long exhibited in front f the Darlington Station of the Stockton and arlington line; but it is now placed under over, mounted on stonework, in the Bank Top tation of the same town. This line—the germ, may be called, of the railway system—proved great success financially and otherwise. fevertheless, the employment of locomotives emained almost unknown to the public at large ntil the opening of the Liverpool and Manhester line, five years later. The Monkland nd Kirkintilloch Railway, a colliery line near lasgow, opened in 1826, was really the first to llow the example of the Stockton and Darlingon, and several other small lines—many of them orked partly by fixed and partly by locomotive gines—quickly adopted the new traction power. he inauguration of the Liverpool and Manhester line in 1830, attended as it was with a agic result, was the first to impress upon the eople that a revolution in travelling had really aken place; but even then the aid of the Press, owerfully and influentially invoked, failed to rouse anything in the shape of enthusiasm. oyal patronage was not bestowed upon the pening ceremony, although eagerly solicited. o the great minds of the time, however, the ent assumed more than ordinary importance, d it is reported that the impression made upon rd Brougham's contemplative mind forced a ar from his eye. Leicester to Swannington came ext, but that from London to Birmingham was e largest that had yet been projected. A great ruggle took place with landowners and other fluential personages, opposed not only to this Bill particular, but to the introduction of railways nerally. Undaunted courage and perseverce on the part of the promoters prevailed, and e Bill, which was rejected in 1832, passed in 33, but not until landowners and others had en conciliated by having the price originally timated for their land, &c., doubled and even bled. The expenses of carrying this Bill, hich was probably the most momentous Parliamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of railways as it had before been against them. The Grand Junction, the London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Croydon, Birmingham and Gloucester, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened. Thus in four or five years was witnessed the laying of the foundations of nearly all the existing great trunk lines of railway in this country.

The expenditure incurred in securing legislative authority to construct railways was enormous. The Parliamentary costs of the Brighton Railway averaged £4,806 per mile; of the Manchester and Birmingham, £5,190 per mile; and of the Blackwall, £14,414 per mile! The solicitors' bill for the South-Eastern Railway contained 10,000 folios, and amounted to £240,000.

Up to 1840, inclusive, notwithstanding the delays and difficulties which surrounded railway projectors, even in the earliest stages of legislation, 299 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841–3 only a few small Bills were passed by the Legislature; but as the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying 10 per cent. dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These

figures illustrate the rise and fall of the great fever known as the "railway mania." At least four times as many schemes came before the credulous and overweening public as ever came to receive legislative deliberation, and between the close of the 1845 session and the opening of that for 1846, no less than 1,300 projects were brought out, and it was calculated that even the small Parliamentary deposits required to be lodged with each Bill would aggregate to nearly sixty millions. Gradually, however, it dawned upon the minds of reflecting people that of the £600,000,000 required, a vast proportion were mere paper projects or competitive schemes, alike unnecessary and uncalled for, and the inevitable collapse soon followed.

General legislation relative to railways was introduced about 1840. The lines that had been constructed previous to this were established under Special Acts. More than anything else in the nature of public or private enterprise, it was beginning to be felt that the railways were instrumental in promoting the interests not only of the rich, but perhaps even in a greater degree the interests of the community at large. The enormous development of the trade of the country was ascribed to the instrumentality of railways. It is not wonderful, therefore, that a new branch of law for their regulation was introduced. The variety and repeated alterations in the railway laws showed the difficulty of dealing with the various and often conflicting interests concerned. The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening for returns of traffic to be made by the companies, as also of accidents involving personal injury, for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. Then followed legislation on the leasing and sale of railways, on the gauge, on cheap trains, passenger duty, &c. In their civil and commercial importance, and the enormous interests they represented, railways soon came to occupy the attention of leading minds of the day, and an active part in their administration was shared by members of the Government and of both Houses of Legislature, and the railway interest has continued powerfully represented.

### RAILWAYS IN 1905.

The number of persons employed in working the railways of the United Kingdom in 1905 was 581,664. The number dependent upon this large body must also be very great; and if we take into account the vast numbers besides who are

employed in branches of trade which administer to the requirements of railways, the social dependence upon their existence must be something enormous.

At the close of the year 1905 there were in use upon the railways 22,237 locomotive engines, 50,939 carriages for the conveyance of passengers, 19,646 other vehicles attached to passenger trains, 720,363 waggons for the conveyance of live stock, minerals, and general merchandise, and 20,096 miscellaneous vehicles.

*Capital embarked in Railways.*—The total amount of capital authorized by Parliament to be raised for the construction of railways in the United Kingdom amounted on the 31st December, 1905, to £1,396,821,868. Of this sum, £1,282,800,935 (which includes £194,341,000 nominal capital caused by the consolidation or conversion of stocks) exists and forms the capital account of the various railway companies, and shows an increase over the year 1904 of £14,306,254, or 1·13 per cent. The £1,282,800,935 is composed of £119,716,449 guaranteed, £325,156,493 debenture, £334,374,026 preferential, and £483,495,648 ordinary stocks and shares, besides a sum of £20,058,319 raised by loans. The net receipts for the year amount to £43,466,356, equal to 3·39 per cent. on the total capital sunk, as compared with £42,660,741 in 1904, with a corresponding capital of £1,268,494,681, which gave a net receipt of 3·36 per cent. It may be seen, therefore, from the foregoing figures that the total amount of capital raised at the close of the year was nearly £1,283,000,000, of which more than £194,000,000, or approximately 15 per cent., was due to nominal additions. These nominal additions formed approximately 18½ per cent. of the ordinary stock, 13½ per cent. of the guaranteed and preference, and 13 per cent. of the loans and debenture stocks. The total amounts of capital at the end of 1905 compared with 1904 show an increase of about £3,250,000 in the ordinary, £7,250,000 in the guaranteed and preference, and £3,750,000 in the loans and debenture stocks, making a total increase of £14,250,000—a smaller increase than that of any previous year since 1894. The proportions which the various classes of stock bore to the total paid-up capital differed but slightly from the year 1904, the ordinary stock forming 38 per cent., the guarantee and preference 35 per cent., and loans and debenture stock 27 per cent. of the total. The proportion of net earnings to capital, although slightly greater in 1905 than in 1904, shows a general tendency to decline. This, however, arises partly from nominal additions to capital on the conversion of stocks. Another cause of the decline is the increased wages and curtailment of the hours of labour of railway servants, and the rapid growth of local taxation, which is increasing in an alarmingly disproportionate ratio to the net profit and to the benefits which the companies derive from the expenditure of the rates. That this burden of taxation shows a constant tendency to grow heavier year by year is illustrated by the fact that during the last ten years there has been an increase of £1,784,211 in this item. As compared with the 1895 total, the sum paid by the railway companies under the head of Rates and Taxes in 1905 shows an advance of nearly 60 per cent.

*Gross Earnings of the Railways.*—The earnings for the year 1905 amounted to £113,531,019, as compared with £111,833,272 for the year 1904, which gives an increase of £1,697,747, equal to 1·52 per cent. The increase in the passenger receipts is £191,184, made up as follows:—

| | 1905. | 1904. | Inc. or Dec. |
|---|---|---|---|
| | £ | £ | £ |
| 1st Class | 3,467,098 | 3,429,133 | +37,965 |
| 2nd ,, | 3,054,196 | 3,265,150 | −210,954 |
| 3rd ,, | 29,628,839 | 29,381,624 | +247,215 |
| Season & Periodical Ticket Holders | 4,106,797 | 3,989,839 | +116,958 |
| | 40,256,930 | 40,065,746 | +191,184 |

The numbers carried were:

| | 1905. No. | 1904. No. | Inc. or Dec. No. |
|---|---|---|---|
| 1st Class | 36,414,492 | 34,930,433 | +1,484,059 |
| 2nd ,, | 52,583,258 | 71,294,217 | −18,710,959 |
| 3rd ,, | 1,110,024,352 | 1,092,549,070 | +17,475,282 |
| | 1,199,022,102 | 1,198,773,720 | +248,382 |
| Seas. & Periodical Tk. Holders | *663,040 | *643,873 | +19,167 |

* For 1901 and 1905 the equivalent number of holders of annual tickets is given. Previous to 1902 the returns were not wholly but only partially on this basis; they are, as regards the years 1902, 1903, 1904, and 1905, on a uniform basis.

RAILWAYS OPENED IN 1906.

| London and South Western | Bentley | Bordon | Dec. 11'05 | 4½ |

It should be here stated that up to, and inclusive of, the year 1904, passengers other than first class travelling on the Liverpool Overhead Railway (a railway which has only two classes) were included in the returns as second, whereas in the returns for 1905 they are included as third class. The receipts from these in 1905 were about £63,000. The real decrease in 1905 in the receipts from second class, and the real increase in receipts from third class were therefore £148,000 and £184,000 respectively. This increase in third class receipts at the expense of the second is largely due to the partial abolition of the latter class on the Metropolitan and Metropolitan District Railways consequent on the electrification of those lines, but many other companies show a slight falling off in 1905 in receipts from second class traffic. It will be seen that the number of first class passengers decreased by 4·2 per cent., but that of increased in 1905 by 4·2 per cent., but that of second class passengers decreased by 26·2 per cent. The receipts from these classes increased by 1·1 per cent. and decreased by 6·5 per cent. respectively. The number of third class passengers increased by 1·6 per cent., and the receipts therefrom by 0·8 per cent. The increase in the number of third class passengers was rather greater in 1905 than in 1904, but it was still small as compared with the annual increases for years previous to 1902. That this falling off in the rate of increase is due in a great measure to the increasing competition of tramways, may be deduced from the fact that in 1897 the increase in number of railway passengers was 5·2 per cent., but that of tramway passengers the increase in number was 3·8 per cent. only. In 1904 the increase in number of third class railway passengers was 0·6 per cent., whereas the increase in number of tramway passengers was 15 per cent. The receipts from season ticket holders show a further considerable increase, following on those of previous years the increase in the receipts from third class season tickets having been in 1902, £79,000; in 1903, £126,000; in 1904, £171,000; and in 1905, £231,000. The earnings for the conveyance of parcels, mails, and such other traffic as is generally carried by passenger trains, amounted in 1905 to £8,463,190, as compared with £8,321,871 in 1904, being an increase of £141,319, or 1·70. The total figures of traffic falling under the heading of "goods" are £56,411,589, as compared with £55,400,052 in 1904—an increase of £1,011,537, or 1·83. The aggregate is made up of £28,749,911 from merchandise; £26,273,014 from minerals; and £1,388,664 from live stock.

## RAILWAY PASSENGER TRAFFIC.

| 1904 | 191,966 | 22,712 | 1,373,211 | 301,860 | 674,909 | 3,407,534 | 496,853 | 597,021 | 3,385,062 | 233,875 | 2,495,595 |
| 1905 | 183,156 | 21,239 | 1,376,527 | 301,028 | 644,162 | 3,457,792 | 508,961 | 547,998 | 3,429,818 | 235,142 | 2,595,275 |

The Midland Railway Company took the initiative in passenger traffic reforms, having run third class carriages by all trains from 1st April, 1872; afterwards, from 1st January, 1875, greatly reducing the first class and abolishing second-class fares. From 1st November, 1892, the Great Northern Railway Company also abolished second class fares to all stations north of Hatfield; from 1st January, 1893, the Great Eastern abolished them in the provinces; the Cambrian followed on 1st May of the same year, but re-introduced them in 1899. They have also disappeared from all journeys between London and Scotland, and on the 1st of July, 1897, the Furness Company discontinued first-class accommodation. On July 1st, 1905, the Metropolitan District Company commenced to work their electric train service, the cars being first and third class only.

## ANALYSIS OF RAILWAY WORKING EXPENDITURE.

| Year. | Maintenance of Way, Works, &c. | Locomotive Power and Carriage Repairs. | Traffic and General. | Rates, Taxes and Government Duty. | Compensation. | Law and Parliamentary. | Steam-boats, Canals, Harbours, &c. | Total Working Expenses. |

| 1904 | 10,593,772 | 24,098,903 | 23,123,215 | 5,090,712 | ¶698,815 | 298,656 | 3,280,087 | 69,174,531 |
| 1905 | 10,586,139 | 24,248,538 | 23,293,440 | 5,287,030 | **698,263 | 327,661 | 3,602,070 | 70,704,661 |

* Includes £118,849 † £116,047. ‡ £153,928. § £144,155. ‖ £155,495. ¶ £162,155, and ** £173,348 paid to employes under the Workmen's Compensation Act, 1897.

The total quantity of goods carried in 1905 was 461,139,023 tons, as compared with 449,837,615 tons in 1904, showing an increase of 11,301,408 tons, or 2·51 per cent.; owing, however, to the revision of the list of articles included under the head of "minerals," the tonnages of minerals and general merchandise previous to the years 1903, 1904, and 1905 are not comparable with those for previous years.

*Expenditure.*—The total working expenses of the whole of the railways for the year 1905 amounted to £70,064,663, equal to 62 per cent. of the gross earnings, as compared with a total of £69,172,531 for the year 1904, equal also to 62 per cent. The increase compared with 1904 amounts to £892,132, or 1·21 per cent. The total number of miles travelled by passenger and goods trains during the year 1905 was 400,923,198, or 3,885,435 more than in 1904. Analysing the expenditure, we find the item £18,491,887 for locomotive power; £5,756,651 for repairs and renewals of carriages, &c.; £10,586,139 for maintenance of permanent way, stations, &c.; and £20,593,970 for traffic expenses. The locomotive expenses in 1905 amounted to 11·09*d.* per train-mile.

*Compensation.*—The amount paid for compensation for personal injuries sustained during the year 1905 amounted to £143,656, as compared with £134,968 for the year 1904, resulting in a comparatively small increase of £8,688, for which the companies are to be congratulated, seeing that they carried nearly a quarter of a million more passengers than in 1904. In the movement of goods the companies have paid for damages and losses £381,459, as compared with £401,692 in 1904—a decrease of £20,233. We subjoin a statement showing the amounts paid by the principal companies under both heads:—

| Company. | *Passengers.* | *Goods.* |
|---|---|---|
| Barry | £739 | £86 |
| Cheshire Lines Committee | 839 | 606 |
| Great Central | 6,252 | 16,174 |

*Net Result of Working the Railways.* The gross ceipts, compared with those of the preceding ar, show an increase from passengers (which ludes season ticket, carriage, horse, dog and t office mail traffic) of £332,503; from goods, increase of £1,011,537; and an increase from its, tolls, navigation and steamboats, &c., of £353,707; and a total increase from all sources of £1,697,747. The net receipts for 1905 on the capital outlay give a sum of 3·39 per cent., compared with 3·36 per cent. for the year 1904, and 3·40 per cent. for the year 1903. As may be seen, however, on page 718, over 14 millions additional capital has been raised during the year 1905, a large proportion of which is "locked up" in works either unfinished or only partly finished, therefore unproductive. Increased working expenses, caused by diminished hours of labour and a proportionate increase in the number of men employed, and increased wages, have largely operated on the net profit. The increase in the amount of wages has for some years been gradually getting larger. A few years ago the amount paid as wages was less than 20 per cent., but now the wages bill represents over 25 per cent. of the total. Rates and taxes are also yearly increasing in a disproportionate ratio to the net profit; for instance, some of the railway companies are paying an annual sum for rates and taxes equal to 1 per cent. on the ordinary stock of those companies or about 6½ per cent. of the gross receipts, and where this burden is due to the building of tramways by municipalities the position is of course exceptionally hard. In fact, since the County Councils came into existence twelve years ago, many extra duties have been imposed upon

* Four up and four down.

railway companies. The Education Act alone has brought about an enormous increase in the rates. But even with these increasing expenses a percentage of 3·39 on the net receipts for the year must be viewed as a very favourable result.

## RAILWAY ACCIDENTS.

To the public generally, one of the most interesting points in connection with the working of the railways is the immunity from accidents, as evidenced for a considerable number of years past in the amount paid by the companies by way of compensation for personal injury to passengers. In 1904 and 1905 the cost per passenger train-mile for personal injury was 0·14*d.* In loss and damage of goods, the cost in 1904 was 0·62*d.*, and in 1905 0·59*d.* per goods train-mile. The general report to the Board of Trade for 1905 shows that although accidents and collisions of a serious nature have occurred during the year to passenger trains, yet the numbers (particularly in the case of the number killed) are very low when compared with the millions of passengers carried by the companies during the year.

The number of personal accidents on railways to passengers, railway servants, and others, reported to the Board of Trade during the year, show a total of 1,180 killed and 18,236 injured (as compared with 1,158 killed and 18,748 injured in 1904.)

The increase since the year 1897 in the number injured is owing to an order recently made by the Board of Trade regarding the mode in which the returns are to be compiled by the railway companies. Hitherto some companies have only reported accidents of gravity, but they are now directed to report all accidents which prevent the servant injured from being employed for five hours on his ordinary work on one of the three working days next after the accident. We will now proceed to investigate under three distinct heads the various causes from which these accidents arose.

*Accidents to Passengers.*—Thirty-nine passengers were killed and 396 injured from accidents to trains, rolling stock, permanent way, &c. (as compared with 6 killed and 534 injured in 1904); while 109 passengers were killed and 1,972 injured from other causes—such as falling between carriages and platforms, or on to the platforms, on getting into or alighting from trains, passing over the line at stations, falling out of carriages during the travelling of trains, and inclusive of 455 injuries resulting from the closing of carriage doors. In addition to the above may be recorded 18 killed and 782 injured by accidents in which the movement of railway vehicles was not concerned, viz., ascending or descending steps at stations, falling off platforms, &c., and inclusive of 125 injured by being struck by barrows or stumbling over packages.

*Accidents to Servants* in the employ of the railway companies or contractors.—The casualties under this head resulting from accidents to trains, or in which the movement of trains or vehicles used exclusively upon railways is concerned, show that 399 were killed and 3,800 injured during the year; of this number 6 deaths and 112 injuries were caused by collisions, 12 were killed and 523 injured in coupling or uncoupling vehicles, 4 were killed and 17 injured by passing over or standing upon buffers during shunting, 5 were killed and 185 injured in getting on or off, or falling off, engines, waggons, &c.; 6 were killed and 419 injured whilst spragging or chocking wheels, 11 were killed and 409 injured by moving vehicles by capstans, turntables, props, &c., and 12 were killed and 523 injured during shunting operations; 68 were killed and 85 injured whilst working on the permanent way, sidings, &c., and 129 killed and 277 injured whilst walking, crossing, or standing on the line. In addition to these accidents, other casualties, in which the movement of vehicles used exclusively upon the railways are not concerned, have occurred, viz., 2 killed and 2,090 injured whilst loading, unloading, or sheeting waggons, 1 killed and 277 injured by the falling of waggon-doors, lamps, bales of goods, &c., 14 killed and 541 injured by falling off platforms, ladders, scaffolds, &c., in addition to a large number of accidents from various other causes, either the result of want of caution or misconduct.

*Accidents to Persons other than Passengers or Servants.*—Under this head is classed casualties whilst passing over railways at level crossings; this caused 57 deaths and 37 injuries in 1905 (as compared with 67 deaths and 28 injuries in 1904). There were 263 deaths and 96 injuries resulting from persons trespassing on the railways, and 176 persons committed suicide upon the lines in 1905 (as compared with 140 in 1904).

| Class of Servants. | Number Employed at the end of 1905. | Number Killed and Injured in 1905. | | Proportion to the Number Employed. | |

## THE CHEAP TRAINS ACT.

The Cheap Trains Act, 1883, is a measure hich affects not only railway shareholders and e public generally, but especially the working asses whose domiciles have been interfered with r the extension of the railway systems into owded centres of London and other large urban eas. The Act has been received by the railway mpanies with indifference, its provisions being garded as partial so far as free and untaxed comotion is concerned, and nothing less than tal repeal of all taxation is the universal desire the railway proprietors and authorities.

The Act, which took effect 1st October, 1883, ovides that fares not exceeding the rate of one nny per mile shall be exempt from duty, but res for return or periodical tickets shall be empt from duty only where the ordinary fare r the single journey does not exceed that rate. ity shall be payable at a reduced rate of 2 r cent. on fares exceeding the rate of one penny ile between stations within one urban district. ch district will contain not less than one hun-ed thousand inhabitants, and must be of a con-uous urban as distinguished from a rural or burban character.

f at any time the Board of Trade have reason believe that upon any railway a due and suffi-nt proportion of accommodation is not provided fares not exceeding a penny a mile, or that h proper and sufficient trains are not provided workmen going to and returning from their rk, at such fares and at such times between six the evening and eight in the morning as appear the Board of Trade to be reasonable, steps y be taken to compel the company to provide h accommodation.

rovision is also made in the Act continuing companies' powers as to special mileage and eptional charges, and also enlarging their vers in dealing with the charges over distances ch include fractions of a mile over a quarter a mile. The King's forces, including officers nen in the navy or naval volunteers, or in the ular, reserve, or auxiliary forces of the army, n any police force when conveyed by railway any occasion for the public service, are, when velling in bodies under one hundred and fifty umber, to be charged three-fourths the rates ordinary passengers; when over that number, alf rates. The Act does not extend to Ireland.

## HIRING OF SPECIAL TRAINS.

lthough the majority of railway companies e no fixed charges for hire of special trains, the ral charges are five shillings per mile, plus ordinary fare for each passenger according to s of vehicle hired. The railway companies, ever, reserve to themselves the right to make tever charges they may think fit in accordance circumstances of hiring special trains.

## RTHER LEGISLATION FOR RAILWAYS.

he report by the Board of Trade in accord-with section 24 of the Railway and rd Traffic Act, 1888, on the classification of handise traffic and schedule of maximum s applicable thereto, determined in respect of various companies, shows that the proposed s and the actual charges approach nearer anticipated. The adoption of the new ules would result in a serious but not whelming loss, and there is no probability the loss would be recouped by an increase of e, as the decrease in revenue would affect rds of thousands of rates, and the reduction for any particular class of goods would be too small to encourage new traffic. As to terminals for station accommodation, and charges for servants' labour, the Board of Trade have adopted a uniform maximum based on as fair an average as it is possible to attain, and have limited the charge to services for loading, unloading, covering, and uncovering. It is also proposed that in all cases there shall be a truck rate for the conveyance of animals. The companies believe that, if they rightly understand the principle laid down in the report as to the revision of rates, no serious difference will be found to exist, but that it is the failure of these schedules to give due and fair effect to those principles that stands in the way of an agreement between the Board of Trade and the companies. The new rates operated on and from January 1, 1893.

*The Workmen's Compensation Act*, 1897.—This Act, which received the Royal assent on August 6, 1897, and came into operation on July 1, 1898, is intituled "An Act to amend the law with respect to compensation to workmen for accidental injuries suffered in the course of their employment."

The Employers' Liability Act of 1880 only gives compensation in cases where the personal injury is caused by the negligence of the employer or his representatives, or by a defect in the works or machinery used in his business. The Act of 1897 entirely disregards the cause of the accident, with the exception of the wilful misconduct of the injured workman himself, and awards compensation to employees in all cases of personal injury by accident arising out of and in the course of their employment. It further provides that compensation for injuries received whilst performing duties involving considerable personal danger shall become a charge upon the profits of the undertaking, thus throwing a serious burden upon Railway Companies and other employers specifically enumerated in the 7th section of the Act. The new Act will in time cause the entire extinction of the companies' accident insurance societies, by whatever title they may be known. The amount paid for compensation under this Act to railway employees during the year 1905 was £173,148.

*The Railway (Prevention of Accidents) Act*, 1902.—By this Act, where the Board of Trade consider that avoidable danger to persons employed on any railway arises from anything done or omitted to be done by the companies, or from want of proper appliances or plant, they may, after giving a reasonable opportunity of removing the danger, make rules for that purpose, by compelling them to use plant or appliance to the satisfaction of the Board, or the disuse of any plant or appliance which involves danger. The Act also empowers the Board to make rules in order to minimise danger generally. The penalties for non-compliance with these rules is a fine of £50, or in the case of a continuance of the offence (after conviction) a fine of £10 for every day during that continuance. The Board of Trade may appoint such persons as appear to them to be required for carrying this Act into effect, and may hold such inquiries and make such experiments as they think expedient for that purpose.

## THE RAILWAY CLEARING HOUSE.

THIS Institution was opened in Jan. 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c., are arrived at. *Chairman*, Lord Claud Hamilton; *Sec.*, H. Smart; *Offices*, Seymour St., N.W.

# Indian Railways.

THE construction of Railways in India, which mmenced in 1853, has been conducted on three erent systems: first, the employment of com- ies under a system of guarantee; secondly, by State through its own officials; and thirdly, assisted companies either with or without rantee or subsidy from the State, and working h capital wholly raised by themselves or ly with capital provided by the State.

he total length of Railway open in India on December, 1905, was 28,295 miles. This mile- includes tramways working outside municipal ts, which are treated as light railways. The tal outlay was £244,626,266. The gross ipts for 1905 amounted to £27,787,266; the king expenses to £13,293,333, or 47·84 per . of gross receipts. The net revenue mted to £14,493,933, which gave a return 92 per cent. per annum upon the capital sted. The number of passengers carried in year was over 248 millions. The Indian ways have in their service 452,058 employees, hom 6,535 are Europeans, 9,175 Eurasians, 436,348 Natives.

e Railways of India have up to the end of involved a yearly loss to the Indian revenues, he working of the year 1900 resulted for first time in their history in a net gain to the State, and the result of the working for the year 1905 was a gain to the Government of £1,758,988.

There is to be a "battle of the gauges" in India in the near future, the question at issue being the metre *versus* the 5 ft. 6 in. gauge. At present there are 11,562 miles of 3 ft. 3⅜ in. gauge, 14,733 of 5 ft. 6 in. gauge, 942 of 2 ft. 6 in. gauge, and 328 miles of 2 ft. gauge. In addition, it seems from a report on Indian railways that the present vehicular width makes the railways work at 22½ per cent. under power, the vehicles on the broader gauge being 9 ft. 6 in., and on the metre gauge 7 ft. 9 in. The 5 ft. 6 in. width might, it is stated, be increased to 12 ft. 3 in.

The principal recent event was the constitution of a Railway Board, consisting of a chairman and two members—with the necessary clerical establishment—to whom is entrusted the general control and administration of the railways in India, hitherto exercised by the Government of India in the Railway branch of the Public Works Department.

The chairman of the Board is Mr. F. R. Upcott, C.S.I., and the two members are Mr. W. H. Wood and Mr. T. R. Wynne, C.I.E. These gentlemen assumed office in March, 1905.

# Indian Railways.

## STATEMENT OF CAPITAL, REVENUE, DIVIDENDS, &c.

In the year 1894 an Act was passed making it legal for Indian Railway Companies to pay interest out of capital during construction, subject to the Secretary of State's specific sanction, and to certain other conditions.

| Railway. | London Office. | Date of Opening of Line. | Year ending December, 1905. ESCRIPTION OF VESSELS BUILDING IN THE UNITED KINGDOM IN 1875 AND 1906 RESPECTIVELY.

| Date. | Steel. | | | | Iron. | | Wood. | | | | Total. | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Steam. | | Sail. | | Steam. | | Sail. | | Steam. | | Sail. | | | |
| | No. | Tons Gross. | No. | Tons Gross. | No. | Tons Gross. | No. | Tons Gross. | No. | Tons Gross. | No. | Tons Gross. | No. | Tons Gross. |
| Sept. 1875 | ... | ... | ... | ... | 144 | 162,325 | 110 | 105,081 | 6 | 1,065 | 173 | 36,103 | 150 | 163,390 | 283 | 141,184 |
| Sept. 1906 | 477 | 1,253,031 | 20 | 9,836 | 1 | 500 | ... | ... | ... | ... | 14 | 1,400 | 478 | 1,253,531 | 34 | 11,236 |

* The figures for this date include vessels preparing, but not actually commenced.

ese figures show that the average size of ls building at the present time is 3½ times of vessels built thirty-one years ago. Then, was not used for shipbuilding purposes; now, it has entirely supplanted iron. Then, the tonnage in hand was equally divided between steamers and sailing vessels; now, the proportion of sailing to steam tonnage is insignificant.

CHANT AND OTHER VESSELS (not Warships) UNCHED IN EACH OF THE PRINCIPAL SHIP-LDING DISTRICTS OF THE UNITED KINGDOM RING 1905.

| District. | Steam. | | Sail. | |

*Wooden Vessels trading on the Great Lakes of North America are not included in the Register Book.

† In the absence of satisfactory information the records of [illegible] engaging chiefly in trade to Greece, Turkey, Southern Russia, and the Dutch East Indies have been omitted from the Register Book.

WHITAKER'S ALMANACK, 1907.

# Ocean Mercantile Fleets—British and Foreign.

FIRST STEAMBOATS—EARLIEST LINES—HISTORICAL SKETCHES—EVOLUTION FROM STEAM PACKET TO STEAM PALACE ON THE ATLANTIC—OWNERS OF THE LARGEST FLEETS, STEAM AND SAIL—BIGGEST AND FASTEST STEAMERS.

In the early part of the 18th century numerous inventors propounded schemes for applying steam power to vessels to be run upon rivers and canals, but only their names can be given in the chronological list of the first steamboats (*vide* page 730).

1824 witnessed the birth in England of the railway system. With the introduction of the "iron horse" the General Steam Navigation Company arose to champion the adoption of steam. The national benefits calculated to result from steam power, enabling vessels to enter and quit harbour regardless of wind and tide, were emphasised by the directors in the prospectus. Ocean trade was then carried on with sailing ships, mostly under 500 tons each, and all the steamboats in the United Kingdom only numbered 109.

Since the beginning of the last reign, steam-propelled vessels have vanquished the time-honoured "clippers." Iron for building purposes, being stronger, supplanted wood, but had itself to yield to steel as soon as that lighter material could be produced cheaply.

The "auxiliary screw" only stayed long enough to enable the unobtrusive "propeller" to make sure of superseding, for ocean services, the unwieldy "paddle-wheels." "Compound engines," which largely reduced coal consumption, paved the way for "triple-expansion" ones. These were next duplicated to drive "twin screws," with which all steamers of the highest class are fitted, and now steam turbines, having been tried successfully, are being adapted to the largest liners in order to obtain increased speed per indicated horse-power, diminished coal consumption, and reductions in weight of machinery, engine-room staff and vibration.

Space being so limited, the evolution "from steam packet to steam palace" in the North Atlantic trade is presented in tabular form (page 731).

The first to steam across the Atlantic was the *Royal William*, launched at Wolfe's Cove, Quebec, 1831, her engines being sent from England. In 1833 she went from Pictou, N.S., to Gravesend, arriving Sept. 11th, after 22 days' passage.

The pioneer steamer from the Old World to the New was the Cork packet *Sirius*. Leaving Cork April 5th, 1838, she reached New York April 23rd, having been compelled to burn everything available. On the same day the *Great Western*, the first specially built for the Atlantic service, sailed in, having left Bristol April 8th—a wonderfully quick passage of 14½ days. A third company started with the *Royal William*; she was the earliest steamer with watertight compartments, and the first to cross from Liverpool, July, 1838, taking 19 days.

The *Royal William* had been chartered from the City of Dublin Steam Packet Company, now the oldest steamship company in the world.

The Irish company was practically the godmother of the Peninsular and Oriental Company, whose mail services upon this side to Egypt were combined in 1839 under the time-honoured flag of the "P. & O.," which received its charter in 1840.

The failure of the earliest Atlantic companies did not deter the establishment and development of the Cunard Company. Samuel Cunard, to the discomfiture and astonishment of the Great Western Company, secured the subsidy of £80,000 a year for a monthly Atlantic service of 4 steamers. The gun-brigs were thereupon superseded as mail carriers, and a brighter era was auspiciously commenced by the despatch of the *Britannia*, 1,139 tons, on July 4th, 1840.

In 1839, the Royal Mail Steam Packet Company undertook the conveyance of mails to the West Indies at a time when a steam passage of even a fortnight's duration was to many a subject of wonder, and in 1840 the Pacific Steam Navigation Company was formed to run a service between Panama and Valparaiso.

Owing to the revolution mechanical science caused in the carrying trade of the sea, antiquity by itself counted gradually less even in the conservative kingdom of the sailor, and as the old order changed, shipowners who neglected to advance with the growing wants of the times fell out or dropped behind. As the size of steamships increased, the heavy cost of construction necessitated the establishment of corporations with great strength of capital, which control the principal ocean routes. The origin of each leading company is briefly outlined in a series of "Historical Sketches," and the largest British and foreign owners are referred to.

The *Great Britain* was 322 × 40 × 31; tonnage 3,270; h.p. 1,500.

The *Great Eastern* was 680 feet long, paddle engines 1,710 h.p. and screw engines 1000 h.p.; tonnage, 18,918; 14 knots speed; daily coal consumption, 300 tons; longest day's run, 333 knots.

Some homeward runs by clippers were of sufficient interest to be chronicled here. The *Red Jacket* in 1854 crossed from New York to the Mersey in 13 days; the *Dreadnought*, 1413 tons, 220 × 45 × 26, eclipsed all previous runs in 1862, when she reeled off between Sandy Hook and Queenstown the enduring record of 9 days 17 hours. The *Thermopylæ's* maiden voyage in 1868, of 60 days between London and Melbourne, remains the fastest ever known. In 1869 the *Patriarch*, 1339 tons, made for the same owners (the Aberdeen Line) the record passage of 68 days between London and Sydney.

In 1814 the steamboats of all kinds registered in the United Kingdom amounted to less than 1,000 tons, increased to nearly 8,000 tons by 1820. There were 766 British steamers afloat in 1838, in all just short of 150,000 tons. The invaluable Register Book which is published by the Committee of Lloyd's Register of British and Foreign Shipping shows that on June 30th, 1906, nearly every other steamer upon the high seas was under the British ensign, the steamship empire-builders of Greater Britain owning 9,261 vessels, 16,165,748 gross tons, exclusive of 2,150 ships (1,444,348 tons) belonging to the dwindling disciples of time-honoured canvas.

The British flag still flies over nearly one-half of the entire shipping tonnage of the world, but this preponderance is steadily decreasing, and a perusal of the statistical tables which are appended evidences the ever-increasing activity of foreign nations for the carrying trade of the sea.

## FIRST STEAMBOATS, PIONEER SAILINGS AND EARLIEST LINES.

1707. Denis Papin experimented on River Fulda with paddle-wheel steamboat.

1736. Jonathan Hulls patented designs similar to modern paddle boat.

1769. James Watt invented a double-acting side-lever engine.

1783. Marquess of Jouffrey made experiments in France.

1785. James Ramsey, in America, propelled a boat with steam through a stern-pipe.

1785. Robert Fitch, in America, propelled a boat with canoe-paddles fixed to a moving beam.

1787. Robert Miller, of Edinburgh, tried primitive manual machinery.

1788. Miller, with Symington, produced a double-hull stern-wheel steamboat.

1802. *Charlotte Dundas*, the first practical steam tugboat, designed by Symington.

1804. *Phœnix*, screw-boat designed by Stephens in New York; first steamer to make a sea voyage.

1807. *Clermont*, first passenger steamer continuously employed; built by Fulton in U.S.A.

1812. *Comet*, first passenger steamer continuously employed in Europe; built by Miller in Scotland.

1818. *Rob Roy*, first sea-trading steamer in the world; built at Glasgow.

1819. *Savannah*, first auxiliary steamer, paddle wheels, to cross the Atlantic; built in New York.

1821. *Aaron Manby*, first steamer (English canal boat) built of iron.

1823. City of Dublin Steam Packet Co. was established.

1824. General Steam Navigation Co. was established at London.

1824. George Thompson & Co. (Aberdeen Line) were established.

1825. *Enterprise* made the first steam passage to India.

1825. *William Fawcett*, pioneer steamer of the P. & O. S.N. Co.

1830. T. & J. Harrison (Harrison Line) were established at Liverpool.

1832. *Elburkah*, iron steamer, took a private exploring party up the Niger.

1834. Lloyd's Register for British and Foreign Shipping established.

1836. F. Green & Co. established at London.

1836. Austrian Lloyd Steam Navigation Co. established at Trieste.

1837. *Francis B. Ogden*, first successful screw tugboat; fitted with Ericsson's propeller.

1838. *Archimedes*, made the Dover-Calais passage under two hours, fitted with Smith's propeller.

1838. *R. F. Stockton*, built for a tugboat fitted with Ericsson's propeller, sailed to America; first iron vessel to cross the Atlantic; first screw steamer used in America.

1839. *Thames*, pioneer steamer of the Royal Mail Steam Packet Co.

1839. George Smith & Sons (City Line) were established at Glasgow.

1840. *Britannia*, pioneer steamer of the Cunard Line.

1840. *Chile*, pioneer steamer of the Pacific Steam Navigation Co.

1845. *Great Britain*, first iron screw steamer, precursor of modern Atlantic steamer.

1845. Thos. Wilson, Sons & Co., Ltd. (Wilson Line) established at Hull.

1847. Pacific Mail Steamship Co. established in America.

1849. Houlder Brothers & Co. established at London.

1850. Bullard, King & Co. (Natal Line) established at London.

1850. Messageries Maritimes de France established.

1850. Inman (now American) Line, established at Liverpool.

1851. *Tiber*, first steamer of the Bibby Line, established 1821 at Liverpool.

| Total | 963 | | | | |

* Under 12 knots.

## FROM STEAM PACKET TO STEAM PALACE.

(1) Wood Paddle-boats. (3) Iron Screw Steamers. (5) Steel Twin-Screw Steamers.
(2) Iron ,, (4) Steel ,, ,,

| Date. | Name of Steamer. | | Owners. | Remarks. |
|---|---|---|---|---|
| 1833 | Royal William | (1) | Quebec & Halifax S.N. Co. | From Picton (N.S.), 1st to cross the Atlantic. |
| 1838 | Sirius | | British and Amer. S.N. Co. | From Cork, 1st departure from U.K. |
| ,, | Great Western | | Great Western S.N. Co. | ,, Bristol, 1st built for Atlantic. |
| ,, | Royal William (2) | | Transatlantic SS. Co. | ,, Liverpool, 1st departure. |
| 1840 | Britannia | | Cunard Line | ,, Liverpool, 1st carried British mails. |
| 1849 | Atlantic | | Collins ,, | ,, New York, 1st carried U.S. mails. |
| 1854 | Canadian | | Allan ,, | ,, Glasgow, 1st steamer of Line. |
| 1856 | Tempest | | Anchor ,, | ,, ,, 1st ,, ,, |
| ,, | Borussia | | Hamburg-American Line | ,, Hamburg, 1st ,, ,, |
| ,, | Adriatic | | Collins Line | Last sailing of Line. |
| 1858 | Bremen | | Norddeutscher Lloyd | From Bremen to New York. |
| 1856 | Persia | (2) | Cunard | 1st Cunard iron paddle steamer. |
| 1862 | Scotia | | ,, | Last ,, ,, ,, ,, |
| 1845 | Great Britain | (3) | Great Western S.N. Co. | 1st Atlantic iron screw steamer. |
| 1850 | City of Glasgow | | Inman Line | 1st to carry steerage passengers. |
| 1858 | GREAT EASTERN | | East. and Australian SS. Co. | Paddle wheels and propeller. |
| 1868 | Italy | | National Line | 1st Atlantic ss. with comp. engines. |
| 1869 | City of Brussels | | Inman ,, | 1st ,, ,, ,, steam steering gear. |
| 1871 | Oceanic (1st) | | White Star Line | 1st with 'midship saloon, &c. |
| 1873 | Pennsylvania | | American ,, | 1st sailing of Line to Liverpool. |
| 1874 | Britannic | | White Star ,, | 1st to exceed 5,000 tons, Great Eastern |
| 1875 | City of Berlin | | Inman ,, | 1st with electric light. [excepted. |
| 1879 | Arizona | | Guion ,, | Watertight compartments floated her. |
| 1882 | Alaska | | ,, ,, | 1st "ocean greyhound." |
| 1883 | Oregon | | ,, ,, (1) | Sunk outside New York; everyone |
| | | | Cunard ,, (2) | saved by N.D. Lloyd ss. Fulda. |
| 1879 | Buenos Ayrean | (4) | Allan Line | 1st Atlantic steel steamer.* |
| 1881 | Servia | | Cunard ,, | 1st Cunard ,, ,, |
| ,, | City of Rome | | Inman (1) Line | Fitted with three funnels. |
| | | | Anchor (2) ,, | |
| 1884 | America | | National ,, | 1st and last express ss. of Line. |
| | Umbria | | Cunard ,, | 1st with 20 knots speed. |
| | Etruria | | | |
| 1886 | Aller | | Norddeutscher Lloyd | 1st triple-expansion express ss.† |
| 1888 | City of New York | (5) | Inman & International (1) | 1st twin-screw ocean expresses.‡ |
| | City of Paris | | American Line (2) | 1st to exceed 10,000 tons, G.E. excepted. |
| 1889 | Teutonic | | White Star Line | Designed as mercantile cruisers. |
| | Majestic | | | |
| 1890 | Fürst Bismarck | | Hamburg-American Line | 1st under 6½ days from Southampton. |
| 1892 | La Touraine | | Compagnie Générale Trans. | Record Havre to New York, 6¼ days. |
| 1893 | Campania | | Cunard Line | Lucania: highest day's run 562 knots. |
| | Lucania | | | Liverpool to New York records. |
| 1895 | St. Paul | | American | Largest express steamers ever built in |
| | St. Louis | | | America. |
| 1897 | Kaiser Wilhelm der Grosse | | Norddeutscher Lloyd | Record day's run, 580 knots. [tons. |
| 1899 | Oceanic | | White Star Line | Balanced engines. 1st to exceed 15,000 |
| 1900 | Deutschland | | Hamburg-American Line | Fastest ocean steamer in the world. |
| 1901 | CELTIC | | White Star Line | 1st to exceed 20,000 tons. |
| 1902 | KRONPRINZ WILHELM | | Norddeutscher Lloyd | |
| 1903 | Kaiser Wilhelm II. | | Norddeutscher Lloyd | Largest express steamer in the world. |
| 1904 | Baltic | | White Star Line | Largest ss. in the world—726 × 76 × 49. |
| ,, | Victorian | | Allan Line | 1st fitted with turbine engines. |

* Union Co. of N.Z.'s Rotomahana, 1,763 tons, was first ocean steel ss. 1879.
† Martello, 2,432 tons, of Wilson Line, was first Atlantic cargo triple-expansion ss., 1884.
‡ Notting Hill, 3,92[illegible] tons, of Twin-Screw Cargo Line, came out so engined, 1881.

### REDUCTION OF PASSAGE.

| | Days. | | | Tons. |
|---|---|---|---|---|
| 1862. | Under 9 | from Q'town. | Scotia | 3,871 |
| 1869. | ,, 8 | ,, ,, | City of Brussels | 3,081 |
| 1882. | ,, 7 | ,, ,, | Alaska | 6,400 |
| 1889. | ,, 6 | ,, ,, | City of Paris | 10,669 |
| 1894. | ,, 5½ | ,, ,, | Lucania | 12,950 |
| 1897. | ,, 6 | ,, St'on. | Kaiser Wilhelm der Grosse | 14,349 |
| 1903. | ,, 5½ | ,, Cherbg. | Deutschland | 16,502 |

### PROGRESS IN LENGTH.

| | Feet. | | Tons. |
|---|---|---|---|
| 1838. | 1st to exceed 200 | Great Western | 1,340 |
| 1845. | ,, ,, 300 | Great Britain | 2,084 |
| 1858. | ,, ,, 680 | Great Eastern | 18,918 |
| 1871. | ,, ,, 400 | Oceanic (1) | 3,807 |
| 1881. | ,, ,, 500 | Servia | 7,392 |
| 1893. | ,, ,, 600 | Campania | 12,952 |
| 1899. | ,, ,, 700 | Oceanic (2) | 17,247 |
| 1904. | ,, ,, 725 | Baltic | 23,000 |

§ For the year 1905 the net increase to the British Mercantile Marine was 12 in total number of vessels, and a total increase in gross tonnage of 385,497 tons. The average annual net increase, 1891-1900 was 264,736 tons.

**ABERDEEN LINE**, between London and Australia *viâ* South Africa, is managed by the owners, Messrs. George Thompson & Co. (founded at Aberdeen, 1824), who have long occupied a prominent position in the Australian cargo and passenger trades, due to the "runs" of their noted clippers to Melbourne and to Sydney, the general high standard of their fleet, and its exceptional immunity from loss over more than half a century. Their ss. *Aberdeen*, built in 1881, was the earliest ocean steamer to demonstrate decisively the superior merits of triple-expansion engines. The tonnage does not include any sailing vessels, but the reputation of the line is well sustained by modern steam favourites bearing such time-honoured names of former "fliers" as *Miltiades*, *Moravian*, and *Salamis*. Two twin-screw steamers, *Miltiades*, 6,793 tons, and *Marathon*, 6,794 tons, each 15 knots, are the largest. The maiden voyage of the *Miltiades* from London to Melbourne took 35 days, her time from Plymouth being a record passage of 34 days steaming.

Fleet, 9 vessels; 42,220 tons.
*London Office*, 7, Billiter Square, E.C.

**AFRICAN STEAMSHIP COMPANY**, the earliest African line, originated from a private expedition of the *Elburkah* up the Niger in 1832, its success leading to others for opening up the West Coast of Africa or suppressing the slave trade. This company received its charter in 1852, with an annual subsidy of £30,000 for a monthly mail, passenger, and freight service performed continuously ever since, the pioneer boats *Forerunner*, *Faith*, *Hope*, and *Charity* rendering valuable aid in the Crimean War. In 1891 the company came (*see* p. 739) under the management of Messrs. Elder, Dempster & Company, of Liverpool, and now maintains seven distinct services from Liverpool, Hamburg, Rotterdam, and Antwerp to West and South-West Africa, the one from the last-mentioned port being under contract with the Congo Free State.

Fleet, 30 steamers; 88,793 tons.
*London Office*, 17, Leadenhall Street, E.C.

**ALLAN LINE.**—The Allan Line and State Line of Steamers was originally called the Montreal Ocean Steamship Company, formed by the Allan Brothers, who, as sailing-ship owners, had been connected with Canada since 1820. The first steamer of the line, the *Canadian*, 1,700 tons, was despatched from Liverpool to Quebec and Montreal Sept. 20, 1854. It was intended to inaugurate at that time a fortnightly mail service, but owing to the Crimean War, during which the steamers were engaged as transports, the mail service did not begin until April, 1856, with the sailing of the *North American*. The line has since continued to meet and promote the postal, commercial, and passenger requirements of the now vast Dominion, and has carried the mails nearly the whole of the time and is still doing so. Since 1859, sailings have been weekly. The steamers go to Halifax and St. John, N.B., when the St. Lawrence is closed. The itinerary includes Glasgow, Liverpool, Londonderry, and London, embracing on the other side, in addition to several Canadian ports, Boston, New York, Philadelphia, and the River Plate. In 1905 the *Virginian* and *Victorian* (540′×60′×40′ 6″: 17½ knots), the first turbine-propelled Atlantic steamers, successfully augmented the service; both beat all records, the passage of *Virginian* (10,754 tons) in July, 1906, between Rimouski and Moville in 5 days 17 hours being the fastest. Two twin-screw steamers are building, each of 10,000 tons, exclusive of total tonnage given.

Fleet, 28 steamers; 147,593 tons.
*Head Office*, 25, Bothwell Street, Glasgow.

**AMERICAN LINE** (and Red Star Line) (*see* International Mercantile Marine Co.) inherited the records of the noted Inman Line. The International Navigation Company, the proprietary organisation, was incorporated in Pennsylvania in 1871; a fortnightly service was established in 1873 between Antwerp and Philadelphia, with steamers under the Belgian flag, known as the Red Star Line; and the American Line was started with the American-built *Illinois*, *Indiana*, *Ohio*, and *Pennsylvania*; 1880 brought a weekly line between New York and Antwerp, this expansion being followed in 1886 by the important acquisition of the Inman Line. The years 1888 and 1889 witnessed the enterprising appearance of the *City of New York* and *City of Paris*, which vessels marked an advance in size as well as the adoption of twin-screws. In 1893 the Inman and International, as the line was then called, extended into the American Line, the mail steamers exchanging Liverpool for Southampton, their names being all shortened to the bare titles of cities. The *New York* and *Paris*, since re-named *Philadelphia*, were, under a special Act of Congress, naturalised into the U.S. register, and the *St. Louis* and *St. Paul* in 1895 emanated from the busy yards at Philadelphia of Cramp & Sons. Weekly New York mail lines are run to and from Antwerp and also Southampton, the latter departures calling at Cherbourg on the West-bound voyage and at Plymouth and Cherbourg on the East-bound voyage. The steamers running between Antwerp and New York call at Dover each way. Philadelphia passenger and freight lines are maintained to and from Liverpool, as well as Antwerp, The *Kroonland*, 12,760 tons, is the largest steamer.

Fleet, 16 steamers; 156,696 tons.
*London Offices*, 1, Cockspur Street, S.W.; and 38, Leadenhall Street, E.C.

**ANCHOR LINE.**—In 1852 a service was established from the Clyde to Portuguese and Spanish ports extending later to upper Mediterranean ports. Some years later additional services between Glasgow and New York *viâ* Moville; Mediterranean and New York; and Glasgow and Liverpool to Bombay, and to Calcutta were inaugurated, which trades have since been vigorously prosecuted with fine steamers, the sizes increasing with the development of the trades. *Columbia*, 8,500 tons; and *Caledonia*, 9,222 tons (the largest in the fleet), are latest additions to New York service; a sister ship to the latter is building. *Olympia* and *Massilia*, each 5,300 tons, and *Circassia*, 6,700 tons have recently been added to Indian service, for which a steamer of 6,500 tons is building. About 70,000 passengers are carried annually.

Fleet, 24 steamers; 122,707 tons.
*London Office*, 4, St. Mary Axe, E.C.

**ATLANTIC TRANSPORT CO., Ltd.** (*see* International Mercantile Marine Co.), originated in London in 1886. In 1889 the boats were all transferred to the Atlantic Transport Co., Ltd., registered in London for the purpose, the prime movers and principal stock-holders

being Americans. The company in 1896 purchased the controlling interest in the National Steamship Co., a line which dated back to 1863 and, after flourishing into front rank, declined by degrees. When the Atlantic Transport Co. commenced, a line was run from London to Baltimore, *viâ* Swansea; soon Philadelphia was added to the itinerary, subsequent growth leading to a service to New York, necessitating large steamers built specially for the carriage of cargo, refrigerated meat and live stock, together with only first-class passengers. Saloon accommodation has increased from 50 to 250, which can be carried by the new twin-screw steamers *Minnehaha*, *Minneapolis*, and *Minnetonka*, each 13,400 tons.

Fleet, 18 steamers; 130,195 tons.
*London Office*, 38, Leadenhall Street, E.C.

**AUSTRIAN LLOYD STEAM NAVIGATION COMPANY**, established in 1836, belongs to Trieste, whence services are kept up to and from Adriatic, Mediterranean, and Levant ports, served by three branch lines. Besides a line to the West as far as Brazil and River Plate, there is an accelerated fortnightly mail service between Trieste, Brindisi, and Bombay; also an ordinary monthly service as between Trieste, Bombay, China, and Japan. The itinerary now includes a monthly line to Calcutta. As soon as Port Sudan is opened, a regular service will be established. The largest steamers are the *Austria*, 6,500 tons, and *Erzerzog Franz Ferdinand*, 6,043 tons, *Nippon*, 6,317 tons, one 8,000 tons steamer building, and two turbine steamers (21 knots).

Fleet, 66 steamers; 195,896 tons.
*London Agents*, M. Samuel & Co., 20, Billiter Street, E.C.

**BIBBY LINE.**—This line was founded in 1807 by Mr. John Bibby, the grandfather of the present representatives, the fleet at that time consisting of small sailing vessels. In 1851 the steam fleet was commenced with the *Tiber* and the *Arno*. In 1891 the *Lancashire*, whose passage of 23 days 20 hours, in July, from Liverpool to Rangoon stands the fastest, started the present service, which runs to Colombo and Rangoon, *viâ* Marseilles, from which port of all Ceylon is 18 days' passage, and Burmah 23. The fast and modern steamers of this line, which belong chiefly to the Bibby family, are all built by Harland & Wolff, and authorised by the Indian Government for officers returning on expiry of furlough, it being the recognised route to Burmah; easy connections being made with Southern India generally by a daily steam service between Colombo and Tuticorin. Largest steamer, *Warwickshire*, 7,966 tons.

Fleet, 7 steamers; 46,509 tons.
*London Office*, 10 & 11, Mincing Lane, E.C.

**THE BOOTH LINE** was founded in 1866 by Messrs. Alfred Booth & Co., of Liverpool. In 1869 Messrs. R. Singlehurst & Co.'s Red Cross line was founded. These two lines have since been closely identified with the rapid progress of the Amazon ports of Para and Manaos. A further service between North Brazil and New York was started in 1882. In 1901 the Booth and Red Cross Lines were amalgamated in the Booth Steamship Co., Ltd., under the management of the former owners. The steamers sail at frequent intervals from New York, Liverpool, Havre, Leixões, and Lisbon to Para, Manaos, Maranhan, and Ceará, and a considerable passenger business is done between the Portuguese ports and the Amazon. The twin-screw steamers *Antony* and *Lanfranc*, of about 6,000 tons each, have been constructed to steam 14 knots and carry 200 saloon and 350 third-class passengers. Of the Company's other vessels the finest and fastest are the *Ambrose*, 4,187 tons, 15 knots speed, and the *Anselm*, 5,442 tons, 14 knots speed, both with accommodation for about 150 first-class and 250 third-class passengers. The company is interested in and manages the Iquitos Steamship Co., Ltd., whose steamers trade more than 2,000 miles up the river Amazon to Iquitos, in Peru. The company carries the royal mails to Para and Manaos; also the mails between New York and Brazil; and the combined fleets include 14 passenger steamers.

Fleet, 31 steamers; 95,445 tons.
*London Office*, 8, Adelphi Terrace, W.C.

**BRITISH AND AFRICAN STEAM NAVIGATION COMPANY (1900), Ltd.**, established in 1858 a mail, passenger, and cargo service of steamers, named after various ports, trading stations, and rivers on the West Coast of Africa, to which they run from Liverpool, Rotterdam and Hamburg. Waterways have been discovered, explored, and brought into prominence by their captains; one, the *Jones*, being so called after Sir A. L. Jones, K.C.M.G., the presiding genius of the firm of Messrs. Elder, Dempster & Co., of Liverpool, who acquired this company in 1900, and considerably enlarged its fleet. Owing to the head of the firm's extraordinary energy, Messrs. Elder, Dempster & Co. are now established at Liverpool, Manchester, Bristol, Cardiff, London, Hamburg, Antwerp, Grand Canary, Santa Cruz, Teneriffe, New Orleans, Montreal, Mobile and Galveston. Their rapidly extending trade enterprises are upon a comprehensive and enormous scale, but space only admits of the following summary of the lines controlled by this wonderful firm:—

| Name of Company. | No. of boats. | Gross tonnage |
|---|---|---|
| British & African S.N.C. (1900) Ltd. | 40 | 126,670 |
| African Steamship Co. | 27 | 86,819 |
| Elder, Dempster Shipping, Ltd. ... | 27 | 84,503 |
| Imperial Direct W. India Mail Serv. | 6 | 27,406 |
| Cie. Belge Maritime du Congo ..... | 3 | 15,500 |
| | 103 | 340,898 |

Fleet, 103 steamers; 340,898 tons.
*London Office*, 4, St. Mary Axe, E.C.

**BRITISH INDIA STEAM NAVIGATION COMPANY.**—In 1855 the founder of this company, the late Sir William MacKinnon, arranged to establish the Calcutta and Burmah Steam Navigation Company for the performance of mail services for the East India Company, with which object it was incorporated in 1856, the *Baltic* and *Cape of Good Hope* being sent out in 1857 to start the business. In 1862 a fresh mail service was entered into which included additional routes, and the name of the company was officially altered to its present title—more in keeping with its business, which strikingly benefited from the opening of the Suez Canal, through which the company's steamship *India* conveyed the first cargo of Indian produce. The Aden-Zanzibar mail service

was put on in 1872, and from then until now new routes have been constantly added to its itinerary, the extent of which will not admit of more than a bare outline. The company is under contract with the Home and Indian Governments for mail services to Arabia, Persia, India, Burmah, East India, the Mauritius, and also runs other services to Batavia, Queensland, &c. In 1899 a three-weekly line from Calcutta to Manila was established, which has since been extended to Yokohama, Kobe, and Moji. This important undertaking, with its far-reaching organisation and connections, supplies over 100 ports with commercial facilities; it is under the management of Messrs. MacKinnon, MacKenzie & Co., in India; Messrs. Gray, Dawes & Co. having represented the company in London since 1866. The s.s. *Queda*, 7,703 tons, is the largest. Latest additions, *Rewa*, 7,003 tons (turbine steamer), and *Rohilla*, 7,010 tons (twin-screw).

Fleet, 120 steamers; 466,088 tons.
*London Office*, 23, Great Winchester Street, E.C.

**THE BUCKNALL STEAMSHIP LINES, Ltd.**, managed by the founders, Messrs. Bucknall Bros., was formed in 1900, with a share and debenture capital of £2,750,000, to take over and extend the British and Colonial Line from London to South and E. African ports, established in 1892, for passengers and cargo; also lines between N. York and S. Africa, N. York and Australia and New Zealand, and N. York and India, as well as a line between Manchester and Persian Gulf ports *viâ* Marseilles. The largest vessel is the s.s. *Matoppo*, 8,350 tons.

Fleet, 25 steamers; 96,420 tons.
*London Office*, 23, Leadenhall Street, E.C.

**CANADIAN-AUSTRALIAN LINE** was established in 1893, and runs in connection with the Canadian Pacific Railway. The steamers *Aorangi*, 4,268 tons, *Miowera*, 3,345 tons, and *Moana*, 3,915 tons, are under contract with the Canadian, New South Wales, Queensland, and Fijian Governments for a monthly mail service between Vancouver, Victoria (B.C.), Honolulu, Brisbane, and Sydney, N.S.W.

*London Office*, 138, Leadenhall Street, E.C.

**CANADIAN PACIFIC RAILWAY.**—The rail mileage, about 12,000, extends from Atlantic Ocean to Pacific Ocean, including branch lines north and south. THE EMPRESS LINE, a three-weekly service between Vancouver and Japan and China, was established 1891. A contract exists between the British Government and the Canadian Pacific Railway under which mails are carried from Liverpool in the following time: To Yokohama, 22½ days; Shanghai, 27½ days; Hong Kong, 29½ days. Mails and passengers are carried in "Empress" Atlantic steamers from Liverpool to Quebec, where close connection is made with the "Over-Seas, Limited," fastest long-distance train in the world, which covers the distance between the two oceans in about 88 hours. During 1903 15 large Atlantic steamers, aggregating 100,201 tons, were purchased from Messrs. Elder, Dempster & Co. The steamers in the Atlantic Ocean services include the R.M.S. *Empress of Britain* and *Empress of Ireland*, 14,500 tons, 18,000 H.P. (largest and fastest to Canada). The *Empress of Ireland* made a record westbound passage, Liverpool to Quebec, of 6 days 13 hours, and the *Empress of Britain* made a record eastbound voyage from Father Point to Liverpool of 5 days 12½ hours. There is also an Upper Lake Service (Fort William-Owen Sound Route), a British Columbia Coast Service, and a British Columbia Lake and River Service.

Fleet, 48 steamers; 181,903 tons.
*London Office*, 62 to 65, Charing Cross, S.W.

**CHARGEURS RÉUNIS** of Paris (Port of Registry, Havre) was established in 1872, and is the third largest shipping company in France. Services are maintained to Indo-China, West Africa, Brazil, River Plate, Gulf of California, China, and Japan. The fleet includes 5 mail and 9 intermediate steamers, ranging in size from the *Amiral de Kersaint*, 5,913 tons, to the *Ville de Maceio*, 2,688 tons. One 13 knots 5,100 tons twin-screw passenger steamer is building. 92 voyages in 1905, and 1,389,914 miles traversed.

Fleet, 39 steamers; 155,595 tons.
*London Agents*, Hackett, Ausender & Co., 19, St. Dunstan's Hill, E.C.

**CHINA MUTUAL STEAM NAVIGATION COMPANY, Ltd.** *See* Ocean Steam Ship Co., page 744.

**CITY LINE.**—Messrs. George Smith & Sons, who sold their line and fleet in 1901 to Mr. J. R. Ellerman, celebrated their Jubilee at Glasgow in 1889, fifty years after their *Constellation*, 344 tons, sailed thence for Calcutta. Sailings are from Glasgow and Liverpool to Calcutta and back to London; as well as to Bombay and Karachi, returning to Liverpool; all the steamers carrying passengers regularly to and from Malta and Egypt, in addition to the above ports. Large extensions have been made in the passenger fleet, over £1,000,000 having been spent in recent years upon new steamers.

Fleet, 22 steamers; 122,144 tons.
*London Agents*, Montgomerie & Workman, 36, Gracechurch Street, E.C.

**CLAN LINE** began a fortnightly service from Glasgow and Liverpool to Bombay and Karachi in 1878, adding one to South and East African ports in 1881, and another to Colombo, Madras, and Calcutta in 1882, a joint service from N. York direct to South and East African ports appearing in 1893. Since then a direct service has been added to the principal South African ports. Twenty-seven turret-deck steamers figure in the fleet, of which the *Clan Colquhoun*, 5,856 tons, is the largest. The line is under the management of Messrs. Cayzer, Irvine & Co., of Glasgow, Liverpool, Manchester and London, whose senior partner, Sir Charles Cayzer, Bart., M.P., was the founder and is the chairman of it. Included in total are three being built, each 5,260 tons.

Fleet, 48 steamers; 198,943 tons.
*London Office*, 115, Leadenhall Street, E.C.

**COMPAGNIE GÉNÉRALE TRANSATLANTIQUE**, established 1862, is the second largest company in France, and is heavily subsidised by that Government. With its fine fleet of mostly fast boats, the company maintains important connections between Havre (its head port), St. Nazaire, Bordeaux, Marseilles, &c., and various Mediterranean, African, West Indian, and North, Central, and South American ports. *La Provence*, 14,744 tons, 22 knots, *La Lorraine*, 11,869 tons, and her sister ship *La Savoie*, are now in the service, having been built on French soil, according to terms of mail contract, at the company's own shipyard. They are the largest ever constructed in France, and have a speed of 21 knots. In 1905 the boats of the company

made 1,071 voyages ; traversed nearly 3,000,000 miles ; conveyed 310,877 passengers, and carried 838,772 tons of cargo.

Fleet, 58 steamers ; 215,036 tons.

*London Office*, 36, Leadenhall Street, E.C.

**COMPANIA TRASATLANTICA** of Barcelona and Cadiz is the leading company in Spain, the largest steamers in the fleet being *Alfonso XII.*, 6,748 tons, *Antonio Lopez*, 5,975 tons, and *Manuel Calvo*, 5,617 tons.

This company in 1881 succeeded Messrs. A. Lopez & Co., who were established in 1860 ; regular mail and passenger services are maintained to New York, Antilles, Canary Islands, Mexico, Colon (for Pacific ports), River Plate, North Africa, Philippines, &c. ; Liverpool agents, Messrs. Larrinaga & Co.

Fleet, 23 steamers ; 86,370 tons.

**THE CUNARD STEAMSHIP COMPANY, Ltd.**, completed 66 years of successful Atlantic service on July 4, 1906. Starting in 1840 with the *Britannia*, a wooden paddle steamer, which made her first voyage between Liverpool and New York in 14 days 8 hours at the rate of 8½ knots per hour, which was a wonder of her time. the Cunard Company's steamers have steadily advanced in size and speed, till, in 1903, their Atlantic fleet contains steamers crossing from Liverpool to Boston (the *Ivernia* and *Saxonia*) with 2,000 passengers and 10,000 tons of freight, and others to New York (the *Campania* and *Lucania*) which make the passage in a little over 5 days at an average speed of more than 21 knots (25 miles) an hour. The *Ivernia* and *Saxonia* have also earned a reputation for remarkable steadiness, which confers the greatest possible immunity from sea-sickness. The *Carpathia* (1903) is a twin-screw steamer of 13,603 tons constructed on similar lines to the *Ivernia* and *Saxonia*, and equally steady, all three providing unrivalled accommodation. The New York and Mediterranean service is conducted with the *Carpathia*, *Ultonia*, *Slavonia*, and *Pannonia*, and conveys passengers at moderate rates to Gibraltar, Algiers, Naples, Palermo, Venice, Trieste and Fiume, with the option of crossing Europe by train and returning to New York or Boston by Cunard steamer from Liverpool. There is a freight service to Boston from Liverpool, also one to Havre, Portugal, Mediterranean and Black Sea ports. All the passenger ships of the Cunard Company are fitted with Marconi's system of wireless telegraphy, by means of which constant communication is kept up, either with other ships or with land stations in the eastern or western hemisphere. The *Lucania*, Oct., 1903, with Signor Marconi on board, was the first vessel to hold communication with both sides of the Atlantic. The *Cunard Daily Bulletin*, a thirty-two page illustrated paper published on board these boats, records news received by wireless telegraphy, and is the first real ocean newspaper. In August, 1903, an agreement was made with the British Government by which the Cunard Co. were to build two new steamers, to be, with all other Cunard ships, at the disposal of the Admiralty for hire or purchase whenever they may be required, the Government lending the company £2,600,000 to build the ships and granting them a subsidy of £150,000 a year. One, the *Lusitania*, was launched on June 7, 1906, and the *Mauretania* in Sept. 19. Each will be about 33,000 tons, propelled by turbine engines, with a speed of 25 knots. It is expected that these steamers which will be the largest and fastest in the world, will be in commission during the summer of 1907. The safety and comfort of passengers is the especial care of the Cunard Company, and every precaution is taken to ensure the best possible ships, the most capable officers, and the most reliable crews to worthily uphold the honourable traditions of the company. The total given includes the *Carinia*, 20,000 tons, fitted with reciprocating engines, and the *Carmania*, 20,000 tons turbine steamer. These steamers mark a distinct advance in the accommodation and comfort provided for all classes of passengers :—

*Head Office*, 8, Water Street, Liverpool.

**DOMINION LINE.** — (*See* International Mercantile Marine Co.) In 1870 some Liverpool and New Orleans cotton merchants formed the Mississippi and Dominion Steamship Company, Ltd. Since 1894 the proprietary company has been the British and North Atlantic Steam Navigation Company, Ltd. A weekly passenger service between Liverpool and Quebec and Montreal in the summer, and Halifax and Portland (Maine) in the winter is maintained, as well as a regular weekly freight service from Liverpool to Portland throughout the year. There is also a fortnightly freight service between Avonmouth and Quebec and Montreal in the summer, and Portland in the winter. The largest steamer is the *Norseman*, 9,546 tons,

Fleet, 14 steamers ; 88,650 tons.

*London Office*, 38, Leadenhall Street, E.C.

**DONALDSON BROTHERS** began business at Glasgow in 1854. The twin-screw steamers *Athenia* and *Cassandra* are the latest additions, fitted with very superior and excellent accommodation for passengers and regularly engaged in Canadian trade. The principal trade of the firm is between Glasgow and Montreal, steamers sailing every Saturday from Glasgow and every Thursday from Montreal during the open navigation of the St. Lawrence. In winter-time the service is a weekly one to St. John, N.B. The steamers are fitted with cold storage, also with mechanical ventilation. The St. John, N.B., service in the summer months is fortnightly, and the other regular services of the firm are Glasgow to Baltimore and Glasgow to Newport News and Norfolk, Va.

Fleet, 14 steamers ; 64,726 tons.

**ELDER, DEMPSTER & CO.**—*See* p. 737.

**ELDERS & FYFFES, Ltd.** This company, which was formed in 1901, is the outcome of the immense development of the West Indian banana trade. The service began in 1902 with 4 steamers adapted for the carriage of fruit ; the company have since had built 9 steamers with special arrangements for the safe conveyance of fruit and accommodation for a

limited number of first-class passengers, the vessels being fitted with all the latest appliances, the largest being the *Reventazon*, *Chirripo*, and *Barranca*, each 5,000 tons. Regular services are maintained between Jamaica and Costa Rica from Manchester ; and from Bristol (Avonmouth). In the coffee season large consignments are brought from Costa Rica. In 1904 the company was entrusted by the British Postal authorities with the carriage of parcels mail to Costa Rica. The small inter-insular steamers employed at the Canary Islands are not included below.

Fleet, 13 steamers, 51,985 tons.
*London Office*, 9, Bow Street, W.C.

**ELLERMAN LINES**, Ltd.—The Ellerman Lines of steamers comprise the following :—The *Ellerman Line*, which trades between Liverpool and Portugal, Italy, Sicily, Adriatic, Alexandria, Gibraltar, Malta, Syra, Smyrna, Constantinople, and Odessa, was founded in 1840, and was conducted by Messrs. John Bibby, Sons & Co. under the style of the "Bibby Line" until the year 1870, when it passed into the hands of Messrs. Frederick Leyland & Co., and was thereafter known as the "Leyland Line" until the Leyland Line was acquired by the Morgan combination, who sold the Mediterranean portion of their business to (now) Sir J. R. Ellerman, Bart., then chairman of the Leyland line, the line in January, 1902, passing into the ownership of the Ellerman Lines, Ltd.—The *City Line*, see p. 740.—The *Hall Line*, which traces its history back for about forty years, has a regular service of passenger and cargo steamers between Liverpool and Bombay and Karachi, calling at Marseilles on the homeward passage. Also in conjunction with the Harrison and Clan Lines from Glasgow and Liverpool to South and East African ports, and in conjunction with the Allan Line one Uruguay and River Plate service.—The *Papayanni Line*, which was acquired from Messrs. Papayanni & Co., was established in the early 'forties, trading between Liverpool and the Mediterranean, touching at Tangiers, Algiers, Malta, Syra, Smyrna, Constantinople, Odessa, and Alexandria. In May, 1901, the business was sold to Sir J. R. Ellerman, Bart., and in January, 1902, passed into the ownership of the Ellerman Lines, Limited.—*Westcott & Laurance Line*. This business, established in 1866, was in December, 1901, acquired by the Ellerman Lines, Limited, the services consisting of lines between Antwerp and London to Malta, Alexandria, Smyrna, Odessa, Constantinople, Batoum, Novorossisk, &c.—*Coverley and Westray Line*. This line runs its service of steamers between London and Oporto, taking both passengers and cargo.

Fleet, 84 steamers ; 310,025 tons.
*London Office*, 12, Moorgate Street, London, E.C.

**FEDERAL STEAM NAVIGATION CO., Ltd.**—Upon the retirement of the noted firm of Messrs. Money Wigram & Son, Mr. Allan Hughes (the chairman of the company), who had been connected with them, organised the above line in 1885, the steamers of which fly a similar flag and bear names similar to the well-known Money Wigram's Blackwall packets, some of which were early to the fore in the adoption of the screw as an auxiliary. The fleet consists of large steamers engaged in conveying general merchandise to Australia and New Zealand, returning to South Africa and London with wool and frozen produce, being fitted with very large capacity for refrigerated cargoes. The twin-screw steamers *Essex*, 7,162 tons, and *Somerset*, 7,150 tons, are the largest.

Fleet, 11 steamers ; 67,012 tons.
*London Office*, 2, Fenchurch Avenue, E.C.

**FORWOOD BROTHERS & CO.** began their Morocco, Canary Islands, and Madeira Line of first-class passenger steamers in 1872 ; the sailings are now weekly from London, the voyage usually occupying 25 days and the line specially caters for those desiring short sea trips for health or pleasure. The ss. *Zweena*, 2,800 tons, is the largest.

Fleet, 4 steamers ; 8,742 tons.
*London Office*, 46, St. Mary Axe, E.C.

**GENERAL STEAM NAVIGATION COMPANY**, Ltd., established 1824, incorporated by Act of Parliament 1834, and incorporated under the Companies Acts 1862 to 1900 in 1902, is essentially a London institution. Besides East Coast services, to Scotland, Continental trades are served between Hamburg in the north and Bordeaux in the south ; other lines extending to the Mediterranean, Adriatic, Levant, and Black Sea. The sea-going services include the *Sheldrake*, 2,697 tons ; *Adjutant*, 2,392 tons ; the *Ortolan*, 1,800 tons, and *Grove*, 2,037 tons. The turbine *Kingfisher*, the fast paddle steamer *Eagle*, and five similar popular pleasure boats run during the summer season to seaside resorts in Essex, Kent, Suffolk, and Norfolk.

Fleet, 55 steamers ; 56,026 tons.
*London Office*, 55, Great Tower Street, E.C.

**GLEN LINE** of steamships, which began about 30 years ago to run from London to the Straits, China, and Japan, belongs to Messrs. McGregor, Gow & Co., whose service for cargo and passengers is one of the most important of the few lines now owned privately, and has superseded the famous racing tea-clippers. *Glen Logan* is 5,723 tons, and *Glenroy* 4,910 tons.

Fleet, 9 steamers ; 40,624 tons.
*London Office*, 1, East India Avenue, E.C.

**HAMBURG-AMERICAN LINE**, in point of carrying capacity, owns the largest fleet in the world, with the exception of the International Mercantile Marine Co. (Morgan Combine). The packet company began its Transatlantic service in 1847 with sailing vessels. The ss. *Borussia*, 2,026 tons, appearing in 1855, was followed by other steamers, monthly departures being kept up from 1856 until 1860, when the ships were sold, and enough steamers purchased to make fortnightly departures to New York, the sailings being increased to weekly ones in 1866. In 1888 the company decided upon twin-screws, and the *Columbia*, *Auguste Victoria*, *Normannia*, and *Furst Bismarck* successively joined the ever-swelling fleet. The *Deutschland* (16,502 tons, built at Stettin, 1900) has surpassed all previous records for speed, averaging 23·51 knots, homeward passage. The "P" ships are noticeable for their size as cargo and passenger ships, being

each over 13,000 tons, with accommodation for 350 cabin and 2,400 'tween deck passengers, and very large cargo space. The Company's largest and best equipped Transatlantic steamers are the new leviathans *Amerika* and *Kaiserin Auguste Victoria*. Both represent the latest developments in ocean travel, and are fitted with every comfort and luxury. The routes of the weekly twin-screw express steamers carrying the American and European mails are: Hamburg, Southampton, Cherbourg to New York, returning *viâ* Plymouth and Cherbourg. Other services leave Hamburg every Thursday for New York *viâ* Boulogne-sur-Mer and Plymouth, returning *viâ* Plymouth and Cherbourg, in addition to which there are regular services from Hamburg to Montreal, Halifax, Boston, Philadelphia, Baltimore, New Orleans, Galveston, West Indies, North, Central, and South Brazil, River Plate, Panama, Mexico (4 lines), Venezuela, Colombia and West Coast of S. America. There is also a service to Eastern Asia and to Persia; and others from New York to China and Japan, from New York to West Indies, Genoa to River Plate, and Stettin *viâ* Helsingborg, Gothenberg, and Christiansand to New York, returning *viâ* Christiania and Copenhagen. A Mediterranean Steamship Line runs from Genoa *viâ* Palermo and Naples to New York. In Europe there are services from Hamburg to various other places. This company also manages the passenger business of the Union Line to New York, the Hamburg South American Company to Brazil and the Argentine Republic. Winter and summer cruises are conducted by the specially designed twin-screw steamers *Prinzessin Victoria Luise*, 4,409 tons, the finest ocean pleasure yacht in the world, and the steamer *Meteor*, 3,613 tons. In March, 1906, there were 10 steamers building (80,700 tons), counted in the total tonnage given, but 39,163 tons of river steamers, lighters, &c., are not included; 33,926 passengers were carried, in 2,572 voyages, in 1905, and 5,804,798 cubic meters of cargo.

Fleet, 157 steamers; 772,780 tons.

*London Offices*, 22, Cockspur Street, S.W.; 81, Strand; 78, Gracechurch Street, E.C.

**HAMBURG SOUTH AMERICAN STEAMSHIP COMPANY** was established at Hamburg in 1871, the largest steamers being *Cap Vilano*, 9,467 tons; *Cap Ortegal*, 7,818 tons; and *Cap Blanco*, 7,523 tons. Regular passenger services are maintained from Hamburg *viâ* Belgium, France, Portugal, and Spain, to Brazil, Uruguay and Argentine. There is also a Patagonian coasting line from here down to Punta Arenas and the Terra del Fuego.

Fleet, 38 steamers; 177,000 tons.

**HANSA COMPANY**, of Bremen, established in 1881, maintains regular cargo services from Bremen, Hamburg, and Antwerp to Bombay and Karachi; to Colombo, Madras, and Calcutta; to Rangoon; a fortnightly service 'tween Bremen, Antwerp, and the River Plate. Lines have also been established from New York to Calcutta and to South African ports. Six additional steamers were launched in 1904. The *Drachenfels*, 7,217 tons, is the largest; the total includes 5 steamers building, but is exclusive of 12 lighters (4,581 tons), 2 tugs, and 2 launches.

Fleet, 50 steamers; 225,000 tons.

*London Agents*, J. H. Wackerbarth & Co., 26, Billiter Buildings, E.C.

**HARRISON LINE** was established in 1830, and is managed by Messrs. Thos. and Jas. Harrison, of Liverpool, under the name of the Charente Steamship Company, Limited, regular services being maintained to and from West Indies, United States, Mexico, Brazil, East Indies, South East Africa, and South of France. In May, 1902, the *Magician* was despatched to Cape Town and Mossel Bay to inaugurate the Ellerman-Harrison joint line to South and East Africa. The *Wayfarer*, 9,599 tons, *Custodian*, 9,214 tons, and *Mechanician*, 9,044 tons, are the largest. *Warrior*, 3,332 tons, *Author*, 3,330 tons, and *Orator*, 3,330 tons, latest additions.

Fleet, 40 steamers; 198,682 tons.

*London Agents*, J. B. Westray & Co., 138, Leadenhall Street, E.C.; Gellatly, Hankey & Co., Billiter Street, E.C.

**HOLLAND-AMERICA LINE**, of Rotterdam, was established in 1872, and maintains a regular passenger and freight service between that port and New York *viâ* Boulogne-sur-Mer, as well as a direct line between Amsterdam and Newport News. The *Rotterdam* is 8,139 tons and the *Statendam* 10,491 tons; but these twin-screw steamers are surpassed in size by the *Potsdam*, 12,606 tons, *Rijndam*, 12,527 tons, *Noordam*, 12,531 tons, and the *Nieuw Amsterdam*, 16,967 tons. The quickest passages between New York and Boulogne-sur-Mer are about nine days.

Fleet, 8 steamers; 84,342 tons.

*London Agents*, Browne, Geveke & Co., 102, Fenchurch Street, E.C.

**HOULDER BROS. & CO., Ltd.**, which became a public company in 1898, was established in 1849 by the late Mr. Edwin Houlder. Regular steamship services for passengers and cargo are maintained between England and Australia and New Zealand, England and River Plate, England and South and East Africa, New York and Australia and New Zealand, River Plate and South Africa, Australia and New Zealand and South Africa. The steamers of the Grange Fleet under the company's management are specially fitted for the conveyance of live-stock and frozen meat, in which an important trade is carried on between this country and Australia and River Plate. *Royston Grange* ran out from United Kingdom to River Plate in a few hours over 21 days, the homeward passage occupying a day longer. The two twin-screw steamers, *Drayton Grange* and *Oswestry Grange*, are respectively 6,664 tons and 6,830 tons. The *Haversham Grange* is 7,557 tons, and the twin-screw steamer *Everton Grange* 7,204 tons.

Fleet, 14 steamers; 69,455 tons.

*Head Office*, 146, Leadenhall Street, London.

**THE HOUSTON LINE** was formed in 1883 by the senior partner of the firm of R. P. Houston & Co., of Liverpool. Regular services of freight steamers are maintained to and from Liverpool and Glasgow to River Plate and South Africa; London and Middlesbrough to South Africa; New York to River Plate and South Africa; Galveston to Liverpool and Continental ports; also from Australia to U.K. and Continent. The *Hypatia*, 5,663 tons, heads the list. 1,011 tons

of harbour craft are not included in the total given.

Fleet, 25 steamers; 93,618 tons.
*London Office*, 26, Leadenhall Street, E.C.

**IMPERIAL DIRECT WEST INDIA MAIL SERVICE COMPANY, Ltd.**, from Bristol to Kingston, Jamaica, W.I.—The *Port Morant*, 2,900 tons, opened this service from Bristol, Feb. 16, 1901, followed by *Port Antonio*, 4,455 tons; *Port Royal*, 4,455 tons; *Port Maria*, 2,900 tons; and *Port Kingston*, 7,584 tons, and *Port Henderson*, 5,167 tons, with a capacity for 40,000 bunches of bananas, all new steamers. The *Port Kingston* accommodates 160 first and 60 second class passengers; the *Port Antonio* and *Port Royal*, 100 first and 50 second class; the *Port Henderson*, 80 first and 40 second class; and the others, 40 first class and 16 second class. They are subsidised for the carriage of H.M. Mails, and specially fitted up for conveying fruit, being expected to bring home 20,000 bunches of bananas every voyage. This praiseworthy effort to foster the West Indian-Bristol trade was promoted by (now) Sir Alfred L. Jones, K.C.M.G., whose firm (Elder, Dempster & Co.) manage the company.
*London Office*, 4, St. Mary Axe, E.C.

**INTERNATIONAL MERCANTILE MARINE COMPANY.**—A company formed in 1902, embracing the American, Atlantic Transport, Dominion, Leyland, Red Star, and White Star lines, together representing a total of 129 steamers and 1,063,269 tons.

**JOHNSTON LINE** gradually entered the Mediterranean, Black Sea, Danube, and American trades, and keep up regular lines from Liverpool, London, and Antwerp. *Quernmore*, 7,302 tons, and *Rowanmore*, 9,456 tons—amongst the finest freight and live-stock carriers in existence—head the well-built, well-kept, and well-managed steamers belonging to Messrs. Wm. Johnston & Co., Ltd., of Liverpool.
Fleet, 19 steamers; 76,898 tons.
*London Office*, 1, St. Mary Axe, E.C.

**KOSMOS COMPANY**, of Hamburg, performs a direct service from Hamburg, Antwerp, and London, to the West Coast of South, Central, and North America, *vid* Straits of Magellan. The line was begun in 1873 to Chile and Peru, and afterwards extended to various other Central American ports, the service having recently developed to the inclusion of Mexican ports, 'Frisco and Seattle. There are fortnightly departures to Chile and Peru from Hamburg and Antwerp, also a sailing from London every four weeks to Chile, Peru, Ecuador, Central America, Mexico, 'Frisco, and Seattle. The steamers range from the *Serapis*, 2,456 tons, to the *Esne*, 6,001 tons, and the *Elkal*, 6,118 tons.
Fleet, 35 steamers; 166,026 tons.
*London Agents*, Browne, Geveke & Co., 102, Fenchurch Street, E.C.

**LAMPORT AND HOLT LINE.**—The Liverpool, Brazil, and River Plate Steam Navigation Company, Limited, was formed in 1865, being popularly known as the Lamport and Holt Line, after its first and present managers. The steamers are run at regular intervals from Glasgow, Liverpool, Manchester, London, Antwerp, Havre, and New York to Pernambuco, Bahia, Rio de Janeiro, Santos, Montevideo, Buenos Ayres, and Rosario; also to the ports of Chile, Peru, and Ecuador, on the West Coast of South America. There is also a line from New York to Manchester. All the steamers are fitted with telescopic masts. Those running between New York and South America form an excellent passenger line, while many of the ordinary cargo steamers have first-class accommodation for a limited number of passengers. Others have been specially constructed to carry large numbers of horses, cattle, and sheep. Among the largest are the *Velasquez*, 6,988 tons; *Veronese*, 7,022 tons; *Voltaire*, 7,000 tons; *Rossetti*, 6,508 tons; *Raeburn*, 5,183 tons; and *Canning*, 5,366 tons. The *Voltaire* is the latest addition to this firm's large fleet. In addition to their own fleet, 12 vessels, with a total tonnage of 40,000 tons, run regularly under the "L. & H." flag.
Fleet, 29 steamers; 125,000 tons.
*London Office*, 36, Lime Street, E.C.

**LEYLAND LINE.**—This old-established business was converted into a public company in 1892, after the death of its founder, Mr. F. R. Leyland. The company's fine fleet now includes the *Devonian*, 10,418 tons; *Winifredian*, 10,405 tons; *Bohemian*, 8,548 tons; *Canadian*, 9,301 tons, and *Cestrian*, 8,823 tons. In 1900 the company acquired by purchase the business of the West India and Pacific S.S. Co., an old-established concern, with a fleet consisting of 22 steamers with a gross tonnage of 111,183 tons, and maintaining services from Liverpool to St. Thomas, Colon (for ports on West Coast of America), Kingston (Jamaica) and Mexican ports; also Barbados, Trinidad, and Spanish Main ports, returning to Liverpool from Galveston or New Orleans. Special attention has been paid to the cotton trade, and the steamers of the company engaged in it have the largest cotton-carrying capacity of any entering the port of New Orleans. In addition to the Liverpool and Boston weekly service, the company maintain a line between Liverpool and New Orleans for both passengers and cargo, as well as one between London, Antwerp, and New Orleans. Lines for cargo only are run between London and Boston, Antwerp and Montreal, and Manchester and Boston.
Fleet, 44 steamers; 266,118 tons.
*Head Office*, 27, James Street, Liverpool.
*London Offices*, 1, Cockspur Street, S.W., and 38, Leadenhall Street, E.C.

**WILLIAM LUND** commenced in the sail-making business in 1861, and in 10 years ably carved his way to the ownership of a fleet of sailing ships. After the Suez Canal was opened he changed to steam, and in 1880 he began his Blue Anchor Line of passenger steamships from London to and from Adelaide, Melbourne and Sydney with the ss. *Delcomyn*, 1,818 tons, this being the first regular direct steam cargo service between England and Australia; the *Narrung*, *Wakool*, and *Wilcannia* are each about 5,000 tons, and steam 13 knots. The twin-screw steamer *Commonwealth* is 6,611 tons, and steams 14 knots; and has recently been succeeded by the *Geelong*, 7,954 tons. They are all first-class passenger steamers and carry H.M. mails between South Africa and Australia. The *Geelong* has gone from London to Adelaide, *vid* Cape of Good Hope, in 36½ days. The average passage to Cape Town is 21 days, and to Australia 42 days.
Fleet, 6 steamers; 33,987 tons.
*London Office*, 3, East India Avenue, E.C.

**MANCHESTER LINERS, LIMITED** (first nd present chairman, Sir Christopher Furness, I.P.), was formed in 1898 to work steamship nes of modern cargo carriers to and from the ort of Manchester, &c. Itinerary includes anada, Philadelphia, and New Orleans. New nes, to Philadelphia (*via* St. John, N.B.) and o River Plate, both back to Manchester. argest is *Manchester City*, 5,833 tons.

Fleet, 14 steamers, 61,505 tons.

*London Office*, 4, Fenchurch Avenue, E.C.

**MESSAGERIES MARITIMES DE FRANCE.**—rom a concern for inland mail carriage, the resent noted company developed. In 1851 an ver-sea contract was entered into for the French ails to Italy, Egypt, Syria, the Levant, and reece. There are five services to Mediter-anean, and Black Sea ports, the last two rades being taken up in 1857. The India nd China mail contract was secured in 1861. here is a service every 28 days to Australia and ew Zealand, *vid* Aden, Bombay, and Colombo; onnecting at Colombo with the China main nes. A fortnightly service is maintained to den or Jibouti, Colombo, Singapore, Saigon, hina, and Japan, with monthly connections for ondicherry and Calcutta, and fortnightly for ava and the Tonquin ports. There are de-artures on 25th of every month to Aden, Jibouti, lahé (Seychelles), Madagascar and Mauritius, onnecting at Diego-Suarez for West Coast and ast Coast of Madagascar, and on 10th of every nonth to Jibouti, Zanzibar, Madagascar and lauritius. The foregoing, with a weekly cargo ne to London *vid* Havre, sail from Marseilles. he mail service from Bordeaux to Brazil and iver Plate, commenced in 1861, now leaves ortnightly, with a steamer once a month or cargo only. Cargo steamers are run from ntwerp to the Far East every two months, nd from Marseilles every month to the French ossessions in Indo-China. The largest passen-er steamers are the *Atlantique*, 6,446 tons; *rmand-Behic*, 6,385 tons; *Ville de la Ciotat*, ,378 tons; *Australien*, 6,365 tons; *Polynesien*, ,363 tons. Included in the total are four teamers building, each 7,500 tons.

Fleet, 76 steamers; 290,377 tons.

*London Office*, 97, Cannon Street, E.C.

**THE MOOR LINE** of steamers, which trade o all parts of the world, was commenced in 885 by Messrs. Walter Runciman & Co., of ewcastle-on-Tyne; the fleet is composed of odern-built vessels. The *Castlemoor*, 3,732 tons, nd *Peadmoor*, 4,119 tons, are the largest.

Fleet, 25 steamers; 86,312 tons.

*London Office*, 55 and 56, Bishopsgate St., E.C.

**NATAL LINE.**—In the middle of the last entury, the firm of Bullard, King & Co. estab-shed a line of clipper ships between England nd Natal, and in 1879 inaugurated the present ervice with the *Pongola*. Steamers are de-patched every 10 days from London *direct* to atal, Delagoa Bay, Beira, and East African orts, which offer special facilities for passengers nd cargo for those ports. Besides a through ervice at regular intervals between South frican ports and China and Japan, another ortnightly one, under contract with the Natal overnment, from Cape Colony and Natal *vid* ast African ports to Madras and Calcutta, calls at eylon. The *Umzumbi* is 3,379 tons and 13 knots, nd the *Umhlali*, the latest addition, is the same size. Quickest passages: Outward, *Umvoti*, 22 days, 23 hours; Homeward, *Umtata*, 21 days, 12 hours.

Fleet, 16 steamers; 38,453 tons.

*London Office*, 14, St. Mary Axe, E.C.

**NAVIGAZIONE GENERALE ITALIANA.**—Under this title were united the lines which formerly belonged to Florio, of Palermo, and Rubattino, of Genoa, having the head office at Rome. There are lines from Italy to India, China, New York, Brazil, and River Plate, in connection with the company's Mediterranean, Adriatic, and Levant services. In 1901 this company joined La Veloce Navigation Italiana Co. in making the services weekly (instead of fortnightly), Genoa and Naples to New York, and from Genoa to Monte Video and Buenos Ayres. The total given includes nine steamers building, aggregating 64,000 tons.

Fleet, 108 steamers; 292,000 tons.

*London Agents*, A. Laming & Co., 8, Leadenhall Street, E.C.

**THE NEDERLAND LINE**, of Amsterdam, is subsidised by the Government of the Netherlands to maintain a mail service between Holland and Java. The Nederland Steam Navigation Company was established in 1870, and now maintains two separate services, one, with nine steamers, carrying the royal mails, passengers and goods, and the other employing nine steamers carrying cargo only. Calling at Southampton, the mail steamers proceed to Sabang Bay, Singapore, Batavia, Samarang, and Sourabaya *vid* Genoa, Port Said, and Suez, connection with ports in Netherlands India being made with the steamers of the Koninklyke Packetvaart Co. Passengers to Java have the option of returning either by this line or by the Rotterdam Lloyd. The *Oranje* is 4,500 tons, from which size the boats range to the *Soembawa*, 3,400 tons. Three mail steamers, of 5,800 tons each, are building.

Fleet, 20 steamers; 82,000 tons.

*London, Southampton and Manchester Agents*, Keller, Wallis & Co.

**NEW ZEALAND SHIPPING COMPANY**, organised at Christchurch, New Zealand, in 1873, carried on business for ten years, with sailing ships specially built for passengers and the trade. The first direct steamer, *Stad Harlem*, conveyed in 1879 600 emigrants to the enterprising colony; four years later the *British King* began the Government mail contract, for which five steamers were built. Of the present fleet, seven are twin-screw steamers, the largest being the *Turakina*, 8,210 tons, and *Ruapehu*, 7,801 tons. New Zealand emphasises its British characteristics by sending here nearly all its produce, which the development of the frozen industries has multiplied. This company's *Mataura* sailed from Port Chalmers in 1882, with 150 tons of mutton prepared on board in the absence of the necessary plant ashore. The passenger steamers sail from London every fourth Thursday *vid* Plymouth, Teneriffe, Cape Town, and Hobart, returning round Cape Horn *vid* Montevideo. Rates are low compared with the conveniences and table supplied to all classes.

Fleet, 14 steamers; 97,875 tons.

*London Office*, 138, Leadenhall Street, E.C.

**NIPPON YUSEN KAISHA.**—In 1868 steamship communication was opened between Tokyo and Osaka by a company which gave way to a Mail Line under Imperial control in 1871.

In 1882 the Union Navigation Company was started, but in three years the proved inexpediency of having two State-aided concerns resulted in amalgamation, and the above, known as the Japanese Mail Steamship Company, was established in 1885. Regular services were kept up from Kobe to Vladivostock, Tientsin, and Corean ports; a line between Japan and Bombay being put on in 1892. The importance of the company rose with the size of its fleet owing to the war with China in 1894, fifty of its steamers being engaged at one time transporting the 120,000 fighting men with their 100,000 attendant coolies. Independent of a complete Japanese coastal system, extending to all the principal ports in Japan, as well as to Keeling from Kobe, and to Bonin Islands from Yokohama, the European passenger line runs fortnightly from Japan to Antwerp and London, starting from Middlesbrough on the return journey; the American line is a fortnightly service connecting at Seattle with the Great Northern Railway for inland United States points. There is also a monthly line to and from Australia, and other services to China, Corea, Asiatic Russia, Hawaii, Straits Settlements, and India. By continually adding boats like *Tango Maru*, 7,200 tons, the fleet which hails from the kingdom of the Mikado has made such phenomenal progress that it now takes a prominent place amongst the first companies in the world. Steam launches (1,138 tons), 4 hulks, and 241 lighters are not included in the total given. Ten steamers are building.

Fleet, 75 steamers; 253,936 tons.
*London Office*, 2, Fenchurch Avenue.

**NORDDEUTSCHER LLOYD** sprang into existence in 1856, initial operations taking the form of lines to Hull and to London. On 19th June, 1858, the *Bremen*, 334 × 42 × 28, sailed to New York *vid* Southampton with 22 cabin passengers, 92 steerage, and 150 tons of cargo, followed by the *Weser*, the service being made fortnightly in 1866. Extensions to Baltimore 1868, New Orleans 1869, West Indies 1871, Brazil and River Plate 1876, evidenced the growth towards front rank which was assumed in 1881 with fast mail-boats built for an express Atlantic service, now maintained weekly from Bremen to New York *vid* Southampton and Cherbourg. The Imperial German Mail Service from Bremen and Hamburg *vid* Antwerp, Southampton, and Genoa to Eastern Asia and Australia, with various branch lines, began in 1885, and was followed in 1891 with an express line between Italy and New York in conjunction with the Hamburg-American Line. In 1892, the first twin-screw steamer, *H.H. Meier*, joined the fleet, which from that date has been completely reorganised and doubled. In 1897 the *Kaiser Wilhelm der Grosse* promptly won and for a time held the palm for ocean speed: in March, 1900, she crossed from Cherbourg to Sandy Hook in 5 days 20 hours 58 minutes, averaging 22·33 knots per hour over 3,148 miles distance run. In 1900 the steamers and trade were acquired of the Scottish Oriental Co. and the East Indian Ocean S.S. Co., and extensions made between Penang and Belawan (Deli) and between Singapore and Palembang, Asahan, and Sandakan (Borneo). The line from Singapore to Labuan has been extended one way to Sulu and the Archipelago; and the other way to Manila. Steamers have been built for the development of the company's Chinese coasting business, which now carry the German postal flag far into the interior of China up the Yangtsze. A branch line has been established between Hong Kong and Sydney *vid* Mariana Islands, Carolines, New Guinea, and Queensland. In 1901 sailings were resumed from Bremerhaven to Cuba. In 1904 the Singapore and Sydney line *vid* Batavia &c., was superseded by a new line from Sydney to Yokohama *vid* New Guinea, Manila, and Hong Kong; additional lines being also established between Stettin and New York, and between Marseilles and Alexandria, *vid* Naples. In 1906 the Company started a weekly service to the Levant. The *Kronprinz Wilhelm*, 14,900 tons, 35,000 h.p., joined the stately N.D.L. fleet in 1901, followed by the *Kaiser Wilhelm II.*, 19,361 tons, 40,000 h.p., built by the Vulcan Works at Stettin, both magnificent monuments to German shipbuilding and industrial art. The fleet includes 49 twin-screw ocean steamers (23 over 10,000 tons each), also 48,000 tons of river steamers and lighters, and 2 Training Ships, 5,823 tons, not included in total given below. The chief new ships now being built are the *Kronprinzessin Cecilie* (identical with the *Kaiser Wilhelm II.*) and the *Washington*, of the *Grosser Kurfürst* type.

| WEST. (Between Cherbourg and Sandy Hook.) | EAST. | Average Sea Speed. | Highest Day's Run. |

Fleet, 118 ocean steamers; 700,201 tons.
*London Agents*, Keller, Wallis & Co., 2, King William Street, E.C.

**OCEAN STEAM SHIP COMPANY, Ltd., and CHINA MUTUAL STEAM NAVIGATION CO., Ltd.**—The Ocean Steam Ship Company was formed in 1865 by Mr. Alfred Holt. The *Agamemnon* began the line on April 19th, 1866, sailing from Liverpool for Singapore and China *vid* Mauritius. The Cape route was given up on the opening of the Suez Canal. The company maintains (in conjunction with the China Mutual S.N.C., Ltd., which was formed in 1882, and of which Messrs. Alfred Holt & Co. acquired the control in 1902) a weekly service of cargo steamers from Glasgow, Bristol Channel ports, and Liverpool to the Straits Settlements, China, and Japan, with a four-weekly extension across the Pacific to British Columbia and Puget Sound; a three-weekly one from Amsterdam *vid* Liverpool to Sumatra and Java, and another between Singapore and West Australian ports. In 1901 a monthly line was begun from Glasgow to Australia. The *Antilochus*, *Bellerophon*, *Cyclops*, *Keemun*, *Ningchow*, *Oanfa*, *Teucer*, and *Titan* are from 8,800 to 9,000 tons each.

Fleet, 60 steamers; 326,053 tons.
*London Agents*, J. Swire & Sons, 8, Billiter Square, E.C.

**ORIENT ROYAL MAIL LINE** are the contractors with the Commonwealth Government for the carriage of mails between England and Australia. The managers of the line are the well-known firms of F. Green & Co.

ad Anderson, Anderson & Co. The steamers, hich have to make uniformly quick passages, il from London on alternate Fridays, calling Plymouth, Gibraltar, Marseilles, Naples, Port id, Suez, Colombo, Fremantle, Adelaide, Melourne, Sydney, and Brisbane, returning homeards in the reverse order. The most recent ldditions to the fleet are the *Orontes*, 9,023 tons, ad *Ortona*, 7,945 tons. Both are twin-screw ssels, each with 10,000 horse-power. The comrtable accommodation afforded by this line to ng-distance travellers, able to pay only the eapest fares, testifies to the benefits conferred steam navigation. When the Orient Royal ail Line began to carry passengers the passage om England to Australia occupied about 50 ys; now it takes about 33 days. The outward d homeward steamers are timed to connect Marseilles, so as to provide a sea voyage from ndon and back of 14 to 15 days, with not more an one day on shore. The Orient Royal Mail ne are noted for their excellent system of easure cruises by large ocean steamships. Some their fine vessels are employed in cruises rying in length from two to ten weeks to rious parts of the world, according to season. 1901 the *Ophir* was selected and specially fitted H.R.H. the Prince of Wales when, with the incess, he visited Australia to open the first rliament of the Commonwealth.

Fleet, 9 steamers; 61,867 tons.

*London Office*, 5, Fenchurch Avenue, E.C.

**THE OTTOMAN STEAMSHIP CO.**, of Galata, n boats from Constantinople to the Asiatic ast of the Black Sea and also to the Syrian ast. The company is partly a Government ncern, and the largest vessel is the *Garbi*, 29 tons.

Fleet, 44 steamers; about 48,000 tons.

**PACIFIC MAIL STEAMSHIP COMPANY.**— s well-known American line, which was ablished at San Francisco in 1847, maintains vices to Central America, Japan, China, nolulu, &c. The *Korea*, 11,276 tons, and *eria*, 11,284 tons, recently built in the United tes, steam 18 knots, and the *Manchuria*, 38 tons, and *Mongolia*, 13,639 tons, each 16 ots.

Fleet, 18 steamers; 98,711 tons.

*London Agent*, Rudolph Falck, 49, Leadenhall eet, E.C.

**PACIFIC STEAM NAVIGATION COMPANY,** rporated by Royal Charter in 1840, began iness with the *Chile* and *Peru*, receiving a small sidy. A bi-monthly service between Valpao and Panama necessitated four more steamers 852, the Pacific trade developing and fresh nches of commerce being opened up. Comnd engines were welcomed and adopted in 1856, reby reducing the costly consumption of coal, scarcity of which article had been the earliest culty. The company's powers were enlarged 865 to run as far as the River Plate. In the capital was increased for the onerous rmance of a monthly mail service from rpool, through the Straits of Magellan to paraiso, the *Pacific*, 1,630 tons, sailing from port May, 1868. The success of the new resulted in three sailings a month, and an nsion to Callao by 1870. Again, two years r, the capital was added to, the *Sorata*, 4,038 s, starting in 1873 a weekly service from rpool to Callao *vid* France, Spain, Portugal, zil, and River Plate, but trade with South America falling off, fortnightly departures were reverted to, and the requisite employment for some of the boats presented itself in 1877, when the *Lusitania* led the way to the Orient-Pacific Line. The fleet owned by the company contains a long list of noble vessels (called after South American places), with which its reputation is well sustained for safety, speed and comfort. The *Orita*, of 10,000 tons (the largest steamer in the South American trade), and the *Oreana*, *Ortega*, and *Oronsa*, each 8,000 tons, all twin-screw steamers, are the latest additions to the fleet.

Fleet, 49 steamers; 173,558 tons.

*London Office*, 5, Fenchurch Avenue, E.C.

**PENINSULAR & ORIENTAL STEAM NAVIGATION COMPANY.**—Mr. Brodie McG. Wilcox began to sow the seeds in 1825, and from the *William Fawcett*, 206 tons: 60 h.-p.: 74×15×8, blossomed the Peninsular Company, subsequently ripening into the above institution, which was incorporated 1840 (see p. 728), and celebrated its Jubilee 1887. Universally known as the "P. & O.," it glories in the motto, "Quis separabit."

Mails were conveyed by Post Office sailing packets from Falmouth to Lisbon before the contract was given to the Peninsular Company. The Indian mails were at that time taken in Government steamers from Bombay to Suez. Prior to the completion of the railway, 1857 (followed by the Suez Canal, 1870), everybody and everything had to take the caravan route across the desert to Cairo, intimately associated with the name of Lieut. Waghorn, who organised quicker and better facilities, Nile steamers afterwards superseding the sailing boats between Cairo and Alexandria. From Alexandria, Home Government steam packets carried the mails to Gibraltar, where the Peninsular Company received them. They soon suggested and pressed a better service than this upon the Government, and eventually a line from England *vid* Gibraltar and Malta to Alexandria was begun by the *Oriental*, 1,610 tons, and *Great Liverpool* 1,540 tons, for which purpose the above company was constituted. The P. & O. Company secured the contract for the mails between Suez and Calcutta, in 1842, the first sailing being the *Hindustan*, 1,800 tons; but the East India Company obstinately refused to hand over their inferior Bombay-Suez Line until 1854, by which period the P. & O. had engaged to run to China and Singapore. The first service to Australia was interrupted by the Crimean War, 11 P. & O. boats being employed. The necessity growing for an independent Australian mail line, the Government called for tenders in 1856, but the P. & O. declined the onerous conditions, which were swallowed by the European and Australian Steam Navigation Company, who soon failed. The Royal Mail Company stopped the breach but temporarily, and the Government, having learnt a lesson, accepted the tender of the P. & O. Company in 1859.

The mails are invariably ahead of the contract times, which in 1905 were further reduced to the following:—

| | | |
|---|---|---|
| Indian | mails: Bombay, | 13½ days from Lond. |
| China | ,, Shanghai | 32 ,, |
| Australian | ,, Adelaide | 29½ ,, |

The *Caledonia*, 7,558 tons, has landed the mails at Bombay within 12¼ days from London *vid* Brindisi, and the steamer's own passage between Bombay and Plymouth has been less than 27 days. The *Isis* and *Osiris*, running in the Brindisi-Port

Said Express Service, have delivered the Egyptian mails within four days from the Metropolis of the Empire. The *Macedonia*, *Marmora*, *Moldavia*, *Mongolia* and *Mooltan*, each about 10,000 tons, and 18 knots speed, are the newest and largest mail steamers in the company's service, and 4 intermediate steamers are being added to the fleet. A flotilla of 30 steam tenders and tugs, not included in the total given, count for 3,500 tons more. In 1905, 2,881,000 miles were traversed.

Fleet, 58 steamers; 379,595 tons.
*London Office*, 122, Leadenhall Street, E.C.

**THE PRINCE LINE** is the substantial handiwork of Mr. James Knott, of Newcastle-on-Tyne, since he despatched the *Saxon Prince* in 1883 as the pioneer of his present big fleet of ubiquitous steamers, of which the largest are the *African Prince*, *Welsh Prince*, and *Afghan Prince*, each of 8,400 tons dead-weight capacity, and having a gross tonnage of 4,915 tons and a speed of 12 knots. The line has regular services between Manchester, Tunis, Malta, Alexandria, Syrian coast and Cyprus, also between Antwerp and London and the same ports, returning usually to Liverpool and Manchester, and frequently to other ports in the United Kingdom. Other lines maintained are those from Antwerp and London to the River Plate, returning to the United Kingdom; New York to the Brazils and River Plate, and back to New York; New York to South African ports; Italian ports and New York, carrying emigrants and cargo, with a return service to the same ports; New York to China, Japan, Philippines and Straits and back to New York. During last year the steamers of the company carried 15,000 emigrants from Italy to New York, and a new line was started from Dunkirk to Malta, Smyrna, and Alexandria, and another from Brazil to New Orleans, and thence to U.K. and Continent.

Fleet, 40 steamers; 110,880 tons.
*London Office*, 5, Fen Court, Fenchurch Avenue, E.C.

**JOHN T. RENNIE, SON & COMPANY, ABERDEEN LINE.**—The steamers of this line leave the West India Dock every week to ten days for Natal, calling at Portland and the Canary Islands (Las Palmas and Teneriffe alternately); they also take cargo and passengers for East African ports as far as Quilimane. The line was inaugurated in the year 1856 with sailing ships which traded regularly between London and Natal. Steam was first tried in 1857 with the *Waldensian* and *Madagascar*, which were the first steamers on the South African coast, and carried the mails from Cape Town as far as the then port of Durban. The present service was commenced in 1882 with the *Dalmatamanzi*, 1,679 tons. In 1886 the *Matabele* was the first steamer in the South African trade to be fitted with triple expansion engines, and steamed nearly 7,000 miles from London to Port Natal, without a single stoppage. The East African service was commenced in the year 1892, and the steamers of the Aberdeen Line now maintain a regular service as far north as Beira, calling at Delagoa Bay and Inhambane, and carrying goods also to the British concession at Chindi and Quilimane, these ports forming the best and cheapest routes for passengers for Rhodesia, Matabeleland, British Central Africa, and the African Lakes District. Steamers carry the British and Portuguese mails from Durban to the various ports they serve. The passenger fares are moderate and the accommodation, especially on the new steamers, superior. The ss. *Inkosi*, 3,576 tons, 13 knots, has gone from London to Natal in 9 days 10½ hours' steaming time, and the *Insizwa* has completed the return passage in 22 days 2 hours. The *Inanda* (4,400 tons, 13 knots, late addition) and *Inkosi* were the first ocean-going steamers outside transatlantic boats to be fitted with Marconi's system of wireless telegraphy.

Fleet, 10 steamers; 28,000 tons.
*London Office*, 4, East India Avenue, E.C.

**ROTTERDAM LLOYD** line of steamers to Java *vid* Suez Canal, is under special mail contract with the Netherlands Government. The service was established in 1883 by the present managers Messrs. Wm. Ruys & Sons, one of the oldest and most important shipowning and shipbroking firms in Holland. The steamers are despatched from Rotterdam, *vid* Southampton, fortnightly for Padang, Batavia, Cheribon, Samarang and Sourabaya, calling at Marseilles, from which port passages of 20 days have been made to Batavia. The largest are the *Sindoro*, 5,468 tons, and *Gventoer*, 5,894 tons, both twin-screw steamers, 15 knots speed; 2 steamers are building, each 4,900 tons.

Fleet, 15 steamers; 61,000 tons.
*London and Southampton Agents*, Escombe McGrath & Co.

**THE ROYAL MAIL STEAM PACKET COMPANY** was incorporated 1839 by Royal Charter with a subsidy of £240,000. Supplemental charters extending the company's operations were granted at intervals, one in 1904 containing an *All British Clause* confining control of the company to British subjects. In 1857 the company temporarily took over the carriage of the Australian mails *vid* Suez. In 1868 the West Indian Mail Line was extended to Colon. In 1869 the South American main line was continued to Buenos Ayres (doing away with branch steamers from Brazil), developing by 1872 into a fortnightly service. The company, in spite of the keenest Continental competition, still retains the premier position in this trade, and now affords a weekly service. Services have recently been establised from Glasgow, Avonmouth, Cardiff, Hull, London and Antwerp to the West Indies; and from Newport, Swansea, and Antwerp to Brazil; also a line to Cuba from Hull and Antwerp *vid* Bilbao, Vigo and Corunna. The West Indian Mail subsidy, which had dwindled to £85,000 a year, was allowed by the Government to lapse in 1905, much against the expressed wishes of the Colonies. In August, 1906, an arrangement was concluded with the Crown Agents of the Colonies for a fortnightly intercolonial service from and to Barbados—quite distinct from the West Indies and New York transatlantic service (run without subsidy). The company availed themselves of the freedom to extend their West Indian Main Line service to New York *vid* Jamaica, maintaining their communications with the West Indian and British Guiana Colonies. During 1904, 6 new cargo steamers joined the fleet. The *Aragon*, 9,795 tons, which sailed on her maiden voyage July 14, 1905, is the first of a series of similar vessels for the Brazil and River Plate route. The *Amazon*, 10,036 tons, and *Araguaya*, 10,537 tons, were launched in 1906. The R.M.S.P. service to Australia (carried on for a short time in 1857) was resumed at the end of 1905, the Company then

quiring a half-interest in the Australian mail vice, which is now carried on by them jointly th the Orient Company under the title of the Orient-Royal Mail" Line.
Fleet, 42 steamers ; 167,884 tons.
*London Office*, 18, Moorgate Street, E.C.

**SHAW, SAVILL AND ALBION COMPANY, MITED.**—This company, successors to Messrs. aw, Savill & Co. and The Albion Co., esta- shed over 50 years ago, maintain regular vices of passenger and cargo steamers be- een London and New Zealand, and despatch rgo steamers at regular intervals from Glasgow d Liverpool to that colony. From London e company despatch two steamers a month, e carrying passengers and general cargo, the her general cargo only, to New Zealand, *vid* ymouth, Teneriffe, Cape Town, and Hobart, turning *vid* Cape Horn, calling at Rio de neiro or Monte Video, Teneriffe, and Ply- outh on the way to London. The company n 11 steamers and 1 sailing ship, including e twin-screw steamers *Mamari*, 7,062 tons, *tatua*, 6,488 tons. The new twin-screw pas- nger ss. *Arawa*, of 9,000 tons, has just been ded to the fleet, and makes her maiden voyage rly in the year. A first-class monthly service mails, passengers, and merchandise is main- ined. All the steamers are fitted with tent refrigerators for the conveyance of ozen meat, as well as butter, cheese, and uit, from New Zealand, and aggregate a tal carrying capacity equal to about 2,750,000 vcases of sheep annually. Messrs. Ismay, rie & Co., have associated with this line eir ss. *Athenic*, ss. *Corinthic*, ss. *Ionic*, *Delphic*, d *Gothic* (a passage of the last-named ving been under 35½ days), which five eamers increase the tonnage regularly run- ng in the company's service by 52,725 tons, t counted below.
Fleet, 12 vessels ; 67,865 tons.
*Head Office*, 34, Leadenhall Street, London, E.C.

**THE "SHELL" TRANSPORT AND TRAD- G COMPANY, LIMITED**, which has been nducted with remarkable financial success, s formed as a limited company in 1898 to take er the business founded by Messrs. M. Samuel d Co. for the transport of petroleum in bulk rough the Suez Canal. Started in 1892 with ree steamers of about 4,500 tons dead-weight pacity, the fleet has increased with extra- linary rapidity, the newest being the *Pectan*, *ondilus*, *Goldmouth*, and *Silverlip*, each with capacity of 10,300 tons, to steam 12 knots. e steamers are adapted for carrying general rgo as well as oil, and owing to special systems ventilation are reliable carriers for the most licate cargoes. A number of the vessels use trictly liquid fuel instead of coal. The steamers rry petroleum and its products in bulk all over e world, and the special trade of carrying full rgoes of benzine in bulk from Sumatra and rneo to Europe *vid* the Cape, of which the Shell" Co. were the pioneers, has now assumed eat dimensions. The carriage of creosote in lk across the Atlantic has also been instituted the "Shell" Co., and the success of same s encouraged other owners to follow their ample. The largest steamer is the *Silverlip*, 9,2 tons.
Fleet, 16 steamers ; 80,991 tons.
*London Office*, 19–21, Billiter Street, E.C.

**THE UNION-CASTLE LINE.**—Early in 1900 the two well-known steamship companies, the Union Steamship Company, Limited, and the Castle Mail Packets Company, Limited, the former company having been formed in 1853 and the latter one in 1872, who for many years have performed the mail service between England and S. Africa, were formally amalgamated, under the title of the Union-Castle Mail Steamship Company, Limited, the joint concern being managed by Messrs. Donald Currie & Co., who were the managers of the Castle Line. The Royal Mail steamships of the line under contract with the Colonial Governments are despatched from Southampton every Saturday for the Cape of Good Hope and Natal, calling at Madeira. In addition, Intermediate steamships are despatched from London every week, calling at Southampton for the Cape Colony, Natal, and Delagoa Bay, taking passengers at lower rates than the Mail steamers. These steamers proceed alternately *vid* Las Palmas and Teneriffe, and call once a month for Mails at Ascension and St. Helena under contract with His Majesty's Government. They also call occasionally at Lobeti Bay, Benguela. At intervals, as the trade requires, an extra steamship is despatched to the Cape ports, Natal, and Delagoa Bay, calling at Las Palmas or Teneriffe. The steamers of the fleet are amply furnished with every contrivance for the safety, comfort, and convenience of all classes of passengers. The largest steamers in the fleet are : *Mail—Kenilworth Castle*, 12,975 tons ; *Armadale Castle*, 12,973 tons ; *Walmer Castle*, 12,546 tons. *Intermediate—Durham Castle*, 8,217 tons ; *Dover Castle*, 8,260 tons ; *Dunluce Castle*, 8,114 tons.
Fleet, 37 steamers ; 258,786 tons.
*London Office*, 3 & 4, Fenchurch Street.

**UNION STEAMSHIP COMPANY OF NEW ZEALAND.**—This company, established in 1875, is now the most important shipping concern in the Southern Hemisphere, and testifies to the expansion of both colony and company. In 1901 the company established a four-weekly mail service from Sydney to Vancouver, and discontinued running a steamer on the San Francisco mail route. The *Aparima*, 5,700 tons, the *Moeraki*, 4,400 tons, and *Manuka*, 4,400 tons, are twin-screw steamers added recently, with a speed of 14 knots ; the turbine steamer *Maheno*, 5,500 tons, is 17 knots. The *Loongana*, an 18-knot turbine steamer of 1,000 tons, is in the service between Melbourne and Launceston, a distance of 276 miles ; the first steamer of this kind in the Southern Hemisphere. Two passenger steamers and two cargo steamers are building.
Fleet, 57 steamers ; 114,853 tons.
*London Office*, 34, Leadenhall Street, E.C.

**DET FORENEDE DAMPSKIBS SEISKAB** (The United Steamship Co.) of Copenhagen celebrated its 25th anniversary in 1891. It is the largest maritime undertaking in Denmark. The company's far-reaching operations cover services with Russia, Germany, Norway, U. Kingdom, Belgium, France, Spain, and Italy, 18 of the fastest steamers being fitted with refrigerating machinery for the transport of dairy produce. The Scandinavian Amerika Passenger Line is maintained between Copenhagen and New York, *vid* Christiania and

Christiansand, for which service 4 twin-screw steamers, each over 10,000 tons, have recently been built, with a speed of 16 knots, each with accommodation for 1,500 passengers. One ice-breaker and salvage steamer, 12 sea-going lighters, and 5 tug-boats belong to the company.

Fleet, 118 steamers; 150,560 tons.

*London Agents*, The United Shipping Co., Ltd., 108, Fenchurch Street, E.C.

**ANDREW WEIR & CO.** were established in 1885 by the senior partner, when the barques *Willowbank*, 862 tons, and *Francis Thorpe*, 1,343 tons, were acquired. Starting building for themselves in 1886, the size of the fleet, known as the Bank Line, grew to 43 clippers, which gradually diminished as the number of steamships increased, the first belonging to the firm being the ss. *Dunveric*, 1,878 tons, in 1896; now the ss. *Suveric*, 7,000 tons, heads a list of 22 steamers grossing 87,809 tons. The *Cedarbank*, 2,825 tons, is the biggest of the 18 sailing ships, representing a further 33,934 tons, this being still one of the largest sailing fleets in the world. Both fleets are mostly employed in general trades. They have the following lines of steamers: New York to the Far East; New York to the River Plate; Calcutta to the River Plate and West Coast of South America. Since 1896 a regular service has been conducted between the Tees and the Forth.

Fleet, 38 vessels, steam and sail; 114,002 tons.

*Head Office*, 6, Lloyd's Avenue, E.C.

**WHITE STAR LINE.**—(*See* International Mercantile Marine Co.) The Oceanic Steam Navigation Company, Ltd., better known as the White Star Line, was founded in 1869 by the late Mr. T. H. Ismay. The *Oceanic* (3,807 tons, 430 feet long) sailed from Liverpool on her first voyage to New York on 2nd March, 1871. The *Britannic*, 5,004 tons, *Germanic*, 5,070 tons (1874–5), *Teutonic*, 9,984 tons (1889), *Majestic*, 9,965 tons (1890), were followed by *Oceanic II.*, 17,274 tons, a leviathan 705½ feet long, whose displacement of 30,000 tons put that of the *Great Eastern* in the shade, exceeding in size any vessel then built or building. To inaugurate a Liverpool, South African, and Australian service with 5 new twin-screw steamers, *vid* the Cape, carrying only one class of passengers, the *Medic*, 12,000 tons, with 85 passengers and a large cargo, was despatched August 3, 1899, since when other White Star steamers have been added to this trade. In 1903 the four largest steamers of the Dominion Line were taken over and renamed, a regular service being inaugurated from Liverpool to Boston *vid* Queenstown and from New York and Boston to Mediterranean ports. Besides the mail and passenger service and a cargo service to New York, the company also have the following services: Liverpool and Boston; New York and Boston to Mediterranean; Liverpool, South African, and Australian passenger and cargo services; and for the Liverpool, London, and New Zealand passenger and cargo services, under the auspices of the Shaw, Savill & Albion Co., Ltd., the White Star Line has had built the *Athenic*, *Corinthic*, and *Ionic*, each 12,230 tons, the largest vessels in the New Zealand trade. The average size of the White Star steamers is the largest in the world (13,020 tons per steamer), all being twin-screw vessels, including some of the largest cargo and live stock carriers in existence. With the advent of the *Celtic II.* (20,904 tons), which sailed from Liverpool for New York on her maiden voyage July 26, 1901, the company possessed the large steamship in the world. She has been surpass in size by the *Cedric*, 21,035 tons, and by *Baltic*, 23,876 tons (725·9 × 75·7 × 49), wh sailed from Liverpool on her maiden voy June 29, 1904. These steamers are of 17 kn speed, and intended to afford comfortable commodation for passengers with great ca capacity rather than the greater speed of *Oceanic*, *Teutonic*, and *Majestic*. A sister sh to the *Baltic*, the *Adriatic*, is building, and it expected that in her will be found many ne features which experience has led the manage to believe will tend to make her a very popul vessel. All the services are maintained entire with twin-screw steamers, and wireless tel graphy is installed in most of the Atlantic vessel Many of the passenger steamers are also fitte with submarine signalling apparatus, a featu which adds considerably to the safe navigati of these steamers in hazy weather.

The following table gives quickest crossings t date:—

| Steamer's Name. | West. | East. | Average Sea Speed. | Highest Day's Ru |
|---|---|---|---|---|
| | d. h. m. | d. h. m. | Knots. | Knots. |
| *Oceanic* | 5 16 40 | 5 18 30 | 20·7 | 524 |
| *Teutonic* | 5 16 31 | 5 21 3 | 20·3 | 528 |
| *Majestic* | 5 17 56 | 5 23 16 | 20·4 | 520 |

Fleet, 28 steamers; 356,540 tons.

*London Office*, 38, Leadenhall Street, E.C., an 1, Cockspur Street, S.W.

**WILSON LINE.**—The firm of Beckinton Wilson & Co., founded at Hull, about 1835, b Mr. Thos. Wilson, became a private company i 1891, and has since been conducted by Messrs Charles and Arthur Wilson. Ever since 1845, th firm has held the foremost position in the Balti trade. In 1850 the present mail service betwee England and Sweden was started with the *Courier* 400 tons, and soon developed into a large mail an passenger service to the principal Swedish an Norwegian ports. The St. Petersburg, Riga, an Stettin trades were next included, the *Dido* 1,409 tons, in 1869, being the first departure t the Adriatic, the same year operations bein extended to the Black Sea. In 1875 the New York and Boston trades were entered, and hav been developed into employing the most tonnage the *Toronto*, 6,035 tons, and *Consuelo*, 6,025 tons both twin-screw steamers, being the largest. I 1878 the steamers of Messrs. Brownlow, Mar den & Co. were purchased, and the Hamburg Antwerp, and Dunkirk trades taken up. Con nection with India, which had been maintaine from 1870 to 1875, was resumed in 1883, with a lin between Hull and Bombay, and in 1896 a servic between London and Boston, U.S., was establishe in association with the Furness and Leylan Lines. In 1903 the fleet was acquired of Messrs Bailey & Leetham, Ltd., numbering 22 steamers with a total gross tonnage of 32,497 tons Messrs. Thos. Wilson, Sons & Co., Ltd., are th largest private shipowning concern in the world *Kolpino*, 1,819 tons, is the latest addition 2 steamers building will aggregate 2,450 tons.

Fleet, 89 steamers; 190,439 tons.

*London Agents*, W. E. Bott & Co., 1, Eas India Avenue, E.C.

Our thanks are due to the owners and agents wh have furnished us with information, and also t the Secretary of *Lloyd's Register of British and Foreign Shipping*.

*The figures at the end of the notices refer to the Holiday Guide Supplement, pp. 845-887.]*

EVERYBODY, however good his constitution, needs more than ever in these wear-and-ar times to renew his health-springs periodically by a holiday amidst fresh scenes and ngenial surroundings. The choice of a suitable resort for pleasure or health, recreation or pose, is often difficult; there are so many places to select from in England, Scotland, eland, and Wales whose claims are as evenly balanced as their attractions are diversified. dividual tastes and temperaments greatly vary, but the love of change is universal. Cheap ilway fares, steamboats, motor cars, and bicycles have all contributed to extend the area thin reach of every holiday-maker from which to choose a fresh source of interest. Some cal authorities are keenly alive to the benefits derived from making widely known the vantages of their respective resorts; others are slowly awakening to the necessity of either llowing the example of their progressive competitors or falling behind in importance. To able a preliminary opinion to be formed with as little trouble as possible regarding the sorts which have furnished authentic particulars for this article, a uniform method of esenting the chief characteristics of each place has been adopted. The excellent arrange-nts now made by all the railways to facilitate travelling will do much to stimulate the itish public, "in spite of all temptations to visit other nations," to become acquainted st with the natural beauty-spots throughout their own native country—near-at-hand shrines wards which tourists from every quarter of the globe turn in ever-increasing numbers with er-increasing zest.

**ABERDEEN, Aberdeenshire.** M.B. Pop. ,022. *Means of access:* L. & N.W. Ry., Cale-ian Ry., North British Ry., Great North of otland Ry., and by steamboat. *Location:* m. from London. *Local distances:* 130 m. from Edinburgh. *Elevation:* From 20 ft. 400 ft. *Immediate neighbourhood:* Pasture ds and hilly country. *Aspect:* East and south. *mate:* Equable and bracing, fairly dry. *Sun-ne:* 1905, 1,359·7 hours. *Water supply:* Con-nt. *Drainage:* Modern. *Soil:* Sandy, over-ng granite. *Front:* 2¼ m. fine sandy beach, h esplanade and pavilion, and frequent train vice. *Sea bathing:* Separate. *Baths:* Hot l cold, and Russian. *Excursions:* By rail to side (Balmoral, Braemar, &c.), Donside, den Bay, Stonehaven, Speyside, &c. *Season:* e-September (*see* p. 847).

**ABERYSTWITH, Cardigan.** M.B. Pop. 8,014. *ns. of access:* N., Cambrian Ry.; S., Man-ster and Milford Rys.; from London, L. & V. Ry. and G.W. Ry. *Location:* On shores of digan Bay. *Elevation:* Slightly above sea el. *Immediate neighbourhood:* Hilly and untainous, scored with romantic valleys. *pect:* W. and S.W. *Climate:* Bracing, with able temperature, no fog, and practically no w or frost. *Water supply:* Constant, from olimmon Mountain. *Soil:* Gravelly subsoil. *inage:* Water carriage and efficient. *Sun-ne,* 1,748 hrs., 1905. *Front:* 1½ m. paved menade, marine and south terraces divided beautiful castle grounds. *Pier:* 600 ft.; ilion accommodating 2,000. *Beach:* Sand shingle, the bay broken by picturesque reefs. *bathing:* Three stands, provision for mixed. *hs:* Public sea-water swimming, and private tric and sea-water baths. *Annual fixture:* sh National Agricultural Show, 2nd week . Aberystwith is well provided with facili-for amusements and recreation, and is the of the University College of Wales (420 dents), and the *locale* of the Welsh National rary, containing the most valuable and unique s, in existence (*see* p. 847).

**BINGDON, Berks.** M.B. Pop. 6,500. 6 m. Oxford. *Means of access:* G.W. Ry., River nes steamers during summer. *Aspect:* h. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern; sewage farm 1½ m. away. *Soil:* Gravel. *Baths:* Corporation river swimming. *Season:* June-Sept. Cricket, boating, swimming, golf links—9 holes (*see* p. 847).

**ALDEBURGH, Suffolk.** M.B. Pop. 2,500 (double in summer). *Means of access:* G.E. Ry., *viâ* Saxmundham Junction. *Location:* On coast in between Lowestoft and Felixstowe, 25 m. from Ipswich. *Elevation:* 15 ft. to 70 ft. *Aspect:* E.S.E. *Climate:* Bracing. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel. *Front:* Crag path over 1 m. long. *Beach:* Clean shingle and sand (sea only recedes 60 ft.). *Bathing:* Mixed. A quiet and growing watering-place on the River Alde. Golf links (18 holes); sea and river boating and fishing; good wild-fowl shooting.

**ARDROSSAN, Ayrshire.** Pop. 6,000. *Means of access:* G. & S.W. Ry. and Caledonian Ry., also steamboat service. *Location:* 30 m. from Glasgow. *Elevation:* Sea-level. *Aspect:* West. *Climate:* Dry. *Water supply:* Constant. *Drainage:* Modern. *Piers:* 2. *Beach:* Sand. *Sea bathing:* Not mixed. Tennis and bowling clubs, model yacht club, golf club at Arden (*see* p. 847).

**ARUNDEL, Sussex.** M.B. Pop. 3,100. L.B. & S.C. Ry., 58 m. from London. *Location:* On River Arun, 4 m. inland from Littlehampton. *Elevation:* Lowest, 8 ft.; highest, 104 ft. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk and gravel. *Excursions:* Portsmouth, 28 m.; Chichester, 10½ m.; Bognor, 9 m.; Worthing, 10 m.

Celebrated for its mediæval castle and splendid park (1,200 acres), much frequented by picnic parties. This old-time stronghold, the home of successive Dukes of Norfolk, occupies a bold position on the top of a hill, the town, an agricultural centre, being picturesquely built on the slopes, amidst lovely surroundings; visited annually by large numbers of excursionists. Boating and angling on river.

**ASHTEAD.** Between Leatherhead and Epsom, a pretty village on the borders of Epsom Common. Ashtead Common, an elevated and picturesque tract of 500 acres, is a favourite resort for picnic parties and children's holiday excursions (*see* p. 847).

**AYR, Ayrshire.** Pop. 30,000. *Means of access:* G. & S.W. Ry. and steamers. *Location:* S.W. of Scotland, 40 m. S. of Glasgow, facing the Firth of Clyde. *Soil:* Sandy. *Front:* Sandy beach. *Pier:* 900 ft. *Sea bathing:* Not mixed. *Excursions:* Train, steamer, and coach. *Season:* May to Sept. Golf course, 9 holes; tennis; Lord Eglinton's hounds hunt the locality. The birthplace of Burns, 2 m. S. of the town, is visited annually by large numbers. The Burns Monument cost £3,350, and is a beautiful piece of art by Mr. Thomas Brock, R.A. (*see* p. 847).

**BAKEWELL, Derbyshire.** U.D.C. Pop. 2,805. *Means of access:* Midland Ry. A bracing but sheltered town, 500 feet above sea-level, in the centre of the Peak district. Haddon Hall, 2 m.; Chatsworth, 4 m. *Season:* May–September. Golf links (9 holes); trout fishing; chalybeate spring (*see* p. 847).

**BALLATER.** The Burgh of Ballater, the terminus of the Deeside branch of the Great North of Scotland Ry., lies 42 m. S.W. of Aberdeen in an open plain 700 ft. above sea-level. Normal population 1,300, largely increased in summer. The air is pure and dry, and the climate bracing. The district of Upper Deeside, from Ballater to Balmoral, 8½ m. distant, has long been a favourite resort for tourists and health-seekers (*see* p. 848).

**BANGOR, Co. Down.** Pop.: Winter, 8,000; summer, 20,000. *Means of access:* Rail and steamer from Belfast. *Location:* 10 m. from Belfast, and 6 m. from Donaghadee; built on a hill sloping to the sea. *Aspect:* Northerly. *Drainage:* Modern. *Soil:* Dry, gravelly. *Climate:* Dry, bracing. *Front:* Promenade and gardens extend round bay a distance of 2 m. *Pier:* 900 ft. *Beach:* Sand. *Sea bathing:* Mixed. *Excursions:* Daily, by road, rail, and sea. *Annual fixtures:* Royal Ulster Yacht Club Races, June 18 and 19; Town Regatta, July 15 and 16; hill-climbing motor races, April. Pierrots, concerts, military band promenades (*see* p. 848).

**BARMOUTH, Merionethshire.** U.D.C. Pop. 2,500. 220 m. N.W. of London, on the River Mawddach, at the entrance to Cardigan Bay. Hemmed in by the rugged shores of Cardiganshire and the Carnarvon mountains. Air is bracing; town is sheltered from north and east.

A popular health resort, owing to the salubrity of the climate and the grandeur of neighbouring scenery. Good centre for tourists; coaching (*see* p. 847).

**BARRY, Glamorgan.** U.D.C. Pop. 30,000. *Means of access:* Barry Railway (from London, G.W. Ry.). *Location:* 8 m. from Cardiff. At the end of a peninsula formed by the curve in the Bristol Channel, surrounded by sea to the west, the south, and the east. *Drainage:* Excellent. *Water supply:* Constant. *Bathing:* Safe, with fine stretch of sand. *Excursions:* Fine steamers ply daily to Weston-super-Mare, Lynmouth, Minehead, and Ilfracombe. Golf, cricket, and boating.

**BATH, Somersetshire.** County Borough. Episcopal city. Pop. 49,817. *Means of access:* 107 m. from Paddington, G.W. Ry.; also western main line, Midland Ry. *Location:* 11 m. from Bristol, on N. bank of River Avon. *Elevation:* 60 to 550 ft. above sea-level. *Neighbourhood:* Woodland, hills, and diversified country. *Climate:* Mild, equable, varies according to elevation and aspect. *Sunshine:* 1,541 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Oolithic limestones, clays and sands. *Buildings:* Luxuriously appointed, with every scientific application known to modern balneology. *Mineral waters:* Thermal springs. *Season:* Spring and autumn periods greatest activity.

Bath, situated in a valley and at various levels on slopes of surrounding hills, occupies leading position as fashionable inland watering-place, possessing an unrivalled combination of archæological, historical, social, and scenic attractions besides the famous waters to which it owes its origin; their healing virtues tried 1905 by 100,000 bathers. It was a bathing establishment in the days of the Romans; the wonderfully preserved remains of the city's ancient splendour constitute a unique collection of universal interest. It is now a fine residential city, with excellent educational facilities and railway communications. Corporation own hot and cold spring baths, and grand pump-room (a well-organised centre for musical entertainments), and maintain a city band. Theatre Royal, Assembly Rooms (concerts and balls), Art Gallery, Royal Literary and Scientific Institution (library, reading-room, geological museum), abbey church, and various old buildings. Royal Victoria Park (50 acres), 1¼ m. carriage drive, promenades, lawns, shrubberies, plantations), Sydney Gardens (band performances, flower shows), recreation ground (county cricket, football, cycling), golf (18 holes; ladies' 9 holes—separate clubs), hunting, archery, tennis, boating, angling (*see* p. 848).

**BEAUMARIS, Isle of Anglesea.** M.B. Pop. 2,326. *Means of access:* L. & N.W. Ry. Bangor or Menai Bridge; excellent omnibus service from Bangor; steamer service from Liverpool. *Location:* On the banks of Menai Straits. Bangor 7 m., Menai Bridge 5 m., Carnarvon 13 m. *Aspect:* S. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel. *Pier:* 1,500 ft., pavilion, band. *Beach:* Gravel and sand. *Bathing:* Not much. *Excursions:* Numerous by steamer.

A quiet resort, combining all the essentials of the seaside with the characteristics of an old-fashioned country town. Fine view of white range of Carnarvonshire mountains. Yachting, boating, fishing, golf links, tennis (*see* p. 852).

**BEDFORD, C.B.** Pop. 38,152. Midland R. 50 m.; L. & N.W. Ry., 62¾ m. from London. On the banks of the Great Ouse, the embankment constituting a charming riverside promenade, the river affording opportunities for aquatic pastimes, which are made the most of. Regatta in July; cricket week; golf links (18 holes), hunting, polo; Bedford Park (60 acres); football, tennis, lacrosse, hockey, croquet; Bedford Musical Society; amateur dramatic and operatic society; technical teaching at the "Evening Institution" (*see* p. 849).

**BELFAST.** Pop. 348,000. The capital of Ulster is the chief commercial city in Ireland, noted for its shipbuilding and linen industry and fine harbour. It is situated on the River Lagan, which flows into Belfast Lough. 101 m. due N. of Dublin, and is well served by rail and steamboat services.

Belfast is within easy distance of the Mourne Mountains, in County Down, the Giants' Causeway, and the rocky coast of Antrim, containing some of the grandest scenery in Ulster. Good fishing, several public baths, technical institute, school of art, museum (*see* p. 849).

**BEMBRIDGE, Isle of Wight.** Pop. 1,200. uated N.E. corner of Island, on coast between de and Sandown, adjoining Brading harbour. mitive watering-place; headquarters of Isle Wight Golf Club. Ladies' golf club and sailing b for small craft.

**BETTWS-Y-COED.** U.D.C. Pop. 1,100. At confluence of the Rivers Conway and Llugwy, the borders of the counties of Denbigh and narvon. 4 m. S. from Llanrwst and 17 m. E. Carnarvon. Excellent centre for excursions; uated in lovely scenery on the fringe of owdonia (*see* p. 849).

**BEXHILL, Sussex.** M.B. Pop. 14,000. *Means access:* L.B. & S.C. Ry., *viâ* Croydon, Lewes, Polegate; S.E. & C. Ry., *viâ* Herne Hill, bridge Wells, and Crowhurst. *Location:* coast, 5 m. W. of Hastings, 12 m. E. of tbourne. *Elevation:* From little above sea-el to 147 ft. *Neighbourhood:* Inland, hilly ture lands, coast open. *Aspect:* South. *nate:* Dry, invigorating. *Sunshine:* 1,780 hrs., 5. *Water supply:* Constant. *Beach:* Shingle, lving to sand as tide recedes. *Drainage:* dern. *Soil:* Sandy. *Front:* 2 miles marine ve separates houses from esplanade, built ng top of shore, with ornamental gardens, dstand. *Kursaal* on E. Parade, a building ing 600 (the first of its kind to be erected in gland). Large promenade deck and garden the sea. Daily performances by excellent nestra. Theatrical and other entertainments. taurant. Afternoon tea band. *Bathing:* ed: *Baths:* Salt-water swimming and eral. *Excursions:* Battle Abbey, 8 m.; manhurst, 7 m.; Pevensey Castle, 7 m.; stmonceux Castle, 10 m. *Season:* July–tember; increasing in favour as a winter rt. Electric trams to Hastings.

he old town is inland 1 m., and has ex-ted recently with such rapidity to the e and along it that, under the influence of de la Warr, the population has doubled in last ten years, and the town developed into odern and select family summer resort. levard motor track, ¾ mile along front; lic park, 12½ acres, with tennis lawns and ter garden; golf course (18 holes); Bexhill s of harriers; foxhounds; boating; day and nlight coaching trips; motor and other con-nces; rail and motor service L.B. & S.C. Ry. p. 850).

**IDEFORD, Devon.** M.B. Pop. 8,754. L. & . Ry., 42 m. from Exeter. An ancient and resting seaport town on the banks of the r Torridge, the centre of Kingsley's country.

**ISHOP'S-TEIGNTON** (2 miles from Teign-th), on N. side of Teign Valley, and 200 ft. ve sea-level. Southern exposure, sheltered . by range rising 800 ft.; surrounded by utiful scenery; within easy distance of Dart-r and numerous places of interest (*see* p. 848).

**LACKPOOL, Lancashire.** M.B. Pop. 57,000. *ns of access:* L. & Y. Ry. and L. & N.W. Midland Ry. and Great Central Ry. *Loca-:* On coast between the Ribble and Wyre, . from Preston. *Elevation:* 9½ ft. to 97 ft. *ct:* West. *Climate:* Dry, bracing; freedom fogs. *Sunshine:* 1,759 hrs., 1905. *Water ly:* Constant. *Drainage:* Modern. *Soil:* lay; S., sand. *Front:* 3 miles; N., espla-e and ornamental sloping cliff-face terraces; lat sandy beach. *Piers:* 3, each with dis-ive features. *Beach:* Sands. *Bathing:* Not mixed. *Excursions:* Excellent facilities by sea and rail; network of electric tramways over city and extending N. to Fleetwood, and S. to St. Anne's and Lytham.

Everything is immense, the Great Wheel being 250 ft. high, the Tower 520 ft.; the busy town, which in wet weather can accommodate enormous numbers of excursionists under cover, is one huge permanent pleasure exhibition; its list of entertainment palaces too long to enumerate. All usual waterside pastimes provided; special prominence given to music (orchestral and choral) and dancing (1,000 couples can dance at once on open-air platform or in elegant ball-room). More select spring and autumn thau in August, when sometimes daily invaded by 200,000 toilers from Lancashire and Yorkshire. Golf links, annual cricket week, and musical festival in October (*see* p. 849).

**BOGNOR, Sussex.** U.D.C. Pop. 6,200. L.B. & S.C. Ry., 66 m. from London. *Location:* On coast between Littlehampton and Selsey Bill. *Elevation:* Little above sea-level. *Neighbourhood:* Flat, open. *Aspect:* South. *Climate:* Mild, dry, equable; small rainfall; freedom from frost and fog. *Sunshine:* 1,738 hrs., 1905 (J.P.R.). *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel. *Front:* Paved promenade 1 m. on seawall. *Pier:* 1,000 ft., pavilion, Council band. *Beach:* Smooth, firm sands. *Bathing:* Mixed; shore lined with bathing tents, except in front of houses. *Excursions:* Littlehampton, 7 m.; Selsey Bill, 7 m.; Chichester, 7 m.; Goodwood, 7½ m.; Arundel, 9 m. *Season:* July-September. *Annual fixtures:* July, croquet tournament; Aug., cricket week, regatta, horse and flower shows, various aquatic sports; Sept., tennis open tournament.

Quiet family summer resort and residential town; suitable winter climate for invalids; theatre, assembly-rooms, golf, boating, fishing, hockey, badminton (*see* p. 852).

**BOURNEMOUTH, Hants.** County Borough. Pop. 67,000. *Means of access:* L. & S. W. Ry. (107½ m. from London) and Midland Ry. *Location:* Extreme S.W. coast of Hants, in sheltered bight between Poole Harbour and Christchurch. *Neighbourhood:* Cliffs, pine-woods, valleys, luxurious growth of trees and shrubs. *Aspect:* South. *Climate:* Mild, equable temperature. *Sunshine:* 1,817·2 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sand and gravel. *Front:* High cliffs, covered foliage, intersected rustic paths, broken by deep chines. *Piers:* Bournemouth, 1,238 ft., bandstand, refreshment and newspaper kiosks; Boscombe, 600 ft. *Beach:* Sandy, no currents, double tides render bathing always practicable. *Bathing:* Mixed. *Baths:* Swimming baths, Turkish and electric at Hydros. *Excursions:* New Forest, 15 m.; Corfe Castle, 18 m.; Wimborne, 9 m.; Christchurch Priory, 4 m.; Salisbury, 31 m.; Stonehenge, 38 m. Steamboat excursions to Swanage, Weymouth, Isle of Wight, Southampton, &c. *Seasons:* Winter and summer. *Annual fixtures:* Regatta, cricket week, horse show, chrysanthemum show, tennis, golf, and croquet tournament.

Widely-spread town built within recent years on a heath covered with pines, which surround and permeate the locality, contributing to this fashionable town's position as a health resort, aromatic exhalations from pines benefiting pulmonary complaints. East Cliff (oldest residential

quarter) separated from West Cliff (newest portion, more elevated) by River Bourne. Town extended more inland through valley than along coast. Valley affords maximum protection from wind, laid out 2 miles as public pleasure gardens, stream running through. Here Invalids' Walk, sheltered quiet, sunny promenade.

Municipal orchestra and bands, 2 theatres, winter gardens (vocal and instrumental concerts), Shaftesbury Hall (entertainments, lectures, concerts, gymnasium), free libraries; science, art, and technical schools; drill halls, 3 arcades; boating, fishing, coaching, hunting; 2 golf links, Latheyrick Park and Queen's Park (18 holes; ladies, 9 holes); 3 large parks, provision for all outdoor pastimes; good educational facilities; excellent London railway service, and direct communication Midlands and North. Electric tramways (*see* p. 853).

**BRAY, Co. Wicklow.** Pop. 6,900. Dublin, Wicklow & Wexford Ry. 12 m. S.E. of Dublin. Favourite coast resort, surrounded by exquisite mountain, woodland, valley, and sea scenery. Ornamental esplanade 1 m. long; excellent beach for bathing and boating (*see* p. 852).

**BRIDGE OF ALLAN, Stirlingshire.** Pop. 3,240. Caledonian Ry., between Stirling and Dunblane. An all-the-year-round health resort; sheltered from N. and E. winds. Unsurpassed scenery, natural mineral wells and baths; golf, tennis, bowling, fishing, coaching. Convenient centre for tourists, at the entrance to the Trossachs and Highlands (*see* p. 852).

**BRIDLINGTON, Yorkshire.** M.B. Pop. 15,000. N. Eastern Ry. *Location:* On coast 5 m. S. of Flamborough Head. *Elevation:* 30 ft. to 100 ft. *Neighbourhood:* Agricultural. *Aspect:* South. *Climate:* Bracing. *Sunshine:* Not recorded. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel on clay bed. *Front:* Promenades at different levels 1½ m. along shore. *Piers:* 2 stone piers enclosing harbour of refuge. *Beach:* Sands. *Bathing:* Mixed. *Excursions:* Numerous marine trips. *Season:* April–September. During season Corporation band plays daily.

Bridlington is a gay and growing summer resort, standing on a gentle acclivity in a fine sheltered bay, greatly in favour with North of England industrial centres. The old town with the fine Priory Church is situated 1 m. inland.

Royal Prince's Parade (including Grand Pavilion and Floral Pavilion), Victoria Rooms, new Spa (band, theatre, gardens), People's Palace, Field's Café (band), recreation ground (*see* p. 853).

**BRIDPORT, Dorsetshire.** M.B. Pop. 5,962. *Means of access:* 149 m. from London by G.W.Ry.; coach connections with Lyme (9 m.) and Crewkerne (12 m.) (L. & S.W. Ry. stations). *Elevation:* About 40 ft. *Aspect:* South. *Climate:* Equable. *Water supply:* Constant. *Drainage:* Modern. *Piers:* At harbour entrance. *Season:* July–September.

A seaport for small vessels and quiet watering-place. Golf links, hunting, tennis, boating, fishing.

**BRIGHTLINGSEA, Essex.** U.D.C. Pop. 4,578. 62 m. from London by G.E. Ry. *Location:* On coast, 10 m. from Colchester. *Drainage:* Modern. *Water supply:* Constant, from deep wells. A quiet yachting, boating, and fishing centre.

**BRIGHTON, Sussex.** County Borough. Pop. 127,183. *Means of access:* L.B. & S.C. Ry., 51 m. from London. *Location:* On coast between Newhaven and Worthing. *Elevation:* 26 ft. to 462 ft. *Neighbourhood:* W., flat; E., cliffs; background, high downs. *Aspect:* South. *Climate:* Kemp Town, E., dry, bracing; centre, sheltered, mild; W., see Hove. *Sunshine:* 1,676 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk. *Front:* 4½ m. from Kemp Town to Hove; marine drive between unbroken line of houses and esplanade on sea-wall, with promenade lawns, ornamental terrace-walks, and bandstands; ½ m. covered in. *Piers:* West Pier, 1,100 ft., pavilion; Palace Pier, 1,710 ft., pavilion. *Beach:* Shingle. *Bathing:* Mixed. *Baths:* Exceptionally well supplied with baths of every description for all classes; one chalybeate spring. *Excursions:* Saloon steamships; Paris, 9 hrs., *vid* Newhaven-Rottingdean, 4½ m., by seashore electric railway; Devil's Dyke, 5½ m.; Stanmer Park, 3½ m. Bramber Castle, 10 m.; Hurst, 7 m.; Ditchling Beacon, 7½ m.; good centre for trips by rail or road. *Seasons:* Summer and winter.

Society's liveliest seaside rendezvous; favourite resort of Londoners; large residential population (including many City men), with great educational facilities; noted for the number and importance of its private scholastic establishments. Development of the town due to salubrious location, accessibility to London and resemblance thereto, excellent train services, and its enormous capacity for accommodating and amusing all tastes and all classes all the year round.

Racecourse meetings; golf links, Kemp Town and Devil's Dyke; harriers, foxhounds; coaching; county cricket ground at Hove; numerous parks and recreation grounds (cycle track, cricket, tennis, bowls); boating, fishing; 3 theatres, 2 music-halls; grand aquarium, finest in the country; pavilion, once a royal residence, now used for public amusements and concerts; public library, museum, art galleries, chess-room, &c. (*see* p. 851).

**THE BROADS.** These well-known and mostly shallow lakes, connected by numerous small and navigable waterways, extend over a large area of Norfolk and Suffolk. Easily approached from Lowestoft, Yarmouth, and Norwich, Wroxham station (G.E. Ry.) is a good centre. Favourite holiday grounds for boating, sailing, cruising, fishing, and shooting.

**BROADSTAIRS, Kent.** U.D.C. Pop. 8,100. S.E. & C. Ry., 75 m. from London. *Location:* Between Ramsgate and Margate; connected with both by electric tram service. *Elevation:* About 150 ft. *Neighbourhood:* High cliffs. *Aspect:* S.E. *Climate:* Dry, bracing. *Sunshine:* 1,762 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk. *Front:* Promenade on top of cliff, ornamental gardens, band. *Beach:* Sands. *Bathing:* Mixed. *Excursions:* See Ramsgate and Margate. *Season:* May–September.

The old town is a primitive place with straggling streets; the cliffs, which rise perpendicularly, overlook a cosy little bay and command splendid sea view from the parade. It is rapidly extending into a quiet, select family resort and exhilarating retreat (*see* p. 852).

**BUDE, Cornwall.** Pop. 1,307. L. & S.W. Ry. A small modern watering-place and bracing summer health resort, standing high on the cliff coast between Newquay and Ilfracombe, exposed to the Atlantic breezes (*see* p. 854).

**UDLEIGH SALTERTON, Devon.** U.D.C. . 1,900. L. & S.W. Ry. *Location:* On S. st of Devon, between Sidmouth and Exmouth. *nate:* Mild. *Water supply:* Constant. *inage:* Modern. *Soil:* Gravel. *Beach:* bly. *Sea-bathing:* Mixed. *Excursions:* l, marine, road. *Season:* July–August. iiet watering-place, protected by surrounding s N. and E. ; numerous pinewoods W. ; houses t in terraces running parallel with the sea. (18 holes), tennis, badminton, croquet, trout ng.

**UXTON, Derbyshire.** U.D.C. Pop. 11,000. *ns of access:* Midland Ry. and L. & N.W.Ry. *tion:* Peak of Derbyshire ; 24 m. from Man- ter, 36 m. from Derby. *Elevation:* 1,000 ft. *hbourhood:* Surrounded by hills, in a deep y, through which flows the River Wye. *Cli- e:* Dry and bracing. *Water supply:* Constant. *nage:* Modern. *Soil:* Mountain limestone. *s:* Numerous hydropathic establishments. *ral waters:* Thermal springs, used natural heated. *Excursions:* Rail, coach, and road ; lon Hall, 14 m. ; Chatsworth, 15 m. *Season:* –October ; numerous visitors throughout ear. *Annual fixtures:* Horse show, military nament ; tennis, croquet, and bowling com- ions ; dog show, chrysanthemum show, two neetings.

shionable inland watering-place ; is the st town in England ; importance mainly due rative properties of its springs, 82° Fahr., all the year round, visited annually by bathers. A member of the Cinque Ports; quiet and old-fashioned; summer resort. Grand view passing shipping. Deal boatmen celebrated for life-saving, ship-salving and pilot-landing exploits. Military band; Victoria Concert Hall; Carter Institute. Golf links (18 holes); ladies' course. Depôt R.M.L.I. at Walmer (*see* p. 857).

**DONAGHADEE, Co. Down.** Pop. 2,073. A favourite watering-place 14 m. from Belfast by rail. 5 m. from Bangor. *Pier:* 750 ft., large covered pavilion. *Beach:* Sand, pebbles and rocks. *Season:* May to Oct. Boating, fishing, swimming, golf links (9 holes), harbour; bathing particularly good (*see* p. 860).

**DORKING, Surrey.** U.D.C. Pop. 7,670. *Means of access:* L.B. & S.C. Ry. and S.E. & C. Ry. The town lies in the valley of the Mole on the south slope of the N. Downs. 25 miles from London. *Elevation:* 220 to 450 ft. above sea level. *Aspect:* Southern, under South Downs. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sand and rock. *Baths:* Public swimming and cubicle hot baths. *Annual fixtures:* Dorking cattle and pleasure fairs, Wednesday and Thursday in Ascension week. Golf links (9 holes), golf club, tennis, cricket, choral societies, town band. Dorking Vale is noted for its pastoral scenery (*see* p. 857).

**DOVER, Kent.** M.B. Pop. 45,000 (estimated). S.E. & C. Ry., 72 m. from London. *Location:* Close to South Foreland in main valley of chalk hills. *Elevation:* Seashore little above sea level; valley extends inland between considerable heights. *Neighbourhood:* Chalk cliffs; back-

ground, hills. *Aspect:* South. *Climate:* Bracing, dry. *Sunshine:* Not recorded. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk. *Front:* Marine drive top of beach separates houses from esplanade, mile long. Admiralty Harbour enclosing 610 acres arm, sunk breakwater. Admiralty Pier, original portion 1,800 ft. long, for rail and Channel steamer traffic, upper portion promenade; Prince of Wales Pier for ocean traffic; Promenade Pier, 900 ft., band, pavilion, reading-room. *Beach:* Shingle and sand. *Bathing:* Mixed. *Baths:* Swimming, general, medical, Turkish. *Excursions:* Folkestone, 7 m.; Canterbury, 15 m.; Deal, 8 m.; Calais, 25 m.; Ostend, 68 m. *Annual fixture:* Yachting week and cricket week.

The premier Cinque Port; of great historic interest; garrison town (4,000 soldiers), watering-place (best possible view of passing shipping), seaport (American and other ocean liners call), Continental packet station (Calais and Ostend), pilot station. Excellent railway service; constant mail and passenger traffic to and from Continent and the East. On East Cliff, 320 ft. high, is the castle—great attraction; opposite heights are barracks and Shakespeare Cliff, 365 ft. Convenient centre for inland coasting and Continental excursions. Residential town, containing many retired military and professional men; good educational facilities. Theatre Royal, Connaught Hall (balls, concerts), Connaught Park (recreation corner for children), Corporation athletic ground, 8 acres (pavilion, cycle track, cricket, football, tennis); The Danes (football, hockey, &c.), Granville Gardens, Corporation band, golf links (9 holes), hunting, coaching, boating, fishing, gymnasium, museum, technical institute, school of art, Dover Sciences Society, electric trams (*see* p. 858).

**DROITWICH, Worcestershire.** M.B. Pop. 4,200. *Means of access:* G.W. Ry. and Midland Ry. *Location:* 6½ m. from Worcester, 13½ m. Malvern. *Elevation:* 129 ft. *Neighbourhood:* Undulating woodland. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Rich loam. *Baths:* Well-appointed bathing establishments and brine swimming baths. *Mineral waters:* Powerful brine springs, seven times stronger than the sea, beneficial for sciatica, rheumatism, &c. *Season:* Easter to Oct.; baths open all the year.

The town, centre of salt industry, lies in fertile valley watered by the Salwarpe; as a health resort is noted for curative properties of its brine-laden springs. Band during season; golf links (9 holes), park, hockey, badminton, tennis, boating, angling, hunting (2 packs) (*see* p. 858).

**DUBLIN,** the capital city of Ireland, stands at the extreme western end of the beautiful Bay of Dublin, close to the mouth of the River Anna Liffey, along both north and south banks of which the city extends for 2 m. Pop. 291,190. It is 69 m. W. of Holyhead and 292 m. W.N.W. of London. The climate of Dublin is free from extremes of heat and cold, with a moderate rainfall. **Phœnix Park** is 1,760 acres in extent, about 7 m. in circumference, and contains The People's Park, cricket and polo grounds, review grounds, racecourse, &c.; also the viceregal lodge and grounds, the zoological gardens, military hospital, &c., &c. *Annual fixture:* Horse Show in Aug. In 1907, the International Exhibition will be opened in a magnificent building erected for the purpose at Balls Bridge (*see* p. 858).

**DUMFRIES.** County town. Pop. 13,241. 33 m. from Carlisle, 325 m. from London. One of the oldest and most interesting towns in Scotland. The most notable local object is the Burns Mausoleum. Centre for charming Solway Firth excursions (*see* p. 860).

**DUNOON, Argyllshire.** A popular Clyde watering-place. Pop. 7,000 winter, between 30,000 to 40,000 in summer, when over 100 steamers call at pier daily. *Aspect:* South and east. *Climate:* Mild. *Drainage:* Modern. *Soil:* Gravel. *Season:* June to Sept. *Annual fixtures:* Royal Clyde Yacht Club races, June, July, and Aug. Fishing, boating, yachting (*see* p. 858).

**EASTBOURNE, Sussex.** M.B. Pop. 46,500. L.B. & S.C. Ry., 62 m. from London. *Location:* On coast between Brighton and Hastings, E. of Beachy Head extremity of the South Downs. *Elevation:* From 4 ft. below (E.) to 140 ft. above (W.). *Neighbourhood:* W., hilly; E., flat, pastoral. *Aspect:* South-east. *Climate:* Mild, invigorating, moderate rainfall, open to breezes from sea and Downs. *Sunshine:* 1,680 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Mostly chalk or sandstone. *Front:* 3 m. (shops excluded), ornamentally arranged in terraces at three levels on sea-wall; marine drive between topmost promenade and houses. *Pier:* 1,000 ft., pavilion, daily entertainments, Sunday concerts, bathing, fishing, marine trips, saloon steamers. *Beach:* Shingle; flat sands as tide recedes. *Bathing:* Mixed. *Baths:* Salt-water swimming, Turkish, &c. *Excursions:* Excellent facilities, rail and road (motors, *chars-à-bancs*, &c.); Beachy Head, 3 m.; Pevensey Castle, 5½ m.; Hurstmonceux Castle, 9 m.; Battle Abbey, 16 m. *Season:* June–Sept. *Annual fixtures:* Regatta, cricket week, hunt ball, flower show, tennis tournament, Mayor's ball, Volunteer ball.

The old portion lies 1½ m. from sea on the E. slopes of Beachy Head, which rises 550 ft. and shelters the town, which extends E., N., and along shore. Trees have been planted profusely in many streets. Motor omnibuses; free library, technical institute, public park (82 acres of woodland), municipal band, theatre, 2 golf links (18 holes), polo, hunting (foxhounds and harriers), coaching, boating, fishing and angling, good cycling roads, gymnasium, the Saffrons (cricket, football, tennis). *Devonshire Park:* 11 acres, favourite centre for music and sports; contains theatre, concert garden, cricket ground, cycle track, tennis courts, skating rink, and large swimming baths; the illuminated fêtes and athletic sports are great attractions. *Beachy Head:* 3 m. to summit; magnificent sea views and inland panorama; footpath and carriage drive, coastguard station, and hotel (*see* p. 859).

**EDINBURGH.** Pop. 300,000. North British Ry. and Caledonian Ry. The winter temperature is the same as in London; summer temperature lower. Public parks, gardens, and meadows occupy 1,180 acres, of which about 180 acres are available for games. Edinburgh possesses a picturesque beauty quite unrivalled. Tourists from all parts of the world are attracted to the metropolis of Scotland by its historical associations with Queen Mary, John Knox, and Sir Walter Scott. Besides the castle, Holyrood Palace, Burns Monument, and John Knox's House, are many historic buildings, museums, libraries, and a celebrated University. Liberton, 3 m. S. of Edinburgh, connected by train service, is open, elevated, healthy (*see* p. 861).

**EPSOM, Surrey.** U.D.C. Pop. 16,000. *Means of access:* L. & S.W. Ry., and L.B. & S.C. Ry. Distance from London, 14 m. *Immediate neighbourhood:* Epsom and Banstead Downs. *Climate:* Bracing. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk, gravel, and some clay. *Annual fixtures:* Spring and summer race meetings. Golf links (18 holes), cricket club, recreation ground, fishing.

Epsom is an important market town situated on the western side of Banstead Downs (*see* p. 861).

**EXETER, Devon.** City and County. Pop. 47,185. L. & S.W. Ry. and G.W. Ry. *Location:* On the E. bank of the Exe. *Elevation:* From 26 ft. to 434 ft. above sea-level. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Red sandstone. *Baths:* Swimming bath and public bathing-place. Excursions to Dartmoor, Exmoor, and Devon watering-places. *Annual fixtures:* Meeting of British Medical Association July to August, 1907. *Amusements:* County football and cricket grounds, fishing, boating, bathing, golf links (9 holes) (*see* p. 861).

**EXMOUTH, Devon.** U.D.C. Pop. 10,848. L. & S.W. Ry., 10 m from Exeter. *Elevation:* Sea-level to 500 ft. *Neighbourhood:* Moorland. *Aspect:* South-west. *Climate:* Mild. *Water supply:* Constant, soft. *Drainage:* Modern. *Soil:* Gravel subsoil. *Front:* 1½ m. level promenade. *Beach:* Sands; also small shingle. *Bathing:* Mixed. *Excursions:* Numerous, by steamer. *Season:* July–Sept. *Annual fixtures:* Tennis tournament, athletic sports (September). Facilities for amusements and recreation numerous and various, including croquet, cricket, and golf, bowls, hunting (*see* p. 862).

**FALMOUTH, Cornwall.** M.B. Pop. 11,789. *Means of access:* G.W. Ry. and by coasting steamship service. *Location:* On south side of Falmouth harbour, 15 m. N.N.E. of the Lizard. *Elevation:* Little above sea-level. *Neighbourhood:* Wooded hills. *Aspect:* North-east upon an arm of the sea 10 m. in circumference. *Beach:* Shingle, sand as tide recedes. *Climate:* Temperate, equable. *Sunshine:* 1,616 hrs., 1904 (J.P.R.). *Season:* Summer and winter. Seaport town and watering-place on the S.W. bank of the River Fal, 8 m. below Truro, with a magnificent harbour and excellent facilities for yachting and boating. Trees have been planted in many streets. Pier, bathing, park, marine drive. River and sea excursions (*see* p. 863).

**FAREHAM JUNCTION.** L. & S.W. Ry. 76¼ m. from Waterloo, *via* Cosham, 84¼ m. *via* Eastleigh. Is a market town and seaport. Portsdown Hill is the site of commanding fortifications connected with the defences of Portsmouth. Magnificent marine and land views (*see* p. 861).

**FELIXSTOWE, Suffolk.** U.D.C. Pop. 7,207. *Means of access:* G.E. Ry.; steamers from London Bridge, Ipswich, Yarmouth, and Continent *viâ* Harwich. *Location:* On coast, 5 m. E. of Harwich, 12 m. from Ipswich. *Elevation:* From little above sea-level to 60 ft. *Neighbourhood:* Cliffs. *Aspect:* South. *Climate:* Bracing; mild autumn and winter. *Sunshine:* 1,802·1 hrs., 1905 (J.P.R.). *Water supply:* Constant. *Drainage:* Modern. *Front:* Promenade 2 m. along top of beach and top of cliffs. *Pier:* ½ m., pavilion to be built. *Beach:* Shingle; sand as tide recedes. *Bathing:* Mixed, mostly from wooden tents, which line shore. *Excursions:* By steamers; each way along coast and up river Orwell to Ipswich. *Seasons:* Easter and June–September. *Annual fixtures:* Lawn tennis (East of England championships), cricket week, two croquet tournaments, at Whitsuntide and August, regatta. A quiet, fashionable, modern-built watering-place. Golf links (9 holes), boating, sailing, &c., pack of foot beagles in winter (*see* p. 861).

**FILEY, Yorkshire.** U.D.C. Pop. 3,003. N.E. Ry. *Location:* On coast in between Scarborough (8 m.) and Bridlington (13 m.). A quiet, bracing watering-place in a fine bay with extensive sands, and a rocky promontory called Filey Brigg jutting out ½ m. into the sea. Boating, excellent fishing, good bathing, golf (9 holes).

**FOLKESTONE, Kent.** M.B. Seaport. Pop. 30,094. S.E. & C. Ry., 70 m. from London. *Location:* 7 m. W.S.W. Dover. *Elevation:* Old town (adjoining harbour) lies between two cliffs, upon which modern portion is built, protected N. by hills; some houses along shore under cliff. *Neighbourhood:* Chalk cliffs, high downs behind. *Aspect:* S. and S.E. *Climate:* Dry, equable; more or less mild, according to elevation. *Sunshine:* 1,697¼ hrs., 1905 (J.P.R.). *Water supply:* Constant. *Drainage:* Modern. *Soil:* Greensand. *Front:* Principal promenade, where band plays, called The Leas, extends 1¼ m.; top of cliff, 150 ft. high; widespread view of shipping; greensward separates carriage drive from asphalted footway. *Beach:* Shingle; boating, fishing (anchoring, Hythe Canal). *Bathing:* Mixed; improved Pullman cars on rails. *Baths:* Swimming Turkish, &c. *Pier:* 680 ft.; pavilion. *Harbour:* 14 acres. *Excursions:* Shorncliffe Camp, 2 m.; Sandgate, 2 m.; Hythe, 5 m.; Dover, 7 m.; Canterbury, 16 m.; Boulogne, 28 m. *Season:* July–September. *Annual fixtures:* Regatta, military and tennis tournaments.

Fashionable, select resort; residential town; excellent railway facilities, 1½ hrs. from London; animated scenes in harbour; piers enclosing it attract promenaders. S.E. & C. Ry. cross-Channel packets afford opportunities for Continental excursions; military element furnishes additional liveliness; plenty of good music; theatre; pleasure grounds; pavilion; cricket, archery, croquet, hockey, lawn tennis, roller skating; Leas Pavilion Ladies' Orchestra; switchback railway; medical gymnasium; golf links (9 holes); racecourse; East Kent Hunt; polo; Radnor Park, 20 acres; free library, museum (*see* p. 862).

**FOWEY, Cornwall.** Pop. 2,258. G.W. Ry. Situated on coast, amid picturesque surroundings and bold cliffs. Climatically and geographically occupies intermediate position between Penzance and Torquay. Protected from E. Favourable winter conditions. Harbour; boating (*see* p. 862).

* **FRESHWATER, Isle of Wight.** Pop. 3,306. In S.W. corner of the Island, on the coast, a little N. of the Needles. The old village has extended S. to Freshwater Gate, where there is a small tract of sands; also N.W. to Totland Bay, where there is a pier; secluded watering-place. Golf Links on Needles Downs and on Ofton Downs with Club Houses. *Sunshine:* 1,702 hrs., 1904 (*see* p. 862).

**FRINTON-ON-SEA, Essex.** Pop. 648. G.E. Ry. 70 m. from London. 4 m. N.E. of Clacton. *Aspect:* S.S.E. *Front:* Green sward, 1½ m.

long, 900 ft. wide. Bathing, boating, fishing, golf links (18 holes).

**GALWAY**, co. Galway. Pop, 13,800. Midland Gt. Western of Ireland Ry. One of the most interesting towns in Ireland, with a fine bay and harbour; bracing air; bathing; lake, salmon and trout fishing; excellent scenery. Excursions to Arran Island, Lough Corrib, Connemara. Theatre, pier, promenade; races August. Bazaar, race week.

**GLASGOW**, Lanarkshire. Pop. 781,000. *Means of access: West Coast Route*, L. & N.W. Ry., joining the Caledonian at Carlisle; *Midland*, joining the Caledonian at Carlisle; and *East Coast Route*, G.N. Ry., N.E. Ry., and N.B. Ry., *vid* York, Berwick, and Edinburgh. Glasgow, the second largest city in the United Kingdom, has a world-wide reputation for its shipbuilding and other industries. To tourists it offers a most convenient centre for visiting Scotland. The beauty spots of the Clyde, on which the city is situated, and the Burns country are easily accessible by rail and steamer. Every variety of steamship pleasure trip is available during the summer season. The city is well supplied with places of amusement, tramway cars, 'buses, parks, libraries, and fine art galleries, and a university, designed by the late Sir G. Gilbert Scott, which cost over £500,000 (*see* p. 862).

**GLOUCESTER.** Cathedral city. Pop. 55,000 (1906). *Means of access:* Midland and G.W. Rys. 114 m. from London. *Elevation:* 63 ft. above sea-level. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel and clay. *Baths:* Corporation, swimming, and Turkish. *Mineral waters:* Saline and sulphurous springs at the Gloucester Spa. *Excursions:* Gloucester is a convenient centre for visiting the Cotswolds and Malvern Hills, the Forest of Dean, and the Wye Valley. Good hunting, boating, fishing, golf (*see* p. 863).

**GRANGE-OVER-SANDS**, Lancashire. U.D.C. Pop. 1,996. *Means of access:* L. & N.W. Ry. and Midland Ry. *vid* Furness Ry. *Location:* On W. shore of Morecambe Bay. 9½ m. from Carnforth. *Aspect:* Southerly. *Climate:* Mild. *Seasons:* Easter to Whitsuntide and August–Sept. *Excursions:* To English Lakes by rail and road. A quiet, sheltered, watering-place and health resort with great natural attractions. Golf (9 holes). *Pier:* Promenade, 1¾ m. in length (*see* p. 863).

**GREYSTONES**, co. Wicklow. Pop. 1,000; trebles in summer. On coast, 5 m. from Bray. Recently developed from a fishing village into a modern watering-place, with a combination of sea and mountain air, dry and bracing. Bathing; sea fishing; golf links (9 holes). Lawn tennis and croquet.

**GUERNSEY**, Channel Islands. Pop. 41,000. *Means of access:* G.W. Ry., *vid* Weymouth; L. & S.W. Ry., *vid* Southampton. *Location:* Off French coast, 64 m. from Weymouth, 97 m. from Southampton, 13 m. N.W. of Jersey. *Beach:* Rock-bound, sandy bays. *Sunshine:* Average 2,000 hrs. Well supplied with facilities for excursions, amusement, and recreation. Excellent sea-fishing. Golf (18 holes), natural bunkers. The island is circled by the Gulf Stream, and frost is very exceptional. The climate is mild, moist, with a stretch of bracing weather frequently in spring; the slope of the land is towards the East.

**GUILDFORD**, Surrey. M.B. Pop. 22,000. *Means of access:* L. & S.W. Ry., L.B. & S.C. Ry., S.E. & C. Ry. 30 m. S.W. from London. *Elevation:* 500 ft. *Aspect:* South. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk and gravel. *Annual fixtures:* Agricultural show, chrysanthemum show, fanciers' show, county ball. Boating, golf (18 holes), and 18 holes course for ladies, tennis, cricket, football, pleasure grounds with bands and illuminations.

This ancient town is situated on the River Wey amidst fine scenery (*see* p. 865).

**HARROGATE**, Yorkshire. M.B. Pop. 32,000. N.E. Ry. *Location:* 18 m. N. of Leeds, 20 m. W. of York. *Elevation:* 320 ft. to 600 ft. *Neighbourhood:* Open moorlands. *Climate:* Bracing, dry, clear air. *Sunshine:* 1,675 hrs., 1905. *Water supply:* Constant, soft. *Drainage:* Modern. *Soil:* Alluvial, grit and shale. *Baths:* Numerous large establishments open all the year round, providing complete modern installations, embracing hydropathic, vapour, heat, light, Peat Plombière swimming baths, and other treatments. *Mineral waters:* About 80 varieties of medicinal springs in a small area, one group sulphur, the other iron. *Excursions:* York and Ripon (cathedrals); Bolton, Fountains, and Kirkstall Abbeys (ruins); Harlow Moor.

Fashionable, select spa and inland resort, celebrated for its mineral springs and bathing palaces; presents many attractions to health-seekers and visitors. Higher Harrogate, open and bracing; Lower Harrogate, milder and sheltered; favourite town for valetudinarians, invalids, and the retired, also a scholastic centre; claims exemption from high summer and low winter temperatures; good facilities for open air exercise; 24 miles asphalted and flagged footpaths, besides 8 miles smooth gravel walks for bath chairs and pedestrians; the Stray, a verdant public common of 200 acres, intersects the town, and is well laid out to retain its rural charms; the Valley Gardens, Royal Spa Gardens, and Winter Gardens (Royal Baths) afford sheltered recreation in all weathers; the Kursaal, Royal Spa concert-rooms, and gardens are owned by the Corporation, who maintain a military band and an orchestra; covered promenade for water-drinkers; opera house; tennis, lacrosse, golf (18 holes); fox-hunting; coaching; cycle bath chairs; swimming baths; free library (*see* p. 863).

**HARWICH** and **DOVERCOURT**, Essex. M.B. *Means of access:* G.E. Ry.; steamers in summer from London Bridge. (**Harwich.** Pop. 10,017). (**Dovercourt.** Pop. 3,892): A modern suburb of Harwich, lies on rising ground a little S.W., and has developed into a quiet select watering-place. *Aspect:* South. *Climate:* Dry, bracing, open to North Sea breezes. *Beach:* Sands. *Bathing:* Mixed. *Mineral waters:* Chalybeate spring; a spa house fitted with pump room; library, and reading room. *Excursions:* River and sea trips. *Season:* June–October. *Annual fixtures:* Athletic sports (Easter, also August), flower show (August). A sea-wall and esplanade runs 2 m. from Harwich to end of Dovercourt, the slopes of the low cliffs being laid out in gardens, where Corporation band plays.

Harwich is a seaport with a fine natural harbour; the centre of a great fishing industry; a naval and military station. Golf links (9 holes) have been recently laid out at Parkeston, about 1 m. away (*see* p. 858).

**HASLEMERE, Surrey.** 43 m. from Waterloo. L. & S.W. Ry. Pop. 2,700. *Location:* Between Godalming and Petersfield. *Elevation:* 350 ft., rising to 900 ft. at Hindhead. 3 m. from Haslemere Railway Station. *Neighbourhood:* Open; extensive stretches of heather and pine-trees. *Climate:* Dry, bracing, no fogs. *Soil:* Sand or gravel, clay towards E. King's Sanatorium erected on Lud's Common between Haslemere and Midhurst; district specially recommended for tuberculosis patients. Good cycling roads; hunting; fishing. Golf links (18 holes) at Hindhead, 3 m. (*see* p. 865).

**HASTINGS AND ST. LEONARDS, Sussex.** C.B. Pop. 66,810. *Means of access:* S.E. & C. Ry., *viâ* Sevenoaks, Tunbridge Wells and Battle. L.B. & S.C. Ry., *viâ* Croydon, Lewes, and Polegate. *Location:* On coast between Pevensey Bay and Rye Bay. *Elevation:* 20 to 400 ft. *Neighbourhood:* Cliffs, undulating pasture-lands. *Aspect:* South. *Climate:* Sea-front under overhanging cliff, mild; hillsides and cliff tops, more bracing; valleys running inland, sheltered and warm. *Sunshine:* 1,744 hrs., 1905. *Water supply:* Constant, soft. *Drainage:* Modern. *Soil:* Sandstone. *Front:* 3 miles on sea-wall, wood-paved marine drive between houses and asphalted esplanade with bandstands. *Piers:* Hastings, 900 ft., pavilion (2,000 persons); St. Leonards, 900 ft., pavilion shore end (800). *Beach:* Shingle, shelving to sand as tide recedes. *Bathing:* Mixed. *Baths:* Large swimming, Turkish and general establishment under Parade; family bathing all the year round. *Excursions:* Saloon steamships constwise and across Channel. Fairlight Glen (599 ft.), 2¼ m.; Battle Abbey, 6 m.; Normanhurst, 7 m.; Pevensey Castle, 12 m.; Hurstmonceux Castle, 14 m.; numerous other opportunities by rail and road. *Seasons:* Summer and winter. *Annual fixtures:* Flower and dog shows; cricket week, croquet tournament, regatta, sea-fishing festival.

The premier Cinque Port; one of the oldest towns in England; situated amidst historical surroundings. An unrivalled watering-place for the fragile and sick; a holiday resort lively throughout the year and visited by all classes; residential town within 1¾ hrs. of London; and important educational centre.

Town band, theatre, music-hall, concert-hall, museum, Alexandra Park (72 acres), 3 public gardens, recreation ground (6 acres; county cricket), tennis courts, 2 golf links (18 holes), archery, foxhounds, harriers, sea-fishing, boating, pleasure yachts, motor omnibuses, electric trams (overhead system) (*see* p. 864).

**HAYLING ISLAND.** Pop. 1,324. 83 m. from London. *Means of access:* L.B. & S.C. Ry. branch line from Havant; steam ferry from Southsea.

A quiet, secluded, rural watering-place, opposite Havant Station, between Southsea and Chichester (*see* p. 830).

**HAYWARD'S HEATH.** U.D.C. Pop. 3,717. L.B. & S.C. Ry., 37 m. from London. *Drainage:* Modern. High situation. Within easy reach of three packs of hounds. Golf Links (18 holes), athletic, bowling, cricket, football, and hockey clubs (*see* p. 865).

**HAVANT** is a small market town 5 m. from Hayling Island, connected by a branch service (L.B. & S.C. Ry.). The town possesses a handsome parish church of early English design. Havant is celebrated for its growth of roses. Leigh Park is open to the public for picnic parties (*see* p. 865).

**HENLEY-ON-THAMES, Oxfordshire.** Pop. 5,984. G.W. Ry., 35½ m. from London; 9 m. from Reading. This delightful up-river resort is noted for its annual regatta, held early in July. In addition to rail facilities for excursions, steamers run daily in summer to Oxford and Kingston. Houseboats are numerous, and bungalows increasing. Naturally the centre of attraction is the river, which increases each year in favour with holiday makers (*see* p. 865).

**HEREFORD,** Cathedral City. Pop. 21,382. On the river Wye. *Means of access:* G.W. Ry., L. & N.W. Ry., and M. Ry., 114 m. from London. *Elevation:* 144 ft. *Climate:* Warm and equable. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel. The city, in the centre of the county, served by 3 railway companies, affords very convenient headquarters for tourists making excursions by cycle, motor, boat, or rail. There is much to interest many visitors in the history and architecture of the noble cathedral. Golf course (9 holes), hunting, fishing, shooting, boating, hockey, tennis. Hereford Musical Festival held triennially. Admirable sketching ground for artists (*see* p. 865).

**HERNE BAY, Kent.** U.D.C. Pop. 8,500. S.E. & C. Ry., 63 m. from London. *Location:* 5 m. E. of Whitstable and 8 m. N.E. of Canterbury on the N. coast of Kent. *Elevation:* A few feet above sea-level. *Neighbourhood:* Undulating, downs and woods. *Aspect:* North. *Climate:* Bracing, keen dry air, low rainfall. *Water supply:* Deep spring wells; constant. *Drainage:* Modern. *Soil:* Principally clay. *Front:* Asphalted and well-planted esplanades, 1 m. along top of beach separates marine drive from houses. *Beach:* Shingle; sand as tide recedes. *Bathing:* Mixed. *Pier:* ¾ m. long; electric tram, pavilion. *Excursions:* Steamboats to Southend, Margate, Ramsgate. *Local Distances:* Canterbury, 8 m.; Reculvers, 4 m.; Margate, 16 m. *Season,* June–September.

A quiet family watering-place, modern built, within 2 hours of London. Open to German Ocean breezes. No land fogs. Vegetation abundant. Fine view of shipping up and down Thames estuary. Recreation ground. Good bands, cricket, tennis, hockey, golf links (18 holes) now being extended, boating, fishing, stream angling, shooting. Excellent roads (*see* p. 865).

**HORSHAM, Sussex.** U.D.C. Pop. 11,500. L.B. & S.C. Ry., 36 m. from London Bridge. An important agricultural town noted for its surroundings, which afford exceptional attractions to picnic parties and pedestrians; is beautifully situated on a tributary of the river Avon. Christ's Hospital (West Horsham) and grounds are about 2 m. distant. Good fishing, hunting, and shooting. The beauty of the rural surroundings, which include the woodland tracts of St. Leonard's Forest, attracts large numbers of cyclists, &c. *Annual Fixtures:* Flower Show (Sept.), fat stock show (Dec.); foxhounds, staghounds; numerous fairs; frequent cricket matches (*see* p. 867).

**HOVE, Sussex.** M.B. Pop. 40,100. L.B. & S.C. Ry., 52 m. from London.

Situated on a chalk slope facing S. on the west of Brighton, which it joins. *Air:* Dry. *Climate:* Specially equable September–March. Extensive lawns and esplanades on sea-front.

Mixed bathing. Patronised by aristocracy autumn and winter. Close to South Downs and Devil's Dyke. 70 acres of parks and pleasure grounds, lawn tennis, golf, boating, fishing, cycling, Sussex County Cricket Ground (*see* pp. 851 and 867).

**HUNSTANTON, Norfolk.** U.D.C. Pop. 1893. *Means of access:* G.E. Ry. *Location:* On coast between Cromer and Kings Lynn, within 8 m. of Sandringham, the Norfolk residence of H.M. the King. *Aspect:* Westerly. *Soil:* Chalk. *Pier:* 800 ft., with Pavilion. *Beach:* Sand. *Bathing;* Mixed. *Water:* Pure and plentiful. *Climate:* Bracing: air of exceptional purity and dryness, highly charged with ozone.

Hunstanton's long stretch of firm, clean sand is recognised as the children's paradise. Entertainments in the Pier Pavilion and on the Esplanade. Recreation Ground of 14 acres, 9 tennis courts, cricket pitch, football and hockey grounds, croquet and bowl lawns (*see* p. 866).

**HYTHE, Kent.** M.B. Pop. 5,600. S.E. & C. Ry. 67 m. from London. On coast. 5 m. W. of Folkestone. *Climate:* Dry, bracing; small rainfall. *Front:* Parade on sea-wall extending to Sandgate. *Beach:* Shingle. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Greensward. *Sea Bathing:* Mixed. *Aspect:* South.

A Cinque Port; quiet, select watering-place, built along shore, foot of cliffs. Golf links (18 holes, 2 courses), boating on Royal Military Canal, bathing establishment, Government School of Musketry; cricket week, August (*see* p. 867).

**ILFRACOMBE, Devon.** U.D.C. Pop. 9,000. *Means of access:* L. & S.W. Ry., *vid* Exeter; G.W. Ry., *vid* Taunton; connections with Midlands *vid* Bristol. *Location:* In N.W. corner of Devon, on S. shore of Bristol Channel. *Elevation:* From 50 ft. to 600 ft. *Neighbourhood:* Open, undulated fertile country. *Aspect:* North-west, north, and north-east. *Climate:* Mild and equable, invigorating; possesses one of the mildest winter climates in England. *Water supply:* From Exmoor Forest: constant. *Drainage:* Modern, new. *Soil:* Shale, light soil over sandstone and grit. *Front:* Parade, rocky terraces, cliff walks. *Pier:* 600 ft. along shore; pavilion. *Beach:* Rock-bound, interspersed with sandy coves and pebbly nooks. *Bathing:* Mixed. *Baths:* Salt-water swimming and general. *Excursions:* A fleet of pleasure saloon steamers run daily in summer to Bristol Channel ports, forming a connecting link with Midlands *vid* Sharpness; also daily coaching trips. Lynton and Lynmouth, 18 m.; Combe Martin, 5 m.; Woolacombe, 6 m.; Bideford, 23 m.; Clovelly, 35 m.; Westward Ho, 27 m.; Lundy Island, 21 m. *Season:* June–September. Band plays all the year round; winter visitors increasing. *Annual fixture:* Out of doors sports authorised by Council.

Quiet favourite resort and excellent excursion centre—coaching rail and sea; built in sheltered valleys and hillsides at various heights, protected from sea by towering headlands, around which wind terrace promenades, rock walks overhang the sea, and paths zig-zag to the summit. Grand scenery; shipping pass close. Lantern Hill, 100 ft.; Capstone Hill, 200 ft.; Hillsborough, 447 ft. (at foot is haven forming the harbour), and the Tors, 600 ft. (curious sequence of seven hills). Two theatres, band, Victoria pavilion (concerts twice daily during season), golf (9 holes), tennis, croquet, bowls, fishing and angling, shooting (*see* p. 866).

**ILKLEY, West Riding of Yorkshire.** U.D.C. Pop. 7,455. *Means of access:* Midland Ry. N.E. Ry., and G.N. Ry., *vid* Leeds. *Location:* Wharfedale, 16 m. from Leeds. *Elevation:* 225 to 1,340 ft. *Climate:* Bracing. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sand loam. *Baths:* All descriptions, numerous large hydro establishments. *Mineral waters:* Chal[illegible] beate[illegible]

A fashionable moorland health resort, with good facilities for excursions, amusements, and recreations (*see* p. 867).

**INSTOW, Devon.** Pop. 634. L. & S.W. Ry. 217½ m. from London. Opposite Appledore 3 m. from Bideford, at the junction of the Taw and Torridge. A quiet little watering-place with firm extensive sands, the favourite resort of children from Barnstaple, Bideford, &c. (*see* p. 867).

## ISLE OF MAN.

**DOUGLAS.** Pop. 23,000. *Means of access:* Steamers from Liverpool (about 3½ hours' passage), and various other parts in England Ireland and Scotland. *Aspect:* East. *Water supply:* New system. *Drainage:* Modern. *Front:* 2½ m. of promenade fringing the crescent shaped bay. *Piers:* Three. *Beach:* Firm sands. *Sea Bathing:* Not mixed. *Excursions:* Numerous by steamboats. *Season:* From Whit week to end of September. *Annual fixtures:* Annual Promulgation of Laws on Tynwold Hill, on 5th July. Motor Tourist Trophy race September. Yachting, golf links (9 holes), fishing, coaching, tennis, bowls, mountaineering, two theatres, two large ball-rooms, opera house, two variety halls, hippodrome, bands, &c. (*see* p. 857).

**RAMSEY.** The second town in the Island (pop. 4,672), possesses probably the finest bay in the British Isles. *Sands:* Perfect. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravelly. Close to the finest beauty spots in the Island. Good boating, sailing, fishing, golf, &c. Mineral waters; powerful brine springs, beneficial for rheumatism, and a marine lake and well-appointed open air baths; 16 m. north of Douglas by railway and electric tram. *Climate:* Bracing. *Season:* July, August and September.

**THE ISLES OF SCILLY, Cornwall.** Pop. 2,000. *Access:* By steamer (40 m.) from Penzance. *Location:* 30 m. from Land's End. *Climate:* Warm, equable and humid; tropical vegetation. *Sunshine:* 1770·1 hrs., 1905.

A group of 150 rocks, only 5 being inhabited; St. Mary's, the largest, 9 m. in circumference, situated in the Atlantic, directly in the course of the Gulf Stream.

**JERSEY.** The largest of the Channel Islands, 13 m. S.E. of Guernsey (*see* p. 758). Pop. 52,576. *Capital:* St. Helen. Pop. 28,000. *Means of access:* G.W. Ry., *vid* Weymouth; and L. & S.W. Ry., *vid* Southampton. *Location:* 15 m. from coast of Normandy, 77 m. from Weymouth. *Sunshine:* 10 months 1682 hrs., 1905. This is the strong point of the climate of the Channel Islands; Jersey claiming to receive more sunshine than any other part of the United Kingdom. *Climate:* Mild, luxuriant vegetation. A summer holiday resort and winter haven, where frost is rare, and lasting snow unknown. *Annual fixtures:* Battle of flowers, race meetings, swimming matches, regatta, cattle, poultry, dog, and flower shows, 2 golf links, boating, fishing, bath-

ing, and facilities for indoor entertainments. Mixed bathing is allowed in one of the bathing pools, but not in the other (*see* p. 868).

**KILLARNEY, Co. Kerry.** Pop. 5,656. 186 m. from Dublin. Great Southern and Western Ry., about a mile distant toward North-East from the shore of the lowest of the far-famed Lakes of Killarney, to which it owes all its prosperity, neighbourhood celebrated for the richness and luxuriance of the vegetation. The chief rendezvous of tourists in Ireland. *Excursions:* Coach, jaunting-car and boat include Gap of Dunloe, Kate Kearney's Cottage, the pass through the rocky slopes of the Toomies, and the McGillicuddy's Reeks, Innisfallen Island, Uss Castle, Muckross Abbey, Kenmare and Glengariff. Good salmon and trout fishing (*see* p. 867).

**KINGSTOWN, Co. Dublin.** Pop. 17,592. Dublin, Wicklow and Wexford Ry.; on the Southern shore of Dublin Bay, 6 m. S.E. of the Capital, and 2 hrs. 45 min. sea journey from Holyhead. Magnificent harbour of 250 acres. *Soil:* Chiefly granite; *Water Supply:* Excellent; *Drainage:* Good. *Winter temperature:* Similar to Ventnor. *Rainfall:* Low.

Kingstown is one of the fashionable seaside resorts in Ireland, and the principal yachting station. Annual regatta July. Boating, bathing, fishing, sea baths, public library, park, pavilion (*see* p. 868).

## ENGLISH LAKES.

(*See* pp. 859, 860.)

The English Lakes District is one of the most attractive to tourists and holiday-seekers; it is rich in literary and historical associations; affords a unique combination of mountains, lakes, rivers, and seas; is rendered easily accessible by modern railway enterprise, the entire area being covered by a well-arranged system of tours specially designed for the ever-increasing number of pleasure-seekers in search of some of the gems of English beauty spots.

**AMBLESIDE,** Westmoreland. U.D.C. Pop. 2,536. *Means of access:* Steamer from Lake Side and Windermere, coach and motor from Waterhead Pier and Windermere, 5 m. *Elevation:* From 160 to 300 ft. above sea-level. *Immediate neighbourhood:* Windermere, Grasmere, Langdale, Coniston, Kirkstone, Troutbeck, etc. *Aspect:* Westerly.

To all travellers and visitors it offers direct and appreciable charms, the views are of unsurpassed beauty, and the climate bracing. There are excursions through most picturesque scenery to the lakes and mountains. For amusement there is a golf course (9 holes), boating on the lake, and steamer tugs. *Season:* June-Sept.

**BOWNESS,** Westmoreland. U.D.C. Pop. 2,062. Adjoins Windermere, situated eastern side of Lake Windermere, between Lakeside and Ambleside; centre of principal yachting and boating stations on the lake; starting point for steamboat excursions; endless other excursions. One may walk, ride, drive, sail, swim in any direction, but never without finding scenes and objects of beauty and interest.

**CONISTON,** Lancashire. By coach or motor from Ambleside, &c.; by Furness Ry., *viâ* Foxfield Junction. The village stands at head of Lake Coniston, upon which a steam gondola makes regular trips.

**GRASMERE,** Westmoreland. U.D.C. Pop. 781. Rail to Windermere or Keswick, thence coach or motor. *Location:* Among the mountains. *Local distances:* Windermere, 9 m., Keswick, 12 m.

**KENDAL,** Westmoreland. Pop. 15,000. L. & N.W. Ry., Mid. Ry. On the W. bank of the Kent, midway between its source and Morecambe Bay. Scout Scar Mountain is a prominent feature of this beautiful district.

**KESWICK,** Cumberland. Pop. 4,451. *Means of access:* By rail from Penrith; coach and motor from Waterhead and Ambleside in connection with lake steamer. One of the best of northern centres for the Lake district, and is one of the most romantic places in a region rich in romance. About ½ m. from Derwentwater, and 1 m. from Skiddaw. Southey's monument and the Lodore Falls within easy reach. Excursions by coach to the picturesque scenery in the surrounding neighbourhood. Good salmon and trout-fishing in lake and river. Golf course (9 holes).

**ULVERSTON,** Lancashire. Pop. 10,000. Furness Ry., 10 m. from Barrow, 8 m. from Windermere. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel. *Excursions:* Lake District, Furness Abbey, Isle of Man, etc.

**WINDERMERE,** Westmoreland. U.D.C. Pop. 2,379. *Means of access:* Furness Ry., L. & N.W. Ry. *Elevation:* from 116 ft. to 400 ft. above sea-level. Situated above the famous lake of the same name. Pleasure steamers run the whole length of the lake, and coaches and motors run to Ambleside, Grasmere, and Ullswater. Splendid fishing and boating.

**LEAMINGTON, Warwickshire.** M.B. Pop. 26,888. *Means of access:* L. & N.W. Ry. and G.W. Ry. *Location:* 2 m. E. of Warwick on the Leam, near its junction with the Avon. *Elevation:* 195 ft. *Neighbourhood:* Cultivated, fertile lands, woods, rivulets. *Climate:* Equable; rainfall below the average. *Water supply:* Constant. *Drainage:* Modern. *Soil:* New red sandstone. *Baths:* Corporation, grand pump-room and bathing establishment, supplied with baths and appliances of all kinds required by modern balneo-therapy; swimming, Turkish. *Mineral waters:* Saline and chalybeate. *Excursions:* Rail and coach. Warwick Castle, 2 m.; Kenilworth, 5 m.; Stratford-on-Avon, 10 m.; Edge Hill, 15 m. *Season:* April-October. *Annual fixtures:* Hunt steeplechases (March), archery meeting (June), tennis tournament, cricket week, and polo week (July), flower shows.

A high-class residential town, besides a fashionable resort for the medicinal properties of its waters. Two free public places for drinking the waters, municipal orchestra (*id.* rate levied), concerts and fêtes in public gardens, pump-room, assembly-room (band, grounds, winter hall), new Victoria Park (20 acres); theatre, choral and orchestral societies; 3 golf clubs with separate links, good hunting centre, polo, archery, hockey, boating (*see* p. 868).

**LEATHERHEAD, Surrey.** U.D.C. Pop. 4,694. 21½ m. from London Bridge. L.B. & S.C. Ry. An ancient town situated in a district noted for its scenery: woodlands, hills and valleys attracting tourists and pleasure parties; close by is Norbury Park, Burford Bridge, and other picnic resorts (*see* p. 868).

**LEWES, Sussex.** M.B. Pop. 11,249. L.B. & S.C. Ry.; 50 m. from London, an important Junction on the L.B. & S.C. Ry., frequent trains

running to Brighton, Newhaven, Seaford, Eastbourne and Hastings. *Water supply:* Constant; *Drainage:* Modern; *Baths:* Open air swimming. An ancient county and assize town on River Ouse. 8 m. N.E. of Brighton. Castle contains a collection of local and historical antiquities belonging to the Sussex Archæological Society. Racecourse. Golf links (18 holes). Cricket, croquet, tennis, cycle and football clubs. Extensive views of sea and surrounding country from adjacent Downs (*see* p. 868).

**LINCOLN.** Cathedral city. Pop. 48,783. On the north bank of the River Witham, 47 m. N.E. of Derby. The cathedral is the most conspicuous object and its chief attraction to visitors, containing some of the richest and rarest specimens of early ecclesiastical architecture. Lincoln is situated in the centre of an important agricultural district, and has been selected for the Royal Agricultural Show to be held in 1907 (*see* p. 868).

**LITTLEHAMPTON, Sussex.** U.D.C. Pop. 9,500. L.B. & S.C. Ry., 62 m. from London. *Location:* On coast, at mouth of River Arun, midway between Portsmouth and Brighton. *Elevation:* Slightly above sea-level. *Neighbourhood:* Open, flat, pasture lands. *Climate:* Mild, dry, invigorating; small rainfall. *Water supply:* Constant, soft. *Drainage:* Modern. *Soil:* Sandy loam on gravel. *Front:* Brick-laid esplanade, ¾ m. along top of beach; wide stretch of green common between it and houses. *Pier:* Small wooden jetty at harbour entrance. *Beach:* Extensive sands. *Bathing:* Mixed. *Excursions:* Arundel, 4 m.; Goodwood, 12 m.; Chichester, 12 m.; Portsmouth, 26 m. *Season:* July–September. *Annual fixtures:* Tennis tournament, cricket week, regatta, athletic sports.

Quiet, growing family summer watering-place and seaport for small ships and yachts. Quaint natural harbour, the jetty being a favourite promenade. Boating and fishing in sea and river; band, small theatre, 2 variety troupes on common; golf links (18 holes), sports ground, tennis courts, goat chaises; good cycling roads; free library; bowling green (*see* p. 870).

**THE LIZARD.** Pop. 580. G.W. Ry. Motor 'bus from Helston Station. *Elevation:* 200 ft. *Neighbourhood:* Moorland; very open. *Aspect:* Southern. *Climate:* Very equable; frost and snow rare. *Water supply:* Constant. *Soil:* Loam and clay. *Beach:* Sand and shingle. Golf course (9 holes), bathing, boating, fishing. *Season:* August–September (*see* p. 869).

**LLANDRINDOD WELLS, Radnorshire,** U.D.C. Pop. 2,400. L. & N.W. Ry. and G.W. Ry. *Elevation:* 750 ft. *Aspect:* S.W. *Climate:* Bracing. *Mineral waters:* Sulphur, saline, lithia chalybeate, &c. *Water supply:* Constant and excellent. *Drainage:* Modern. *Baths:* Sulphur.

Llandrindod Wells as a health resort is becoming popular. Its great attractions are its mineral springs, but the beauty of its surroundings and the purity of its air also attract many visitors. The town is lighted by electricity. *Amusements:* Golf (18 holes), tennis, bowls, croquet, cycling, fishing, &c. The waters are very efficacious in the treatment of gout, rheumatism, anæmia, neurasthenia, dyspepsia, diabetes, and liver affections (*see* p. 869).

**LLANDUDNO, Carnarvonshire.** U.D.C. Pop. 9,279. *Means of access:* L. & N.W. Ry. and G.W.Ry. *vid* Chester. *Location:* On coast between Great and Little Orme's Head. *Elevation:* From 21 ft. to 678 ft. *Neighbourhood:* Snowdonian range of mountains. *Aspect:* Llandudno Bay, N.E., and Conway Bay, S.W. *Climate:* Mild. *Sunshine:* 1,582·8 hours, 1905. *Water supply:* Constant. *Drainage:* Latest. *Soil:* Mostly gravel. *Front:* Promenade and marine drive round the bay. *Pier:* 2,280 ft., pavilion. *Beach:* Sand and gravel. *Sea bathing:* Mixed. *Baths:* Every facility; two hydros. *Excursions:* Rail, coach, and steamer; unique marine drive and footpath for 5 miles round Great Orme's Head. *Season:* April–October. *Annual fixture:* May-day festival.

Lively, progressive, and popular watering-place. There is a tram road (cable) to summit of Gt. Orme's Head, where a new golf links has been made. Town band, two theatres, Happy Valley minstrels, golf links on the west shore (18 holes), asphalted tennis courts, hockey, coaching, boating, fishing.

A light railway from Colwyn Bay is now being laid, and is expected to be running by Easter, 1907 (*see* p. 869).

**LLANFAIRFECHAN, Carnarvonshire.** L. & N.W. Ry. and Cambrian Ry. A quiet seaside village at the base of the Penmaenmawr mountains, looking westward on the Lavan Sands and Anglesey. It is warm in winter; in summer its open situation renders it a bracing and comparatively cool place. Bright and sunny, but high rainfall (*see* p. 869).

**LLANGOLLEN, Denbighshire.** Pop. 3,304. *Means of access:* G.W. Ry. 203¼ m. from London. A favourite summer resting-place. On the hills which rise from the vale convalescents may in summer obtain much benefit. Situated on the River Dee, in a beautiful valley, a favourite resort of anglers. The house, which was the home of the celebrated Ladies of Llangollen, is one of the finest specimens of the timbered cottage architecture of the eighteenth century. Good fishing (*see* p. 869).

**LLANWRTYD WELLS.** A village in Brecon-shire on railway between Llandovery and Llandrindod, surrounded by open airy uplands. Fine mountain air, bracing climate. Noted for sulphur springs issuing from rock 3 or 4 ft. from the ground in very strong stream, containing much sulphur gas when received into glasses.

**LOOE, Cornwall** (between Falmouth and Fowey), is a little health resort which in the matter of climate compares itself to Torquay. It has many attractions for the artist and tourist (*see* p. 870).

**LOWESTOFT, Suffolk.** M.B. Pop. 29,850 (estimated Dec., 1904, 32,320). *Means of access:* G.E. Ry., Midland and G.N. Joint Ry. "Belle" steamers from London in summer. *Location:* The most easterly point in England, on coast of Suffolk, 22 m. S.W. of Norwich. *Elevation:* From little above sea-level to 80 ft. *Neighbourhood:* Open, sand dunes and broads. *Climate:* Bracing; absence of fog and mist. *Sunshine:* 1,654 hours, 1904. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel and sand. *Front:* South of pier. Esplanade 1 m. long, top of cliffs; marine drive between it and houses. In opposite direction, harbour, fish markets, and old town. *Beach:* Sandy and pebbly. *Bathing:* Mixed. *Baths:* Swimming and general. *Piers:* 2, South Pier 1,300 ft.; pavilion (restaurant, reading-room, military band); Claremont pier, 760 ft., band, concerts, sea-angling competitions.

*Excursions:* Rail and road; marine and Broads. *Season:* July–September.

The South Pier, one of the outer harbour boundaries, is a favourite rendezvous overlooking the yacht basin; the North Pier being more resorted to for fishing. A main thoroughfare, with electric trams, runs for 3 m. nearly parallel with the shore, a swing bridge over the inner harbour entrance connecting the two portions of the town. Lowestoft is a good centre for exploring the Broads. There is excellent fishing from piers and harbour, boats and beach; and the Broads yield abundance of coarse fish.

Marina theatre, hippodrome, concerts on South beach and at Sparrow's Nest and Olympian Gardens, 2 parks, open air fêtes, model yacht pond, harbour for yachts, Norfolk and Suffolk Yacht Club and Waveney Sailing Club headquarters, regatta, aquatic sports, boating, shooting, golf (9 holes), tennis, bowls, electric light (*see* p. 870).

**LYME REGIS**, Dorset. M.B. Pop. 2,095. L. & S.W. Ry. 150 m. from Waterloo. On coast between Torquay and Weymouth. *Aspect:* S.E. *Water supply:* Constant. *Beach:* Sand. *Bathing:* Mixed. *Season:* May to Oct. *Annual fixtures:* Flower show and regatta in Aug. A quiet watering-place and seaport. Golf (9 holes), tennis, cricket, fishing (*see* p. 870).

**LYNTON AND LYNMOUTH**, North Devon. U.D.C. Pop. 1,800. *Means of access:* Railway from Barnstaple on coast of Devon, open to the Bristol Channel. *Location:* Between Ilfracombe and Minehead, opposite Swansea. *Neighbourhood:* Crags, valleys, streams. *Aspect:* North. *Climate:* Bracing. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel. *Front:* Esplanade, 1,000 ft. *Beach:* Pebbles, rocks, and sand. *Sea bathing:* Mixed. *Season:* Easter–November.

Lynton is situated on top of a hill 500 ft. high, connected by a cliff railway with Lynmouth, lying in the valley below, amidst a wealth of wild scenery, for which the district is famous.

Coaching, marine trips, trout and sea fishing, hunting, golf, tennis (*see* p. 870).

**LYTHAM**, Lancashire. U.D.C. Pop. 9,089. *Means of access:* Lancashire and Yorkshire Ry. and L. & N.W. Ry. *Location:* On coast, between Blackpool and Southport. *Elevation:* Little above sea-level. *Neighbourhood:* Rural. *Aspect:* South. *Climate:* Bracing. *Sunshine:* 1,659 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sandy. *Front:* Marine drive and wide green lawn 2 miles long between houses and asphalted promenade. *Pier:* 900 ft., pavilion, theatre. *Beach:* Sandy and pebbly. *Bathing:* Mixed. *Baths:* Swimming, &c. *Season:* June–Sept. *Annual fixtures:* Regatta, athletic meeting, Rose Queen festival, June; Tennis tournament, fêtes and children's sports, July.

Fashionable watering-place, mouth of the Ribble, combining attractions of seaside and country; 12 acres ornamental public gardens. Golf links (18 holes), coursing, marine excursions, boating, fishing, bowls; assembly-rooms, literary institute; electric trams to Blackpool; splendid band during season.

**MABLETHORPE**, Lincolnshire. U.D.C. Pop. 1,150. G.N. Ry. A quiet health resort. On coast. 13 m. from Louth. *Elevation:* Sea level. *Neighbourhood:* Flat, open. *Climate:* Bracing. *Drainage:* Modern. *Soil:* Heavy marl. *Front:* Sea hills of various heights. *Beach:* Sands. *Bathing:* Mixed. *Baths:* Sea water. *Season:* June–September. *Annual fixtures:* Battle of flowers, flower show, Lifeboat Day (*see* p. 870).

**MAIDSTONE**, Kent. Pop. 33,516. S.E. & C.-Ry. 41 m. from London. A busy town in the centre of the hop industry, on the right bank of the Medway. The parish church is the largest in England, and the town possesses a very fine museum. *Water supply:* Constant. *Drainage:* Modern. Athletic and recreation grounds; fishing and boating (*see* p. 873).

**MALVERN**, Worcestershire. U.D.C. Pop. 18,000. *Means of access:* G.W. Ry. and Midland Ry. *Location:* On E. slope of the Malvern Hills, 8 m. from Worcester. *Elevation:* 500 ft. above sea-level. *Aspect:* East. *Climate:* Dry, bracing. *Water supply:* Pure, constant. *Drainage:* Modern. *Soil:* Gravelly. *Baths:* Hydro, Turkish, Droitwich brine, &c. *Excursions:* By *chars-à-banc* and other vehicles. The highest point of the Malvern Hills is the Worcestershire Beacon, 1,400 ft. high; from the summit is obtained one of the most extensive panoramic views in Gt. Britain, embracing the Severn and Wye Valleys; the Cotswold, Mendip, and Welsh Hills; and in the plain below can be seen Worcester, Cheltenham, Tewkesbury, Gloucester, Hereford, and other places of interest. *Season:* Summer and winter. *Annual fixtures:* Shakespeare week in May, croquet tournament August.

Malvern is an inland watering-place and a pretty residential town, consisting mostly of villas standing in own grounds. Assembly rooms (high-class bands and theatrical companies), free library, gentlemen's club, tennis, bowls, golf links (19 and 18 holes), separate clubs for ladies and gentlemen (*see* p. 871).

**MARGATE**, Kent. M.B. In the Isle of Thanet. Pop. 25,000. S.E. & C. Ry. 73 m. from London. *Location:* Extreme N.E. of Kent, 4 m. W. of N. Foreland. *Neighbourhood:* Cliffs, few trees; agricultural district behind. *Aspect:* N. and N.W. *Elevation:* From little above sea-level to 80 feet. *Climate:* Dry, bracing; unequalled for certain qualities due to geographical situation. *Sunshine:* 1,577 hrs., 1905. *Water supply:* New and excellent. *Drainage:* Modern. *Soil:* Chalk. *Front:* Promenade gardens, with bandstand; bandstands top of cliff called the Fort, and at the Oval and Westbrook, E.; unrivalled entertainments; esplanade on top of sea-wall, separated from houses by marine drive, W. *Pier:* 960 feet, pavilion, band. *Beach:* Extensive firm sands; open harbour for small vessels. *Bathing:* Mixed. *Baths:* Hydro, Turkish and other baths; modern electric installation. *Excursions:* Electric tramways to Ramsgate, 5 m., *viâ* Broadstairs; N. Foreland, 2½ m.; Reculvers, 9 m.; in summer daily communication with London by fast saloon steamers. *Season:* June–September.

Popular watering-place, combining great natural advantages to proximity to London. In summer a bustling, merry pleasure-place—a special favourite with Londoners, all kinds of seaside amusements being provided, with accommodation for all classes amidst stimulating surroundings. Cliftonville, E., and Westgate, W., quiet and select quarters, commanding fine sea views. Margate air has long been proverbially good for convalescents. Two theatres; golf links (18 holes), tennis, boating, fishing, steamboats

to coast towns and London by General Steam, Palace, and Belle Companies; scholastic establishments numerous and good (*see* p. 872).

**MATLOCK, Derbyshire.** U.D.C. Pop. 8,000. Midland Ry. 143 m. from London. *Location:* On the River Derwent 16 m. N. of Derby. *Elevation:* 300 to 900 ft. *Neighbourhood:* Valley scenery. *Aspect:* South-West. *Climate:* Dry, bracing, sheltered by hills from N. and E. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Limestone and gritstone. *Baths:* A large number of the finest hydropathic establishments in the country. *Mineral waters:* Thermal springs. *Excursions:* Haddon Hall, 7 m.; Chatsworth, 9 m.; Wingfield Manor, 10 m.; Hardwick Hall, 17 m.; Dovedale and all parts of the Peak District. *Season:* July–October. Baths open all the year. *Annual fixtures:* Venetian fêtes, flower show, regatta.

MATLOCK BANK, where most of the bathing establishments are situated, for which the place is noted, is connected with Matlock Bridge by a cable tramway, ½ m. Entertainment pavilion, golf links (9 holes) (*see* p. 873).

**MIDHURST, Sussex.** Pop. 1,650. L.B. & S.C. Ry. and L. & S.W. Ry. 61 m. from London, equal distance from Pulborough and Chichester. It is a quiet, old-fashioned town in pretty rural scenery, with a river, park with deer, heather common, immense woods, and the Downs 3 m. off. The ruins of Cowdray House stand in the park close to the town. *Aspect:* South. *Drainage:* Modern. *Soil:* Sandy, Folkestone beds. *Season:* May–Oct. *Annual fixture:* Horticultural and horse show, August Bank Holiday. Cricket, hockey, tennis, football. N.B.—King Edward VII. Sanatorium, 2½ m. (*see* p. 874).

**MINEHEAD, Somerset.** U.D.C. Pop. 2,511. G.W. Ry. *Location:* On S. shore of Bristol Channel, 24 m. from Taunton. *Neighbourhood:* Sea and moorland. *Aspect:* East. *Climate:* Mild and equable. *Water supply:* Constant. *Soil:* Sandstone. *Front:* Asphalted esplanade on sea-wall. *Pier:* With landing stage for excursion steamers. *Beach:* Sand. *Season:* June–September. *Annual fixture:* Opening meet Devon and Somerset Staghounds (August).

Minehead is a favourite centre, August to December, for members of the Devon and Somerset, Exmoor and West Somerset Hunts; a favourite holiday resort in summer; recommended as a winter residence for invalids (*see* p. 872).

**MOFFAT, co. Dumfries.** Pop. 2,799. Popular bracing spa. 7 hrs. from Euston (West Coast route). 350 ft. above sea. Sheltered from N. and E. by heath-clad mountains. *Mineral waters:* Sulphur and chalybeate.

**MONTROSE, Forfarshire.** Pop. 12,400. N.B. Ry. and Cal. Ry. *Location:* E. coast Scotland. *Climate:* Bracing. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sandy. Sea bathing. *Season:* July–Sept. *Amusements:* Golf course (18 holes); 9-hole course for ladies; rifle shooting competitions; rod fishing. Many historic associations and charming surroundings, fine promenade, large bathing pavilion, soft beach. Good centre for tourists in eastern Scotland. Midway between Dundee and Aberdeen (*see* p. 871).

**MORECAMBE, Lancs.** M.B. Pop. 11,798. *Means of access:* L. & N.W. Ry. and Midland Ry. *Location:* A modern seaside resort on shore of Morecambe Bay, 4 m. from Lancaster, protected N. and E. *Front:* 3 m. promenade on sea-wall, circular in form. *Drainage:* Septic system. *Soil:* Sandy. *Baths:* Open air swimming baths on beach. *Season:* Easter to Sept. Two piers, each with pavilion. Winter gardens. Alhambra palace. *Beach:* Sand. *Sea Bathing:* Mixed.

Enjoys considerable popularity as a health and holiday resort. Situated towards the southern extremity of Morecambe Bay. Heysham adjoins, from whence run steamers to the Isle of Man, Ireland, &c. (*see* p. 873).

**MULLION, Cornwall.** On the east side of Mounts Bay. Possesses a climate very suitable for convalescents. Mean winter temperature 46·89 Fahr., summer 59·92 Fahr. Golf links (18 holes), boating, bathing, fishing (*see* p. 874).

**MUNDESLEY-ON-SEA, Norfolk.** Pop. 680. G.E., Mid. and G.N. Joint Ry. A quiet little seaside resort 8 m. S.E. of Cromer. Picturesque cliffs and extensive smooth, sloping sands. Mixed bathing. *Climate:* Dry, bracing. *Season:* July–Oct. Golf course (9 holes) (*see* p. 873).

**NANTWICH, Cheshire.** U.D.C. Pop. 7,722. *Means of access:* L. & N.W. Ry. and G.W. Ry., *viâ* Crewe. *Elevation:* 130 ft. *Soil:* Sandy and gravel. *Mineral waters:* Brine baths.

An inland watering-place and hunting centre, containing a number of old Elizabethan houses.

**NEWHAVEN, Sussex.** U.D.C. Pop. 6,772. L.B.& S.C. Ry., 57 m. A seaport on the coast of Sussex, at the mouth of the River Ouse, 2 m. W. of Seaford, with a good deep-water harbour accessible at all tides. Its importance mainly centres in the L.B. & S.C. Ry.'s passenger and goods services *viâ* Dieppe, 64 m., a popular and convenient route to Paris, Switzerland, Italy, Austria, &c., maintained by large and comfortable new turbine steamers which run twice daily each way in connection with express trains from London and Paris, passing through some of the most picturesque scenery, and run alongside the steamers both at Newhaven and Dieppe.

**NEWQUAY, Cornwall.** U.D.C. Pop. 3,776. *Means of access:* G.W. Ry. and coach from Wadebridge, L. & S.W. Ry. *Location:* On coast between St. Ives and Padstow, 32 m. N.E. of Penzance. *Neighbourhood:* Cliff scenery. *Aspect:* North. *Climate:* Bracing. *Sunshine,* 1,682¼ hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Beach:* Sands.

The modern town, connected with a harbour and remains of old fishing village, is a rising modern health resort (*see* p. 874).

**NEWTON ABBOT, Devonshire.** U.D.C. Pop. (1905) 13,000. *Location:* South Devon, 6 m. from Torquay and Teignmouth, midway between Exeter and Plymouth. *Means of access:* G.W. Ry., 4 hours from London. A tourist centre, especially for Dartmoor, to which coaches run daily during the summer.

**NORWICH, Norfolk.** Pop. 117,500. G.E. Ry. and Mid. & G.N. Joint Ry. On the banks of the Wensum. The cathedral, castle, and St. Andrew's Hall are chief objects of interest.

**OBAN, Argyllshire.** Pop. 5,374. *Means of access:* Caledonian Ry., L. & N.W. Ry., and steamboat. *Location:* Around beautiful bay. *Water supply:* Constant and good. *Drainage:* Modern. *Soil:* Dry. *Front:* Extensive promenade and esplanade, 2 m. *Piers:* Two. *Beach:*

Sandy. *Bathing:* Mixed. *Season:* May–October. *Annual fixtures:* Sports and regattas.

Oban's natural position, salubrity of climate, and beauty of situation command a high reputation among tourists visiting the Highlands, for whom it is a convenient point of arrival for and departure from the shooting moors. Golf (9 holes). Yachting. Magnificent drives to numerous places of historical interest (*see* p. 875).

**OXFORD.** Cathedral city. Pop. 49,413. G.W. Ry. 63¼ m. from Paddington. The county town of Oxfordshire is one of the most ancient and celebrated Universities in the world. It is situated at the confluence of the Cherwell and the Isis; architecturally is a most beautiful city, and occupies a fine site encircled by rich and wooded meadows. The University contains 21 colleges and 3 halls. The Bodleian Library, one of the most important collections in the world, contains over 300,000 volumes. The Corn Exchange, Town Hall, Martyrs' Memorial, Observatory, Botanic Gardens, Christchurch Meadows, and Worcester Gardens are amongst the many objects of interest afforded visitors. Excursions can be made to Blenheim Park, Woodstock (the magnificent palace of the Duke of Marlborough), and to Stanton Harcourt, the seat of the Harcourt family. A frequent service of saloon steamers provides facilities for endless interesting outings up and down the Thames (*see* p. 874).

**PAIGNTON, S. Devon.** U.D.C. Pop. 9,400, increasing. G.W. Ry., 4¾ hrs. from Paddington. *Location:* 2½ m. from Torquay. *Neighbourhood:* Hills, open to breezes from Dartmoor. *Climate:* Equable, with maximum of sunshine. Mild but tonic. *Soil:* Sandstone. *Front:* Esplanade, with open and sheltered seats, 1 m. alongside a recreation green. *Pier:* With handsome pavilion. *Beach:* Yellow sands, with about 200 tents on hire. *Bathing:* Mixed, from sands, pier, and Goodrington Beach. *Excursions:* Coaches, buses, public motors, rail, sea and river. *Season:* June–September. Waterworks on Holne Moor, for unlimited supply of purest water, completed. *Amusements and recreations:* High-class dramatic performances in pier pavilion, al-fresco variety concerts on green, entertainments in public hall, numerous bands, chess club (visitors invited), Queen's Park (sports, promenade concerts, bowling, archery, tennis, &c.), Victoria Park (ornamental) (*see* p. 875).

**PENMAENMAWR. Carnarvonshire.** U.D.C. Pop. 4,000. L. & N.W. Ry. *Location:* On coast, 4½ m. Conway; 8 m. Llandudno. *Elevation:* Sea-level to 2,000 ft. *Neighbourhood:* Snowdonian range. *Aspect:* N. *Soil:* Sandy, gravelly. *Beach:* Sands. *Bathing:* Mixed.

A quiet, high-class health-rest and holiday resort, combining sea and mountain air (*see* p. 874).

**PENZANCE, Cornwall.** M.B. Pop. 13,136. *Means of access:* G. W. Ry., 7 hrs. from London; steamers to London and Bristol weekly. *Location:* On N.W. shore of Mount's Bay, 10 m. E.N.E. of Land's End; sheltered from W. and N. *Elevation:* Sea level. *Neighbourhood:* Hills on three sides. *Aspect:* South-east. *Climate:* Mild, absence of cold. *Sunshine:* 1,789 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Granite. *Front:* Sea-wall, with higher and lower promenades. *Beach:* Shingle. *Sea-bathing:* Mixed. *Baths:* Swimming and general. *Excursions:* Land's End, 10 m.; Lizard, 21 m.; St. Michael's Mount, 3 m.; Scilly Isles, 40 m. *Season:* Summer and winter.

A seaport and watering-place, the westernmost in England. A warmer health resort in the winter than any place on the mainland, for which due records are available. Spacious harbour. Pilchard and mackerel fisheries important industry. Boating, good fishing, shooting, golf (18 holes), coaching. Motor-car services G.W. Ry. Free library, Morrab Gardens (3 acres), natural history and antiquarian museum, geological museum (*see* p. 874).

**PERTH, Stirling.** Pop. 34,539. *Means of access:* Main railway routes to the north. *Location:* On the Tay, 22 m. W. from Dundee; 40 m. N. from Edinburgh. *Elevation:* 18 to 472 ft. above sea-level. *Aspect:* S.W. and E. *Mineral waters:* Pitkeathly (saline), 4 m.

The Charing Cross of Scotland from which excursions may be made to all parts of the country (particularly the Highlands), the railway facilities being exceptional. Golf courses, two (18 holes; ladies, 9 holes). Boating and free fishing on the Tay, cricket, &c. Perth and its surroundings are associated with Sir Walter Scott's famous novel (*see* p. 876).

**PETWORTH.** The seat of Lord Leconfield (1¾ m. from Petworth Station) was for 300 years the beautiful home of successive Dukes of Northumberland. The house (frontage 324 feet) is rich in works of art and paintings, including some fine specimens of Turner's, and there are some carvings by Grinling Gibbons. The sword has been preserved which was used by Hotspur at the Battle of Shrewsbury. House can be seen Tuesday and Thursday 11 a.m., 12 noon, 2 p.m., and 3 p.m. The Park, which is always open, is 14 m. in circumference, and unrivalled for trees, turf, water, and deer (*see* p. 874).

**PEVENSEY BAY.** Primitive village on east coast of Sussex, 4 m. E. of Eastbourne pier, built on shingle beach, from which sea has receded, consisting of about 100 houses.

Pevensey Station (1¾ m. from Pevensey Bay), L.B. & S.C. Ry., 65 m. from London. Secluded summer resort for families desiring quiet freedom.

**PLYMOUTH, Devon.** Pop. 107,509. G.W. Ry. and L. & S.W. Ry. On Plymouth Sound. Possesses the stirring attractions of great naval arsenal and garrison town, besides ordinary interests of a seaside resort. Good tourist centre. Excellent facilities for marine and land excursions (*see* p. 875).

**POOLE, Dorset.** Pop. 19,461. L. & S.W. Ry. and Midland Ry. 113½ m. from London. A seaport town to the west of Bournemouth, situated amidst pleasant surroundings, on the northern side of the harbour which bears its name.

Ornamental park, free public library, science and art school, with usual facilities for amusement and recreation (*see* p. 876).

**PORT RUSH, co. Antrim.** Pop. 2,000. 60 m. from Belfast. A summer holiday resort and tourist centre for Giant's Causeway, glens of Antrim, &c. Golf, boating, bathing, fishing.

**PORTSMOUTH and SOUTHSEA, Hants.** County Borough. *Means of access:* L.B. & S.C. Ry. and L. & S.W. Ry.; also steamer from London. *Location:* On S. coast of Hampshire,

opposite Isle of Wight and the Solent. *Elevation:* Little above sea-level. *Neighbourhood:* Open, sheltered behind by Portsdown Hills. *Aspect:* South. *Climate:* Mild, invigorating; moderate rainfall; open to breezes from sea and surrounding country. *Sunshine:* (not recorded). *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel and clay. *Front:* Promenade and marine drive, 2 m. along top of beach, separated from houses by wide tract of green common, often used for inspections and reviews; esplanade is adorned with naval and military memorials and relics. Handsome town hall (Saturday evening popular concerts), museum, technical institute, cycle track. *Pier:* Pavilion (daily entertainments and Sunday concerts); fishing; landing stage for steamers; marine trips. *Beach:* Shingle. *Bathing:* Movable stages for ladies and gentlemen running into deep water at all tides, fitted with separate compartments; also from beach, with and without machines. *Baths:* Salt-water, swimming, &c. *Excursions:* Regular steamer service between Isle of Wight; marine trips round it and to Southampton, Bournemouth, Weymouth, &c. Steamers from London call *en route* for Plymouth, Falmouth, and Dublin. By rail: Winchester, 29 m.; Chichester, 18 m.; Hayling Island, 10 m.; Porchester Castle, 7 m. *Seasons:* Summer and winter. *Annual fixture:* Regatta.

The island of Portsea consists of four divisions, connected by electric trams:—N., *Landport:* Traversed by main thoroughfares (birthplace of Charles Dickens). N.W., *Portsea:* largest dockyard in the world. W., *Portsmouth:* Naval arsenal; gun wharf; armoury; harbour contains *Victory*, Nelson's old flag-ship; *Duke of Wellington*, flagship of Naval Commander-in-Chief; *St. Vincent* training ship; and a Sailors' Rest. S. and E., *Southsea:* Suburban residence for families of officers in both services; fashionable summer resort; favourite centre for yachtsmen; wintering place for convalescents; Eastney Barracks (headquarters R.M. Artillery). Much of historical interest attaches to the dockyard, arsenal, and fortifications (*see* p. 880).

**PRINCE-TOWN**, Devon. Pop. 1,200. G.W.Ry. 26 m. from Exeter, 16 m. from Plymouth. *Elevation:* 1,400 ft. *Immediate neighbourhood:* Moors, tors, rivers, mountains, grand scenery. *Climate:* Bracing, invigorating. *Soil:* Peat. *Season:* Easter to September, when hunting commences. Good cricket ground, bowling green, quoits, tennis (*see* p. 876).

**PWLLHELI**, Carnarvon. M.B. Pop. 4,000. (Pronounced Pullth-helly—Brine or Salt Water Pool), is situated on the Northern part of Tremadoc Bay. Sheltered by mountains (1,000 to 2,000 ft. high), on the N. and E., with southerly aspect. Visitors enjoy a mild temperature in winter; in the summer the new part of the town is a bracing, tone-giving health resort. *Beach:* Extensive sands and very small shingle. Safe bathing (mixed), in clear water. Sea fishing abounds, and sport for fresh-water anglers close by. Boating; golf links (9 holes); trams; omnibuses; coaching; art gallery; hiring fairs, May and November; fine national harbour; good cricket ground (*see* p. 876).

**RAMSGATE**, Kent. M.B. Pop. 28,000. S.E. & C. Ry., 79 m. from London. *Location:* South shore of Isle of Thanet, in between Deal and Broadstairs. *Elevation:* From sea-level to 150 ft. *Neighbourhood:* Open country and cultivated downs. *Aspect:* South and south-east. *Climate:* Mild, invigorating; not much rain; St. Laurence is high and bracing. *Sunshine:* 1,764½ hrs., 1905. *Water supply:* Chalk wells; constant. *Drainage:* Modern. *Soil:* Chalk. *Front:* Marine drive, promenade, and gardens top of cliffs, connected by ornamental approach roads at easy gradients. *Beach:* Sands; boating and fishing. *Bathing:* Not mixed. *Baths:* Complete establishment, including Turkish. *Pier;* Extensive stone promenade piers, enclosing fine harbour over 50 acres. *Excursions:* Steamboat service with London in summer; coasting and Continental trips; electric trams to Broadstairs, 2 m., and Margate, 5 m.; Canterbury, 16 m.; Deal, 13 m.; Pegwell Bay, 7 m.; Sandwich, 16 m. *Annual fixtures;* Yachting week; agricultural, flower, and horse shows.

A lively seaport and watering-place, popular with Londoners winter and summer; the sea comes close up to the chalk cliffs, completely washing the sands at high tide. The harbour piers are favourite walks, always affording interesting sights. One railway station is on the shore. Two theatres; concert room; public bands and concert party; Royal Victoria Pavilion; Sanger's Amphitheatre; Ellington Park; Warre Recreation Ground (cricket, tennis, croquet); free library; reading room; river angling; hunting; headquarters Temple Yacht Club. There is a good and close view of passing shipping; harbour is much frequented by coasters, fishing smacks, pleasure steamers, and yachts (*see* p. 876).

**READING**, Berkshire. C.B. Pop. 72,214. *Means of access:* G.W. Ry., L. & S.W. Ry. and S.E. & C. Ry. 36 miles from Paddington. Reading Abbey was founded by Henry I. in 1121, boundaries still traced in existing ruins. Reading possesses a university college, and general museum. Six parks and recreation grounds, aggregating 216 acres; gas and electric light; tramways. It is a good centre for boating, situated in the midst of beautiful Thames scenery, which can be explored by boats or steamboats. Corporation swimming baths; swimming club; two rowing clubs; regattas in August; three golf clubs (links each 9 holes); hunting, staghounds and foxhounds. Local organisations for cycling, football, cricket, tennis, hockey, quoits, bowls, rowing (*see* p. 877).

**REDCAR**, Yorks. U.D.C. Pop. 9,000. N.E. Ry. *Location:* On coast, 4 m. S. of Tees estuary, 5 m. N.W. Saltburn. *Elevation:* Level. *Climate:* Bracing. *Water supply:* Constant. *Soil:* Sandy. *Front:* Promenade, 2 m. *Pier:* 1,320 ft. *Beach:* Sands. *Bathing:* Not mixed. *Season:* July–August.

**REIGATE**, Surrey. M.B., which includes Redhill. Pop. 25,993. *Means of access:* L.B. & S.C. Ry. and S.E. & C. Ry. 21 m. South of London. *Elevation:* From 250 to 750 ft. *Water supply:* Constant. *Sewage system:* Bacteriological. *Soil:* Chalk, sand, clay. Corporation baths. The favourite residential district of Redhill is really an outlying suburb belonging to the ancient town of Reigate, but, owing to advantages of direct railway communication, its population now exceeds that of the parent parish (*see* p. 876).

**RHYL, Flint.** U.D.C. Pop. 8,473. L. & N.W. Ry. *Location:* On the coast between the estuary of River Dee and Llandudno, 30 m. from Chester. *Elevation:* 10 ft. to 20 ft. *Aspect:* N.W. *Climate:* Mild. *Sunshine:* 1,627 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sandy. *Front:* Terrace-promenade. *Pier:* ½ m.; small pavilion. *Beach:* Sands. *Bathing:* A portion of the beach has been set apart for mixed bathing. *Baths:* Sea-water; 2 hydros. *Excursions:* Coach, steamer, and rail. *Season:* April–October.

A popular seaside resort, well supplied with facilities for amusement and recreation (*see* p. 877).

**RIPON, Yorkshire.** Episcopal city. Pop. 8,230. *Means of access:* N.E. Ry. and L. & N.W. Ry. *Location:* 11 m. Harrogate; 30 m. Leeds; 30 m. York. *Elevation:* 125 ft. *Aspect:* S.W. *Soil:* Gravel and red sand. *Mineral waters:* Sulphur; New Spa sulphur baths opened by H.R.H. Princess Henry of Battenberg, Oct. 1905. *Season:* Winter and summer. Music in Spa gardens during summer, golf links (9 holes), hockey clubs (ladies and gentlemen), cricket club, boating on River Ure, fishing in rivers Ure, Skell, and Laver, hunting (2 packs).

The ancient city of Ripon enjoys the advantages of a good residential centre, health resort, and headquarters for tourists. *Excursions:* York and Durham cathedrals and various abbeys (*see* p. 876).

**ROTHESAY, Isle of Bute.** Pop. 9,323. *Access:* Steamer service from Wemyss Bay, Gourock, Greenock, and Craigendoran. *Location:* On the shore of Rothesay Bay, in the Firth of Clyde. *Aspect:* East. *Climate:* Mild, equable. *Water supply:* Constant. *Drainage:* Modern. *Front:* Esplanade; bandstand; ornamental gardens. *Pier:* For steamer traffic. Well provided with facilities for steamer excursions, amusement and recreation.

A popular watering-place and centre for intercourse with all places on the Firth of Clyde and the Western Highlands (*see* p. 877).

**RYDE, Isle of Wight.** M.B. Pop. 11,043. *Means of access:* By steamboat. *Location:* N.E. coast of Isle of Wight, facing Portsmouth. *Elevation:* 144 ft. *Aspect:* North. *Sunshine:* 2,184 hrs. end of Oct., 1906. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Clay, gravel, and sand. *Pier* (with pavilion): ½ m. *Beach:* Sand. *Sea bathing:* Mixed. *Season:* June to Sept.

A lively town, second in yachting importance only to Cowes. Excursions by coaches, motor buses, trains, and steamers to any part of the island. *Annual fixtures:* Two regattas, rose show, gymkhana, chrysanthemum show. Tennis courts and bowling greens (*see* p. 877).

**ST. ANDREWS, Fifeshire.** Pop. 7,621. N.B. Ry. 20 m. South of Dundee. This ancient and royal city is famous for its magnificent golf links—a credit not only to the city, but to the entire world of golfers; for its University, the oldest in Scotland, where formerly the Primate of Scotland resided; and for the variety and striking beauty of its surrounding scenery and coast views. It is a fashionable watering-place, with every requisite for health and pleasure. Golf club over 100 years old (*see* p. 877).

**ST. BEE'S, Cumberland.** R.D.C. Pop. 1,200. *Means of access:* L. & N. W. Ry., and M. Ry.; through communication. *Location:* West Coast Cumberland. A quiet seaside village; rocks and headlands. Fine old Norman church. Recreation ground; bowling; tennis. *Season:* June–September; mild winter.

**ST. MARGARET'S BAY, Kent.** Pop. 1,086. S.E. & C. Ry., 80 m. from London.

Village health resort on coast, 4½ m. N.E. of Dover. Houses on different elevations in a sheltered break in lofty cliffs only open to sea breezes. *Aspect:* South-east. *Climate;* Dry, bracing; warmer on shore than cliff-top. *Soil:* Chalk. Well and Company's water. June to January most favourable months.

**SALISBURY, Wilts.** Cathedral City. Pop. 17,900. *Means of access:* L. & S.W. Ry. and G.W. Ry., 84 m. from London. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk. *Baths:* Corporation, also private company. *Annual fixtures:* Pleasure fair (3 days), sheep fair, races, county ball, Bibury Club races.

From its history, antiquity, and position in the fertile valley of the Avon, Salisbury is a most interesting city. Chief amongst its attractions is its splendid cathedral (spire 404 feet, the highest in England), dating from 1220, one of the best examples extant of early English architecture. Stonehenge with its colossal Druidic ruins, and Salisbury Plain, military manœuvres annually, a vast area of 200 square miles, can be visited from here. County hall, theatre, promenade concerts in Victoria Park nightly during summer (Sundays excepted), Blackmore Museum, public library, golf links (9 holes) (*see* p. 878).

**SALTBURN-BY-THE-SEA, Yorks.** U.D.C. Pop. 2,578. N.E. Ry. *Location:* On coast; Whitby, 21 m.; Scarborough, 42 m. *Elevation:* 150 ft.; inclined tramway from beach. *Neighbourhood:* Moorland. *Aspect:* North. *Climate:* Bracing. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Clay and sand. *Front:* Upper and lower promenade separated by sloping turf. *Pier:* Band-stand. *Beach:* Sand entirely; no groynes. *Bathing:* Mixed; tents and machines. *Baths:* Brine and electric massage; large sea-water swimming. *Season:* June to September.

Well supplied with facilities for amusements and recreation; golf links (9 holes) (*see* p. 877).

**SANDGATE, Kent.** U.D.C. Pop. 2,000. S.E. & C. Ry., 68½ m. from London. On coast in between Hythe and Folkestone, close to Shorncliffe camp. *Aspect:* South. *Climate:* Equable; freedom from sea fogs. *Soil:* Sandy. *Beach:* Shingle. Tramway to Hythe.

Most houses face the sea and enjoy a southern aspect. Well protected by tall cliffs from N.N.W. and N.E. winds. Fifteen minutes from Shorncliffe Camp (*see* p. 877).

**SANDOWN, Isle of Wight.** U.D.C. Pop. 5,220. *Means of access:* L.B. & S.C. Ry. and L. & S.W. Ry., *viâ* Portsmouth and Ryde; also steamers in summer. *Location:* On N. end of Sandown Bay, south coast of the island, 6 m. from Ryde, 2 m. from Shanklin. *Elevation:* From sea-level to 200 ft. *Neighbourhood:* Cliffs, great variety in formation and colour; background, downs. *Aspect:* South. *Climate:* Mild, dry; small rainfall. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sand, gravel, and chalk. *Front:* Esplanade, bandstand. Kursaal and Arcade. *Pier:* 840 ft.; pavilion; landing-stage for steamers; facilities for sea-bathing. *Sea-bathing:* Mixed. *Ex.*

*cursions:* Rail, road, sea. Sandown is the junction for the island railways. *Season:* June-October (August principal month). *Annual fixture:* Regatta, August.

A quiet, family watering-place; entertainments of a varied description at the Pier Pavilion, Kursaal and Town Hall. Bands and other musical attractions on the esplanade. Yachting, canoeing, boating; golf links (18 holes). Coaching, motor buses (*see* p. 878).

**SCARBOROUGH, Yorkshire.** M.B. Pop. 38,200. 230 m. from London, *vid* York (42 m.), by G.N. and N.E. lines. *Location:* On N.E. coast, between Whitby and Bridlington. *Elevation:* Ranges to 300 ft. *Neighbourhood:* Moors and dales. *Aspect:* East. *Climate:* Mild. *Sunshine:* 1,473 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Front:* Promenades at high and low levels. *Pier:* 1,000 ft., pavilion. *Beach:* Sands. *Sea-bathing:* Not mixed. *Baths:* Sea-water, &c. *Mineral waters:* Chalybeate. *Season:* June-September; cricket festival, September.

Fashionable watering-place, with a diversified frontage of 2 m. with esplanade overlooking bay and harbour. North and south parts, each with a fine sandy bay, separated by a rocky promontory 300 ft. high. The noted Spa establishment and grounds—a social rendezvous, contains promenade, kiosk bandstand, theatre, grand concert hall, ballroom, picture gallery, and café, besides pumproom and other attractions. A ravine, which separates south cliff from main part of town, used as public park. St. Nicholas Cliff pleasure gardens, Holbeck gardens, Clarence gardens and marine drive skirting the sands, aquarium, swimming baths. Theatre Royal, Londesborough Theatre, hippodrome, museum, golf links (18 holes), cricket club, tennis, croquet, bowling green, boating, fishing, angling (*see* p. 878).

**SEAFORD, Sussex.** U.D.C. Pop. 4,100. L.B. & S.C. Ry., 58 m. from London. *Location:* On coast, between Eastbourne and Brighton; 2 m. E. of Newhaven. *Elevation:* 20 ft. to 60 ft. *Neighbourhood:* Cliffs and downs. *Aspect:* South-west. *Climate:* Invigorating, equable; small rainfall. *Water supply:* Constant, from chalk wells. *Drainage:* Modern. *Soil:* Chalk. *Front:* Parade. *Beach:* Pebbly. *Bathing:* Mixed. *Excursions:* Alfriston, 4 m.; Littlington, 3½ m.; Wilmington, 6 m. *Season:* July-September.

A quiet, old-fashioned town in small bay, protected by high downs from N. and E. Operatic concerts on parade; golf links (18 holes), ladies' course; tennis, croquet, fishing (*see* p. 879).

**SEATON, Devon.** Pop. 1,375. L. & S.W. Ry. 152 m. from Waterloo between Lyme Regis and Sidmouth. Equable climate. Fine cliff scenery. Pebbly beach, safe bathing, sea fishing, angling in river Axe (salmon and trout), boating, hunting, shooting, golf links (9 holes). Regatta in July (*see* p. 878).

**SELSEY-ON-SEA, Sussex.** L.B. & S.C. Ry. 8 m. south of Chichester, connected by light railway and 9 m. from Bognor by coast walk. A quiet, secluded summer resort, on east side Selsey Bill. Prawn and lobster fishing. Yacht anchorage. The attractions are sea bathing, level roads for cycling, shooting, fishing, cricket, driving, &c. (*see* p. 879).

**SEVENOAKS, Kent.** Pop. 8,103. S.E. & C. Ry. 23 m. from London. 14 m. West of Maidstone. This fine market town occupies a very elevated and healthy position near the river Darenth. Noted for the rural beauties of its surroundings, and the number of the historical residences, &c., in its vicinity: including Knole House and Park, Penshurst Place, Hever Castle, Igtham Mote. The neighbouring villages contain much of antiquarian interest. Excellent hunting in district with foxhounds and staghounds (*see* 879).

**SHANKLIN, Isle of Wight.** U.D.C. Pop. 4,533. *Means of access:* L.B. & S.C. Ry. and L. & S.W. Ry., *vid* Portsmouth and Ryde. *Location:* Between Sandown and Ventnor, in a shallow indentation of the coast-line of Sandown Bay; 8½ m. from Ryde. *Elevation:* Sea-level, cliff, and hillside. *Neighbourhood:* High downs. *Climate:* Mild, sunny. *Water supply:* Constant. *Soil:* Chalk. *Front:* Esplanade; roadway separates houses from promenade top of beach. *Pier:* 1,180 ft.; pavilion; excursion steamers call. *Beach:* Sands. *Baths:* Spa bathing establishment. *Mineral water:* Ferruginous spring. *Excursions:* Rail, road, and sea. *Bathing:* mixed.

A quiet, family watering-place at the foot of downs, 800 ft. high, built on the shore, on the cliff, and backwards towards the downs. Shanklin Chine, the pride of the place, runs from the beach into the land for 450 ft. and is abundantly wooded. Town band, public institute, social and recreation club, miniature rifle club, cricket, tennis, croquet, badminton, boating, golf (18 holes), art school, electric light (*see* p. 879).

**SHERINGHAM, Norfolk.** Pop. 2,700. Midland and G. Northern Jt. Ry. and G.E. Ry. On coast, little W. of Cromer. A quiet and select watering-place. Bold cliffs, sands, golf (18 holes), and ladies' course; also a "nursery" for tyros. Cricket, tennis, croquet, bowls, fishing. Mixed bathing (*see* p. 878).

**NEW SHOREHAM, Sussex.** Pop. 3,900. U.D.C. L.B. & S.C. Ry., 56 m. from London. *Location:* On the east coast, 6 m. W. of Brighton. *Elevation:* Slightly above sea-level. *Neighbourhood:* Flat; hilly N. *Aspect:* Southerly. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Loamy. *Beach:* Shingle; sand at low water. *Bathing:* Mixed.

Situated at the foot of the South Downs on the River Adur, just W. of Shoreham harbour, with a bungalow settlement on the immediate seafront. Boating on sea and river; fishing, golf (18 holes), tennis (*see* p. 879).

**SHREWSBURY, Shropshire.** Pop. 28,396. *Means of access:* L. & N.W. Ry. and G.W. Ry. 162¼ m. from London. Situated on the Welsh border. This ancient and interesting town, on the River Severn, is rich in historical associations, ancient public buildings, and old timbered houses. Its castle, once a royal fortress, is associated with many stirring fights, and portions of the town ramparts still remain. Shrewsbury was the native place of Charles Darwin, and Sir Philip Sydney was educated at its famous grammar school. *Climate:* Equable. *Drainage:* Modern. Good water. Electric light.

Free library and museum, natural history and museum, archæological museum, old market hall, borough technical school, public baths, theatre royal, music hall, harmonic, orchestral,

and choral societies. Boating, angling, tennis, bowls, golf links (9 holes), hockey, football, swimming, shooting, hunting, cricket.

**SIDMOUTH, Devon.** Pop. 4,201. L. & S.W. Ry. 168 m. from Waterloo. Protected from N. and E.; much sunshine; comparatively small rainfall for Devon. Good drainage and water. Typical South Devon climate; recommended for asthma, bronchitis, &c. Large bathing establishment, esplanade. *Beach:* Sands. Boating, tennis, archery, cricket, golf links (18 holes), river fishing. (*see* p. 877).

**SILLOTH, Cumberland.** U.D.C. Pop. 1,292. N.B. Ry. On the shore of the Solway Firth, 18 m. W. Carlisle. *Elevation:* Sea-level. *Neighbourhood:* Agricultural. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sandy. *Front:* Lawn and promenade. *Beach:* Sands. *Bathing:* Not mixed. *Season:* June to Sept.

**SKEGNESS, Lincolnshire.** U.D.C. Pop. 3,000. G.N. Ry. *Location:* On coast between Hunstanton and Mablethorpe. *Neighbourhood:* Flat country, with sand dunes. *Aspect:* East. *Climate:* Bracing. *Sunshine:* 1,735 8 hrs., 1905. *Drainage:* Modern. *Water supply:* Improved one in progress of construction. *Soil:* Sandy. *Front:* 1 m. parade. *Pier:* 1,843 ft.; pavilion. *Beach:* Sands. Sea-bathing; salt-water baths, with swimming-bath and water chute. A breezy, modern watering-place, looking over the waters of the North Sea. King's Hall Theatre, pleasure gardens and pavilion, switchback railway, cricket and tennis ground (6 acres), golf (18 holes), angling, good cycling roads.

**SOUTHAMPTON.** County borough. Pop. 117,312. L. & S. W. Ry. London, 75 m.; Cowes, 12 m.; Portsmouth, 30 m. *Aspect:* South. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel. *Front:* Southampton Water, western esplanade. Pier with pavilion. *Beach:* Shingle. *Bathing:* Mixed; in large open-air salt-water baths. *Annual fixtures:* Flower shows, regattas. *Amusements:* Yachting, boating, fishing (sea and river), shooting, golf links (9 holes), bowling greens, and tennis courts, county cricket ground, football, large natural common of 365 acres, parks and pleasure grounds, theatres, &c. Many antiquarian relics.

Situated at the head of Southampton Water, and bordered by the estuaries of the Itchen and Test, this important and very progressive seaport, with its long stretch of magnificent docks, affords an endless source of pleasure to visitors interested in the coming and going of the great troopships, the big liners, cross-channel steam packets, and coasting steamboats. Numerous facilities for marine excursions to Isle of Wight, &c. (*see* p. 882).

**SOUTHEND-ON-SEA, Essex** (*see* p. 879). M.B. Pop. 50,000. *Means of access:* London, Tilbury & Southend Ry., G.E. Ry., Midland Ry. Steamers in summer from London Bridge. *Location:* On N. shore of Thames estuary, opposite Sheerness, 35 m. from London. *Elevation:* From sea-level (E. part) to 125 ft. above (W. part). *Neighbourhood:* Well-shrubbed cliffs; rural behind town. *Aspect:* South. *Sunshine:* 1,843 hrs., 1905. *Climate:* Dry, mild. *Water supply:* Constant, soft. *Drainage:* Modern. *Soil:* Brick-earth and gravel. *Front:* Promenade, 3 m.; marine gardens along cliffs. *Pier:* 1½ m., tramway, pavilion (seats 1,200), daily entertainments, sacred concerts Sunday. *Beach:* Shallow, shingle and sandy; tide goes out great distance, disclosing mud. *Bathing:* Mixed; bathing tents allowed on beach; floating swimming baths. *Baths:* Sea-water, hot and cold. *Excursions:* Rail and road (motors, *chars-à-banc*, &c.). An excellent centre for marine trips, river coasting and Continental. *Season:* Whitsuntide to Sept. *Annual fixtures:* Regatta week, Sept.; cricket week, Aug.; angling festival, Oct.; Prittlewell races. Flower show and Mayor's Ball.

A popular lively resort (**Southend-on-Sea**) within 50 minutes of City; upwards of 100 trains daily; and residential town (**Westcliff-on-Sea**), many City men living here. The Thames is here 7 m. wide, and all day long the world's shipping up and down affords a fine sight.

Technical schools and public library (cost over £9,000), institute, good private schools. Empire Theatre, Kursaal. Pier pavilion. Marine park, sports, dancing pavilion, 2 public parks, cricket, tennis. Southchurch Hall Park; yachting, boating, hockey, tennis, electric tramway from esplanade to top of cliffs; electric light. Golf links at Rochford (*see* p. 879).

**SOUTHPORT, Lancs.** M.B. Pop. 52,000. *Means of access:* L. & Y. Ry., Midland, G. Northern, G. Central, and L. & N.W. Rys. *Aspect:* West. *Climate:* Mild. *Sunshine:* 1,595½ hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sand. *Front:* Marine gardens, lake, and sandy shore. *Pier:* 1,300 yds., pavilion. *Bathing:* Mixed. *Excursions:* Blackpool, Llandudno, Liverpool, Windermere, Harrogate. Municipal band, May to Oct., Winter Gardens, Botanic Gardens, Kew Gardens, Corporation bowling greens, tennis and croquet courts, water chute, captive flying machine (Maxim's), marine lakes for boating and sailing.

Besides a large residential population it attracts numerous visitors in the spring and autumn in search of health and rest (*see* p. 882).

**SOUTHWOLD, Suffolk.** M.B. Pop. 2,800. *Means of access:* G.E. Ry. and Southwold Ry. *Location:* On coast, between Lowestoft and Aldeburgh. *Elevation:* 40 ft. *Aspect:* South-east. *Climate:* Dry, bracing. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel. *Front:* Cliff walk. *Pier:* 870 ft.; "Belle" steamers call. *Beach:* Shingle and sand. *Bathing:* Mixed. *Excursions:* to Dunwich up River Blyth. Motor 'buses to Lowestoft. *Season:* July to Sept. *Annual fixtures:* Pleasure fair, lifeboat parade, model yacht regatta. Golf (18 holes), sailing and boating on sea and river; harbour for yachts; cricket and tennis on common; sea fishing in autumn. Electric light and telephone (*see* p. 880).

**STIRLING.** Pop. 18,403. *Means of access:* Caledonian Ry., N. British Ry. *Location:* On River Forth, midway between Edinburgh and Glasgow. One of the most beautiful and historic towns in Scotland, offering special attractions to tourists and visitors. Fine view from ancient castle. Golf links, bracing air, good water supply.

**STONEHAVEN, Kincardine.** Pop. 4,500. Cal. Ry., N.B. Ry. *Location:* 14 m. S. of Aberdeen. *Elevation:* 100 ft. *Aspect:* East. *Climate:* Genial. *Beach:* Shingle and sand. *Bathing:* Not mixed. *Season:* May–Oct.

Has deservedly a high repute as a summer

resort. In the neighbourhood are the picturesque ruins of Dunnottar Castle. Golf course (18 holes), situated on the top of the cliffs close to the sea; cricket ground with large pavilion; well-kept bowling green; sea and river fishing; excellent boating and bathing facilities; and ideal cycling roads (*see* p. 882).

**SUTTON, Surrey.** U.D.C. Pop. 18,500. L.B. & S.C. Ry. 12 m. from London. *Elevation:* 292 ft. *Climate:* Dry and bracing, few fogs. Midway between Croydon and Epsom. Numerous interesting and historical villages are within easy walking distance, and the Holmesdale valley with its ancient towns and villages is immediately accessible (*see* p. 882).

**SUTTON ON-SEA, Lincolnshire.** Pop. 2,710. G.N. Ry. (branch, Louth to Willoughby). On coast, between Skegness and Mablethorpe. *Aspect:* East. *Climate:* Dry, bracing. *Soil:* Sandy. *Front:* Promenade and sands. *Bathing:* Mixed (*see* p. 882).

**SWANAGE, Dorset.** U.D.C. Pop. 3,384. *Means of access:* L. & S.W. Ry. and steamboat. *Climate:* Mild; pure, dry atmosphere; small daily range of temperature; much sunshine; freedom from fogs and strong winds. *Drainage:* Modern. *Front:* Esplanade. *Pier:* 600 ft. *Beach:* Sands. *Bathing:* Mixed. *Season:* July to Sept.

A quiet family watering-place in the centre of Swanage Bay, a little south of Bournemouth. Bathing, boating, fishing, yachting, swimming, excursions by steamboats along coast (*see* p. 882).

**TEIGNMOUTH, Devon.** U.D.C. Pop. 8,636. *Means of access:* G.W. Ry. *Location:* At the mouth of the Teign, between Exeter and Torquay. *Elevation:* 70 ft. *Neighbourhood:* Moorland. *Aspect:* South. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Red sandstone. *Front:* 1½ miles. Asphalte paths on sea-wall. *Pier:* 600 ft.; pavilion. *Beach:* Sand and shingle. *Sea-bathing:* Mixed. *Excursions:* Rail, river, marine, coaching. *Season:* July–Sept. *Annual fixtures:* Regatta, lifeboat-day.

A summer holiday resort, winter residence, and seaport; is sheltered by surrounding hills from E. and N. *Al fresco* concerts on the Den (6 acres); grounds adjoining beach. Sailing and swimming matches, water polo, boating on river and sea, fishing, shooting; good anchorage for yachts in harbour. Teign Corinthian Sailing Club (*see* p. 882).

**TENBY, Pembroke.** M.B. Pop. 4,400. *Means of access:* G.W. Ry. & L. & N.W. Ry. *vid* Carmarthen. *Location:* On W. shore of Carmarthen Bay. *Elevation:* Up to 200 ft. *Neighbourhood:* Cliffs and rocks. *Aspect:* N.E. to S.W. *Climate:* Mild in winter; freedom from frost and snow; heat in summer moderate. *Sunshine:* 1,713 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Limestone. *Front:* North, wooded to sea-line; south, bold rocky cliffs. *Pier:* 240 ft. *Beach:* Extensive sands; shingle at places. *Bathing:* Mixed. *Excursions:* Road, rail, and sea. *Seasons:* July–Sept., Nov.–March. *Annual fixtures:* Tennis tournament, horse show, golf tournament, hunt week, race week, aquatic carnival.

A fashionable and cheerful watering-place, the favourite health resort of South Wales (*see* p. 884).

**TINTAGEL, Cornwall.** Pop. 868. 4½ m. from Camelford Station by bus. L. & S.W. Ry., 242 m. from London. Tintagel Castle, on top of a steep precipice, is the legendary home of King Arthur, and one of the show places of N. Cornwall.

Grand scenery, bracing climate, sandy beach; boating, golf links (9 holes) (*see* p. 883).

**TONBRIDGE, Kent.** Pop. 12,736. S.E. & C. Ry., 29½ m. from London. Situated on the banks of the Medway, surrounded by some of the loveliest and most varied scenery in Kent. Boating on the river, cricket week, hunting, etc., are the principal amusements (*see* p. 883).

**TORQUAY, Devon.** M.B. Pop. 33,625. *Means of access:* G.W. Ry., 220 m. from London. *Location:* S.E. coast of Devon in the N. recess of Torbay, 25 m. S. of Exeter. *Neighbourhood:* Cliffs and hills. *Sunshine:* 1,775 hours, 1905. *Climate:* Mild, soft, equable; luxuriant vegetation. *Water supply:* From Dartmoor; constant, soft. *Drainage:* Modern. *Soil:* Limestone. *Front:* Ornamental promenades and marine drive. *Pier:* 1,500 ft.; pavilion, skating-rink. *Beach:* Sand and shingle. *Bathing:* Mixed. *Baths:* Corporation baths (fresh and sea-water, medicated), Turkish. *Excursions:* Rail and river, coaching and marine. *Seasons:* Winter and summer. *Annual fixtures:* Balls at Easter, Aug., and Christmas; dog show, flower show, regatta, steeple and hurdle races, mobilisation of Fleet.

In a curve of Torbay, on a peninsula between the Rivers Dart and Teign, Torquay is built on seven hills, the highest reaching 400 ft., sheltered N. and E.; lower part is built round harbour (enclosed by quay and piers), the houses rising behind in tiers, affording choice of elevation. A fashionable, high-class watering-place, favourite resort for the delicate, and popular winter residence; claims to be warm in winter and cool in summer. Good yachting facilities in harbour, and safe anchorage in bay. Convenient centre for excursionists over Dartmoor.

*Recreations:* Princes Gardens—fêtes, tennis, croquet, bowls, band (plays daily), golf (18 holes and 9 holes), yachting, boating, fishing (sea, river, and lake), hunting, polo, chess club, theatre; in the Corporation Bath Saloons—balls, concerts, lectures, skating rink; at the Recreation ground—football, hockey, tennis, cycle track; model yacht lake in the King's Gardens (*see* p. 883).

**TOTNES, Devon.** M.B. Pop. 4,034. G.W. Ry., 21 m. S.W. of Exeter. On River Dart, not far from Dartmoor. Boating, angling; steamer trips daily to Dartmouth; motor and coach trips daily to Paignton.

**TOWYN, Merionethshire.** U.D.C. Pop. 3,840. Cambrian Ry. *Location:* A quiet and bracing seaside resort on the shores of Cardigan Bay, at the opening of a broad plain, into which, 6 m. inland, two valleys merge—one from the foot of Cader Idris, brightened by the River Dysynni, the other from Lake Talyllyn.

**TREFRIW, Carnarvonshire** (*see* p. 818). Llanwrst Station, L. & N.W. Ry., 1 m. An inland village health resort in the valley of the Conway on west side of the river 8 m. from Llandudno Junction, and 7 m. from the sea.

**TUNBRIDGE WELLS.** M.B. Pop. 35,000. *Means of access:* L.B. & S.C. Ry., *vid* Croydon and Oxted; S.E. & C. Ry., *vid* Chislehurst and Tonbridge. *Location;* 5 m. south of Tonbridge,

on borders of Kent and Sussex. *Elevation:* Ranges from 300 ft. to 440 ft. above sea-level. *Neighbourhood:* Undulating, pastoral, well wooded, luxuriant foliage. *Climate:* Dry, mild or bracing, according to elevation; free from humidity, few fogs. *Sunshine:* 1,737 hrs., 1904. *Water supply:* Constant, soft. *Mineral springs;* Purest chalybeate drinking water. *Drainage:* Modern. *Soil:* Porous sandstone. *Excursions:* Within easy reach of many historical mansions and castle ruins; Eridge, 3 m.; Crowborough Hill, 7 m.; Sevenoaks, 12 m.; Edenbridge, 13 m. *Annual fixtures:* Athletic sports, cricket week, agricultural show, steeplechases (Eridge), coursing (Edenbridge). *Season:* June–October.

In 1906 the famous Nelson memorandum was purchased by Councillor J. B. Woollan, J.P., of Sherwood Park, a resident of this town, and during his lifetime it will be exhibited at the Town Hall. On his death the memorandum will become the property of the British nation, and be placed in the British Museum. The Exhibition is open daily at the Town Hall from 10 to 4; Saturdays 10 to 1; Tues., Thurs. and Sat. admission 1s., other days free.

Inland watering-place. A select residential and health resort. The common, 249 acres, is a splendid sloping sweep of verdant heath, furze and bracken, the highest parts, 440 ft. above sea-level, commanding fine landscape views; foot of common are its medicinal springs, pump-room and Pantiles. Corporation band, open-air entertainments, opera house, assembly-rooms, musical and dramatic societies, technical institute, open-air and indoor bathing establishments, Neville athletic grounds, several parks and recreation grounds (football, cricket, tennis, archery), golf links (9 holes), good hunting centre, coaching (*see* p. 883).

**VENTNOR, Isle of Wight.** U.D.C. Pop. 6,000. *Means of access:* L.B. & S.C. Ry. and L. & S.W. Ry., *via* Portsmouth and Ryde. *Location:* S.E. coast of the island, 12 m. from Ryde. *Elevation:* From sea-level to 800 ft. *Neighbourhood:* Wooded downs. *Aspect:* South. *Climate:* Mild and equable. *Sunshine:* 1,698 hours, 1905. *Water supply:* Constant over greater part of town. *Drainage:* Modern. *Soil:* Chalk. *Front:* Esplanade along top of beach; a marine drive separating houses from promenade. *Pier:* 640 ft.; excursion steamers call. *Beach:* Shingle. *Bathing:* Not mixed. *Excursions:* Rail, coach and steamer. *Season:* Winter and summer. *Annual fixture:* Tennis tournament (August).

The town lies in a recess in a bay, sheltered from N., N.E., and E. by lofty downs, which gently descend to the shore in irregular rocky tiers. The houses rise from the beach with striking effect in terraces at various altitudes, and extend along the undercliff, which natural plateau halfway up the downs is the great feature of the district. A fashionable resort and winter sanatorium. Pavilion, public park, tennis, croquet, golf links (18 holes), coaching, hockey, free library; electric light (*see* p. 884).

**WALMER.** U.D.C. Pop. 5,775. Adjoins Deal. Also a Cinque Port, its castle being up till recently the residence of the Lord Warden, but now open to public inspection (*see* p. 843).

**WALTON-ON-THE-NAZE, Essex.** U.D.C. Pop. 2,015. G.E. Ry., 70 m. from London. *Location:* On the coast, 9 m. from Clacton, 18 m. from Colchester. *Aspect:* E. and S.E. *Climate:* Bracing. *Sunshine:* See Clacton. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Gravel, sand, and loam. *Front:* Promenade on sea-walls. *Pier:* ¼ m.; pavilion. *Beach:* Sands. *Bathing:* Mixed. *Season:* June to Oct. Theatre, pierrots, golf links, tennis, croquet.

**WARWICK,** C.B. Pop. 11,889. *Means of Access:* L. & N.W.R. and G.W.R. 108 m. from London. An ancient and interesting town, standing on a rocky plateau on west bank of river Avon, in the midst of one of the prettiest districts in the Midlands. Of special interest to tourists is its fine old castle, one of the grandest specimens extant of an old feudal baronial hall, towering 100 feet above the N.W. bank of the river. Warwick Castle contains a vast collection of art and antiquarian treasures. In the town are some very fine specimens of Gothic architecture (Beauchamp Chapel) and some quaint old houses and gateways. Kenilworth and Stratford-on-Avon are easily accessible (*see* p. 884).

**WATERFORD,** C.B. Pop. 29,000. G.W.Ry. 97 miles S.S.W. of Dublin. One of the most ancient cities in Ireland. Its situation and advantages as a port made it an important factor in the history of Ireland; and its position on the River Suir is one of considerable beauty. Of importance to visitors are the numerous excursions by road, rail, and steamer to the picturesque villages at the mouth of the harbour. Waterford was the one place in Ireland which successfully resisted the victorious arms of Cromwell (*see* p. 885).

**WEST KIRBY AND HOYLAKE, Cheshire.** Pop. 13,200. Wirral Ry., L.N.W. Ry., G.C. Ry. *Location:* 12 m. from Liverpool, 18 m. from Chester. *Elevation:* 280 ft. *Aspect:* S.W. *Climate:* Mild, well sheltered, little frosts. *Water:* Constant and abundant. *Soil:* Sandy. *Drainage:* Modern. *Beach:* Sand. *Season:* June to September. Noted Golf centre, Hoylake, 18 holes; boating; driving; lawn tennis and bowling-greens.

West Kirby possesses a splendid Marine Lake (along the side of which runs a wide promenade), available for yachting, boating, and bathing, at any state of the tide (*see* p. 884).

**WESTON-SUPER-MARE, Somerset.** U.D.C. Pop. 19,845. *Means of access:* G.W.Ry., Midland Ry.; steamers from S. Wales. *Location:* At the N. extremity of Uphill Bay, in a recess of the Bristol Channel on the Somerset coast, opposite Cardiff (10 m. across), 20 m. S.W. of Bristol. *Neighbourhood:* Sands, hillsides, woods. *Climate:* Equable, dry, bracing. *Sunshine:* 1,521 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sandy. *Front:* 2 m.; promenade and carriage drive on sea-wall. *Piers:* 2; Birnbecke (400 ft.); Grand (pavilion). *Beach:* Sands. *Sea-bathing:* Mixed. *Baths:* Swimming, sea-water, electric, Turkish, and general establishment. *Excursions:* Sea trips to Lynmouth, Ilfracombe, Minehead, and South Wales. Light railway to Clevedon, 8 m. Coach drives to Chadder, Banwell, Winscombe, &c.

A prominent and popular summer and autumn watering-place, open to Atlantic breezes, largely resorted to by people from the inland parts of West of England; built on the well-wooded slopes of Worlebury Hill, and at its base protected from N. and E. Municipal pavilion and

opera house and grand pier pavilion (concerts, military bands, dramatic entertainments), 4 public parks, 400 acres woods, golf links (18 holes), hunting, coaching, tennis, boating, free library, museum, reading-room, gymnasium, school of art, sanatorium, convalescent home, and electric trams (*see* p. 884).

**WEYMOUTH AND MELCOMBE REGIS, Dorset.** M.B. Pop. 19,831. *Means of access:* G.W.Ry. and L. & S.W. Ry. *Location:* Divided by the River Wey, on Weymouth Bay, opposite Isle of Portland. They form one combined borough. *Temperature:* Equable. Seaport town and popular watering-place. *Climate:* Bracing, but mild during winter. Boating and fishing; also steam-boat and *char-à-banc* excursions. Mixed bathing allowed, also visitors' private bathing tents on foreshore. Noted for number and standing of its private schools. G.W.R. Service to the Channel Islands (*see* p. 885).

**WHITBY, Yorks.** U.D.C. Pop. 11,755. G.N. Ry. An ancient port and fishing town between Saltburn and Scarborough, on each side of the mouth of the River Esk, surrounded by hills, dales, woods, rivers, and moorland; extensive sands, two free piers at harbour entrance. It now attracts large numbers of visitors in the summer. Climate bracing, golf, sea and river fishing, excellent facilities for yachting and boating, mixed bathing (*see* p. 885).

**WHITLEY BAY, Northumberland.** U.D.C. Pop. 7,705. N.E. Ry. A growing watering-place on the cliff coast, connected with Newcastle by electric tramway service. Golf links, bathing, boating, fishing.

**WINCHESTER, Hampshire.** Cathedral city. Pop. 20,929. *Means of access:* L. & S.W. Ry. and G.W. Ry.; 60 m. from London; on the east side of a hill, sloping to the river Itchen; 12 m. from South Coast. *Neighbourhood:* Hilly and pastoral. *Aspect:* South. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk. *Baths:* Open, swimming. *Annual fixtures:* Several fairs; cricket week; golf links (3 courses, 18 holes); fishing.

Winchester cathedral is the largest and one of the oldest in England, its nave being considered the finest. Other attractions are the County Hall, the Hospital of St. Criss, the Thrupp Gallery, the museum, and numerous institutions, ancient and modern. Near the city is the famous Winchester College (*see* p. 885).

**WINDSOR, Berks.** Pop. 13,958. *Means of access:* G.W. Ry. and L. & S.W. Ry. A Royal and ancient city of world-wide interest. Its famous castle, founded by William I., has been for many centuries the seat of British Royalty, and, with Windsor Park and Virginia Water, offers exceptional attractions to visitors (*see* p. 885).

**WOODHALL SPA, Lincolnshire.** U.D.C. Pop. 1,100. G.N. Ry., 18 m. from Lincoln. *Elevation:* 50 ft. *Neighbourhood:* Flat and woody. *Climate:* Dry and bracing; small rainfall. *Mineral waters:* Bromo-iodine. The baths and pump-room contain all modern improvements. Massage. Tennis, croquet, bowls and golf (18 holes) in adjoining grounds. *Season:* March–November.

The bromo-iodine water, which has made Woodhall famous, is the most powerful of its kind in Europe, and many dangerous and distressing diseases give way before its curative virtues (*see* p. 887).

**WOOLACOMBE, Devon.** Pop. 350. 1½ m. from Morthoe Station, 12 m. from Barnstaple. *Elevation:* 60 ft. *Climate:* Equable; sheltered from E. and N. *Sunshine:* 1,654 hrs., 1904. *Rainfall:* 28·26 in. (claimed to be lowest in N. Devon). *Water supply:* Direct from Exmoor. *Drainage:* Modern. *Soil:* Shale. *Front:* Extensive firm sands. *Bathing:* Mixed. *Season:* June–Oct. *Annual fixtures:* Tennis and golf tournaments. Sand competitions. A quiet and growing seaside village resort on coast of N. Devon facing south.

**WORCESTER.** C.B. Pop. 48,000. G.W. Ry. and Midland Ry. 120 m. from London; on the left bank of the Severn. *Aspect:* West. *Climate:* Mild. *Water supply:* Constant. *Water:* Soft. *Drainage:* Modern. *Soil:* Sand and gravel. *Excursions:* Steamers to Malvern, Tewkesbury, Ledbury, &c. Boating on river, cathedral promenade.

One of the most ancient of our cathedral cities. The cathedral, built in the early English style, dates from the eleventh century. For beauty and distinctive character Worcester china is famous all the world over. Golf links (9 holes). Surrounding district, traversed by the Severn, affords tourists a great variety of typical English rural scenery (*see* p. 885).

**WORTHING, Sussex.** M.B. Pop. 25,809. L.B. & S.C. Ry., 61 m. from London. *Location:* On coast between Beachy Head and Selsey Bill, 12 m. W. of Brighton. *Elevation:* Slightly above sea-level. *Neighbourhood:* Flat; background South Downs 3 m. distant from town hall. *Aspect:* South. *Climate:* Soft, mild, equable. *Rainfall:* 26·85 in. *Sunshine:* 1,715 hrs., 1905. *Water supply:* Constant, from the hills. *Drainage:* Modern. *Soil:* Loam and marl. *Front:* Asphalted promenade, 1¼ m., level with top of beach, slightly raised above carriage drive, road between it and houses; bandstand. *Pier:* 900 ft., pavilion; excursion steamers call in summer. *Beach:* Shingle, shelving to hard sands as tide recedes. *Bathing:* From tents, machines, and pier-head; mixed bathing. *Baths:* Large salt-water, swimming, and general establishment for ladies and gentlemen, with tennis courts adjoining. *Excursions:* Arundel, 10 m.; Bramber Castle, 9 m.; Goring Woods, 3 m.; Broadwater, 1 m.; 13th century church, Chanctonbury, 7 m. (800 ft.); Cissbury and other remains of Roman encampments. *Season:* Winter and summer. *Annual fixtures:* Regatta, horse show, cycle and athletic sports, poultry show, summer and autumn flower shows, swimming carnival, tennis and croquet tournaments, sailing regatta.

A select and growing watering-place, residential town, and winter resort for invalids; much foliage and sylvan surroundings. Theatre Royal; library; school of art; choral societies; sports ground (county cricket, football, tennis, and hockey); Homefield Park, 16 acres (cricket, tennis, bowls); Steyne Gardens, 3 acres (promenade concerts); hunting; boating; electric light; golf links (18 holes) close to town, reached by a service of motor omnibuses (*see* p. 886).

**YARMOUTH, GREAT.** C.B. Pop. 53,000. *Means of access:* G.E. Ry., Midland & G.N. Joint Ry., steamboats from London. *Location:* Coast

of Norfolk, 20 m. E. of Norwich. *Elevation:* From little above sea-level to 50 ft. above. *Neighbourhood:* Norfolk Broads. *Aspect:* East. *Climate:* Bracing. *Sunshine:* Not recorded. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Dry sand. *Front:* 4 m. marine drive, separates houses from concrete promenade (which fringes sands), with ornamental gardens, bandstands, and winter gardens. *Piers:* 2, Wellington and Britannia, each with large and well-furnished pavilion, and 1 jetty. *Beach:* 7 m. sands in borough. *Bathing:* Separate and mixed. *Excursions:* To Broads by rail, boat, and road; also marine trips. *Season:* June-Sept. *Annual fixtures:* Regatta, Aug. Race meeting, Sept. Golf meetings, Easter, Whit week, and 1st week in Nov. (closed to members); open golf tournament, Aug.; tennis tournament, Aug.

A seaport; important herring fishery station; gay and popular holiday resort, in county of Norfolk. The town possesses unequalled sands and a fine stretch of quays lined by Elizabethan houses. The old parish church is one of the largest in the country. The toll-house, a 13th century relic, is now a museum and a free library; and the celebrated Nelson Room is still preserved at the Star Hotel. The sands extend to Gorleston, a modernised, quiet, select watering-place, connected with Yarmouth by rail and tram, and within the borough.

Assembly rooms; Aquarium Theatre; Theatre Royal; Hippodrome; Wellington Pier Gardens (military band daily); winter gardens. Recreation grounds, 40 acres (cricket, croquet, bowls, tennis, cycling), golf-links (18 holes); good cycling roads; boating and fishing on sea and Broads; revolving observation tower, 130 feet high; pavilion; switchback railway; Hotchkiss bicycle railway; Beach concert rings; minstrels; market covers 2½ acres; marine museum (*see* p. 887).

**YELVERTON,** South Devon. Pop. 1,500. *Means of access:* G.W. Ry. and motor 'bus from Plymouth.

A breezy moorland village, considered a good natural sanatorium all the year round; especially busy Aug.-Sept. Angling, hunting.

**YORK,** Yorkshire. C.B. Pop. 83,467. *Means of access:* All principal English and Scotch lines; 188½ m. from London. *Sunshine:* 1,387 hrs., 1905. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Clay. *Baths:* Open and covered swimming baths.

The cathedral, founded by Edwin, the Saxon king of Northumberland, possesses three features in which it is not matched in England—the size of its east window, the flowing tracery of its west window, and the beauty of its chapter house. Another striking feature is its ancient coloured glass. The city is very rich in antiquities and full of interest, and possesses the largest railway station in England. There are golf links (9 holes) and plenty of arrangements for outdoor and recreative sports both in and near the city (*see* p. 887).

*** *Our thanks are due to the Railway Officials, the Town Clerks, the Medical Officers of Health, and the Secretaries of Local Associations who have furnished us with particulars.*

For the purposes of comparison it may be mentioned that the sunshine recorded for *London* was 1,314½ hours in 1905. The sunshine values given in this article have been, wherever possible, obtained from the official records at the Meteorological Office. Where marked (J.P.R.) the value has been determined by means of a Jordan's Photographic Recorder; the results from this form of recorder are not directly comparable with those from Campbell Stokes' Recorders, and in consequence the Meteorological Office have now discontinued publishing them.

## TEMPERATURE AT BRITISH HEALTH RESORTS.

MEAN TEMPERATURE OF THE AIR AT BRITISH HEALTH RESORTS AND CHIEF TOWNS DURING THE YEAR ENDING JUNE 30th, 1906, COMPARED WITH THAT OBSERVED AT NICE FOR EIGHTEEN YEARS.

*DESCRIPTIVE PROSPECTUS AND FULL PARTICULARS MAY BE OBTAINED FROM THE*

**Manager & Secretary, 63, CHANCERY LANE, LONDON, W.C.** [233

"Gloy" won't do "everything,"
but it pastes paper daintily.

The label is red, and "Gloy" pale blue,
The bottle is one to remember you.
Armed with brush you go ahead,
"Gloying" daily for daily bread.

Wholesale only.
A. WILME COLLIER,
Shepherdess Walk,
London, N.

5 oz. A wee bottle for little folk at home .. .. 6d.

10 oz. The "grown up" size for offices .. .. 1/-

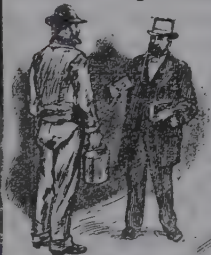
32 oz. More "Gloy" still to refill .. 2 -

160 oz. One gallon, 6 6

A paste for clean people.
Ask friend Stationer for some.

[215

**The City Missionary** is a friend in the Homes of the People, where he expounds the Holy Scriptures; whilst **125 SPECIAL** Missionaries are appointed to Cabmen, Coalies, Omnibusmen, Canal Boatmen, Navvies, Gas-workers, Railwaymen, Dockers, &c., including 25 to the Landlords, Barmen, and Customers in over 8,000 Public-houses, and 21 who visit solely among



the Welsh, Jews, and Foreigners in London.

# THE LONDON CITY MISSION
## EMPLOYS 428 MISSIONARIES
## IN THE GREAT METROPOLIS.

It is one of the oldest of the Home Missionary Societies, having been founded by David Nasmith in 1835.

**Offices—3, Bridewell Place, London, E.C.** [114

# HATCH, MANSFIELD & Co LTD

## WINE MERCHANTS.

*Telegraphic Address:* "LUSCIOUS, LONDON."

*Telephone No.:* GERRARD, 5325.

By special appointment to His Majesty King Edward VII.

47, PALL MALL, LONDON, S.W.

DIRECTORS:

*E. F. G. HATCH, ESQ., CHAIRMAN.*

EARL OF DENBIGH.
HON. SIDNEY GREVILLE.
LORD HYDE.
J. H. G. LANG, ESQ. (BELL, RANNIE & CO.)
HON. J. MANSFIELD.
A. ROSS MITCHELL, ESQ.
C. G. RAYNE, ESQ. (NEWCASTLE-ON-TYNE).

## HOME DEPARTMENT.

THE extent of the Company's business has recently been largely augmented by the purchase of those of

BELL, RANNIE & CO. (Established 1715), LONDON, EDINBURGH, PERTH, DUNDEE & AYR.

BARTON & CO. (Established over 100 years), Late of St. James's Street, LONDON, S.W.

C. G. RAYNE & CO. (Established 1868), NEWCASTLE-on-TYNE.

DREMEL & CO. (Established 1858), LONDON.

JENNER & CO. (Established 1837), SANDGATE (Kent).

The extensive stocks of the Company, together with those of the above Firms—which were taken over *en bloc*—afford a selection of Wines and Spirits which, whether in point of quality or quantity, is not to be surpassed.

THE Company is also represented by the following Branches:

**MANCHESTER**..16, Albert Square. **LIVERPOOL**..D1, Exchange Buildings.

**HULL**.....9, Bishop Lane.

The Company's quotations are the lowest anywhere obtainable.

The Company pays carriage to any railway station in Great Britain, to any port in Ireland, and on quantities of 23 dozen bottles or their equivalent to any port in the world.

The Company only deals in wines of approved vintages.

The Company publishes the fullest particulars of every wine and spirit they quote, and affords every possible guarantee for authenticity.

# HATCH, MANSFIELD & Co. LTD

## WINE MERCHANTS.

## AGENCIES ABROAD.

TO meet the requirements of Englishmen resident abroad the Company has adopted the policy of establishing a series of agencies throughout the world, whereby customers may obtain in either the smallest or largest quantities the identical Wines and Spirits as supplied to leading Families and Clubs in England, and at the same time have the benefit of all the guarantees for quality and authenticity which the system of the Company affords.

The following Agencies have been opened:—

| | | |
|---|---|---|
| AUSTRALIA | MELBOURNE | A. Levin & Co. |
| INDIA | BOMBAY | Greaves, Cotton & Co. |
| | CALCUTTA | Krieg & Co. |
| | SIMLA | Cotton & Morris. |
| | MADRAS | Hajee Ismail Sait. |
| | ADEN | Pallonjee, Dinshaw & Co. |
| CHINA | SHANGHAI | Ilbert & Co. |
| | CANTON | Shewan, Tomes & Co. |
| | FOOCHOW | M. W. Greig & Co. |
| | HANKOW | Ramsay & Co. |

## THE DICTIONARY OF NATIONAL BIOGRAPHY INDEX AND EPITOME.

**Edited by SIDNEY LEE.**

ATHENÆUM.—"We can conceive no volume of reference more indispensable to the scholar, literary man, the historian, and the journalist."

**** *Prospectus, with specimen pages, post free on application.*

## LIFE AND WORKS OF CHARLOTTE, EMILY, & ANNE BRONTË.

**THE "HAWORTH" EDITION.**

*"Assuredly there are few books which will live longer in English literature than those we owe to the pen of the Brontë sisters."*—SPEAKER.

**In 7 Vols., with Portraits and Illustrations, large crown 8vo., cloth, gilt top, 6s. each; or in Set cloth binding, gilt top, £2 2s. the Set.**

Introductions to the Works are supplied by Mrs. HUMPHRY WARD, and an Introduction and Notes to Mrs. GASKELL'S "Life of Charlotte Brontë" by Mr. CLEMENT K. SHORTER, the eminent Brontë authority.

## W. M. THACKERAY'S WORKS.

**THE BIOGRAPHICAL EDITION.**

*"I do not hesitate to name Thackeray first. His knowledge of human nature was supreme, and his characters stand out as human beings with a force and a truth which has not, I think, been within the reach of any other English novelist in any period."*—ANTHONY TROLLOPE, on English Novelists in his Autobiography.

**13 Vols., large crown 8vo., cloth, gilt top, 6s. each. The 13 Volumes are also supplied in Set cloth binding, gilt top, £3 18s.**

This new and Revised Edition comprises additional material and hitherto Unpublished Letters, Sketches, and Drawings, derived from the Author's Original MSS. and Note-books; and each volume includes a Memoir in the form of an introduction by Mrs. RICHMOND RITCHIE.

## MRS. GASKELL'S WORKS. The "KNUTSFORD" Edition.

*"The Edition strikes us as excellent, and will appeal not only to the very large circle who are admirers of Mrs. Gaskell, but, it is to be hoped, to many who will read her books for the first time."*—WESTMINSTER GAZETTE.

**In 8 Vols. Crown 8vo, cut edges, cloth, gilt top. Price 4s. 6d. each net.**

With an Introduction to each Volume, in addition to a Biographical Introduction in the First Volume, by Dr. A. W. WARD, Master of Peterhouse, Cambridge. Each Volume contains a Photogravure Frontispiece. There are also other Illustrations.

## ROBERT BROWNING'S COMPLETE WORKS. Cheaper Edition.

Edited and Annotated by The Right Hon. AUGUSTINE BIRRELL, K.C., M.P., and FREDERIC G. KENYON. 2 Vols., large crown 8vo, bound in cloth, gilt top, with a Portrait-Frontispiece to each Volume. *7s. 6d.* per Volume.

**** Also the UNIFORM EDITION of ROBERT BROWNING'S WORKS, in 17 Vols., crown 8vo, bound in sets, £4 5s.; or the Volumes bound separately, 5s. each. And the POCKET EDITION, in 8 Volumes on India Paper, price 2s. 6d. net each in limp cloth; or 3s. net in leather. Or the 8 Volumes in a gold-lettered case, 22s. 6d. net in cloth, or 28s. 6d. net in leather.

## ELIZABETH BARRETT BROWNING'S POETICAL WORKS.

CHEAPER EDITION. In 1 Volume, with Portrait and Facsimile of the MS. of "A Sonnet from the Portuguese." Large crown 8vo, bound in cloth, gilt top, *3s. 6d.*

**** Also the UNIFORM EDITION, in 6 Vols., small crown 8vo, 5s. each. And the POCKET EDITION, in 3 Vols., on India Paper, price 2s. 6d. each net in limp cloth, or 3s. net in leather.

## MISS THACKERAY'S WORKS. Uniform Edition.

DETAILED PROSPECTUS ON APPLICATION.

# ORDNANCE SURVEY MAPS.

**ALL SCALES** of these Valuable Maps can be obtained for any part of the British Isles from the London Agent, **EDWARD STANFORD.**

**NOBLEMEN AND LANDED GENTLEMEN** will find the Ordnance Survey Maps on the 6-in. or 25-in. scales invaluable for estate purposes; or for residential purposes, the sheets of the 1-in. survey can be mounted to make up admirable maps for hunting, motoring, driving, or walking, for 10, 15, 20, or any number of miles round. Such maps are most convenient when mounted on a spring roller, or mounted and framed like a picture, and when so mounted they are ornamental and useful on the walls of a library, hall, or billiard-room. Full Illustrations and particulars, see **STANFORD'S RÉSUMÉ OF THE PUBLICATIONS OF THE ORDNANCE SURVEY,** sent post free.

## List of Edward Stanford's Departments.

**Publishing.**—Maps and Books arranged for and published. Estimates and terms on application.

**Map Selling.**—This department includes the productions of every map publisher of repute, both at home and abroad, including the ORDNANCE and GEOLOGICAL SURVEY MAPS, and the ADMIRALTY CHARTS, with the Pilots and Sailing Instructions which accompany them.

**Map Mounting of all Kinds** done on the premises by skilled workmen.

**Map Engraving.**—This department includes Drawing, Lithography, and Engraving of all kinds. Edward Stanford's large collection of Copyright Maps is available for Transfers for Book Illustration, &c. Estimates given.

**Geographical Book Selling.**—The best Guide Books, Works of Travel, and all Standard Geographical Works are kept in stock.

Geographer to His Majesty the King. [243

Twenty-fourth (1906) Edition.

# Haydn's Dictionary of Dates

Twenty-fourth (1906) Edition.

## AND UNIVERSAL INFORMATION.

Medium 8vo. cloth, *21s.* net; half-calf, *25s.* net; full or tree calf, *31s. 6d.* net.

For more than Sixty Years **HAYDN'S DATES** has been firmly established in public favour as a book which is indispensable in every office, library, and home, and as **a Work which has no rival.**

The DAILY MAIL says: "Nowhere else in the world is to be found a work so universal and up-to-date."

The SPHERE says: "It would be difficult to think of a better way of spending a guinea than on this invaluable work."

The TIMES says: "The most Universal Book of Reference in a moderate compass that we know of in the English language."

The SPECTATOR says: "Haydn's Dictionary is so complete, was so carefully constructed at first, and has been so well kept up to date."

**ACCURATE, COMPREHENSIVE, EXHAUSTIVE.**

So Simply Arranged (Alphabetically and Chronologically) that any Information can be found in a moment.

**Haydn's Dates is Indispensable to Everyone.**

## MRS. BEETON'S BOOK OF

# HOUSEHOLD MANAGEMENT

Half roan, *7s. 6d.* net; half-calf or half-morocco, *12s. 6d.* net; full calf or tree calf, *18s.* net.

**NEW EDITION. THOUSANDS OF NEW RECIPES.**

Thoroughly Revised, Enlarged, and brought up to date, containing over 2,000 pages of letterpress, besides hundreds of Illustrations and many Coloured Plates.

Twice the size of the old Edition, it forms a

## COMPLETE GUIDE TO COOKERY

in all its branches, including—

**Daily Duties.**
**Mistress and Servant.**
**Hostess and Guest.**
**Marketing and Accounts.**
**Menus and Menu Making.**
**Trussing and Carving.**
**Sick Nursing.**
**The Care of Children.**
**The Home Doctor.**
**The Home Lawyer.**

The QUEEN says: "How on earth this book, with its wonderful variety of information, which comprises almost everything a woman needs to know in her household, from the kitchen upwards, can be produced at the price asked for this marvellous encyclopædia of household cookery is a matter of wonder. It is a book which should take an honoured place in every housekeeper's library."

The GLOBE says: "For size, and for cheapness, and for general get-up, it comes easily first—and seems certain to stay first—among books on practical domestic economy. It is hard to say what will be missing from this treasure-house; certainly nothing belonging to the domain of the careful mother, the competent mistress, or the accomplished cook."

# A DIRECTORY OF SCHOOLS AT BRITISH HEALTH RESORTS.

N the selection of a SCHOOL, the climate to meet individual requirements is often of primary mportance to Parents and Guardians, and Educational facilities must generally be considered hen deciding upon a locality for residential purposes.

A decision is difficult where so many districts in England, Scotland, Ireland, and Wales have venly balanced claims and diversity of advantages.

In "British Holiday and Health Resorts" (*vide* pages 749–773) a uniform method has been dopted of presenting the natural characteristics and salient features of the principal health esorts in the United Kingdom.

Many resorts are noted for the number, variety, and excellence of the PRIVATE COLLEGES nd SCHOOLS which flourish under favourable hygienic conditions. Isolated efforts of individuals o draw attention to special advantages of local surroundings having proved disappointing, he Directory of Schools has been inaugurated as a special supplement to "British Holiday nd Health Resorts."

## BEXHILL-ON-SEA.

unshine, 1905: Bexhill, 1,780 hours; London, 1,314½ hours.

e Medical Officer of Health writes:—Bexhill has always been celebrated for the ngevity of its inhabitants. The death rate r 1905 here was only 7·85. The town holds first place among health resorts, owing to the neral salubrity of the climate; genial influences invigorating breezes and brilliant sunshine; rfect drainage; the purity of its water; and freedom from epidemics. The sea-bathing is cellent. Residence at Bexhill is very beneficial anæmia, scrofula and tuberculous complaints, d in diseases of the respiratory organs, which ay be sent here with advantage during the eater part of the year. Especially suitable r convalescents and delicate children."

YS. *Established* 1894.

### LAKE HOUSE PREPARATORY SCHOOL.

*Head Master*—

Mr. FRANK BOND, M.A.,

rt provided to and from London. References n application.

## BLACKPOOL.

Population, 57,000. Means of access, L. & Y. Rly., L. & N.W. Rly., and Great Central Rly. Location, on coast between Ribble and Wye. Elevation, 9½ feet to 97 feet. Aspect, W. Beach, sands. Bathing, not mixed. Climatological tests prove that the bracing qualities are entirely due to location. These conditions arise from the town being situated at a point where numerous currents of air are continually meeting and flowing over the coast. During the summer months the heat is tempered by the prevailing sea winds, and in the winter the giving out of warmth obtained in the tropics by the Gulf Stream occasions a mildness unknown at other places. The water supply particularly abundant, and of the finest potable character. Sunshine, 1,759·9 hours; London, 1,314·5 hours.

BOYS.

### ARNOLD HOUSE SCHOOL,

SOUTH SHORE, LANCS.

Open and most healthy situation, between South Shore and St. Annes-on-the-Sea.

Preparation for Universities, Professions, &c.

Long list of References and Terms may be had on application to PRINCIPAL.

## BRIDGE OF ALLAN.

**The Medical Officer of Health writes:**—"Bridge of Allan has a long-standing and deservedly high reputation as a health resort. It is charmingly situated, well wooded, well watered, and sheltered by the Ochils from the north-east winds. Immediately behind it the ground rises by a pleasant country lane to a bracing hillside, so that there is available a choice of climate to suit the weather. The little town is well built, clean, and wholesome."

Bridge of Allan, Stirlingshire. Population, 3,240. On the Caledonian Railway, one hour from Edinburgh and Glasgow. The curative properties of the waters are widely known, and have for many years attracted people from all parts of the United Kingdom. There is no part of Scotland richer in historical associations than the surrounding district.

BOYS.

Specially good opportunities for boys preparing for Army, Medicine, or Engineering. Boys have passed direct into Woolwich. The Principal takes Twelve Boarders in his house and attends personally to their needs.

Terms—Day Boys, £20; Boarders, £60–£70.

No Extras.

## CHELTENHAM.

Originally resorted to as a spa and health resort, is now a beautiful residential town. Its later development has been chiefly due to the ungrowth of its great colleges. The chief educational institutions of the town are in first-rate sanitary condition, and are inspected systematically. The sunshine and humidity are about the average for West Central England. Children of school age do well here generally.

Acute rheumatism is a rare affection, and persons with tendency to bronchial disease are well suited as a rule.

Superior accommodation for isolating infectious cases.

BOYS. **BRANDON HOUSE AND SUFFOLK HALL,**

**CHELTENHAM.**

**Mr. E. R. GURNEY, B.A.** (*St. Edmund Hall, Oxford*) & **Mr. A. L. SOAMES, M.A.** (*Trin. Coll., Cam.*)

Large DETACHED HOUSE on high ground, near the Tarn. Good shady Garden. Tennis, Croquet, Badminton, Swings.

The Misses Chambers offer ANGLO-INDIAN and COLONIAL children a happy refined HOME with every care. Liberal Table. Pleasant Holidays. Moderate Fees. Highest references.

Little Boys under 6 received with their sisters.

GIRLS AND BOYS. **SOUTHEND HOUSE SCHOOL,**

**PITTVILLE, CHELTENHAM.**

**Miss AGNES KING-TURNER'S**

HOME-SCHOOL FOR CHILDREN AND ELDER GIRLS OF SLOW MENTAL DEVELOPMENT.

To educate children who, through mental or physical peculiarities, are unfit for ordinary school work. Home life. Froebel methods for younger pupils; work specialized for elder ones according to capabilities. Physical development and games a great object.

Children admitted at any age.

References to well-known Doctors and Clergymen.

## CLACTON.

Clacton-on-Sea, within easy access of London, has a southern exposure, and is celebrated for its pure air, fine bracing climate, and bright sunshine, with its very small rainfall. The drainage is modern and well constructed; the water supply is abundant and excellent; the houses are modern and well arranged, and the hotels are first-class. The inhabitants live to a good old age. The residential death-rate for 1905 was 11·16 per 1,000. Rainfall, 16·68 inches. Seabathing is safe and good. The place is suitable for rest and recovery from illness and overstrain, and the amusements are various and good. There is an excellent sea-front promenade fully two miles long.

1,689·7 hours' sunshine, 1905.
London, 1,314·5.

BOYS.

### CLACTON COLLEGE.

PRIVATE BOARDING SCHOOL FOR BOYS.

Head Master. HAROLD PICTON, B.Sc. (Lond.) (Gold, Silver and Research Medallist, Univ. Coll.).

Excellent situation, standing in practically the highest part of the town.

Great attention given to Physical Training, Cricket, Football, and all outdoor games.

INDIAN AND COLONIAL PUPILS TAKEN ENTIRE CHARGE OF.

# DORKING.

Population, 7,670. Access, L.B. & S.C. Rly. and S.E. & C. Rly. On south slope of North Downs. The beauties of this part of Surrey have been officially described as probably unparalleled combined in most places with climatic conditions equal to attractions.

GIRLS. **EBOR HOUSE.**

HOME SCHOOL FOR DAUGHTERS OF GENTLEFOLK.

*Recognised by Board of Education.*

**Principal - - Miss GROSSE.**

INSTRUCTION COURSE embraces solid modern English Education on High School methods Religious Training on Church of England principles; practical Kindergarten Department.

Pupils prepared ordinary Local Exams. Special care given History, Literature, and Natural Science.

DEPORTMENT AND HEALTH studied. Drilling Hockey Club; large Playing Field; Tennis; Croquet; Swimming. Large and convenient Premises *Sole charge of Children from Colonies, &c.*

# EASTBOURNE.

Eastbourne (Sussex). Municipal Borough. Population, 47,250. L.B. & S.C. Rly. 62 miles from London. Elevation, from sea level to 140 feet above sea level; the districts of Mead and Upperton stand upon very high ground. Neighbourhood—W., hilly (South Downs); E., flat, pastoral. Aspect, S.E. Climate mild, invigorating, moderate rainfall; open to breezes from sea and Downs. Drainage modern. Soil, mostly chalk or sandstone. Beach, shingle; flat sands as tide recedes. Bathing excellent.

**The Medical Officer of Health writes:** "Its advantages as a health resort are much sunshine, pure air, absence of fog, clean, quickly drying roadways, large parks and gardens with many trees, a plentiful and good water supply from wells sunk in the deep chalk, and the proximity to the breezy, health-giving South Downs. The climate is generally beneficial in anæmia, scrofula and tubercular diseases, and skin diseases; and its effects are especially beneficial in the case of convalescent children. Death-rate 1905, inclusive, 11·22 per 1,000; of residents, 9·1 per 1,000. Full benefit of winter sun is secured. Warm, sunny shelter always obtainable in centre of town. Beachy Head breaks S.W. winds, and diverts much rain, dryness of soil being promoted by great porosity of chalk." Sunshine, 1,680¼ hrs; London, 1,314¼ hrs.

BOYS.

## ST. BEDES.

PREPARATORY SCHOOL FOR THE PUBLIC SCHOOLS AND ROYAL NAVY.

*Recognised by the Board of Education.*

**Headmaster - G. H. GOWRING, M.A.**

Illustrated prospectus and full particulars from

**Miss DODWELL KINGSFORD (Principal).**

GIRLS.

## STERNDALE COLLEGE,

WEST CLIFF.

Is situated within a stone's throw of the sea, on high ground overlooking the whole town. The School is a small Educational Home for about twenty Girls of good social position, to whom the Principals, MISS RAYWOOD and MISS BUCK, offer the comforts and social and moral advantages of a refined and cultured family life. No evening study. Usual recreations. Great success with Health. Specialities: Music, Art, Languages, Needlework and excellent English.

## EDINBURGH.

For nearly 200 years the Metropolis of Scotland has been famous as an educational centre. Its University dates from 1582. In the matter of climate this beautiful city has been well endowed by Nature. Strong south-westerly winds blow during 119 days of the year, coming with unbroken, ozone-bringing force from the Atlantic. Winter temperature same as London ; summer temperature lower. Public parks, gardens, and meadows occupy 1,180 acres, 150 of which are suitable for games.

GIRLS.

### CRAIGMOUNT.

The education provided by the MISSES GOSSIP is that of a High-class Ladies' School. The instruction, which is thorough and on modern lines, has for special aim the mental growth and individual progress of the pupils. Home life rather than a University career is the end kept in view.

The Course of Study includes all usual subjects. Foreign Languages taught by Resident Foreign Mistresses.

The Grounds, extending to about 3 acres, afford abundant scope for recreation. The tone of the School is carefully guarded.

Healthy situation. Beautiful surroundings.

GIRLS.

### CRAIGMILLAR PARK COLLEGE.

**Principal - - - Madame MURISET.**

HIGH SCHOOL FOR GIRLS.

Situated in one of the finest and healthiest southern suburbs of Edinburgh. Large Garden and Tennis Lawn.

Curriculum extends from most elementary stage to preparation for entrance to University. Limited classes; individual attention, under direct supervision of Principal.

Perfect sanitary arrangements. School heated with hot-water pipes and open fireplaces.

Recreation—TENNIS, GOLF, HOCKEY, &C., AND ALL REFINED GAMES.

## LIBERTON.

A suburb of Edinburgh. One of the most healthy and invigorating places in Scotland, occupying an elevated position overlooking the city (with which it is connected by tram), and commanding magnificent views.

GIRLS.

### ST. HILDA'S SCHOOL,

**LIBERTON, near EDINBURGH, N.B.**

**Headmistress - Miss R. STOLTZ, M.A.**

Designed to provide an education to develop moral, intellectual, and physical growth of its pupils.

LIBERTON one of most invigorating places in Scotland.

St. Hilda's stands top of hill overlooking Edinburgh.

A sound curriculum is provided. Modern Languages are taught on the Berlitz method. There are special facilities for the study of Music.

Open-air exercise and games much encouraged. Riding and Swimming Lessons given.

## EALING.

Ealing holds a very satisfactory record in health statistics. A good and constant supply of pure water. Parks and open spaces comprise 117 acres. Facilities for all kinds of outdoor sports, and provision for every kind of recreation.

GIRLS.

### THE HAWTHORNS.

Healthy situation, facing Ealing Common, and surrounded by good garden.

Course of Study includes Religious Instruction, English, French, German, Music, Arithmetic, Mathematics, English Literature, Botany, and Needlework.

Pupils prepared for all Higher Examinations. Every effort made to ensure thorough knowledge of subjects taught, and to induce pupils to take pleasure in their work, consideration being paid to individual capacity and state of health.

**Principals** { Mrs. WRISTBRIDGE. Miss K. FORDHAM.

## FAREHAM,

Hampshire, possesses the ordinary open sylvan character of English scenery, commanding magnificent marine and land views. Enjoys special protection from prevalent winds from S.W. by the great screen of the New Forest, and from N.E. by Portsdown Hills.

BOYS.

ENGINEERING.

### SEAFIELD PARK COLLEGE,

CROFTON-ON-THE-SOLENT, FAREHAM, HANTS.

A Residential College, specially equipped for preparing the sons of gentlemen for the profession of an Engineer, and for all such as require a Mathematical, Mechanical, and Practical Education.

The College is under the inspection of the University of London.

*All communications to be addressed to the Principal,*

H. M. MANSEL-JONES, B.A. Lond. (Hon.).

## HARROW.

About 10 miles from London. Tops the summit of a rise from a broad rich vale. Its healthy position, genial climate, and beautiful surroundings have contributed to make it a desirable place of residence in the country close to the Metropolis.

BOYS.

### BOWDEN HOUSE SCHOOL.

**Principals** { Rev. W. G. PRICE, M.A. J. C. R. ELLIS, M.A.

HIGH-CLASS PREPARATORY SCHOOL FOR THE SONS OF GENTLEMEN,

FROM 7 TO 14 YEARS OF AGE.

Fine healthy situation on the Southern slope of Harrow ridge. Climate bracing. Sanitation excellent. Swimming Bath; large Playing Fields of about 30 acres; School Farm. Careful moral training: Boys' happiness studied.

Several Scholarships gained during the past year.

# FOLKESTONE.

Seaport. Population (estimated 1905), 34,770. Means of access, S.E. & C. Railway. 70 miles from London. Location, 7 miles S.W. of Dover. Elevation, old town (adjoining harbour) lies between two cliffs, upon which modern portion is built, protected from the north by hills. Neighbourhood, chalk cliffs, high Downs behind. Aspect, S. & S.E. Climate: Dry, equable, more or less mild, according to elevation. Beach: shingle. Bathing: mixed. Improved Pullman cars on railway.

The situation of the town on the cliff, and the fact that the latter projects slightly at this spot, lays it open to considerable ventilation from the sea, while the high chalk range at its back excludes a great part of the colder land winds, especially those blowing from the north. The town is one of the best planned seaside resorts. The comparatively very healthy and dry climate is due to the porous nature of the geological formation, and, in addition, the facilities for drainage make mists, damp and fogs almost unknown. The water supply is constant, and the water exceedingly pure. The sanitation of the town is carefully guarded, and precautions taken from time to time to maintain its efficiency. For an educational centre it is particularly adapted, as there is hardly a day in the winter season when a sunny walk may not be taken and general outdoor exercise indulged in.

1,697¼ hours' sunshine, J.P.R., 1905. London, 1,314¼ hours.

BOYS.

## FELTONFLEET,

EARL'S AVENUE.

HOME SCHOOL.

*Situated in best part of Folkestone, close to the Sea.*

Boys aged 7 to 14 prepared for Public Schools and Royal Navy. Pupils from INDIA AND COLONIES received. Every care given to Health and Home Comforts.

By Dr. WOOD, *Head Master of Harrow*, as combining thorough education with healthy outdoor life necessary for growing girls.

Special Class for YOUNG CHILDREN, who are under Principals' constant supervision.

ELDER PUPILS TAKEN TO BRUSSELS for Spring Term if desired, thereby offering UNIQUE FACILITIES for French, Music, and Art. Private Gymnasium Class; Hockey; Tennis; Sea Bathing.

GIRLS.

## EVERSLEY.

Miss K. N. WHITE.

"Eversley" is essentially a Home School, and each pupil receives individual attention. The work is of a high standard, and has received an excellent report from the Board of Education. Special attention is given to Music, Modern Languages, Literature, Nature Study, Needlework, and Cooking.

Three hours daily are spent out of doors, when the girls ride, bicycle, bathe, play hockey, tennis, or basket-ball, according to the season of the year.

GIRLS.

## ST. HILDA'S.

HOME SCHOOL FOR GIRLS.

MISS ABBOTT receives a limited number of Resident Pupils for home care and education, assisted by highly-qualified English, French, and German mistresses. Religious instruction in strict accordance with the teaching of the Church of England.

Premises pleasantly situated, close to Leas and Sea. Sanitary arrangements perfect. Health of the girls carefully considered.

Large field overlooking Sea for Outdoor Games.

Preparation for University Local Examinations if desired.

# FELIXSTOWE.

Population, 6,400. G.E. Railway. On coast, 5 miles East of Harwich. Elevation from little above sea level to 50 feet. Aspect, South. Beach, shingle; sand as tide recedes. Excellent Bathing.

Felixstowe occupies a sheltered but very sunny position, the soil (red clay) ensuring a dry surface. Climate is bracing. Many days can be spent on the beach in November and December in warm, bright sunshine. Sunshine, 1,802 hours. London, 1,314·5 hours.

BOYS. *Established* 1883.

## EASTWARD HO COLLEGE,

FELIXSTOWE.

**Principal - B. B. THOMPSON, Inter. Arts (Lond.)**

EDUCATIONAL COURSE.—To prepare Gentlemen's Sons for Commercial Life, Public Schools, University and Professional Exams. Many successes Public Exams. Limited number; individual care. Backward or delicate boys special instruction. Junior Department for young boys (7).

SCHOOL COURSE includes Divinity, English in all branches, French, German. Optional Subjects—Other Languages, Music, Painting, Dancing, Drill, Needlework. Pupils prepared for any Exam. Kindergarten Classes.

DELICATE GIRLS.—Special branch for 6; study regulated by medical advice. Rooms face four directions; peculiarly fitted for open-air treatment.

# GRANGE-OVER-SANDS,

Lancashire. Means of Access: Mid. Rly., L. & N.W. Rly. 204 miles from London. Admirably situated on the shores of Morecambe Bay, with a genial climate and southerly aspect. The water supply is excellent, and the drainage perfect. Owing to its dual character as a seaside and rural health resort, it offers the best facilities for education under most favourable surroundings. Admirable arrangements for indoor amusements and outdoor recreation, including Tennis and Croquet.

GIRLS.

## SUNNYBRAE.

SCHOOL FOR GIRLS.

**Principal - Miss M. E. BROTHERS**

(Registered, Column B).

Assisted by fully qualified Resident and Visiting Staff.

Girls received from 9 years old. Thorough education on modern lines. Intellectual and physical faculties developed in pleasant HOME atmosphere for after-use. Character carefully trained.

SCHOOL COURSE includes French, German, Latin, Mathematics, Science, Drawing, Swedish Drill, and usual English subjects.

# GREAT YARMOUTH.

**The Medical Officer of Health writes:**—"The dry, sunny climate of Great Yarmouth has been noted for a hundred years and more, and the longevity of its inhabitants was extraordinary even at a time when nearly the whole population lived within the old town walls. The town has now extended over the Denes and the modern portions of the Borough are built on a dry subsoil of clean sand, affording excellent surroundings for anæmic and ill-developed children and others requiring bracing air."

GIRLS.

## KIMBERLEY HOUSE,

MARINE PARADE.

**Principals - The MISSES WELCH.**

SCHOOL FOR GIRLS.

The aim of the Principals is to give an education thoroughly in keeping with the future prospects of their pupils.

For this purpose the Staff of Resident and Visiting Teachers has been carefully chosen, the results being a distinct success.

Sports and outdoor exercises beneficial to the health are encouraged. Good Sea Bathing.

*Special arrangements made for Foreign Boarders.*

HIGHEST REFERENCES.

GIRLS.

## SUTHERLAND HOUSE.

Pupils prepared for Exams.

HOUSE situated within 3 minutes of Sea and Beach Gardens.

References, &c., on application.

# HARROGATE.

The Medical Officer of Health writes :—"Harrogate is the most important centre in Yorkshire for thoroughly equipped private secondary schools. The enterprise and educational zeal of highly qualified teachers, aided by the salubrity of the climate, have made these schools famous in every part of England. Harrogate is known as the 'Queen of English (Inland) Watering Places,' and is world-renowned for the medicinal properties of its waters and its magnificent baths, which are acknowledged to be the finest in Europe. The distinguishing features of the climate of Harrogate are its bracing atmosphere, low humidity, and abundant sunshine. The mortality is and always has been remarkably low. During the last 10 years the average death-rate has been 12·62 per 1000. The incidence of disease amongst the resident population is low. Epidemic diseases are uncommon, and when they occur rarely spread to any extent. Respiratory diseases are infrequent and rheumatic fever is seldom seen. Harrogate is undoubtedly one of the best-drained towns in the kingdom. Sunshine records, average for 6 years, 1796 hours."

Harrogate, M.B. Population, 32,000. North Eastern Rly. Location, 18 miles N. of Leeds, 20 miles W. of York. Elevation, 320 feet to 600 feet above sea-level. Neighbourhood, open moorlands. Climate, bracing. Dry, clear air. Water supply, constant, soft. Drainage, modern. Soil, alluvial grit and shale. 1675 hours' sunshine, 1905; London, 1314½ hours.

BOYS.

## HARROGATE MODERN COLLEGE.

SUCCESSFUL AND EXCLUSIVE BOARDING SCHOOL FOR BOYS.

## HASTINGS AND ST. LEONARDS.

Mild winter climate. Compares favourably with many southern Continental resorts. Summer here is cool, to the surprise of strangers, who expect the contrary. Aspect, temperature, soil and sky combine to make Hastings and St. Leonards a home of safety and comfort for weakened constitutions desirous of avoiding severe weather. Climate decidedly conducive to recovery from attacks of bronchitis and catarrh; many cases of phthisis do well on the breezy heights all the year round.

BOYS. *Established* 1865.

### HIGHBURY HOUSE SCHOOL,

ST. LEONARDS-ON-SEA.

Preparation for the Universities, Professions, and Commerce.

STRONG STAFF OF MASTERS.

Large Playing Field, Gymnasium, Workshop (Carpentry and Engineering), Laboratory.

Engineer Cadet Corps.

Perfect Sanitation. Electric Lighting.

Preparatory Department under Governesses.

*Principal*—

**J. D. WILDE, M.A.**

Telephone: 0471. Telegrams: "Highbury."

GIRLS.

### BRAYBROOKE COLLEGE

FOR GIRLS.

*Recognised by Board of Education.*

Pupils prepared, if desired, for Public Examinations. English, French, Mathematics, Science, Drawing, Drill. Senior and Junior Classes.

**HOLMESDALE GARDENS.**

Healthiest position, high ground. Sanitation excellent. Well-ventilated Class and Bed Rooms. Large Field for Tennis, Hockey, and Cricket.

**Principal - - Miss FOSS,**

Assisted by Certificated Resident Governesses and Visiting Masters. Domestic supervision of Lady Housekeeper. Every care to Health and Home Comforts.

## HAYLING ISLAND,

With its southern aspect, fine beach, combination of country and seaside, and close proximity to Southsea and Portsmouth, has rapidly developed into a health resort of considerable importance. It enjoys perfect quiet; magnificent air. Patronised by Sir Frederick Treves and family.

GIRLS.

### OAK VILLA GIRLS' SCHOOL.

**Miss HEIGHINGTON-JONES**

is prepared to receive a limited number of Pupils.

ENGLISH SUBJECTS include:—

Music, Organ, Pianoforte; Singing (solo and part), Drawing, Painting, Needlework, Drill. Preparation for Trinity College Musical Examinations.

Special care taken with delicate or backward children. Sole charge of children having parents abroad. Boys under 9.

Cycling, Sea Bathing, Outdoor exercise every day. Five minutes from Sea.

Other Subjects as desired.

## HERNE BAY

Has been described by the Registrar-General as "the healthiest seaside resort in England," and this statement is borne out by the fact that "Herne Bay" and "health" are at the present time practically synonymous words. The death-rate is exceedingly low, and its climatic conditions are such that, while its winters are mild, the hot weather during the summer time is tempered by the cooling breezes from the German Ocean. Analysis of the water proves the same to be of the very highest degree of purity and without any trace of contamination. The drainage of the town is new and in every sense of the word "up-to-date." Herne Bay is in every way suited as a resort for either educational, health, or residential purposes.

BOYS. **HERNE BAY COLLEGE.**

1866.

**EUSTACE W. TURNER, M.A. Oxon.**

(*Honoursman in Science*).

School of 40 Boarders, each receiving careful training. Little boys in separate part of house. Preparation for Matriculation, Professional Preliminary Examinations, Public Schools, or City life. Playing Field, ten acres. Drilling. Gymnastics. Rifle Drill. Shooting for Seniors. Open and Covered Playgrounds. Reading Room. Playrooms. Remarkable health record. Premises on Sea front. All Class Rooms overlooking the Sea. Sanitary arrangements perfect.

GIRLS. **BELLE VUE.**

LADIES' SCHOOL.

*Recognised by Board of Education.*

The ACCOMMODATION is ample and superior. "Belle Vue" faces the sea. Good Bathing; Lawn Tennis. Domestic arrangements replete with every comfort. Certified Sanitation.

The STAFF consists of certificated English and Foreign Teachers.

The COURSE OF INSTRUCTION comprises complete, sound, liberal ENGLISH EDUCATION, including French. Pupils prepared for all Local Examinations.

Prospectus and References, apply—

**Principal - Miss KING, C.M., M.C.P.**

(Registered Column B).

GIRLS. *Established* 1894.

### ST. MONICA'S SCHOOL,

**HERNE BAY.**

HOME SCHOOL FOR GIRLS.

*Principals*—

**Miss CARTER, A.C.P.; Miss VOY CARTER.**

SITUATION.—In the Canterbury Road, a short distance from the Sea.

PREMISES.—New, and built expressly for a Girls' School. Large Garden, Tennis and Croquet Lawns. The School and Class Rooms are large, lofty, and well ventilated; heated throughout with hot water. Sanitation perfect.

Especial care taken of delicate girls.

## HAYWARD'S HEATH,

Sussex, is a delightfully picturesque and salubrious region for the healthy, and well adapted for the needs of convalescents and of delicate constitutions requiring an open-air life without excessive stimulation.

BOYS. **BRUNSWICK SCHOOL.**

*Removed from Brunswick Road, Brighton, 1897.*

HIGH-CLASS PREPARATORY SCHOOL FOR PUBLIC SCHOOLS AND ROYAL NAVY.

HEALTH.—Hayward's Heath is recommended for its bracing air by a leading London Physician.

EDUCATION.—Large Staff of Resident and Visiting Masters. Modern Languages taught conversationally.

BUILDINGS:—Include Chapel, Gymnasium, Swimming Bath, Carpenters' Shop.

GROUNDS:—Eight acres; Playing Fields four acres.

Prospectus, Views, and References on application to Headmaster:—

**L. C. W. THRING, M.A.**
(Marlborough and Trinity College, Cambridge).

## HEREFORD.

On a gravel subsoil, 289 ft. above sea level, with surrounding suburbs reaching 280 ft., intersected by the River Wye, Hereford affords a climate with a happy medium, neither too cold and bracing, nor too relaxing. Water supply and drainage good. Average rainfall, 26 in.

GIRLS.

**HARLEY HOUSE SCHOOL.**

**Principals - The MISSES EARLE.**

Close to Cathedral and Castle Green. Grounds, three-quarters of an acre in extent, afford space for Tennis, Croquet, &c.

House admirably adapted for School purposes; large, lofty rooms, well ventilated; perfect sanitary arrangements.

Boarders and Day Scholars received. Ample time allowed for study and recreation. All active games encouraged.

PUPILS PREPARED FOR HIGHER EXAMINATIONS IF DESIRED.

Classes in Cooking, Dressmaking, Nursing, Wood-carving, &c.

## HONOR OAK, S.E.

London's remarkable health standard is due to excellent drainage, pure water, together with less exposure, greater warmth, and less humidity than outlying country. Honor Oak, a high-class residential quarter, near Crystal Palace and several parks.

BOYS.

**FOREST HILL HOUSE SCHOOL**

*Recognised by Board of Education.*

**Principal - A. S. GRIFFITH, M.A.**

AIM.—Preparation for Public Schools and Professional and Commercial Careers.

CURRICULUM.—Includes Chemistry, Shorthand, Drawing and Drill, in addition to the usual Form subjects.

BOARDERS.—Limited, and under the personal care of Mrs. GRIFFITH.

SITUATION.—300 feet above sea level, and exceptionally healthy.

PLAYING FIELDS of nearly four acres for Cricket, Football, and general games attached to School.

## HUNSTANTON.

The Medical Officer of Health writes:—"Hunstanton shares with all the East Coast watering-places a great reputation for convalescents. Apart from this, Hunstanton seems specially adapted for children. The rapidly-drying soil, the absolutely safe bathing, the magnificent sands for exercise in wet or dry weather, perfect drainage, and splendid water combine to make it an ideal place for them. The number of schools and the wonderful progress (physically) of weakly children bear testimony to these advantages."

Hunstanton, Norfolk, U.D.C. Pop., 1,893 in winter. G.E. Ry. Location on coast between Cromer and King's Lynn. Within 8 miles of Sandringham, the Norfolk residence of H.M. the King. Aspect, westerly. Soil, chalk. Beach, sand. Climate, bracing. Water, pure and plentiful.

BOYS. **THE GLEBE HOUSE.**

PREPARATORY SCHOOL FOR THE PUBLIC SCHOOLS, AND FOR THE R.N. COLLEGE, OSBORNE.

**Headmaster, Mr. H. CAMBRIDGE BARBER, M.A.**
*(late Hastings Exhibitioner of Queen's College, Oxford).*

Junior, Middle and Senior Divisions.

Excellent sanitary arrangements and water supply. Electric Light.

ELEVEN ACRES OF GARDEN AND PLAY FIELDS.

## LYTHAM.

Dr. Andrew Wilson describes it as "the town of room and space and free air." An all-round-the-year health resort. Known as "the Garden of the Fylde" on account of its number of trees and rich greenery.

GIRLS.

### FAIRHAVEN HIGH SCHOOL

(LADIES),

**Near LYTHAM, LANCASHIRE**

(*Recognised by the Board of Education*),

With which is incorporated the

FYLDE CONSERVATOIRE OF MUSIC.

**Principal—Miss MILLEN** (Regd. in Column B).

Fine School Building in own grounds. Bracing position. Close to the Sea and St. Anne's-on-Sea, on the mild West coast. Hockey and Tennis Grounds. Boarders only and the *daughters of Colonial and Indian gentlemen received.* Staff of 16 Resident B.A. English, Foreign, and Music Mistresses, and Visiting Masters (Graduates). Highest English and Music successes.

PROSPECTUS UPON APPLICATION.

## LOWESTOFT.

The most Easterly point in England, on coast of Suffolk. Population, 33,123. Means of access, G.E. Rly., Midland and G.N. Joint Rly. Has long enjoyed a great reputation as a health resort, and is one of the most bracing places on the East Coast. Town is open to breeze direct from the North Sea, laden with invigorating ozone, while being completely sheltered from the North winds by high lands and woods. Water pure and supply constant. Drainage modern.

GIRLS.

### ARDMORE,

**NORTH PARADE.**

HIGH-CLASS SCHOOL FOR GIRLS.

*Principal and Head Mistress* { **Miss MARY KIDNER,** *Assoc. of Trin. Coll., Lond. (Pianist).*

SITUATION.—Pleasant, healthy; best part, near Sea, and overlooking Belle Vue Park. South aspect. Large School and Class Rooms. Average size of bedrooms, 16 ft. by 16 ft. Sanitary certificate.

CURRICULUM.—Usual English Subjects, Languages, Mathematics, Music, Science, Art. Preparation for Exams. if desired. *Specialities*—French (Res. Mistress), Voice Production, Music, Physical Culture.

Indian and Colonial Pupils received.

*Individual care of backward and delicate girls.*

Special terms for Clergy.

GIRLS.

### CLAIRE HOUSE SCHOOL

FOR GIRLS,

**NORTH PARADE, LOWESTOFT.**

**Miss HERON** (*Cert. High, Camb.*),

Receive and personally supervise limited number of Boarders for thorough instruction, usual branches, high-class modern education. Pupils prepared, if desired, for Public Exams. English, French, Music, Painting, Drawing.

SITUATION excellent. Premises well adapted for school purposes; Sanitation perfect, certified; rooms large, overlooking Park and Sea. Tennis Courts. Health and Moral Training cultivated; each pupil's abilities developed. French Conversation obligatory stated times.

## MAIDENHEAD.

**The Medical Officer of Health writes:**—"Maidenhead is an exceedingly beautiful and healthy riverside town. In the upper part of the town the air is bracing; the soil dry, being on chalk. The lower part is on gravel. Sewage good. Water supply excellent."

BOYS.

### MAIDENHEAD COLLEGE,

CASTLE HILL.

MODERN HIGHER SECONDARY SCHOOL.

Its situation has been described as "the healthiest spot in a very healthy town in a naturally healthy county."

It is well equipped with modern furniture and apparatus and provided (*inter alia*) with Chemical Laboratory and Workshop.

The members of the staff are all experienced teachers, adopting the best methods of teaching.

Preparatory Department. Prospectus from

**Headmaster - Mr. A. MILLAR INGLIS.**

## MATLOCK.

**The Medical Officer of Health writes:**—"Matlock is the 'Gem of the Peak' for scenery. Its death rate is phenomenally low. The district has been a health resort 204 years. Its absolute freedom from epidemics, purity of water, and 'cures' are world known. The season is year round.'

BOYS.

### STANCLIFFE HALL.

**Headmaster: Rev. ERNEST OWEN, M.A.**

Situated over 500 feet above sea level, in very sunny position, sheltered from North and East, park stretching away to South, and commanding lovely views over beautiful Valley of Derwent. 40 acres grounds. Climate dry, bracing, not severe. Drainage and sanitary arrangements perfect.

Excellent Cricket and Football Grounds, Golf Links, Covered Playground, Fives Court, Gymnasium, Library, Carpentry, Swimming.

*Preparation for Public Schools and Navy.*

Special attention given to Modern Languages.

# LLANDUDNO, NORTH WALES.

**The Medical Officer of Health writes:**—"The climate of Llandudno possesses many advantages. The standard work, 'The Climate and Baths of Great Britain,' by the Royal Medical and Chirurgical Society, describes the dryness and the bracing properties of the air of Llandudno, the high annual average temperature, and the equability and comparative warmth of the winter months. The amount of sunshine is high. Fog and snow seldom seen. Water supply and drainage excellent. Vital statistics very satisfactory."

BOYS.

## TAN-Y-BRYN.

PREPARATORY SCHOOL FOR BOYS.

**Headmaster: LEONARD H. EDMINSON, M.A. (Oxon.) and B.A. (Lond.)**

Stands in its own grounds, on hillside facing Sea, close to Beach, in a particularly dry and bracing and sunny climate.

Special importance is attached to the sound teaching of English.

*Entire charge taken of boys whose parents are abroad.*

Great attention given to Physical Development by healthy and varied exercise.

Mrs. Edminson supervises all domestic arrangements.

GIRLS.

## LANSDOWNE HOUSE SCHOOL AND KINDERGARTEN.

ABBEY ROAD.

*(Recognised by Board of Education.)*

**Principal - - - - Miss RAW.**

Conducted on the most approved modern methods, and situated in a spot that is noted for its abundant sunshine and extreme purity of air.

Pupils receive a sound education, and are prepared for University Exams., &c.

TENNIS, CROQUET, HOCKEY, SWIMMING, RIDING, and CYCLING are the pastimes elected for outdoor exercise, and all pupils are encouraged to take part.

# MALVERN.

Great Malvern and Malvern Link. Population 16,448. Means of access, G. W. Rly., Midland Rly. Situated 520 feet high on the Eastern slope of the well-known Malvern Hills. Within close proximity to Worcester, Cheltenham and Gloucester. The substance on which the Town is built is porous, conferring the benefits of great dryness. Hills behind town rise to a height of 1,000 feet, and East winds are but little felt. The air is gently stimulating, and daily range of temperature slight. Summers are comparatively cool, while winters are not severe. A great deal of bright sunshine is experienced. Fogs are very rare. Drainage and water supply attain a high degree of excellence, the water being very pure and drainage perfect.

BOYS.

## THE SCHOOL, MALVERN LINK.

**Mr. Wm. DOUGLAS, M.A. (Classical Honours),**
*Late Scholar of Keble College, Oxford.*

and Mr. E. H. DOUGLAS, M.A. (Mathematical Honours), late Scholar of Eton and King's College, Cambridge, ten years Assistant Master at Glenalmond, assisted by Staff of Qualified Masters, receive a limited number of Boys between the ages of 8 and 14 to prepare for PUBLIC SCHOOLS and NAVY.

Five years Assistant Master at Rossall School.

They are carefully grounded in Classics, Mathematics, English, and French.

*Entire charge is undertaken of Boys whose parents are abroad.*

BOYS.

## CHERBOURG.

PREPARATORY TO THE PUBLIC SCHOOLS AND NAVY.

**Principals: Messrs. VINES and COATES.**

Assisted by Five Resident Masters.

Careful individual instruction, as distinct from cramming. The ability of each boy carefully considered with a view to obtain best results. No trouble or expense spared to make work of Naval Class as efficient as possible. School examined periodically.

LARGE CRICKET GROUND (9½ acres), EXCELLENT GYMNASIUM, FOUR LAWN TENNIS COURTS AND PAVILION.

Arrangements can be made to receive boys whose parents are abroad.

GIRLS.

## LAWNSIDE.

SCHOOL FOR YOUNG LADIES.

**Principal - Miss FIRTH.**

*Formerly Head Mistress of Bath High School.*

Situated 500 feet above sea level; pleasant surroundings. Ventilation and Sanitary arrangements perfect. Detached Sanatorium.

Pupils prepared if desired for Universities and University Exams. English and Foreign Resident Governesses. Special attention to Music and Modern Languages.

Large Grounds, full-sized Tennis Courts, Croquet Ground, Riding and Swimming.

Physical and Moral Development carefully cultivated under direct supervision of Principal.

GIRLS.

## HAZEL BANK.

HIGH SCHOOL FOR GIRLS.

Stands in own grounds; large, airy rooms. Climate dry and invigorating, peculiarly suitable as place of residence for the young.

Healthy development by individual teaching and careful training under Christian influence the main object of School Course.

COVERED GYMNASIUM; PLAYING FIELD FOR HOCKEY, TENNIS AND CROQUET.

Careful attention to diet.

Many Open Scholarships have been taken by pupils.

Two sections—Junior and Senior.

**Principal - Miss JUDSON.**

# MARGATE.

M.B. Population, 26,000. Means of access, S.E. & C.D. Rly. Location on N.E. corner of coast of Kent, 76 miles from London. Elevation from a little above sea level to 105 feet. Water supply, constant, from the country district of Wingham, 14 miles from Margate.

**The Medical Officer of Health writes** :—"Nearly three thousand children are sent yearly to Margate for their education. The chief reasons for the world-wide reputation of Margate as a health resort appear to be: Its dry, bracing climate, the Town is exposed to the sea breezes from all quarters except the West; it has the smallest rainfall in England; there is a notable absence of fog; the subsoil is chalk, and the roads rapidly dry even after the heaviest rain. In addition to a large expanse of firm, dry sands there are promenades extending along the cliffs and the sea-front for more than three miles, and a sheltered park in the Dane Valley. The above exceptional advantages combine to make Margate a specially desirable residence for growing children during their school days. Sunshine: Margate, average for 14 years, 1,600 hours. Margate stands on two hills separated by the Dane Valley. The East Hill district is called CLIFTONVILLE; it is the highest part of the town. 1905: hours of sunshine, 1,584·1; London 1,314·5 hours."

BOYS.

## HERNE HOUSE SCHOOL,

**CLIFTONVILLE (MARGATE)**

(In connection with Heath Brow School, Boxmoor, Herts).

*Principals—*

**Rev. WM. TAYLOR JONES, M.A., L.C.P.**

**Rev. EDWD. WM. TAYLOR JONES, M.A.**

Pupils prepared for Public Schools, Professional or Commercial Career. School's work tested by usual Local Exams. and own Exams. Young, delicate, and backward boys receive special care. Greatest attention to Religious, Moral, and Physical Training, and Domestic Comforts.

Drill Sergeant. Gymnastics. Sea Bathing.

BOYS.

## NEW COLLEGE,

**CLIFTONVILLE.**

**Principal - FRANK SHERVILL, M.A.**

(*Late open Scholar, St. Peter's College, Camb.; Graduate, Honours.*)

LOCATION.—On Cliffs; Sea View; S. aspect; close Sea.

PREMISES.—Detached; built for School; every modern convenience; lofty rooms. Chemical Laboratory; Carpenter's Shop; Bicycle Shed; Dark Room (Photography).

Boys receive groundwork of sound education; prepared for Public Schools—Professional Commercial life. Individual instruction wherever necessary. HEALTH specially considered. *Numerous Examination Successes.* Outdoor Games carefully planned. Playing Field; Sea Bathing.

GIRLS.

## BRONDESBURY,

**CLIFTONVILLE, THANET.**

LOCATION.—Very healthy, on chalk soil, looking over Tennis Courts to Sea, and close to open country. Sanitary arrangements certified.

**Principal - Miss GALLOWAY**

(Newnham College, Cambridge).

Together with efficient Staff of trained and certified Mistresses and non-resident Professors.

SCHOOL SYSTEM offers thorough Modern Education, based on definite Church principles, aiming at Physical, Mental, and Moral Development of each pupil without sacrificing present health and happiness.

Average, 25 pupils from 6 to 19. Escorts provided.

GIRLS. *Established* 1876.

## GODWIN GIRLS' COLLEGE,

**CLIFTONVILLE.**

(On High Cliffs, facing Sea.)

**Principals - The Misses BENNET.**

Miss M. K. BENNET, Medallist, is specially qualified for Solo Singing, Voice Production, and other branches of Music, holding a Teacher's Certificate from Signor Visetti.

Resident English and Foreign Governesses and Visiting Masters.

Pupils prepared for Local and other Exams.

Principals pay personal attention to Health and Comfort of pupils, and escort them to and from Victoria Station.

GIRLS.

## GUELPH HOUSE,

**CLIFTONVILLE, MARGATE.**

**"HOME" SCHOOL FOR GIRLS.**

*Recognised by Board of Education.*

**Principal - - - Miss E. FINCH.**

Assisted by efficient Staff of Resident Mistresses and Visiting Professors.

LOCATION.—On high ground close to Sea Front and Sands.

PREMISES.—Rooms large and lofty; view of sea from nearly every window.

SCHOOL COURSE.—Provides comprehensive modern education. Pupils prepared for usual Exams.

Pupils from INDIA AND COLONIES specially provided for. *Monthly School Magazine.*

# NORWICH.

Population, 111,728. G. E. Rly. Known as the pleasant "City of Gardens," so equably are houses and trees blended in it. The splendid Cathedral and Castle, built in 1096, form a striking example of Norman style, and are the two great architectural features. The bridge over the Castle moat has one of the most perfect Anglo-Norman arches now existing. The Medical Officer of Health writes:—"Climate dry and bracing, good for most types of debility. Conducive to longevity."

BOYS.

## BELLE VUE SCHOOL.

**Headmaster, JAMES CHARTER, B.A.**

Situated in one of the healthiest suburbs of Norwich.

Curriculum includes all branches of thorough English Education. Pupils prepared, if desired, for Public Schools and Preliminary Professional Examinations. Moral training carefully attended to by Principal, who has had long experience in educational work.

PLAYING FIELDS OF ABOUT 6 ACRES FOR SCHOOL SPORTS OF ALL KINDS.

Domestic arrangements personally supervised. Number of boarders limited.

GIRLS. [*Established* 1871.]

## WAKEFIELD HOUSE SCHOOL.

**THORPE HAMLET, NORWICH.**

*Recognised by Board of Education.*

**Principals - - The MISSES LUCAS**

(Successors to Misses LADBROOKE).

Assisted by efficient Staff.

Premises well adapted for School, commodious, airy, well ventilated; in high, extensive grounds. Tennis. Croquet Lawns. Curriculum embraces usual subjects for a sound Education, and *Classes* are arranged for Dancing, Gymnastics, Wood Carving, Fancy Needlework, Shorthand, &c., and the usual *Exams.* prepared for. Games and outdoor recreations are a special feature.

School Examinations twice a year.

# NOTTINGHAM.

**The Medical Officer of Health writes:**—"Subsoil chiefly 'Bunter' Sand Rock. Altitude above mean sea level, 80 to 425 feet. Average rainfall, 25 inches. Average temperature, 48·4 degrees. 328¼ acres of public parks, atmosphere singularly free from smoke, and no large town within 16 miles."

GIRLS.

## BROADGATE SCHOOL FOR GIRLS.

**Principal - Miss CHURLEY, B.A. (Lond.),**

Assisted by large Staff of qualified Teachers.

Special attention is given to History and Literature. Aim of Language teaching is to give practical knowledge of subject. Methods are chiefly oral. French is spoken throughout the School.

ABLETT'S DRAWING A SPECIALITY.

Swedish Drill by trained mistress. Hockey and Cricket. Every lesson is followed by short recreation, thus preventing weariness and inattention. Pupils prepared for Examinations. Kindergarten Branch under trained Froebel Mistress.

# OXFORD.

On the banks of the Thames, 63¾ miles from London, G. W. Rly. The most ancient and famous seat of learning in the United Kingdom. Occupying a fine site, encircled by rich and wooded meadows. Elevation 220 feet; very bracing and healthy.

GIRLS.

## CHURCHILL VILLA SCHOOL

FOR GIRLS.

**296, BANBURY ROAD, OXFORD.**

**Principal - - Mrs. EDWARDS.**

The School Course includes the usual English subjects: French, Arithmetic, Freehand Drawing, Drill, and Class Singing.

Extra subjects—Latin, German, Piano, and Painting.

Boys under 8 are received, and there is a KINDERGARTEN CLASS for children under 7.

*References and full particulars on application.*

# READING.

**The Medical Officer of Health writes:**—"Reading has a healthy, equable climate with a moderate rainfall, the annual average during the past 26 years having been 23·7 inches. The beneficial effect of this is seen in the low death-rate, which averaged only 14 per 1,000 of the population during the past 10 years."

BOYS.

## READING SCHOOL.

Present School built in 1870–71, consisting of Main Block, Big School Room, two Masters' Houses, Headmaster's House, Chapel, Laboratories, Carpenters' Shop, Gymnasium, Swimming Bath, Sanatorium, &c.

The School Course includes every important subject of modern education, with numerous valuable Scholarships attached. Equipped in the most up-to-date manner with every convenience for thorough supervision of scholars both in their work and recreation. PLAYING FIELDS ABOUT 8 ACRES.

**Headmaster: Rev. W. CHAS. EPPSTEIN, M.A.,**

Assisted by large and highly qualified staff.

FOUNDED OVER 400 YEARS.

GIRLS.

## "DUNEDIN,"

**BATH ROAD.**

HOME SCHOOL FOR GIRLS.

**Principal - - - - Miss ESSER.**

Assisted by certificated English and French Governesses and Visiting Masters.

"Dunedin" is beautifully situated on high ground and gravel soil.

OBJECTS.—To combine School Discipline with comforts and training of a bright Christian Home.

COURSE OF INSTRUCTION includes all usual subjects and Preparation for Local Examinations.

*Delicate Children and Pupils from abroad or the Colonies have the Principal's personal and individual care.*

## RAMSGATE.

The climate of Ramsgate is equable, invigorating and bracing—unmarred by sudden change. In the summer the sun's rays are deliciously tempered by cool sea breezes. Fogs are practically unknown. The last report of the Medical Officer of Health contains the following statement:—"The year (1905) was characterized in the district by a rainfall somewhat below the average, only 21·37 inches, and by an amount of bright sunshine above the average, viz. 1,745 hours. These climatic features were also favourably distributed so that the three winter months were dry and unusually sunny, whilst the summer months were cooler than usual." The zymotic death-rate in Ramsgate was only 1·0 per 1,000 of the population.

Sunshine, 1,764·5 hrs., 1905. London, 1,314·5 hrs.

BOYS.

### CHATHAM HOUSE COLLEGE, RAMSGATE.

Founded 1797. Rebuilt 1882.

JUNIOR SCHOOL - 50 Boys - £25 a Term.
SENIOR ,, - 70 ,, - £30 ,,

These fees are inclusive.

Grounds, 15 acres. Private Chapel. Cadet Corps; two Rifle Ranges; large Drill Hall; Workshops.

**Principal - Miss DUTTON.**

Assisted by Miss M. E. DUTTON and competent Teachers.

School provides thoroughly sound education on modern lines. Kindergarten Class.

Pupils prepared for Local Exams. Great attention to Physical Culture and Outdoor Games.

Miss Dutton (experienced in the care of delicate children) personally supervises domestic arrangements.

*Indian References supplied.*

GIRLS. *Established* 1866.

### CLAREMONT.

LADIES' COLLEGE.

*Recognised by Board of Education.*

LOCATION.—Victoria Parade, East Cliff. Fine Sea View; overlooking Ornamental Grounds.

**Principal - - Mrs. SHAW.**

Under the direction of present Principal for last 12 years, a sound and modern education has been aimed at with successful results, testified to by successes at Public Exams.

Modified School Course for delicate pupils.

Special provision for COLONIAL AND FOREIGN PUPILS. References supplied to existing connections

Drill. Physical Culture Classes. Outdoor Games.

## SCARBOROUGH.

**The Medical Officer of Health writes:**—"Owing to its situation on the coast, Scarborough enjoys a climate which is mild and equable. The force of the prevailing Westerly winds is greatly mitigated by the hills which surround the town on the inland sides. Only for a short time in the spring are the winds Easterly, and this is the one period of the year in which Scarborough is unsuited for the delicate. The amount of sunshine is considerable. The rainfall for the last two years has been under 20 inches. The mild, bracing climate and pure air make Scarborough eminently adapted to the favourable development of youths of both sexes."

Sunshine, 1,473 hrs., 1905. London, 1,314·5 hrs.

BOYS.

### THE MOUNT SCHOOL.

PREPARATORY FOR PUBLIC SCHOOLS.

**Principal: HERBERT WALTON, B.A. Lond.**

Thorough grounding in usual subjects, Latin, Greek, German (if desired), French, English, Essay Writing, Arithmetic, Geometry, &c.

BOYS.

### MADELEY HOUSE SCHOOL,

RICHMOND HILL.

**Miss SPEARE.**

*Assisted by English and French Masters,*

Receives boys from the age of 6 to 14½, to be prepared for Scholarships and Entrance at the Public Schools, and for the Royal Naval College, Osborne.

Prospectus, list of Honours, &c., on application.

## REIGATE.

Reigate and Redhill lie at the foot of the North Downs. The elevation varies from 200 to 700 ft., the soil largely consisting of chalk and sand (the Upper Greensand, Folkestone, and Hythe Beds). The water is soft and of great purity. The death rate is about 11·0 per 1,000.

BOYS.

### HILLSIDE.

*Boys prepared for Public Schools and Royal Navy, or any Preparatory School.*

School premises stand on high ground, close to Reigate Station, and about 2 miles from Redhill.

Special care is taken in coaching boys in outdoor games; GOOD CRICKET GROUND AND PLAYGROUND OF ABOUT 2 ACRES.

Half term's notice desired before removal of any pupil.

**Principal: Mr. T. H. G. WELCH, M.A.**

*(For many years Head Assistant-Master at St. David's, Reigate).*

## RUGBY.

Centre of a fine tract of country on the south bank of the Avon, 400 feet above sea level. Its educational facilities have a world-wide reputation. The modern drainage and supply of pure water make it one of the healthiest places in England.

BOYS.

### OAKFIELD.

PREPARATORY SCHOOL FOR BOYS.

**Principal - T. ARNOLD WISE, M.A., J.P.**

Situated on brow of Bilton Hill.

Playing Fields (11 acres) attached to house. Covered Swimming Bath.

Curriculum includes usual Preparatory School Subjects, and Carpentering, German, Music, Drawing and Riding if desired.

ARRANGEMENTS CAN BE MADE TO TAKE ENTIRE CHARGE OF BOYS WHOSE PARENTS RESIDE ABROAD.

Boys received between the ages of 8 and 15.

Large Staff of University Graduates and other Resident Masters.

## ST. ALBANS.

Population, 16,019. Means of access, Midland Rly., G.N. Rly., L. & N.W. Rly. 20 miles from London. An ancient and historic city. Its healthiness is ensured by its altitude and the existence of a bracing climate, constant supply of pure water, and modern drainage. The situation enables residents to enjoy many forms of healthy sport which the countryside affords. The fine Abbey is one of the most remarkable in England regarding its size and variety of architecture.

BOYS.

### OXFORD HOUSE SCHOOLS.

**Principals: Mr. and Mrs. THORNHILL.**

Twenty miles from London, situated on an eminence 300 feet above sea level. Pure and bracing air.

Course includes thorough English education arranged to meet requirements of higher Examinations.

GREAT AIM IS TO PREPARE YOUTHS FOR BUSINESS AND COMMERCIAL PURSUITS.

# THE ABERDEEN LINE of Direct Steamers.

## LONDON TO PORT NATAL AND EAST AFRICA.

### FLEET.

| | | |
|---|---|---|
| "INANDA." | "INSIZWA." | "INYONI." |
| "INKOSI." | "INGELI." | "ILLOVO." |
| "INKONKA." | "INYATI." | "IFAFA." |
| | "INCHANGA." | |

S.S. "INKOSI."

The Steamers of this Line sail every ten days from the West India Import Dock, calling alternately at LAS PALMAS and TENERIFFE and taking cargo and passengers for NATAL, DELAGOA BAY, INHAMBANE, BEIRA, CHINDE and QUILIMANE. They form the quickest and most direct route for THE TRANSVAAL, RHODESIA, MASHONALAND, BRITISH CENTRAL AFRICA and THE AFRICAN LAKE DISTRICT. They have very fine accommodation for FIRST and SECOND CLASS PASSENGERS at very moderate fares, are fitted with the latest appliances, Refrigerators, Electric Light and Fans, and carry Surgeons and Stewardesses. The "Inanda" and "Inkosi" are fitted with Marconi's Wireless Telegraphy. For Freight or Passage apply to the Owners:

**JOHN T. RENNIE, SON & CO., 4, East India Avenue, London, E.C.**

**JOHN T. RENNIE & SON, Aberdeen. JOHN T. RENNIE & SONS, Durban, Natal.**

# ATLANTIC TRANSPORT LINE.

## LONDON to NEW YORK every Week.

*The only Passenger Line from London to New York direct.*

FLEET.—S.S. MINNEAPOLIS, 13,401 tons; S.S. MINNEHAHA, 13,403 tons; S.S. MINNETONKA, 13,400 tons; S.S. MESABA, 6,833 tons. These new steamers are completely up-to-date, and have luxurious accommodation, large State Rooms, Music Room, Smoking Room, Electric Light, and Refrigerator. Cuisine and Service excellent. All the State Rooms and Saloons are amidships, so that there will be very little motion felt in steamers of this great size. The majority of the State Rooms are on the Bridge Deck, a position for which very high fares are usually charged. FIRST-CLASS PASSENGERS ONLY. Table and attendance First Class.

SCHEDULE OF FARES.—November 1 to March 31, from £11, £13, and upwards; April 1 to October 31, from £14, £16, and upwards. Return Tickets are issued at a reduction of 10 per cent. off the homeward fare. Children under 10 years half-price. Infants under 12 months free.—For particulars of passage apply to

**ATLANTIC TRANSPORT COMPANY, LIMITED, 1, Cockspur St., London, S.W., and 38, Leadenhall Street, London, E.C.** [27

**SECRETARY.**—A. E. MANN.

**SUPERINTENDENT OF BRANCHES.**—H. R. S. MASSEY.

The present Subscribed Capital of the Bank is £14,000,000, in 140,000 Shares of £100 each, held by upwards of 10,100 Shareholders. The sum of £20 has been paid on each Share, thus making the paid-up Capital £2,800,000. The Rest or Surplus Fund is £1,400,000.

Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced.

The Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England or the Colonies. Attends to the purchase and sale of British and Foreign Stocks. Collects Dividends on Government Funds, Railway Stock, Foreign and other Securities, payable in England or abroad. Acts as agents for the receipt of Military and other Pay and Allowances, and generally transacts every description of Banking business.

Sums of £10 and upwards may be deposited, subject to seven days' notice of withdrawal or repayable at call. Interest is allowed thereon, according to the class of Deposit, but subject to alteration by public advertisement in the *Times* newspaper. A receipt is given for each deposit, which is not transferable, and must be surrendered on repayment of the amount, according to the conditions printed thereon.

Circular Notes of £10, £25, and £50 are issued for the use of Travellers, payable in the principal towns of Europe, Asia, Africa, America, and Australasia. They are issued free of expense, and are payable by the Agents abroad, at the exchange of the day, without any deduction whatever for Commission.

Letters of Credit are also granted on the chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches.

The officers of the Bank are bound not to disclose the transactions of any of its customers.

A. E. MANN, *Secretary*

London, *October*, 1906. [18

The National Provincial Bank of England, Limited, having numerous branches in England and Wales, as well as Agents and Correspondents at home and abroad, affords great facilities to its customers, who may have money transmitted to the credit of their accounts through any of the branches free of charge.

Current accounts are conducted at the Head Office and Metropolitan Branches, and deposits are received and interest allowed thereon at the rates advertised by the Bank in the London newspapers from time to time.

The Bank undertakes the Agency of Private and Joint Stock Banks, also the Purchase and Sale of all British and Foreign Stocks and Shares, and the collection of Dividends, Annuities, etc.

Circular Notes and Letters of Credit, payable at the principal towns abroad, are issued for the use of Travellers.

At the Country Branches Current Accounts are opened, Deposits received, and all other Banking business conducted.

The Officers of the Bank are bound to secrecy as regards the transactions of its customers.

Copies of the Annual Report of the Bank, Lists of Branches, Agents and Correspondents may be had on application at the Head Office, and at any of the Bank's branches.

By order of the Directors. { R. T. HAINES, T. ESTALL, D. J. H. CUNNICK. } *Joint General Managers.* [19

CURRENT ACCOUNTS are kept in conformity with the usual practice in London and the country respectively. Customers keeping Current Accounts have the facility of discounting approved Bills, of obtaining loans upon negotiable Securities, of depositing Bills, Coupons, &c., for collection. The Bank will take charge of Foreign and Colonial Bonds, &c., and will detach and collect the Coupons as they become due, passing the interest to the credit of Customers as received. Sums of money may be paid into any Office for transmission to any other Office of the Bank for the credit of customers, free of charge. Every facility afforded for the transmission of money between London, Liverpool, Manchester, Scotland and Ireland, and for the receipt and delivery of Stocks, Shares, &c.

LETTERS OF CREDIT AND CIRCULAR NOTES, payable at any of the Chief Commercial Towns and Cities of the World, are issued. [127

WILLIAM ARTHUR PHILPOTT.

***Bankers.***

LLOYDS BANK, LIMITED, 72, LOMBARD STREET, E.C.

***Offices.***

**1, FREDERICK'S PLACE, OLD JEWRY, E.C.**

This Trust was established in the year 1893 for the purpose of acquiring Freehold and Long Leasehold Shop Properties, primarily in the London District, solely for **investment** purposes.

The Capital of the Company is divided into "A" and "B" Shares.

The "A" Shares have been fully subscribed and paid up. Dividends at the rate of 6 per cent. have been regularly paid thereon for the last fourteen years, and they are officially quoted on the London Stock Exchange.

The "B" Shares carry a cumulative dividend of 5 per cent. per annum, and are issued from time to time as required. Applications for them are invited.

The present Rental Income, arising from lettings on full repairing Leases, exceeds £20,000 per annum, nearly half of which is derived from freeholds.

The Directors, Solicitor, and Secretary, as holders of the Founders' (or Management) Shares, do not participate in profits until the dividends are paid on the "A" and "B" Shares, and one-fourth of the remaining profits is carried to a Reserve Fund. This Reserve now amounts to £3,500, and is invested in consols.

The "A" and "B" Shares together rank for priority both as to Capital and Dividends. Only fully-paid £5 Shares are issued, so that they carry no liability. Full particulars of all investments are detailed in the Annual Reports.

**PURCHASES.**—The Trust is open to entertain Shop Property Investments in main thoroughfares and well-established trading positions, either in London or the provinces.

**MORTGAGES.**—Loans on First Mortgages of the Trust's properties are entertained. The rate of interest varies from 3½ to 4 per cent. The loans required never exceed two-thirds value.

A copy of the Fourteenth Annual Report and Balance Sheet, showing the progress of the Trust since its formation, can be obtained on application.

EDWARD WELSH, *Secretary.*

## Stock and Share Brokers,

***Mansion House Buildings,***

## 4, QUEEN VICTORIA STREET, LONDON, E.C.

ESTABLISHED AT THIS ADDRESS SINCE 1884.

***We invite correspondence with Investors, to whose interests and needs special attention is devoted.***

## GOOD INVESTMENTS.

For permanent Investment the following may be named:—English Government, Corporation, and Colonial Stocks; English Railway Stocks; Mortgage Debenture Bonds in Foreign and American Railways, *which yield Dividends on Ordinary Stock;* Shares in first-class Banks, such as London and Westminster, London and County, Union Bank of London, London Joint Stock, London City and Midland, Parr's, Lloyds, Bank of Egypt, Industrial Bank of Japan, &c.

A careful selection of the foregoing will provide an investment yielding an average return of about 4½ per cent.

Investors desiring a larger percentage may turn their attention to the better class of industrial Companies, such as Harrod's Stores, Slaters, Aërated Bread, Lyons, D. H. Evans, Van den Berghs, Brunner Mond, Weldons, J. & P. Coats, and Bolckow Vaughans, &c. The Preference Shares and Debentures of the above named appear to us well worthy of attention, even on the part of the most careful investor, and the Ordinary Shares yield a good return. We make sound Home Industrial Shares a special feature, and are able to deal at closest quotations. Upon our advice many investors bought Slaters at under par (now £2½); Harrods at £1 (now £4¼); Aerated Breads at £2 (now £7); D. H. Evans at £1 (now £3½); English Sewing Cottons at 12*s.* (now £1⅛); J. & P. Coats at £4¾ (now £6).

## MINES.

Mining Shares are, of course, speculative. Our Notes, carefully prepared each month, and based on most recent information, should be seen by those interested in Indian, Australian, and African (Gold or Diamond) and Broken Hill Mines.

Dealing at close prices. Prompt delivery.
Cover business not entertained.
Stocks delivered to any London Banker against cash.
Foreign Correspondents will receive every attention.

***Monthly Investment List free on application.***

***References can be given in every large town in England.***

## TERMS OF BUSINESS.

WE are often asked for our "SYSTEM"—oftener, and more reasonably, for our Terms of Business. We have no Mechanical System—no Stereotyped Terms. Automatic Monotony, Unbending Uniformity are both alien to our habit of thought. **Principles** fixed as adamant we believe in, but principles capable of adaptation to varying conditions and requirements. In a sentence our business principle is this, that we undertake all classes of Stock Exchange Business, both for **Investment** and **Speculation,** on the terms of expecting to make a reasonable profit for ourselves—to be adequately protected in speculative transactions—guaranteeing to give good value to Clients by close dealing, prompt delivery, and punctual payment. We are always open to consider any reasonable proposition consonant with these principles, and endeavour to meet the individual views of Clients as far as we can.

**OUR GENERAL TERMS SENT POST FREE on application.**

Our Monthly Investment List, giving "PRICES," "Highest and Lowest," "Yields on Investments," "Dividend Announcements," careful analyses of leading "Balance-sheets and Reports," &c., &c., free on application.

***Advances made on Marketable Stocks and Shares.***

ALDRED WILLIAM ROWDEN, Esq., K.C.
C. R. R. WEST, Esq., Cheam.

*Solicitors*—Messrs. CAPRON & Co., Savile Place, Conduit Street, W.

**PURCHASES.**—The Society purchases Reversions and Remainders, whether absolute or contingent; Life Interests, whether in possession or deferred, and generally all Interests (in approved property) that depend upon the duration of human life.

**LOANS.**—The Society also grants Loans on the security of such Interests, either on Ordinary Mortgage or by way of Reversionary Charge. The latter mode meets the convenience of borrowers who do not wish to make any payment for either principal or interest until their Reversionary Property falls into possession. The amount to which the Society will then be entitled is fixed at the outset, and does not depend on the time elapsing between the grant of the Loan and its repayment. The option of redeeming the Charge during the first three or five years can usually be combined with this form of Loan.

*Forms of Proposal and full information can be obtained at the Society's Offices.*

W. OSCAR NASH, F.I.A., *Actuary and Secretary.* [33

MESSRS. H. E.

# FOSTER & CRANFIELD

(Successors to MARSH, MILNER & CO.),

Conduct periodical Property Auctions on the

First and Third Wednesdays,

and Periodical Sales of Reversions and kindred interests on the

First and Third Thursdays,

in each month throughout the year, at

*The Mart, Tokenhouse Yard, E.C.*

Offices: 6, POULTRY, LONDON, E.C. [212

Telephone Nos.: 999 Bank and 8539 Central. Telegrams—"Invariably, London."

DATES OF AUCTIONS FOR 1907.

# MESSRS. EDWIN FOX & BOUSFIELD

Announce for the convenience of their Employers that their

# SALES BY AUCTION

of Landed Estates and House Property, Ground and Improved Rents, Reversions, Policies of Assurance, Shares and other Securities, will take place during the year **1907,** at the Auction Mart, Tokenhouse Yard, Bank of England, on the following

**WEDNESDAYS:—**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| JANUARY | 16th | APRIL | 3rd | JUNE | 12th | OCTOBER | 2nd |
| ,, | 23rd | ,, | 10th | ,, | 19th | ,, | 9th |
| ,, | 30th | ,, | 17th | ,, | 26th | ,, | 16th |
| FEBRUARY | 6th | ,, | 24th | JULY | 3rd | ,, | 23rd |
| ,, | 13th | MAY | 1st | ,, | 10th | ,, | 30th |
| ,, | 20th | ,, | 8th | ,, | 17th | NOVEMBER | 6th |
| ,, | 27th | ,, | 16th | ,, | 24th | ,, | 13th |
| MARCH | 6th | ,, | 22nd | ,, | 31st | ,, | 20th |
| ,, | 13th | ,, | 29th | AUGUST | 14th | ,, | 27th |
| ,, | 20th | JUNE | 5th | SEPTEMBER | 18th | DECEMBER | 4th |
| ,, | 27th | | | | | ,, | 11th |

The prices realised at these Auctions are not included in the official reports, such quotations being often prejudicial—and never beneficial—to the only parties concerned—buyer and seller,

*Favourably reviewed by over 100 Influential Newspapers.*

# "HOW TO SELECT A LIFE OFFICE."

## *By G. M. DENT, F.S.S.*

EXTRACTS FROM A FEW PRESS OPINIONS.

"Those who are seeking an office for the purpose of assurance will do well to peruse this 'dialogue' before deciding upon any particular company."—*Bullionist.*

"The statistics as to Endowment assurance policies as investments are highly interesting and convincing."—*Citizen.*

"To those who contemplate taking out life policies, the expenditure of a shilling on this pamphlet may be recommended as about the wisest step they could take. Everyone should read it."—*Fairplay.*

"There is no doubt Mr. Dent has expended a vast amount of research on his pamphlet, and the elaborate tables which he publishes are distinctly valuable."—*Financial Times.*

"An interesting study of the dialogues and tables given will more than repay the shilling outlay."—*Dundee Advertiser.*

"All who intend to insure their lives will find much useful information in this pamphlet."—*Belfast News-Letter.*

"The publication is of value to the insurance broker and other professional men, but of more value still to the intending insurer."—*Halifax Courier.*

"A cleverly-written dialogue. Both tables are explained with great lucidity."—*Law Journal.*

"All who contemplate insuring their lives should read, mark, learn, and inwardly digest this able and interesting treatise."—*Leeds Times.*

"A well-written pamphlet. Anyone proposing to insure his life will easily find from the author's 'three interviews' how to spend his money to the best advantage."—*Liverpool Mercury.*

"Cannot fail to be instructive."—*Daily Chronicle.*

"A valuable pamphlet on life assurance. . . . There are two carefully prepared tables—No. 1, 'exhibiting in a concentrated form the more essential points to be considered in the selection of a Life Office,' and No. 2, 'showing the different results to policy-holders produced by the payment of the same money to the various offices.'"—*Morning Post.*

"A most valuable and exhaustive pamphlet."—*Nonconformist.*

"One special branch of the question, which is most lucidly treated, is the value of life assurance considered simply as an investment."—*Southport Guardian.*

"An instructive pamphlet. Insurers in search of knowledge might advantageously expend a shilling on this book."—*Statist.*

**Price 1s. By post, 1s. 1d. (under four ounces).** [189

## LIFE DEPARTMENT.

**Premiums.**—The Rates of Premium charged are below the average rates of British Offices.

**Expenses.**—The total annual expenses, including commission charged to the Life Department, are restricted to **10** per cent. of the net premiums.

**Profits.**—Policy-holders assuring with profits receive four-fifths of the **total profits** derivable from the Company's Life Department. These profits are large, and at the last two valuations have permitted reversionary bonuses in the new series to be declared **at the rate of 30s. per cent. per annum on sums assured and on previous bonuses.** The next valuation will be made after December 31st, 1908.

**FIRE, MARINE, AND LEASEHOLD AND CAPITAL REDEMPTION POLICIES**
are granted on favourable terms.

**THE HOME FIRE BUSINESS OF THE ALLIANCE IS IN EXCESS OF THAT OF ANY OTHER COMPANY.**

Proposal Forms, Prospectuses, and Statements of Accounts may be had on application. ROBERT LEWIS, *General Manager.* [133

# THE LONDON LIFE ASSOCIATION LIMITED

(A Mutual Life Assurance Office Established in 1806).

## 81, King William Street, LONDON, E.C.

**Funds in Hand - - - £4,850,000**

## MINIMUM PREMIUMS.

THE London Life Association Limited is not a company trading for profit, but a society of persons mutually assuring each others' lives at the lowest possible cost. It has no shareholders to provide for, no branch offices to keep up, and it never employs travellers or pays commission to agents or solicitors to get new business. The expenses of management are thus reduced to a minimum, being but £4 10*s.* 1*d.* per cent. of the Premiums, or £2 19*s.* 8*d.* per cent. of the Income from premiums and interest—ratios less probably than those of any other office, and in fact less than those of most for commission alone.

The Association's system of charging a full premium for seven years and then allowing large reductions during the rest of life is well known, but there are those to whom the higher early premiums are inconvenient, even when the Office lends one-half of each at 4 per cent. The Directors, therefore, knowing that the Association can rightly be content with smaller payments than are necessary elsewhere, have introduced tables of MINIMUM PREMIUMS which, although they are lower than the non-profit rates of most companies, will yet, after the first seven complete years, participate in reduction by a rate per cent. always less by 50 than the rate per cent. declared for their series, the limit of reduction being one half. If, therefore, as is hoped, the rate declared in seven years' time for the Seventh Series should be 52 per cent., Minimum Premiums will be reduced by 2 per cent., and so on, a *gradual* increase in these rates of reduction being confidently anticipated; but, whatever happens, the sum assured is fixed (without being liable to any diminution or debt), and the renewal premium specified in the policy is the most which the assured can be called upon to pay. These Minimum Premiums are applicable to various forms of assurance, whether on the lives of children or those who are of age; the policies are free for the whole world; a surrender value of at least one-quarter of the ordinary complete premiums paid, even of the first alone, is guaranteed; and all claims are receivable immediately on proof of death (or maturity) and title.

It is impossible to set forth here the details of this scheme, but they are to be found in a prospectus which may be obtained on application by post or otherwise, for there is not the least difficulty in effecting assurances without the intervention of any middleman. [220

## GUARANTEE DEPARTMENT.

The Bonds of the Company are accepted by His Majesty's Government, the High Court of Justice, the Board of Trade, the Local Government Board, the City of London and other Municipal Corporations, and by various Banks and Railways and other large Companies throughout the United Kingdom. Special terms will be quoted for guaranteeing all the members of a staff.

## ACCIDENT DEPARTMENT.

"THE PARAGON POLICY" insures against Accidents of all kinds (compensation being doubled if by Tramcar or Railway Accident), provides against illness from 60 diseases, permanent incapacity by Accident, and paralysis and blindness by disease. The Policy is world-wide, the sums insured at death, or loss of limbs or eyesight by accident, are increased at each renewal by 5 per cent. (limited to 50 per cent. of the sum assured), and there are other special advantages. A prospectus will be forwarded on application.

## EMPLOYERS' LIABILITY DEPARTMENT.

Risks under the Workmen's Compensation Acts, 1897–1900, the Employers' Liability Act, 1880 and under the Common Law, covered at moderate rates.

## BURGLARY AND THEFT INSURANCE.

*Applications for Agencies invited.* [176

*Subscribed Capital, £100,000. Called up and Paid, £60,000. Reserves, £60,000. Invested Funds, £150,000.*

**ESTABLISHED 1865.**

This Association issues GUARANTEE POLICIES for situations of trust. It is specially authorised to guarantee the Employees of the Government. By an arrangement with the PROVIDENT CLERKS' MUTUAL LIFE ASSOCIATION, all persons Assuring their lives with that Association, in connection with a Guarantee, will be enabled to effect the latter at a considerable reduction of Premium. This arrangement has been so framed as to be advantageous to both Institutions.

Prospectuses, Forms of Proposals, &c., may be obtained of the Agents, or at the Chief Office,

# THE PROVIDENT CLERKS' And General Accident Insurance Company, Ltd.

*Subscribed Capital, £50,000. Called up and Paid, £20,000. Invested and Reserved, £100,000.*

**ESTABLISHED 1876.**

The Insurances granted by the Company are chiefly comprised in the following Classes, provision for special cases being made on application at the Chief Office, 61, Coleman Street, E.C.:—

1. Insurance against Accidents of every kind, with or without allowances during entire or partial disablement.
2. The "**PROVIDENT**" Policy, covering Accidents and Disease, and including Cumulative Bonus.
3. Insurance against Railway Accidents only.
4. Insurance against Fatal Accidents during a Voyage.

The liability of Employers under the Workmen's Compensation Acts, 1897 and 1900, and the Employers' Liability Act, 1880, can be covered by special arrangements for Insurance.

To Assurers with the PROVIDENT CLERKS' MUTUAL LIFE ASSOCIATION and the PROVIDENT CLERKS' AND GENERAL GUARANTEE ASSOCIATION, Accident Policies are issued at reduced rates.

# "HOW TO SELECT A LIFE OFFICE."

## By G. M. DENT, F.S.S.

**Extracts from a few Press Opinions.**

*MORNING POST.*—"Mr. G. M. Dent, who is a Fellow of the Royal Statistical Society, has written a valuable pamphlet on Life Assurance, in which all the more important questions connected with the subject are discussed by a firm of merchants and an insurance broker. . . . There are two carefully-prepared tables."

*PALL MALL GAZETTE.*—"Deals very clearly with the main points to be borne in mind in selecting an office, and the tabular matter is very useful. Armed with this pamphlet, and blessed with a little commonsense, the ordinary man cannot go very far wrong."

*DAILY CHRONICLE.*—"Cannot fail to be instructive."

*STATIST.*—"The form of question and answer relieves the work very much from the heavy character of a statistical inquiry." "To those who may contemplate insurance, the expenditure of 1s. on this pamphlet will be a judicious outlay."

*FINANCIAL TIMES.*—"Carefully and skilfully compiled."

*POLICY-HOLDER.*—"Life Assurance as an investment, and Endowment Assurance, are both explained in a very attractive way."

*UNITED SERVICE GAZETTE.*—"The fact that this pamphlet has now reached its third edition amply demonstrates the value of its contents. Illustrations, proving the great value of life assurance as an investment, accompany the pamphlet, which also shows how to determine the relative merit of Offices which are not altogether 'much of a muchness' as is generally believed."

*BRADFORD OBSERVER.*—"The remarks on Life Assurance as a paying investment, apart from its protection against the misfortune of premature death, deserve to be widely read."

*CARDIFF TIMES.*—"In terse and lucid fashion, Mr. Dent not merely emphasises the utility of Life Assurance as an investment, but also explains how the assurer may obtain the maximum of security and the largest return for money."

*GLASGOW HERALD.*—"The pamphlet takes the form of a dialogue, which, together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a company."

*LIVERPOOL COURIER.*—"The dialogue is smartly written, and touches on many of the most important elements that have to be considered before a policy is taken in any office. Appended are illustrative tables showing how widely different offices vary in their mode of doing business."

H.R.H. THE DUCHESS OF ALBANY.
H.R.H. THE PRINCESS FREDERICA OF HANOVER.

President:
The LORD GLENESK.

Treasurer:
HENRY E. WRIGHT, Esq.

Consulting Physician:
WM. DUNCAN, M.D., F.R.C.S.

Physicians:
W. H. FENTON, M.A., M.D.
J. INGLIS PARSONS, M.D., M.R.C.P.
F. WATT EDEN, M.D., M.R.C.P.

Surgeon:
J. BLAND SUTTON, F.R.C.S.
A. E. GILES, F.R.C.S., M.D.

Matron:
Miss E. C. LAURENCE.

The Hospital has 60 Beds, and was founded for the reception and treatment of respectable poor women and gentlewomen in reduced circumstances, suffering from those many distressing diseases to which the female sex is liable. A great proportion of women thus afflicted are those upon whom the numberless misfortunes of ill-health most heavily fall—the poor gentlewoman, the governess, the wife of the ill-paid clerk, the artisan, and the very poor. Their homes are altogether unsuited for the performance of a critical operation, nor can they there have the special nursing and care which their condition demands. It is therefore obvious that the work of this Charity, in restoring Mothers, Wives and Daughters to that health upon which the maintenance of families so frequently depends, is one of real value and importance.

**FREE IN-PATIENTS**
are admitted on recommendation of Subscriber, one Letter being sufficient for each Patient's entire stay.

**CONTRIBUTING IN-PATIENTS**
are received upon payment Weekly of 10s. 6d., 21s., or 42s., according to means.

**OUT-PATIENTS**
attend daily at 2.15 o'clock (except Saturdays), with Subscriber's Letter, or on payment of 1s.

**THE CONVALESCENT HOME**
at St. Leonards-on-Sea contains 22 Beds, and is not reserved for hospital patients.

The Hospital is mainly dependent on voluntary contributions. It has recently suffered severe loss through the death of old friends, and further assistance, especially regular support, is greatly needed.

HERBERT H. JENNINGS, *Sec.*

*Secretary: Rev. E. de M. RUDOLF, Savoy Street, London, W.C.*

# THE GIRLS' FRIENDLY SOCIETY.

Patroness—HER MAJESTY QUEEN ALEXANDRA.
Presidents and Vice-Presidents—THE ARCHBISHOPS AND BISHOPS.

The G.F.S. is a National Society which links together in friendly bonds over 300,000 wome of all ages and of all ranks of society in all parts of the world for mutual help. Its aim is to se before its members a high ideal of purity of thought, word, and deed; to help them to be tru to that ideal: to be a standing witness to the possibility of purity of life and conduct for ever woman and girl in the land; to guard the hundreds of thousands of girls who are growing up t womanhood from acknowledged dangers, and to extend to them the priceless boon of lovin Christian fellowship and of fellowship in Christian work.

The various Departments of G.F.S. work include help for Sick Members, the care of Work house Children, Registry Work, protection in Emigration and in Travelling, the provision o Lodges and Recreation Rooms, Industrial Training, and the encouragement of Temperance an Thrift. That it has a just claim on general sympathy and support can scarcely be doubted by thos who realise the need that exists for such services as the Girls' Friendly Society strives to render.

The Publications of the Society, and all further information, can be obtained from THE SECRETARY, G.F.S. Centra Office, 39, Victoria Street, Westminster, S.W. [24

# THE GORDON BOYS' HOME

**(THE NATIONAL MEMORIAL TO GENERAL GORDON).**

*Patron*—THE KING. *Vice Patron*—H.M. QUEEN ALEXANDRA.
*President*—H.R.H. THE PRINCE OF WALES, K.G.
*Chairman of Committee*—General Sir GEORGE W. A. HIGGINSON, G.C.B.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.
OFFICES—5, YORK STREET, ST. JAMES'S, S.W.

The Home is constructed to accommodate 250 Boys, chosen from the homeless and destitute, between the age of 14 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this countr or its Colonies, and for service in the Army, Navy or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. None are admitted below 13½ years of age or above 15¼. 2. A boy must, in th opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity a would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, whic would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of th Home. A guaranteed payment of £22 annually during his stay at the Home will give a right of nomination for bad fulfilling the conditions of admission. There are now 250 Boys in the Home. Subscriptions and Donations ar urgently needed in order that this number may be maintained.

Subscriptions are received by THE LONDON AND WESTMINSTER BANK, 1, St. James's Square, S.W.; by th Treasurer, General the Right Hon. Sir DIGHTON PROBYN, G.C.B., V.C., Buckingham Palace, S.W.; and by th Secretary, at the Office, 5, York Street, St. James's, S.W., from whom any further information can be obtained.

# HOMES OF HOPE,

## Nos. 4, 5, & 6, Regent Square, Gray's Inn Rd., London, W.C.

*(Established 1860.)*

For the **restoration** of the **First** fallen and the **Protection** of **Friendless** young women.

Young women are admitted on any day, and coming from any quarter whatever, **if there be room** in the Homes, and **funds.**

The special efforts of this Society are made on behalf of the poor **betrayed** and **deceived young women** who have **taken** the **one false step,** who are really the **most hopeful** class **of the fallen,** and generally **to be pitied.**

In **every** case, **if** it be **possible,** the **men** are **compelled** to **pay** the sum allowed by law **for** the **child's support.**

While inmates of the Homes, the young women **are trained** in household and domestic duties, with a view to their **becoming good** and **useful members of society.** The great object, however, kept most anxiously before the Committee is to afford them opportunities of religious instruction.

The applications for admission are **painfully urgent,** and the charity is wholly dependent on voluntary contributions. It is hard to witness **the anguish and sorrow** of those who apply, and **pass them over** for lack of funds.

This best of all Rescue work is **hampered** and **hindered** by **debt,** and the Committee require **more Subscribers,** as the **work** is **limited** for lack of more money. Had they the means, **many more young lives** could be **snatched from sin,** and—**mark this! - nearly every case** that comes into the Homes **is a rescue.**

The Secretary will be happy to forward the last Annual Report.

*Patroness*—HER MOST GRACIOUS MAJESTY QUEEN ALEXANDRA.
*Vice-Patron*—His Grace the Duke of Rutland. *Treasurer*—Robert Barclay, Esq.

Nearly **400,000** Patients have been cured or relieved at this Hospital, which was the *first*, and for many yea the *only* Institution in the Kingdom for the Special Treatment of Cutaneous Diseases.

PATIENTS are admitted on small payment, entitling them to four weeks' treatment, or by Subscriber's lett of recommendation. Indigent persons are admitted entirely free.

OUT-PATIENTS are received daily at 1 p.m., including Saturdays, and on Wednesday evenings at 7 o'clo *Medical Men are admitted free to the practice of this Hospital.*

Light Treatment Lupus Lamps, X Ray, High Frequency, and Radium, daily towards the expense erecting and maintaining which Donations and Subscriptions are earnestly solicited, and will be thankfu received and acknowledged by the Secretary, or the Bankers, Messrs. Barclay, Ltd., 54, Lombard Street, E.C.

FOUR HUNDRED to FIVE HUNDRED OF THE SUFFERING POOR ARE WEEKLY RELIEVED F THIS CHARITY, and every addition to the Fund would extend its advantages to a larger number.

GEO. A. RICHARDSON, *Secretary.*

THE

# LONDON HOSPITAL MEDICAL COLLEGE

*ONE HUNDRED AND TWENTY-SECOND SESSION.*

## The SUMMER SESSION will commence on May 1st, the WINTER SESSION on Oct. 1st.

The largest General Hospital in England; over 929 Beds are in constant use, and no beds a closed. Being the only General Hospital for East London *i.e.*, for a million and a half people the practice is immense. In-patients last year, 13,552; out-patients, 209,272; accidents, 14,15 major operations, 3,353.

APPOINTMENTS.—Owing to the enormous number of patients, more appointments, salaried a resident, are open to students than at any other hospital. Ninety of these qualified appointme are made annually, and more than 150 Dressers, Clinical Clerks, &c., appointed every three month All are free to Students of the College. Holders of resident appointments have free board.

SCHOLARSHIPS AND PRIZES. Thirty-seven Scholarships and Prizes are given annually. SEV ENTRANCE SCHOLARSHIPS will be offered in October.

SPECIAL CLASSES are held for the University of London and other Higher Examinatio Special entries for Medical and Surgical Practice can be made. A reduction of 15 Guineas is ma to the sons of members of the profession entering for the full course.

ENLARGEMENT OF THE HOSPITAL COLLEGE.—The New Pathological Institute and t laboratories and class-rooms for Bacteriology, Public Health, Operative Surgery, Chemistr Biology, are now open.

The Clubs Union Athletic Ground is within easy reach of the Hospital.

Luncheons and Dinners at moderate charges can be obtained in the Students' Club.

The Central Metropolitan and other railways have stations close to the Hospital and College

*For prospectus and information as to residence, &c., apply, personally or by letter.*

MILE END, E. MUNRO SCOTT, *Warden.*

# INFANT ORPHAN ASYLUM,
## WANSTEAD

*Patron*—HIS MAJESTY THE KING. *Bankers* Messrs WILLIAMS, DEACON'S BANK

This Institution maintains and educates the Orphans of persons once in prosperity, from their Earliest Infancy until Fifteen years of age.

It has received 4,697 Fatherless Children already. Forty-one were admitted last year.

Nearly 500 are in the Asylum now.

Elections will be held in May and November this year.

Forms of nomination can be obtained at the Office.

Nearly the whole of the Yearly Income arises from Voluntary Contributions. *Assistance is therefore urgently needed*, and will be thankfully acknowledged.

# LONDON FEVER HOSPITAL

## ISLINGTON, N.

**Patron: HIS MAJESTY THE KING.**
**President: The Rt. Hon. LORD BALFOUR OF BURLEIGH, K.T.**

82,000 persons have been received and treated here since 1802. Th Diseases admitted are Scarle Fever, Diphtheria, Measles, and German Measles; and Typhoid when accommodation can l made available. The general ward fee is three guineas for the whole term of treatment. Privat rooms, three guineas a week. Patients' payments amount to about a fourth of the annual out- the other three-fourths falling upon the funds of the Institution. This system encourages people wh are willing to pay a part at least of the cost of their illness to do so rather than remain for treatm at home or cast themselves upon the rates. No help is received from the rates for this Hospital.

Annual subscribers of a guinea and upwards for more than one year are Governors, and donor of ten guineas and upwards in one sum are Life Governors. Domestic servants of Governors, an certain employés of subscribing business houses, clubs, and hotels, are promptly removed an treated free of charge. Application to the Secretary with a medical certificate will ensure promp admission. The application can be made personally, or by letter, telegram, or telephone; 657 Nort

# LONDON SKIN HOSPITAL,

## 40, Fitzroy Square, W.

**Patron: H.R.H. THE PRINCE OF WALES, K.G.**
**President: HIS GRACE THE DUKE OF LEEDS.**
Treasurer:—W. H. ROTHERY-NUTT, Esq.

This Hospital was established in March, 1887, for the treatment of Skin Affections among the poorer classes. It is entirely free to the necessitous—without distinction—and also affords relief to those above that class who are unable to pay the ordinary medical fees. At present there are no funds available for the admission of free In-Patients, and it is for this especial purpose that the Committee most earnestly appeal to the benevolent.

**Annual Subscribers of £3 3s. have the right to recommend In-patients.**

Out-Patients are seen every afternoon at **1.30**, and every evening at **6.30**.

Röntgen Ray, High Frequency, and other Electrical Methods of Treatment every afternoon at **2**.

Up to the 31st of December last, **34,500** persons had been relieved, and the attendances exceeded **215,000.**

Subscriptions and Donations may be paid to the Bankers, Messrs. DRUMMOND, 49, Charing Cross, S.W., or will be gratefully received by the Secretary.

**J. H. TYLER,** *Secretary.* [77

# The Maternity Charity and District Nurses' Home

## HOWARD'S ROAD, PLAISTOW, E.

*Founded in 1889.* **Branches at Victoria Docks, East Ham, and Barking.**

**9,851** Patients were nursed in 1905, including: Maternity cases, **4,941**; Pneumonia and Bronchitis, **412**; Diphtheria, **50**; Typhoid, **55**; Surgical, **714**; Accidents, **110.** **202,343** visits were made.

*President*—THE LORD BISHOP OF LONDON.
*Treasurer*—GENERAL CLIVE. *Secretary*—GRANT MARSTON, ESQ.
OFFICE: 46A, PALL MALL, S.W.

1. The aim of the Association is to Distribute such Funds as may be committed to it, in grants to the Local Committees of poor parishes, proportionate to the needs of each.
2. The Clergy and District Visitors are the unpaid Agents of Relief, and possess the indispensable qualification of personal knowledge of the poor.
3. The overburdened Clergy are hereby greatly assisted in dealing with the distressing cases constantly before them. The religious persuasion of the poor is no obstacle to their relief.
4. Every penny contributed is devoted to the relief of destitution, all the working expenses being otherwise provided for.

Annual report will be forwarded on application to the Secretary.
Subscriptions to enable the Committee to carry on the work efficiently are greatly needed.
Cheques, payable to GRANT MARSTON, should be sent to the Office 46A, Pall Mall, S.W., or to LLOYDS BANKING Co. Ltd., 16, St. James's Street, S.W. [6

# THE NATIONAL BENEVOLENT INSTITUTION,

**FOUNDED BY THE LATE PETER HERVE.**

ESTABLISHED 1812. INCORPORATED BY ROYAL CHARTER.

Under the immediate Protection and Patronage of **His Most Excellent Majesty the King.**

*Treasurer*—E. JACKSON BARRON, Esq.

This Institution was founded for the Purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards.

The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and Subscribers.

The sum disbursed in Pensions now amounts to **£14,350** per Annum.

The total number of aged Persons who have been supported by the Institution is **Three Thousand and Twenty-Six**, the gross sum distributed to them up to the present exceeding **£619,900.**

Subscriptions, from 5*s.* and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily.

*Office*—65, SOUTHAMPTON ROW, BLOOMSBURY, W.C. HENRY C. LATREILLE, *Secretary.* [68

# NATIONAL HOSPITAL FOR THE PARALYSED & EPILEPTIC

This Undenominational Institution is entirely dependent upon public benevolence, having ***no endowment whatever.***

It was founded for the Maintenance, Clothing and Education of Fatherless Children of both sexes.

Orphans are received from all parts of the Kingdom, at any age between ***three months*** and eleven years, and are retained until they are fifteen.

***2,350*** children have already been admitted to its benefits, ***300*** of whom are still in the Orphanage.

Their requirements entail a yearly expenditure of at least ***£8,000,*** of which less than ***£2,300*** is provided by annual subscriptions.

The large balance is dependent upon donations and legacies. The Board of Management are sorely in need of funds to meet current expenses. Help from the benevolent public is therefore urgently needed and earnestly requested.

The Secretary will be pleased to give any further information.

J. ROWLAND EDWARDS, *Secretary.* [64

H.R.H. THE PRINCE OF WALES, K.G. | H.R.H. THE DUKE OF CONNAUGHT, K.G.

*President*—THE DUKE OF GRAFTON, K.G.

*Honorary Secretaries*—Messrs. GEORGE POCOCK and PERCY R. POCOCK.

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from **10s.** to **25s.** per month.

There are at present **1,191** pensioners, residing in various parts of the Kingdom, among whom upwards of **£8,000** is annually distributed in pensions, paid monthly, through the agency of upwards of **800** Honorary Almoners.

Elections take place in May and November in each year.

In addition to those elected by the votes of Subscribers, not less than two are added at every election by rotation. Others are nominated from time to time to receive the "Queen Victoria," "Thomas Pocock," "James Templeton Wood" and other Memorial Pensions.

To be eligible, applicants must be totally blind, above 21 years of age, of good moral character, and in receipt of an income not exceeding £20, if single, and £30 if married. No distinction is made in regard to sex or creed; nor is the receipt of parish relief a disqualification.

Application must be made on the printed forms provided by the Society.

Subscribers of 10*s.* 6*d.* annually, or Donors of Five Guineas, are entitled to One Vote at every election, and multiples thereof in proportion. They can also assist in the Nomination of a Candidate.

The payment of a Legacy to the Society confers upon each Executor the privilege of One Life Vote for every £25 bequeathed.

The yearly report, containing the rules, accounts and all information, will be forwarded on application.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or Messrs. Barclay and Co.

*Bankers*—COUTTS & Co., London.

Upon this Institution, founded in 1824, rests a heavy responsibility. It is earnestly and respectfully submitted that it has in consequence a strong claim upon the benevolence of the humane and charitable.

The Committee respectfully appeal to the Public to extend a hearty assistance—

I. By supplying early information to the Secretary of all acts of cruelty witnessed.

II. By increasing the revenue of the Society by annual subscriptions, by donations, by testamentary gifts, and particularly by inducing their friends to become members.

Trained Officers are despatched to all parts of the Kingdom. Nearly 8,000 convictions annually.

The increased operations of the Society necessitate a continual drain on the funds of the Society on account of the inadequacy of the yearly Subscription. The Committee need much greater assistance, and unless such additional support be extended to them, this most righteous cause of humanity must suffer from insufficiency of means to carry out those many urgent measures which every well-wisher of this Society has so deeply at heart. Remittances may be forwarded to the Secretary.

***SUPPORTED ONLY BY VOLUNTARY CONTRIBUTIONS.***

Benevolent individuals who may be inclined to become benefactors by Will to this Society are earnestly desired to use the following FORM OF BEQUEST:—

"I give and Bequeath to The Royal Society for the Prevention of Cruelty to Animals, Established 1824, to be paid to the Treasurer and to be at the disposal of the Committee for the time being of the said Society; and I direct that the same be paid free of legacy duty." [142

# ST. GEORGE'S HOSPITAL, S.W.

Urgently appeals for further support, as the ordinary Income is about £12,000 less than the Expenditure.

**£1,000 WILL ENDOW A BED,**

**£500 A COT.**

# SOCIETY FOR RELIEF OF PERSECUTED JEWS

**(SYRIAN COLONIZATION FUND).**

**Office:—41, PARLIAMENT STREET, S.W.**

*President*:—LORD AMHERST OF HACKNEY.
*Hon. Treasurer*:—F. A. BEVAN, Esq., 54, LOMBARD STREET, E.C.
*Bankers*:—MESSRS. DRUMMOND, 49, CHARING CROSS, S.W.

**INHUMAN and FIENDISH TORTURE and MASSACRE of JEWS** in Russia is driving out all who can escape. Under the Alien Act few can be sheltered here. Some reach Palestine, where they can at least die unmolested. The majority are in great destitution, and suffer terribly from want and disease, because they cannot get work.

For many years THIS SOCIETY HAS EMPLOYED MEN AND BOYS on Abraham's Vineyard, Jerusalem, in Stone dressing, Carpentry, Building, constructing Rock-hewn Cisterns for Water, and Olive Oil Soap Making. **1,500** Families of Sick and Feeble are given Food, Clothing, Drinking-water and Fuel, as Funds permit. Numbers live in underground, airless places, or in sheds exposed to summer heat and winter storms, no furniture, scanty bedding of rags, no fuel. Many apply to us daily for work, whom we would employ, but **FUNDS are URGENTLY NEEDED.**

**DONATIONS WILL BE THANKFULLY RECEIVED** by the Treasurer and Bankers, as above, or at the Office, 41, PARLIAMENT STREET, S.W., by E. A. FINN, Secretary, where also the Olive Oil Soap may be had at 4*s.* per dozen Tablets, post free.

This is the **ONLY SOCIETY FOUNDED FOR RELIEF OF PERSECUTED JEWS** in TOKEN OF CHRISTIAN SYMPATHY. [162

For the Relief of Necessitous Clergymen, their Widows, Aged Single Daughters, and Children, of every Diocese of England and Wales.

President—THE ARCHBISHOP OF CANTERBURY.

**BY FAR THE OLDEST, LARGEST AND MOST COMPREHENSIVE OF THE CLERGY CHARITIES.**

Donors of ***30 Guineas*** are elected Governors of the Corporation.

**MORE ANNUAL SUBSCRIPTIONS AND DONATIONS ARE URGENTLY NEEDED.**

***Legacies*** also form a most important feature in the annual receipts of this ancient Society.

SIR PAGET BOWMAN, Bt., *Regr.*, Corporation House, Bloomsbury Place, London, W.C. [187

# ST. PETER'S HOSPITAL

## *For Stone and other Urinary Diseases.*

(ESTABLISHED 1860),

## HENRIETTA STREET, COVENT GARDEN, W.C.

*President*—Right Hon. THE EARL OF DUNRAVEN AND MOUNT EARL, K.P.
*Treasurer*—F. A. BEVAN, Esq.

ST. PETER'S HOSPITAL is intended for Persons of both Sexes suffering from Stone in the Bladder and other diseases of the Genito-Urinary Organs, and contains 2 Public Wards for Men (24 beds), a Ward for Women and Children (2 Beds), and a Private Ward (6 Beds) for Paying Patients.

The number of Patients treated during the year 1905 was **385** In-Patients and **3,921** Out-Patients, the latter being seen Daily, viz., Monday, 2 to 3 and 5 to 7; Tuesday, 2 to 3; Wednesday, 5 to 7; Thursday, 5 to 7; Friday (Women and Children only), 2 to 3; and Saturday, 4 to 7.

A Donation of Ten Guineas constitutes a Life Governor; a Subscription of One Guinea an Annual Governor. Subscriptions and Donations will be thankfully received by Messrs. BARCLAY & Co., 1 Pall Mall East, S.W.; Messrs. HOARE & Co., 37, Fleet Street, E.C.; or by

IRWIN H. BEATTIE, *Secretary.* [178

# St. Thomas's Hospital,

## THAMES EMBANKMENT, S.E.,

*Serves a very large POOR POPULATION on the South of the Thames.*

There are **561** Beds for the **ABSOLUTELY POOR.**

There are **42** Beds in St. Thomas's Home for cases who can pay a moderate amount.

**IN-PATIENTS**—**6,873** cases were treated in **1905.**

" " **566** cases were treated in St. Thomas's Home in **1905.**

**OUT-PATIENTS**—**78,118** were treated in **1905.**

The Hospital Expenditure on Maintenance and Special Repairs amounted in **1905** to .. **£57,269**
The Income from Endowments, Paying Patients, &c., amounted to .. .. .. .. **£50,284**
Capital Expenditure on New Buildings and Structural Improvements .. .. .. **£64,288**

It is thus seen that a considerable amount in **1905** was required from **VOLUNTARY CONTRIBUTIONS** to maintain the Hospital in its efficiency.

**Contributions to be sent to the Treasurer, J G. WAINWRIGHT, Esq., at the Hospital; or to G. Q. ROBERTS, Secretary.**

*Applications for admission to St. Thomas's Home for Paying Patients are to be sent to the Steward.* [240

# THE SURGICAL AID SOCIETY.

*Chief Office*—SALISBURY SQUARE, FLEET STREET, E.C.

*Patron*—HIS MAJESTY THE KING.
*President*—The Right Hon. the EARL OF ABERDEEN, G.C.M.G.

This Society was established in 1862 to supply Spinal Supports, Leg Instruments, Trusses Elastic Stockings, Artificial Limbs, &c., and every other description of mechanical support to the Poor, without limit as to locality or disease.

WATER BEDS and INVALID CHAIRS and CARRIAGES are Lent to the Afflicted.

It provides against imposition by supplying the appliance on the certificate of a Surgeon only. By special grants it ensures that every deserving applicant shall receive prompt assistance.

**Over 30,000 Appliances given in the year ending September 30, 1906.**

Annual Subscription of £0 10 6 } Entitles to two recommendations
Life Subscription of 5 5 0 } per annum.

*Contributions are earnestly Solicited.* *Bankers*—Messrs. BARCLAY & Co., Ltd., Lombard St.
RICHARD C. TRESIDDER, *Secretary*. [231

# The United Kingdom Beneficent Association.

*Secretary*—F. BURTON OSBORN, Esq.

## *Office : 7, Arundel Street, Strand, W.C.*

**Under the Patronage of H.M. THE KING and H.M. THE QUEEN.**
PRESIDENT: His Grace the DUKE OF ABERCORN, K.G., C.B.

The Association grants Annuities to Widows and Daughters of Clergymen, Medical Men, Officers of the Navy and Army, members of the Legal Profession, landed proprietors, and others of the upper and middle classes of gentle birth, above forty years of age, free from any unsoundness of mind, and medically certified to be unable, from age or bodily infirmity, to earn their own livelihood. Persons in possession of more than £50 per annum are not eligible for the benefits of the Association.

Since the foundation of the Association in 1863, annuities have been granted to 2,147 persons, of whom 1,053 are now living. Over 430 Candidates, many of them absolutely without income, are waiting to receive annuities. Waiting Candidates are assisted from time to time from the Temporary Relief Fund, and Candidates and Annuitants share alike in the benefits of the Clothing Department and the Department of Visiting Friends.

Permanent Memorial Annuities can be established. The cost and conditions may be ascertained upon application. [179

# WEST END
# Hospital for Diseases of the Nervous System
## PARALYSIS AND EPILEPSY,
## 73, WELBECK STREET, CAVENDISH SQUARE, W.

*Instituted 1878.*

Patron—HER MAJESTY THE QUEEN.

With Special Wards for Paralysed Children. 77 Beds.

Applicants must be in attendance at the Hospital for Examination by the Physicians at half-past one o'clock upon Mondays, Wednesdays or Thursdays, or half-past five o'clock upon Tuesday and Friday evenings.

Patients contribute according to their means. The indigent are immediately and gratuitously treated upon production of a Certificate signed by a Subscriber to the Hospital, a Minister of Religion or Registered Medical Practitioner, that the applicant is known by the donor to be deserving of free Hospital Relief.

Urgent cases treated in the first instance without letter. H. C. WILLOCK-PULLEN, *Treasurer*.
*N.B.*—Annual Subscriptions are earnestly solicited ALFRED J. WISE, *Secretary*. [177

**The London Finance Committee are responsible for work requiring £8,000 annually.**

**FUNDS THANKFULLY RECEIVED.**

*Secretary*: Mr. H. KIDNER, F.G.S.

**OFFICES: 25 & 26, GEORGE ST., HANOVER SQ., LONDON, W.** [118

# WEST LONDON HOSPITAL, HAMMERSMITH ROAD, W.

(Incorporated by Royal Charter, Nov. 1st, 1894.) Supported by Voluntary Contributions.

*Patron*—HIS MAJESTY THE KING. *President*—His Grace the DUKE OF DEVONSHIRE, K.G.
*Treasurer*—Rt. Hon. LORD ROTHSCHILD. *Chairman*—His Grace the DUKE OF ABERCORN, K.G.

IT needs:—£63,000 to carry out the scheme of extension for which plans have been accepted, and by which provision is made for about 250 beds; £10,000 to pay off debt; and £12,000 annually to maintain the present work of relieving about 2,300 In-Patients and 40,000 Out-Patients. Its endowments yield an annual income of about £350. Wherefore it relies upon voluntary contributions for £11,650 wherewith to meet its annual expenditure of £12,000.

It is the nearest General Hospital for Hammersmith, Fulham, Acton, Chiswick, Brentford, and for large portions of Kensington and Barnes. The population it serves numbers more than 500,000 persons. It is entitled to receive and hold devises of freehold land or any other property.

*Bankers* { LONDON AND COUNTY BANK, Hammersmith, W.
{ LLOYDS BANK, LIMITED, 16, St. James's Street, S.W.

THE

# Association for the General Welfare for the Blind

*258, TOTTENHAM COURT ROAD, W.*

**Patrons—THEIR MAJESTIES THE KING AND QUEEN.**

Established by Miss Gilbert in 1856.

This Institution employs about eighty Blind men and women in the manufacture of Baskets, Brushes, Mattresses, Chair Caning, and Wood Chopping. It also grants small pensions to old workers. Funds are urgently required to maintain the Benevolent Department, which assists the workers, and provides pensions.

Inspection invited and Orders for Work solicited.

SYDNEY SELFE (Lieut.-Col.), *Secretary.*

# The Hospital for Women

*SOHO SQUARE, W.*

FOUNDED 1842. INCORPORATED BY ROYAL CHARTER, 1887.

*Patron*—HER MAJESTY QUEEN ALEXANDRA.

*President*—THE EARL OF SHAFTESBURY. *Treasurer*—F. A. BEVAN, Esq.

**£40,000 WANTED FOR RE-BUILDING THE HOSPITAL.**

The Hospital for Women was the first established in this or any other country exclusively for the treatment of Diseases peculiar to Women. This national institution, containing 60 Beds, is entirely dependent upon VOLUNTARY CONTRIBUTIONS, which are MOST URGENTLY NEEDED. In addition to the Free Wards, the New Wing, open in 1869, is available for those able to contribute a weekly sum towards their maintenance.

*Bankers*—Messrs. BARCLAY & Co., Ltd., 54, Lombard Street, E.C., and 1, Pall Mall East, S.W.

LIKE all other working tools, th
many grades of Fountain Pen
—only fair—bad. It is money throwi
to buy the bad and only fair. The B
only is good enough. To experiment with
or unknown Pens is extravagance. Better
half-a-guinea on a

# "SWAN

and have complete satisfaction,
half-a-crown on you don't know wh

PRICES:

**10/6, 16/(**

**25/-** upwards

***Sold by all Station and Jewelle***

The Size 5
**"SWAN"**
has a very large ink capacity, is supplied in every style of point, and we recommend it as a handy and serviceable pen. The large strong cap covers the screw joint of nib section and renders it little liable to breakage. The thick holder and smooth gold nib neutralize any tendency to writer's cramp. We specially recommend this size, therefore, for clergymen, lawyers, doctors, authors, journalists and others who have much writing always on hand.

Write for Catalogue of "SWANS" as supplied to H.M. Stationery Office, London School Board, Municipal Corporations, Pitman's Metropolitan School, &c.
